

LilyPond

Snippets

The music typesetter

The LilyPond development team

This document shows a selected set of LilyPond snippets from the LilyPond Snippet Repository (<http://lsr.di.unimi.it>) (LSR). It is in the public domain.

We would like to address many thanks to Sebastiano Vigna for maintaining LSR web site and database, and the University of Milano for hosting LSR.

Please note that this document is not an exact subset of LSR: some snippets come from `input/new` LilyPond sources directory, and snippets from LSR are converted through `convert-ly`, as LSR is based on a stable LilyPond version, and this document is for version 2.19.82.

Snippets are grouped by tags; tags listed in the table of contents match a section of LilyPond notation manual. Snippets may have several tags, and not all LSR tags may appear in this document.

In the HTML version of this document, you can click on the file name or figure for each example to see the corresponding input file.

For more information about how this manual fits with the other documentation, or to read this manual in other formats, see Section “Manuals” in *General Information*.

If you are missing any manuals, the complete documentation can be found at <http://lilypond.org/>.

This document has been placed in the public domain.

For LilyPond version 2.19.82

Table of Contents

Pitches	1
Adding ambitus per voice	1
Adding an ottava marking to a single voice	1
Altering the length of beamed stems	2
Ambitus with multiple voices	2
Ambitus	3
Applying note head styles depending on the step of the scale	3
Automatically changing the stem direction of the middle note based on the melody	4
Changing ottava text	5
Changing the ambitus gap	5
Changing the interval of lines on the stave	6
Clefs can be transposed by arbitrary amounts	7
Coloring notes depending on their pitch	7
Creating a sequence of notes on various pitches	8
Creating custom key signatures	9
Customize drumPitchNames drumStyleTable and drumPitchTable in layout and midi	9
Forcing a clef symbol to be displayed	12
Generating random notes	12
Hiding accidentals on tied notes at the start of a new system	13
Keep change clefs full sized	13
Makam example	14
Modifying the Ottava spanner slope	14
Non-traditional key signatures	15
Numbers as easy note heads	15
Orchestra choir and piano template	16
Ottava text	20
Preventing extra naturals from being automatically added	20
Preventing natural signs from being printed when the key signature changes	20
Quoting another voice with transposition	21
Separating key cancellations from key signature changes	21
Transposing pitches with minimum accidentals ("Smart" transpose)	22
Tweaking clef properties	23
Using autochange with more than one voice	25
Rhythms	27
Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms	27
Adding drum parts	27
Adjusting grace note spacing	28
Aligning bar numbers	28
Alternative breve notes	29
Automatic beam subdivisions	29
Automatically change durations	30
Avoiding collisions with chord fingerings	31
Beam endings in Score context	31
Beams across line breaks	32
Changing beam knee gap	33
Changing form of multi-measure rests	33
Changing the number of augmentation dots per note	33

Changing the tempo without a metronome mark	34
Changing the tuplet number	34
Changing time signatures inside a polymetric section using \scaleDurations	34
Chant or psalms notation	35
Compound time signatures	36
Conducting signs measure grouping signs	36
Consistently left aligned bar numbers	37
Controlling tuplet bracket visibility	38
Creating metronome marks in markup mode	39
Engraving ties manually	39
Engraving tremolos with floating beams	39
Entering several tuplets using only one \tuplet command	40
Flat flags and beam nibs	40
Forcing rehearsal marks to start from a given letter or number	42
Generating custom flags	42
Guitar strum rhythms	44
Heavily customized polymetric time signatures	45
Making an object invisible with the 'transparent property	46
Making slurs with complex dash structure	46
Manually controlling beam positions	47
Merging multi-measure rests in a polyphonic part	47
Modifying tuplet bracket length	48
Moving dotted notes in polyphony	48
Multi-measure length control	49
Multi-measure rest markup	49
Non-default tuplet numbers	49
Partcombine and autoBeamOff	50
Permitting line breaks within beamed tuplets	51
Positioning grace note beams at the height of normal note beams	51
Positioning grace notes with floating space	52
Positioning multi-measure rests	52
Preventing final mark from removing final tuplet	53
Printing bar numbers at regular intervals	54
Printing bar numbers inside boxes or circles	55
Printing bar numbers with changing regular intervals	55
Printing metronome and rehearsal marks below the staff	56
Printing music with different time signatures	56
Printing the bar number for the first measure	59
Redefining grace note global defaults	60
Removing bar numbers from a score	61
Removing connecting bar lines on StaffGroup PianoStaff or GrandStaff	61
Rest styles	62
Reverting default beam endings	63
Rhythmic slashes	63
Skips in lyric mode (2)	64
Skips in lyric mode	64
Stemlets	64
Strict beat beaming	65
Subdividing beams	65
Three-sided box	66
Time signature in parentheses - method 3	67
Time signature in parentheses	67
Time signature printing only the numerator as a number (instead of the fraction)	68
Tweaking grace layout within music	68

User defined time signatures	69
Using alternative flag styles	69
Using grace note slashes with normal heads	70
Using ties with arpeggios	70
Expressive marks	71
Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms	71
Adding parentheses around an expressive mark or chordal note	71
Adding timing marks to long glissandi	71
Adjusting the shape of falls and doits	72
Alternative breve notes	72
Asymmetric slurs	73
Breathing signs	73
Broken Crescendo Hairpin	74
Caesura ("railtracks") with fermata	75
Center text below hairpin dynamics	75
Changing \flageolet mark size	77
Changing text and spanner styles for text dynamics	77
Changing the appearance of a slur from solid to dotted or dashed	77
Changing the breath mark symbol	78
Changing the number of augmentation dots per note	78
Combining dynamics with markup texts	79
Contemporary glissando	79
Controlling spanner visibility after a line break	79
Controlling the vertical ordering of scripts	80
Creating a delayed turn	80
Creating arpeggios across notes in different voices	81
Creating cross-staff arpeggios in a piano staff	81
Creating cross-staff arpeggios in other contexts	82
Creating double-digit fingerings	83
Creating "real" parenthesized dynamics	83
Creating simultaneous rehearsal marks	83
Creating slurs across voices	84
Creating text spanners	85
Double glissando	86
Dynamics custom text spanner postfix	86
Dynamics text spanner postfix	87
Glissandi can skip grobs	87
Hairpins with different line styles	88
Hiding the extender line for text dynamics	88
Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")	88
How to print two rehearsal marks above and below the same barline (method 1)	92
How to print two rehearsal marks above and below the same barline (method 2)	93
Inserting a caesura	94
Laissez vibrer ties	94
Line arrows	94
Making slurs with complex dash structure	95
Modifying default values for articulation shorthand notation	95
Moving slur positions vertically	96
Moving the ends of hairpins	97
Positioning arpeggios	97
Positioning text markups inside slurs	97
Printing hairpins in various styles	98
Printing hairpins using al niente notation	98

Printing metronome and rehearsal marks below the staff.....	99
Setting hairpin behavior at bar lines.....	99
Setting the minimum length of hairpins	99
Showing the same articulation above and below a note or chord	100
Snap-pizzicato or Bartok pizzicato	100
Using a tick as the breath mark symbol	101
Using arpeggioBracket to make divisi more visible.....	101
Using double slurs for legato chords	102
Using the whiteout property	102
Vertical line as a baroque articulation mark	103
Vertically aligning dynamics across multiple notes	103
Repeats.....	104
Adding volta brackets to additional staves.....	104
Centered measure numbers.....	104
Changing the default bar lines	105
Cross-staff tremolos.....	106
Engraving tremolos with floating beams	106
Isolated percent repeats.....	107
Measure counter.....	107
Numbering groups of measures.....	108
Percent repeat count visibility.....	109
Percent repeat counter	109
Positioning segno and coda (with line break)	110
Setting the double repeat default for volte.....	112
Shortening volta brackets	112
Volta below chords.....	113
Volta multi staff.....	113
Volta text markup using repeatCommands	114
Simultaneous notes	116
Additional voices to avoid collisions	116
Changing a single note's size in a chord	116
Changing partcombine texts	117
Clusters	117
Combining two parts on the same staff	118
Displaying complex chords	119
Double glissando.....	119
Forcing horizontal shift of notes	120
Making an object invisible with the 'transparent property	120
Moving dotted notes in polyphony	121
Suppressing warnings for clashing note columns	121
Two \partcombine pairs on one staff	122
Staff notation	124
Adding ambitus per voice.....	124
Adding an extra staff at a line break	124
Adding an extra staff	125
Adding indicators to staves which get split after a break	126
Adding orchestral cues to a vocal score.....	130
Adding timing marks to long glissandi	132
Alternative bar numbering	132
Centered measure numbers.....	133

Changing the default bar lines	134
Changing the number of lines in a staff.....	135
Changing the staff size.....	136
Creating blank staves.....	136
Creating custom key signatures	138
Creating double-digit fingerings	138
Cross staff stems.....	139
Display bracket with only one staff in a system.....	139
Extending a TrillSpanner	140
Extending glissandi across repeats.....	141
Flat Ties	142
Forcing measure width to adapt to MetronomeMark's width.....	144
Glissandi can skip grobs	145
How to print two rehearsal marks above and below the same barline (method 1)	145
How to print two rehearsal marks above and below the same barline (method 2)	146
Incipit	147
Inserting score fragments above a staff as markups	151
Let TabStaff print the topmost string at bottom.....	152
Letter tablature formatting	153
Making glissandi breakable.....	153
Making some staff lines thicker than the others.....	154
Measure counter	154
Mensurstriche layout (bar lines between the staves).....	155
Modifying the Ottava spanner slope.....	155
Nesting staves	156
Non-traditional key signatures	157
Numbering groups of measures.....	157
Orchestra choir and piano template	158
Putting lyrics inside the staff.....	162
Quoting another voice with transposition	163
Quoting another voice	163
Removing brace on first line of piano score.....	164
Removing the first empty line	165
Setting system separators	166
Tick bar lines.....	169
Time signature in parentheses - method 3	169
Time signature in parentheses.....	169
Tweaking clef properties	169
Two \partcombine pairs on one staff	171
Use square bracket at the start of a staff group.....	173
Using autochange with more than one voice	173
Using marklines in a Frenched score.....	174
Vertical aligned StaffGroups without connecting SystemStartBar	177
Volta below chords.....	185
Volta multi staff	186
Editorial annotations	187
Adding fingerings to a score.....	187
Adding links to objects	187
Adding markups in a tablature.....	188
Allowing fingerings to be printed inside the staff.....	189
Alternative bar numbering	189
Analysis brackets above the staff.....	190
Analysis brackets with labels.....	191

Applying note head styles depending on the step of the scale	192
Avoiding collisions with chord fingerings	192
Blanking staff lines using the \whiteout command	193
Changing a single note's size in a chord	193
Changing the appearance of a slur from solid to dotted or dashed	194
Coloring notes depending on their pitch	194
Controlling the placement of chord fingerings	195
Creating a delayed turn	196
Creating blank staves	196
Creating double-digit fingerings	198
Default direction of stems on the center line of the staff	198
Drawing boxes around grobs	199
Drawing circles around note heads	199
Drawing circles around various objects	199
Embedding native PostScript in a \markup block	200
Grid lines: changing their appearance	200
Grid lines: emphasizing rhythms and notes synchronization	201
Hammer on and pull off using chords	203
Hammer on and pull off using voices	203
Hammer on and pull off	203
How to print two rehearsal marks above and below the same barline (method 1)	204
How to print two rehearsal marks above and below the same barline (method 2)	204
Making some staff lines thicker than the others	205
Marking notes of spoken parts with a cross on the stem	206
Measure counter	206
Numbering groups of measures	207
Positioning fingering indications precisely	208
Positioning text markups inside slurs	209
Printing text from right to left	209
String number extender lines	209
Using PostScript to generate special note head shapes	210
Using the whiteout property	210
Text	212
Adding markups in a tablature	212
Adding the current date to a score	212
Adjusting lyrics vertical spacing	213
Aligning and centering instrument names	214
Aligning objects created with the \mark command	215
Aligning syllables with melisma	215
Blanking staff lines using the \whiteout command	216
Center text below hairpin dynamics	216
Changing ottava text	218
Changing the default text font family	218
Combining dynamics with markup texts	219
Combining two parts on the same staff	220
Creating "real" parenthesized dynamics	221
Creating simultaneous rehearsal marks	221
Creating text spanners	222
Demonstrating all headers	223
Embedding native PostScript in a \markup block	224
Formatting lyrics syllables	225
How to put ties between syllables in lyrics	225
Lyrics alignment	225

Markup lines	226
Multi-measure rest markup	228
Ottava text	228
Outputting the version number	228
Piano template with centered lyrics	229
Printing bar numbers with changing regular intervals	230
Printing marks at the end of a line	230
Printing marks on every staff	230
Printing text from right to left	231
Putting lyrics inside the staff	231
Stand-alone two-column markup	232
String number extender lines	232
Three-sided box	233
UTF-8	234
Vocal ensemble template with lyrics aligned below and above the staves	235
Volta text markup using repeatCommands	237
Vocal music	238
Adding ambitus per voice	238
Adding indicators to staves which get split after a break	238
Adding orchestral cues to a vocal score	242
Adjusting lyrics vertical spacing	244
Aligning syllables with melisma	244
Ambitus with multiple voices	245
Ambitus	245
Ancient notation template – modern transcription of gregorian music	246
Anglican psalm template	247
Arranging separate lyrics on a single line	250
Changing stanza fonts	251
Chant or psalms notation	252
Forcing hyphens to be shown	252

Pitches

Section “Pitches” in *Notation Reference*

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

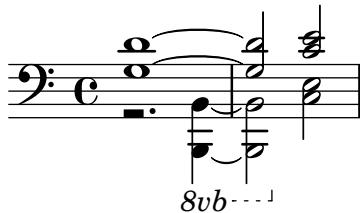

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice will transpose the position of notes in all voices for the duration of the ottava bracket. If the ottavation is only intended to apply to one voice, the middleCPosition and ottava bracket may be set explicitly. In this snippet, the bass clef usually has middleCPosition set to 6, six positions above the center line, so in the 8va portion middleCPosition is 7 positions (one octave) higher still.

```
{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \set Staff.ottavation = #"8vb"
    \once \override Staff.OttavaBracket.direction = #DOWN
    \set Voice.middleCPosition = #(+ 6 7)
    <b,,, b,,,>4 ~ |
    q2
    \unset Staff.ottavation
    \unset Voice.middleCPosition
    <c e>2
```

```

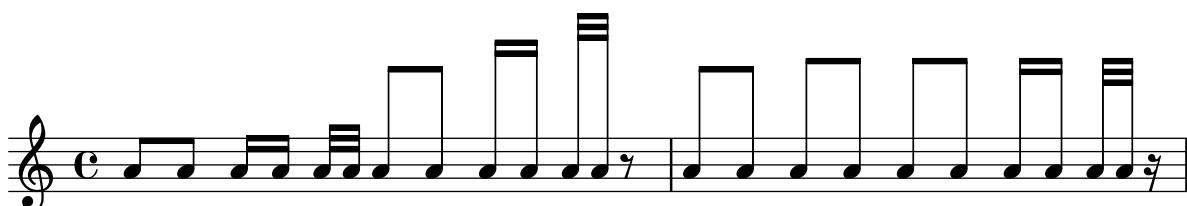

}
>>
}
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```
\relative c' {
  \override Stem.details.beamed-lengths = #'(2)
  a8[ a] a16[ a] a32[ a]
  \override Stem.details.beamed-lengths = #'(8 10 12)
  a8[ a] a16[ a] a32[ a] r8
  \override Stem.details.beamed-lengths = #'(8)
  a8[ a]
  \override Stem.details.beamed-lengths = #'(8.5)
  a8[ a]
  \revert Stem.details
  a8[ a] a16[ a] a32[ a] r16
}
```

Ambitus with multiple voices

Adding the `Ambitus_engraver` to the `Staff` context creates a single ambitus per staff, even in the case of staves with multiple voices.

```
\new Staff \with {
  \consists "Ambitus_engraver"
}
<<
\new Voice \relative c' {
  \voiceOne
  c4 a d e
  f1
}
\new Voice \relative c' {
```

```
\voiceTwo
es4 f g as
b1
}
>>
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
      \consists "Ambitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>
```

Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the `tonic` property). This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and

`xcircle` are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as `\aikenHeads` or `\sacredHarpHeads`.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```
fragment = {
    \key c \major
    c2 d
    e2 f
    g2 a
    b2 c
}

\new Staff {
    \transpose c d
    \relative c' {
        \set shapeNoteStyles = ##(do re mi fa
                                #f la ti)
        \fragment
    }
}

\break

\relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                                mensural xcircle diamond)
    \fragment
}
}
```

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the `Melody_engraver` to the Voice context and overriding the `neutral-direction` of Stem.

```
\relative c'' {
    \time 3/4
    a8 b g f b g |
    c b d c b c |
}
```

```
\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
    \override Stem.neutral-direction = #'()
  }
}
```

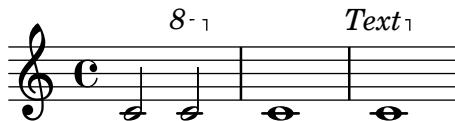

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```
{
  c'2
  \ottava #1
  \set Staff.ottavation = #"8"
  c''2
  \ottava #0
  c'1
  \ottava #1
  \set Staff.ottavation = #"Text"
  c''1
}
```

Changing the ambitus gap

It is possible to change the default gap between the ambitus noteheads and the line joining them.

```
\layout {
  \context {
    \Voice
    \consists "Ambitus_engraver"
  }
}

\new Staff {
  \time 2/4
  % Default setting
  c'4 g''
}
```

```
\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #0
    c'4 g''
}

\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #1
    c'4 g''
}

\new Staff {
    \time 2/4
    \override AmbitusLine.gap = #1.5
    c'4 g''
}
```

Changing the interval of lines on the stave

`staffLineLayoutFunction` is used to change the position of notes. This snippet shows setting its value to `ly:pitch-semitones` in order to produce a chromatic scale with the distance between each space and line of the stave equal to one semitone.

```
scale = \relative c' {
    a4 ais b c
    cis4 d dis e
    f4 fis g gis
    a1
}

\new Staff \with {
    \remove "Accidental_engraver"
    staffLineLayoutFunction = #ly:pitch-semitones
}
```

```
{
  <<
    \scale
    \context NoteNames {
      \set printOctaveNames = ##f
      \scale
    }
  >>
}
```

Clefs can be transposed by arbitrary amounts

Clefs can be transposed by arbitrary amounts, not just by octaves.

```
\relative c' {
  \clef treble
  c4 c c c
  \clef "treble_8"
  c4 c c c
  \clef "treble_5"
  c4 c c c
  \clef "treble^3"
  c4 c c c
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
%Association list of pitches to colors.
#define color-mapping
(list
  (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
  (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
  (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
```

```

  (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
  (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
  (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue)))))

%Compare pitch and alteration (not octave).
#(define (pitch>equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2)))))

#(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch>equals?)))
    (if color
        (cdr color)))))

#(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}

```

Creating a sequence of notes on various pitches

In music that contains many occurrences of the same sequence of notes at different pitches, the following music function may prove useful. It takes a note, of which only the pitch is used. This example creates the rhythm used throughout Mars, from Gustav Holst's The Planets.

```

rhythm =
#(define-music-function (p) (ly:pitch?)
  "Make the rhythm in Mars (the Planets) at the given pitch"
  #{ \tuplet 3/2 { $p 8 8 8 } 4 4 8 8 4 #})

\new Staff {
  \time 5/4
  \rhythm c'
  \rhythm c''
  \rhythm g
}

```

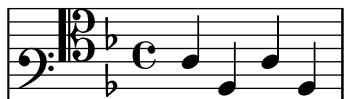

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{
    \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
  #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Customize drumPitchNames drumStyleTable and drumPitchTable in layout and midi

If you want to use customized drum-pitch-names for an own drum-style with proper output for layout and midi, follow the steps as demonstrated in the code below. In short:

* define the names * define the appearance * tell LilyPond to use it for layout * assign pitches to the names * tell LilyPond to use them for midi

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#cust
%%%%%
%%%%%
%%%%% To use custom drum-pitch-names for your score and midi you need to follow
%%%%% this route:
%%%%%
%%%%% LAYOUT:
%%%%%
```

```
%%
%% (1) Define a name and put it in `drumPitchNames'
%% This can be done at toplevel with
%%   drumPitchNames #'my-name = #'my-name
%% or shorter:
%%   drumPitchNames.my-name = #'my-name
%% It's possible to add an alias as well.
%% (2) Define how it should be printed
%% Therefore put them into a toplevel-list, where each entry should look:
%%   (my-name
%%     note-head-style-or-default
%%     articulation-string-or-#f
%%     staff-position)
%% Example:
%%   #(define my-style
%%     '(
%%       (my-name default "tenuto" -1)
%%       ; ...
%%     ))
%% (3) Tell LilyPond to use this custom-definitions, with
%%   drumStyleTable = #(alist->hash-table my-style)
%% in a \layout or \with
%%
%% Now we're done for layout, here a short, but complete example:
%%   \new DrumStaff
%%     \with { drumStyleTable = #(alist->hash-table my-style) }
%%     \drummode { my-name }
%%
%%%%%
%% MIDI:
%%%%%
%%
%% (1) Again at toplvel, assign a pitch to your custom-note-name
%%   midiDrumPitches #'my-name = #(ly:make-pitch -1 4 FLAT)
%% or shorter:
%%   midiDrumPitches.my-name = ges
%% Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%   drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%% Example:
%%   \score {
%%     \new DrumStaff
%%     \with {
%%       drumStyleTable = #(alist->hash-table my-style)
%%       drumPitchTable = #(alist->hash-table midiDrumPitches)
%%     }
%%     \drummode { my-name4 }
%%     \layout {}
%%     \midi {}
%%   }
```

```
%%%%%
%% TESTING
%%%%%
%%
%% To test whether all is fine, run the following sequence in terminal:
%%     lilypond my-file.ly
%%     midi2ly my-file.midi
%%     gedit my-file-midi.ly
%%
%% Which will do:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%     (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%
%%%%%
%%%%%
%% FULL EXAMPLE
%%%%%

drumPitchNames.dbass      = #'dbass
drumPitchNames.dba        = #'dbass  % 'db is in use already
drumPitchNames.dbassmute  = #'dbassmute
drumPitchNames.dbm        = #'dbassmute
drumPitchNames.do          = #'dopen
drumPitchNames.dopenmute  = #'dopenmute
drumPitchNames.dom         = #'dopenmute
drumPitchNames.dslap       = #'dslap
drumPitchNames.ds          = #'dslap
drumPitchNames.dslapmute  = #'dslapmute
drumPitchNames.dsm         = #'dslapmute

#(define djembe
  '((dbass      default  #f          -2)
    (dbassmute  default  "stopped"  -2)
    (dopen      default  #f          0)
    (dopenmute  default  "stopped"  0)
    (dslap      default  #f          2)
    (dslapmute  default  "stopped"  2)))

midiDrumPitches.dbass = g
midiDrumPitches.dbassmute = fis
midiDrumPitches.dopen = a
midiDrumPitches.dopenmute = gis
midiDrumPitches.dslap = b
midiDrumPitches.dslapmute = ais

one = \drummode { r4 dba4 do ds r dbm dom dsm }

\score {
```

```
\new DrumStaff
  \with {
    \override StaffSymbol.line-count = #3
    instrumentName = #"Djembe"
    drumStyleTable = #(alist->hash-table djembe)
    drumPitchTable = #(alist->hash-table midiDrumPitches)
  }
  \one
  \layout {}
  \midi {}
}
```

Forcing a clef symbol to be displayed

When a clef sign has already been displayed and it has not been changed to a different clef, then repeating the `\clef` command will be ignored by LilyPond, since it is not a change of clef. It is possible to force the clef to be redisplayed using the command `\set Staff.forceClef = ##t`.

```
\relative c' {
  \clef treble
  c1
  \clef treble
  c1
  \set Staff.forceClef = ##t
  c1
  \clef treble
  c1
}
```

Generating random notes

This Scheme-based snippet generates 24 random notes (or as many as required), based on the current time (or any randomish number specified instead, in order to obtain the same random notes each time): i.e., to get different random note patterns, just change this number.

```
\score {
  $(let ((random-state (seed->random-state (current-time))))
    (make-sequential-music
      (map (lambda (x)
        (let ((idx (random 12 random-state)))
          (make-event-chord
            (list
              (make-music 'NoteEvent
                'duration (ly:make-duration 2 0 1/1)
                'pitch (ly:make-pitch
```

```

        (quotient idx 7)
        (remainder idx 7)
        0))))))
      (make-list 24))))
}
}

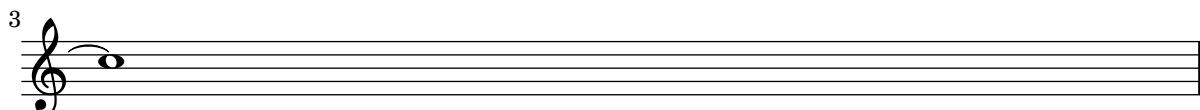

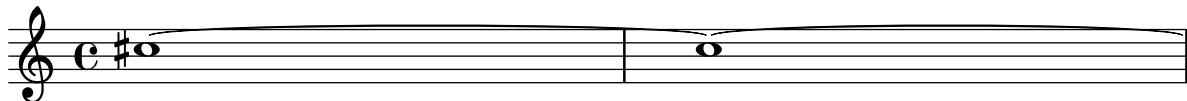

```

Hiding accidentals on tied notes at the start of a new system

This shows how to hide accidentals on tied notes at the start of a new system.

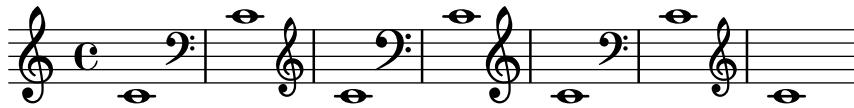

```
\relative c' {
  \override Accidental.hide-tied-accidental-after-break = ##t
  cis1~ cis~
  \break
  cis
}
```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```
\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}
```

Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations. Consult the initialization file ‘ly/makam.ly’ for details of pitch names and alterations.

```
% Initialize makam settings
\include "makam.ly"

\relative c' {
    \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
    c4 cc db fk
    gbm4 gfc gfb efk
    fk4 db cc c
}
```

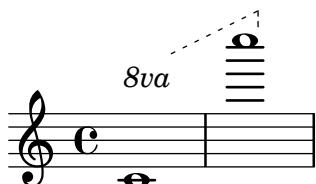

Modifying the Ottava bracket slope

It is possible to change the slope of the Ottava bracket.

```
\relative c'' {
    \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
    \override Staff.OttavaBracket.bound-details =
        #`((left . ((Y . 0) ; Change the integer here
                    (attach-dir . ,LEFT)
                    (padding . 0)
                    (stencil-align-dir-y . ,CENTER)))
        (right . ((Y . 5) ; Change the integer here
                   (padding . 0)
                   (attach-dir . ,RIGHT)
                   (text . ,(make-draw-dashed-line-markup (cons 0 -1.2))))))

    \override Staff.OttavaBracket.left-bound-info =
        #ly:line-spanner::calc-left-bound-info-and-text
    \override Staff.OttavaBracket.right-bound-info =
        #ly:line-spanner::calc-right-bound-info
    \ottava #1
    c1
    c'''1
}
```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations = #`(((octave . step) . alter) ((octave . step) .
alter) ...) where, for each element in the list, octave specifies the octave (0 being the
octave from middle C to the B above), step specifies the note within the octave (0 means C
and 6 means B), and alter is ,SHARP ,FLAT ,DOUBLE-SHARP etc. (Note the leading comma.)
```

Alternatively, for each item in the list, using the more concise format `(step . alter)` specifies that the same alteration should hold in all octaves.

For microtonal scales where a “sharp” is not 100 cents, `alter` refers to the alteration as a proportion of a 200-cent whole tone.

Here is an example of a possible key signature for generating a whole-tone scale:

```
\relative {
  \set Staff.keyAlterations = #`((6 . ,FLAT)
                                (5 . ,FLAT)
                                (3 . ,SHARP))
  c'4 d e fis
  aes4 bes c2
}
```

Numbers as easy note heads

Easy notation note heads use the `note-names` property of the `NoteHead` object to determine what appears inside the note head. By overriding this property, it is possible to print numbers representing the scale-degree.

A simple engraver can be created to do this for every note head object it sees.

```
#(define Ez_numbers_engraver
  (make-engraver
    (acknowledgers
      ((note-head-interface engraver grob source-engraver)
        (let* ((context (ly:translator-context engraver))
               (tonic-pitch (ly:context-property context 'tonic))
               (tonic-name (ly:pitch-notename tonic-pitch))
               (grob-pitch
                 (ly:event-property (event-cause grob) 'pitch))
               (grob-name (ly:pitch-notename grob-pitch))
               (delta (modulo (- grob-name tonic-name) 7)))
               (note-names
                 (make-vector 7 (number->string (1+ delta))))))
        (ly:grob-set-property! grob 'note-names note-names))))))
  #(set-global-staff-size 26)

\layout {
  ragged-right = ##t
```

```
\context {
    \Voice
    \consists \Ez_numbers_engraver
}
}

\relative c' {
    \easyHeadsOn
    c4 d e f
    g4 a b c \break

    \key a \major
    a,,4 b cis d
    e4 fis gis a \break

    \key d \dorian
    d,,4 e f g
    a4 b c d
}
```

The image shows three staves of musical notation. Staff 1 starts at a C-clef and ends at a G-clef, with a key signature of one sharp. Staff 2 starts at a D-sharp-clef and ends at an A-sharp-clef, with a key signature of two sharps. Staff 3 starts at an E-clef and ends at a B-clef, with a key signature of one sharp. Each staff has seven vertical stems with black numbers 1 through 7 indicating pitch. The stems are numbered 1, 2, 3, 4, 5, 6, 7 from bottom to top.

Orchestra choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```
fluteMusic = \relative c' { \key g \major g'1 b }

% Pitches as written on a manuscript for Clarinet in A
% are transposed to concert pitch.

clarinetMusic = \transpose c' a
\relative c'' { \key bes \major bes1 d }

trumpetMusic = \relative c { \key g \major g''1 b }

% Key signature is often omitted for horns
```

```
hornMusic = \transpose c' f
  \relative c { d'1 fis }

percussionMusic = \relative c { \key g \major g1 b }

sopranoMusic = \relative c' { \key g \major g'1 b }

sopranoLyrics = \lyricmode { Lyr -- ics }

altoIMusic = \relative c' { \key g \major g'1 b }

altoIIMusic = \relative c' { \key g \major g'1 b }

Ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

```
{
    \ottava #1
    \set Staff.ottavation = #"8"
    c''1
    \ottava #0
    c'1
    \ottava #1
    \set Staff.ottavation = #"Text"
    c''1
}
```

Preventing extra naturals from being automatically added

In accordance with traditional typesetting rules, a natural sign is printed before a sharp or flat if a previous double sharp or flat on the same note is canceled. To change this behavior to contemporary practice, set the `extraNatural` property to `f` in the `Staff` context.

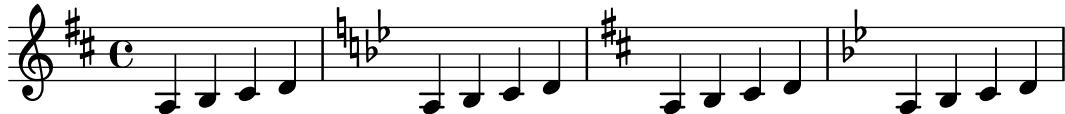

```
\relative c' {
    aeses4 aes ais a
    \set Staff.extraNatural = ##f
    aeses4 aes ais a
}
```

Preventing natural signs from being printed when the key signature changes

When the key signature changes, natural signs are automatically printed to cancel any accidentals from previous key signatures. This may be prevented by setting to `f` the `printKeyCancellation` property in the `Staff` context.

```
\relative c' {
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
    \set Staff.printKeyCancellation = ##f
    \key d \major
    a4 b cis d
    \key g \minor
    a4 bes c d
}
```

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

}

```
\addQuote sax {
    \transposition es'
    \repeat unfold 16 { a8 }
}

quoteTest = {
    % french horn
    \transposition f
    g'4
    << \quoteDuring #"clarinet" { \skip 4 } s4^"clar." >>
    << \quoteDuring #"sax" { \skip 4 } s4^"sax." >>
    g'4
}

{
    \new Staff \with {
        instrumentName = \markup { \column { Horn "in F" } }
    }
    \quoteTest
    \transpose c' d' << \quoteTest s4_"up a tone" >>
}
```

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `'break-align-orders` property of the `BreakAlignment` grob.

The value of `'break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving `key-cancellation` before `staff-bar`; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
    \override Score.BreakAlignment.break-align-orders =
        ##((left-edge ambitus breathing-sign clef staff-bar
            key-cancellation key-signature time-signature custos)
            (left-edge ambitus breathing-sign clef key-cancellation
```

```

    staff-bar key-signature time-signature custos)

(left-edge ambitus breathing-sign clef key-cancellation
key-signature staff-bar time-signature custos))

\key des \major
c'1
\bar "||"
\key bes \major
c'1
}

```

Transposing pitches with minimum accidentals ("Smart" transpose)

This example uses some Scheme code to enforce enharmonic modifications for notes in order to have the minimum number of accidentals. In this case, the following rules apply:

Double accidentals should be removed

B sharp -> C

E sharp -> F

C flat -> B

F flat -> E

In this manner, the most natural enharmonic notes are chosen.

```

#(define (naturalize-pitch p)

```

Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines `middleCClefPosition` must also be specified, with positive or negative values moving `middleCPosition` up or down respectively, relative to the staff's center line.

For example, `\clef "treble_8"` is equivalent to setting the `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition` and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{
% The default treble clef
\key f \major
```

```
c'1
% The standard bass clef
\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
\set Staff.middleCPosition = #6
\set Staff.middleCClefPosition = #6
\key g \major
c'1
% The baritone clef
\set Staff.clefGlyph = #"clefs.C"
\set Staff.clefPosition = #4
\set Staff.middleCPosition = #4
\set Staff.middleCClefPosition = #4
\key f \major
c'1
% The standard choral tenor clef
\set Staff.clefGlyph = #"clefs.G"
\set Staff.clefPosition = #-2
\set Staff.clefTransposition = #-7
\set Staff.middleCPosition = #1
\set Staff.middleCClefPosition = #1
\key f \major
c'1
% A non-standard clef
\set Staff.clefPosition = #0
\set Staff.clefTransposition = #0
\set Staff.middleCPosition = #-4
\set Staff.middleCClefPosition = #-4
\key g \major
c'1 \break

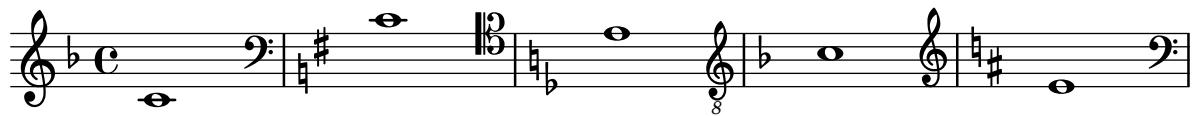

% The following clef changes do not preserve
% the normal relationship between notes, key signatures
% and clefs:

\set Staff.clefGlyph = #"clefs.F"
\set Staff.clefPosition = #2
c'1
\set Staff.clefGlyph = #"clefs.G"
c'1
\set Staff.clefGlyph = #"clefs.C"
c'1
\set Staff.clefTransposition = #7
c'1
\set Staff.clefTransposition = #0
\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
```

Rhythms

Section “Rhythms” in *Notation Reference*

Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved. For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section. This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
r16[ g16 \tuplet 3/2 { r16 e'8} ]
g16( a \tuplet 3/2 { b d e') }
g8[( a \tuplet 3/2 { b d') e'] ~ ]
\time 2/4
\tuplet 5/4 { e'32\(( a b d' e' } a'4.\)
}
```

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drl = \drummode {
    bd4 sn8 bd bd4 << bd ss >>
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
    timh4 ssh timl8 ssh r timh r4
    ssh8 timl r4 cb8 cb
}

\score {
<<
\new DrumStaff \with {
    instrumentName = # "timbales"
    drumStyleTable = # timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
}
<<
```

```
\timb
>>
\new DrumStaff \with { instrumentName = #"drums" }
<<
  \new DrumVoice { \stemUp \drh }
  \new DrumVoice { \stemDown \drl }
>>
>>
\layout { }
\midi { \tempo 4 = 120 }
}
```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```
graceNotes = {
  \grace { c4 c8 c16 c32 }
  c8
}

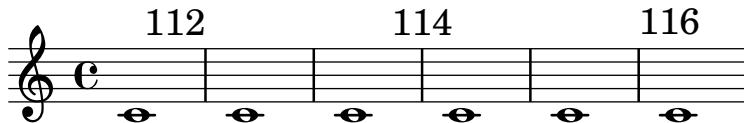

\relative c' {
  c8
  \graceNotes
  \override Score.GraceSpacing.spacing-increment = #2.0
  \graceNotes
  \revert Score.GraceSpacing.spacing-increment
  \graceNotes
}
```

Aligning bar numbers

Bar numbers by default are right-aligned to their parent object. This is usually the left edge of a line or, if numbers are printed within a line, the left hand side of a bar line. The numbers may also be positioned directly over the bar line or left-aligned to the bar line.

```
\relative c' {
  \set Score.currentBarNumber = #111
  \override Score.BarNumber.break-visibility = #all-visible
  % Increase the size of the bar number by 2
  \override Score.BarNumber.font-size = #2
```

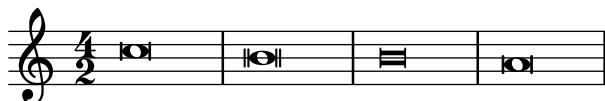

```
% Print a bar number every second measure
\set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
c1 | c1
% Center-align bar numbers
\override Score.BarNumber.self-alignment-X = #CENTER
c1 | c1
% Left-align bar numbers
\override Score.BarNumber.self-alignment-X = #LEFT
c1 | c1
}
```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

```
\relative c' {
  \time 4/2
  c\breve |
  \override Staff.NoteHead.style = #'altdefault
  b\breve
  \override Staff.NoteHead.style = #'baroque
  b\breve
  \revert Staff.NoteHead.style
  a\breve
}
```

Automatic beam subdivisions

Beams can be subdivided automatically. By setting the property `subdivideBeams`, beams are subdivided at beat positions (as specified in `baseMoment`).

```
\new Staff {
  \relative c' {
    <<
    {
      \voiceOne
      \set subdivideBeams = ##t
      b32[ a g f c' b a g
      b32^"subdivide beams" a g f c' b a g]
    }
    \new Voice {
      \voiceTwo
      b32_"default"[ a g f c' b a g
      b32 a g f c' b a g]
```

```

        }
>>
\oneVoice
\set baseMoment = #(ly:make-moment 1/8)
\set beatStructure = 2,2,2,2
b32^"baseMoment 1 8"[ a g f c' b a g]
\set baseMoment = #(ly:make-moment 1/16)
\set beatStructure = 4,4,4,4
b32^"baseMoment 1 16"[ a g f c' b a g]
}
}

```

subdivide beams baseMoment 1 8 baseMoment 1 16
 default

Automatically change durations

`shiftDurations` can be used to change the note lengths of a piece of music. It takes two arguments - the scaling factor as a power of two, and the number of dots to be added as a positive integer.

```

\paper { indent = 0 }

music = \relative c' { a1 b2 c4 d8 r }

\score {
  \new Voice {
    \time 4/2
    \music
    \time 4/4
    \shiftDurations #1 #0 { \music }
    \time 2/4
    \shiftDurations #2 #0 { \music }
    \time 4/1
    \shiftDurations #-1 #0 { \music }
    \time 8/1
    \shiftDurations #-2 #0 { \music }
    \time 6/2
    \shiftDurations #0 #1 { \music }
    \time 7/2
    \shiftDurations #0 #2 { \music }
  }
}

```

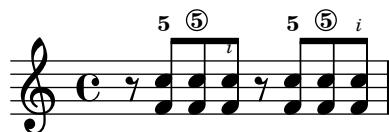

Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

```
\relative c' {
    \set fingeringOrientations = #'(up)
    \set stringNumberOrientations = #'(up)
    \set strokeFingerOrientations = #'(up)

    % Default behavior
    r8
    <f c'{-}5>8
    <f c'{\5}>8
    <f c'{-\rightHandFinger #2}>8

    % No tweak needed
    r8
    <f c'{-}5>8
    <f c'{\5}>8
    % Corrected to avoid collisions
    \override StrokeFinger.add-stem-support = ##t
    <f c'{-\rightHandFinger #2}>8
}
```

Beam endings in Score context

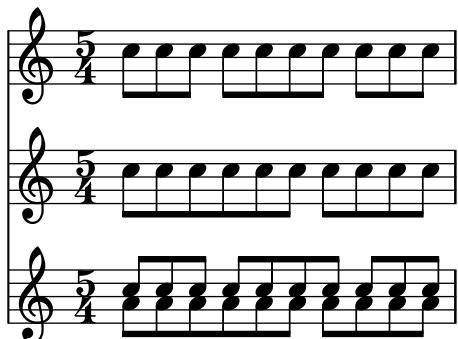

Beam-ending rules specified in the `Score` context apply to all staves, but can be modified at both `Staff` and `Voice` levels:

```
\relative c'' {
    \time 5/4
    % Set default beaming for all staves
    \set Score.baseMoment = #(ly:make-moment 1/8)
    \set Score.beatStructure = 3,4,3
    <<
        \new Staff {
            c8 c c c c c c c c
        }
        \new Staff {
            % Modify beaming for just this staff
            \set Staff.beatStructure = 6,4
        }
    >>
}
```

```

c8 c c c c c c c c
}
\new Staff {
    % Inherit beaming from Score context
    <<
    {
        \voiceOne
        c8 c c c c c c c c
    }
    % Modify beaming for this voice only
    \new Voice {
        \voiceTwo
        \set Voice.beatStructure = 6,4
        a8 a a a a a a a a
    }
    >>
}
>>
}

```

Beams across line breaks

Line breaks are normally forbidden when beams cross bar lines. This behavior can be changed as shown:

```

\relative c' {
    \override Beam.breakable = ##t
    c8 c[ c] c[ c] c[ c] c[ \break
    c8] c[ c] c[ c] c[ c] c
}

```

Two staves of musical notation. The top staff is in common time (C) and shows eighth-note patterns with beams that cross bar lines. The bottom staff is in 2/4 time (2) and shows sixteenth-note patterns with beams that cross bar lines, demonstrating the effect of the override command in the previous code example.

Changing beam knee gap

Kneed beams are inserted automatically when a large gap is detected between the note heads. This behavior can be tuned through the `auto-knee-gap` property. A kneeed beam is drawn if the gap is larger than the value of `auto-knee-gap` plus the width of the beam object (which depends on the duration of the notes and the slope of the beam). By default `auto-knee-gap` is set to 5.5 staff spaces.

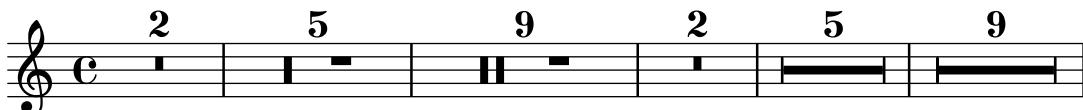

```
{
    f8 f''8 f8 f''8
    \override Beam.auto-knee-gap = #6
    f8 f''8 f8 f''8
}
```

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” - church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the `expand-limit` property.

```
\relative c' {
    \compressMMRests {
        R1*2 | R1*5 | R1*9
        \override MultiMeasureRest.expand-limit = #3
        R1*2 | R1*5 | R1*9
    }
}
```

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

```
\relative c' {
    c4.. a16 r2 |
    \override Dots.dot-count = #4
    c4.. a16 r2 |
    \override Dots.dot-count = #0
    c4.. a16 r2 |
    \revert Dots.dot-count
    c4.. a16 r2 |
}
```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
    \new Staff \relative c' {
        \tempo 4 = 160
        c4 e g b
        c4 b d c
        \set Score.tempoHideNote = ##t
        \tempo 4 = 96
        d,4 fis a cis
        d4 cis e d
    }
    \layout { }
    \midi { }
}
}
```

Changing the tuplet number

By default, only the numerator of the tuplet number is printed over the tuplet bracket, i.e., the numerator of the argument to the `\tuplet` command.

Alternatively, num:den of the tuplet number may be printed, or the tuplet number may be suppressed altogether.

```
\relative c'' {
    \tuplet 3/2 { c8 c c }
    \tuplet 3/2 { c8 c c }
    \override TupletNumber.text = #tuplet-number::calc-fraction-text
    \tuplet 3/2 { c8 c c }
    \omit TupletNumber
    \tuplet 3/2 { c8 c c }
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
    \context {
```

```

\Score
  \remove "Timing_translator"
  \remove "Default_bar_line_engraver"
}
\context {

  c8 d e4 gis8
}
```

Compound time signatures

Odd 20th century time signatures (such as "5/8") can often be played as compound time signatures (e.g. "3/8 + 2/8"), which combine two or more unequal metrics.

LilyPond can make such music quite easy to read and play, by explicitly printing the compound time signatures and adapting the automatic beaming behavior.

```
\relative c' {
  \compoundMeter #'((2 8) (3 8))
  c8 d e fis gis
  c8 fis, gis e d
  c8 d e4 gis8
}
```

Conducting signs measure grouping signs

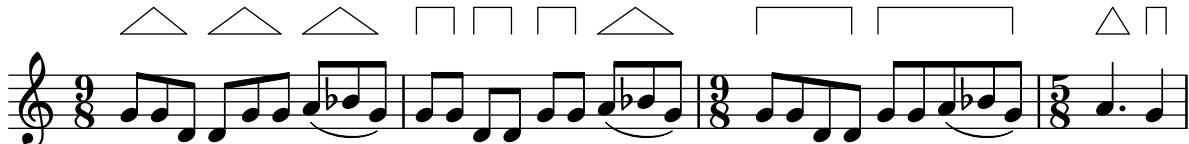

Beat grouping within a measure is controlled by the context property `beatStructure`. Values of `beatStructure` are established for many time signatures in `scm/time-signature-settings.scm`. Values of `beatStructure` can be changed or set with `\set`. Alternatively, `\time` can be used to both set the time signature and establish the beat structure. For this, you specify the internal grouping of beats in a measure as a list of numbers (in Scheme syntax) before the time signature.

`\time` applies to the `Timing` context, so it will not reset values of `beatStructure` or `baseMoment` that are set in other lower-level contexts, such as `Voice`.

If the `Measure_grouping_engraver` is included in one of the display contexts, measure grouping signs will be created. Such signs ease reading rhythmically complex modern music. In the example, the 9/8 measure is grouped in two different patterns using the two different methods, while the 5/8 measure is grouped according to the default setting in `scm/time-signature-settings.scm`:

```
\score {
  \new Voice \relative c'' {
    \time 9/8
    g8 g d d g g a( bes g) |
    \set Timing.beatStructure = 2,2,2,3
    g8 g d d g g a( bes g) |
    \time 4,5 9/8
    g8 g d d g g a( bes g) |
    \time 5/8
    a4. g4 |
  }
}
```

```
\layout {
  \context {
    \Staff
    \consists "Measure_grouping_engraver"
  }
}
}
```

Consistently left aligned bar numbers

When left aligning bar numbers, overlapping problems may occur with Staves brackets. The snippet solves this by keeping right aligned the first bar number following line breaks.

```
consistentlyLeftAlignedBarNumbers = {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \override Score.BarNumber.self-alignment-X =
    #(lambda (grob)
      (let ((break-dir (ly:item-break-dir grob)))
        (if (= break-dir RIGHT) RIGHT LEFT)))
}

\new ChoirStaff <<
  \new Staff {
    \relative c' {
      \set Score.barNumberVisibility = #(every-nth-bar-number-visible 3)
      \bar ""
      \consistentlyLeftAlignedBarNumbers

      \set Score.currentBarNumber = #112
      \repeat unfold 8 { R1 }
      \break
      \repeat unfold 9 { R1 }
      \break
      \repeat unfold 7 { R1 }
    }
  }
  \new Staff {
    \relative c' {
      \repeat unfold 24 { R1 }
    }
  }
>>

\layout {
  indent = #0
  ragged-right = ##t
  ragged-last = ##t
}
```

The musical score consists of six staves of music. The first two staves are in common time (C). The first staff shows eighth-note patterns with measure numbers 114 and 117 above it. The second staff shows eighth-note patterns with measure numbers 120 and 123 above it. The third staff shows eighth-note patterns with measure numbers 126 and 129 above it. The fourth staff shows eighth-note patterns with measure numbers 132 and 135 above it.

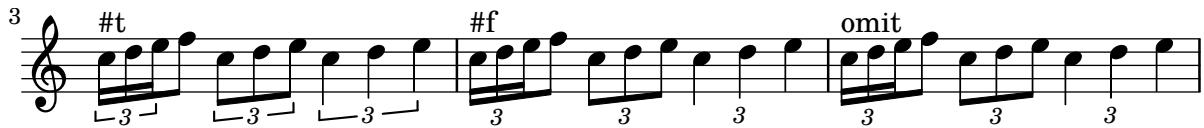

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet. To control the visibility of tuplet brackets, set the property 'bracket-visibility' to either #t (always print a bracket), #f (never print a bracket) or #'if-no-beam (only print a bracket if there is no beam).

```
music = \relative c' {
    \tuplet 3/2 { c16[ d e } f8]
    \tuplet 3/2 { c8 d e }
    \tuplet 3/2 { c4 d e }
}

\new Voice {
    \relative c' {
        << \music s4^"default" >>
        \override TupletBracket.bracket-visibility = #'if-no-beam
        << \music s4^"'if-no-beam" >>
        \override TupletBracket.bracket-visibility = ##t
        << \music s4^"#t" >>
        \override TupletBracket.bracket-visibility = ##f
        << \music s4^"#f" >>
        %% v2.18 :
        \omit TupletBracket
        << \music s4^"omit" >>
    }
}
```

A close-up of a musical staff showing a sixteenth-note tuplet. The first two measures are labeled 'default' and show brackets under each group of three notes. The next four measures are labeled 'if-no-beam' and show brackets only where there is no common beam.

Creating metronome marks in markup mode

New metronome marks can be created in markup mode, but they will not change the tempo in MIDI output.

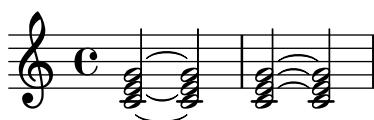

```
\relative c' {
  \tempo \markup {
    \concat {
      (
      \smaller \general-align #Y #DOWN \note #"16." #1
      " = "
      \smaller \general-align #Y #DOWN \note #"8" #1
    )
  }
  c1
  c4 c' c,2
}
```

Engraving ties manually

Ties may be engraved manually by changing the `tie-configuration` property of the `TieColumn` object. The first number indicates the distance from the center of the staff in half staff-spaces, and the second number indicates the direction (1 = up, -1 = down).

```
\relative c' {
  <c e g>2~ <c e g>
  \override TieColumn.tie-configuration =
    #'((0.0 . 1) (-2.0 . 1) (-4.0 . 1))
  <c e g>2~ <c e g>
}
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the '`gap-count`' property of the `Beam` object, and the size of the gaps between beams and stems is set with the '`gap`' property.

```
\relative c'' {
  \repeat tremolo 8 { a32 f }
  \override Beam.gap-count = #1
```

```
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #2
\repeat tremolo 8 { a32 f }
\override Beam.gap-count = #3
\repeat tremolo 8 { a32 f }

\override Beam.gap-count = #3
\override Beam.gap = #1.33
\repeat tremolo 8 { a32 f }
\override Beam.gap = #1
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.67
\repeat tremolo 8 { a32 f }
\override Beam.gap = #0.33
\repeat tremolo 8 { a32 f }
}

}
```

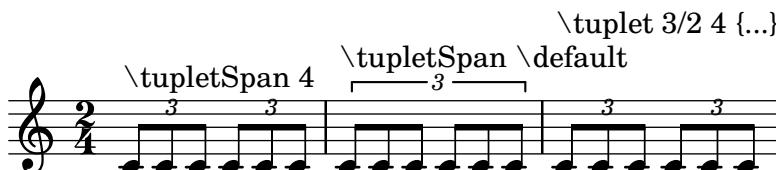

Entering several tuplets using only one \tuplet command

The property `tupletSpannerDuration` sets how long each of the tuplets contained within the brackets after `\tuplet` should last. Many consecutive tuplets can then be placed within a single `\tuplet` expression, thus saving typing.

There are several ways to set `tupletSpannerDuration`. The command `\tupletSpan` sets it to a given duration, and clears it when instead of a duration `\default` is specified. Another way is to use an optional argument with `\tuplet`.

```
\relative c' {
  \time 2/4
  \tupletSpan 4
  \tuplet 3/2 { c8^"\tupletSpan 4" c c c c c }
  \tupletSpan \default
  \tuplet 3/2 { c8^"\tupletSpan \default" c c c c c }
  \tuplet 3/2 4 { c8^"\tuplet 3/2 4 {...}" c c c c c }
}
```

Flat flags and beam nibs

Flat flags on lone notes and beam nibs at the ends of beamed figures are both possible with a combination of `stemLeftBeamCount`, `stemRightBeamCount` and paired [] beam indicators.

For right-pointing flat flags on lone notes, use paired [] beam indicators and set `stemLeftBeamCount` to zero (see Example 1).

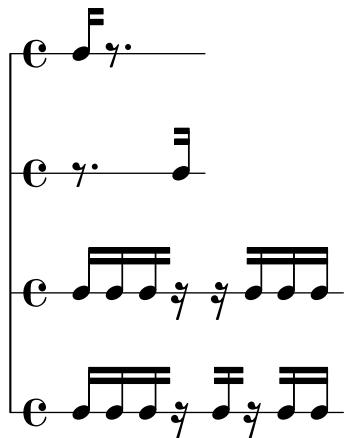

For left-pointing flat flags, set `stemRightBeamCount` instead (Example 2).

For right-pointing nibs at the end of a run of beamed notes, set `stemRightBeamCount` to a positive value. And for left-pointing nibs at the start of a run of beamed notes, set `stemLeftBeamCount` instead (Example 3).

Sometimes it may make sense for a lone note surrounded by rests to carry both a left- and right-pointing flat flag. Do this with paired [] beam indicators alone (Example 4).

(Note that `\set stemLeftBeamCount` is always equivalent to `\once \set`. In other words, the beam count settings are not “sticky”, so the pair of flat flags attached to the lone `16[]` in the last example have nothing to do with the `\set` two notes prior.)

```
\score {
  <<
  % Example 1
  \new RhythmicStaff {
    \set stemLeftBeamCount = #0
    c16[]
    r8.
  }
  % Example 2
  \new RhythmicStaff {
    r8.
    \set stemRightBeamCount = #0
    16[]
  }
  % Example 3
  \new RhythmicStaff {
    16 16
    \set stemRightBeamCount = #2
    16 r r
    \set stemLeftBeamCount = #2
    16 16 16
  }
  % Example 4
  \new RhythmicStaff {
    16 16
    \set stemRightBeamCount = #2
    16 r16
    16[]
    r16
    \set stemLeftBeamCount = #2
    16 16
  }
  >>
}
```

Forcing rehearsal marks to start from a given letter or number

This snippet demonstrates how to obtain automatic ordered rehearsal marks, but from the letter or number desired.

```
\relative c'' {
    c1 \mark \default
    c1 \mark \default
    c1 \mark \default
    c1 \mark #14
    c1 \mark \default
    c1 \mark \default
    c1 \mark \default
    c1
    \break
    \set Score.markFormatter = #format-mark-numbers
    c1 \mark #1
    c1 \mark \default
    c1 \mark \default
    c1 \mark \default
    c1 \mark #14
    c1 \mark \default
    c1 \mark \default
    c1 \mark \default
    c1
}
```

The image shows two staves of music. The top staff starts with a 'c' rehearsal mark, followed by letters A, B, C, O, P, Q, R. The bottom staff starts with a '9' rehearsal mark, followed by numbers 1, 2, 3, 4, 14, 15, 16, 17. Both staves consist of eight eighth notes each.

Generating custom flags

The `stencil` property of the `Flag` grob can be set to a custom scheme function to generate the glyph for the flag.

```
 #(define-public (weight-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X)))
```

```

(log (- (ly:grob-property stem-grob 'duration-log) 2))
(is-up? (eqv? (ly:grob-property stem-grob 'direction) UP))
(yext (if is-up? (cons (* log -0.8) 0) (cons 0 (* log 0.8))))
(flag-stencil (make-filled-box-stencil '(-0.4 . 0.4) yext))
(stroke-style (ly:grob-property grob 'stroke-style))
(stroke-stencil (if (equal? stroke-style "grace")
                      (make-line-stencil 0.2 -0.9 -0.4 0.9 -0.4)
                      empty-stencil)))
(ly:stencil-add flag-stencil stroke-stencil)))

% Create a flag stencil by looking up the glyph from the font
#(define (inverted-flag grob)
  (let* ((stem-grob (ly:grob-parent grob X))
         (dir (if (eqv? (ly:grob-property stem-grob 'direction) UP) "d" "u"))
         (flag (retrieve-glyph-flag "" dir "" grob))
         (line-thickness (ly:staff-symbol-line-thickness grob))
         (stem-thickness (ly:grob-property stem-grob 'thickness))
         (stem-width (* line-thickness stem-thickness))
         (stroke-style (ly:grob-property grob 'stroke-style))
         (stencil (if (null? stroke-style)
                      flag
                      (add-stroke-glyph flag stem-grob dir stroke-style "")))
         (rotated-flag (ly:stencil-rotate-absolute stencil 180 0 0)))
    (ly:stencil-translate rotated-flag (cons (- (/ stem-width 2)) 0)))))

snippetexamplenotes =
{
  \autoBeamOff c'8 d'16 c'32 d'64 \acciaccatura {c'8} d'64
}

```

Guitar strum rhythms

For guitar music, it is possible to show strum rhythms, along with melody notes, chord names and fret diagrams.

```
\include "predefined-guitar-fretboards.ly"
<<
\new ChordNames {
  \chordmode {
    c1 | f | g | c
  }
}
\new FretBoards {
  \chordmode {
    c1 | f | g | c
  }
}
\new Voice \with {
  \consists "Pitch_squash_engraver"
} {
  \relative c' {
    \improvisationOn
    c4 c8 c c4 c8 c
    f4 f8 f f4 f8 f
    g4 g8 g g4 g8 g
    c4 c8 c c4 c8 c
  }
}
\new Voice = "melody" {
  \relative c' {
    c2 e4 e4
    f2. r4
    g2. a4
    e4 c2.
  }
}
\new Lyrics {
  \lyricsto "melody" {
    This is my song.
    I like to sing.
  }
}
>>
```

The diagram illustrates four chords: C, F, G, and C. Above each chord is its name in capital letters. Below each chord is a guitar neck diagram with fingerings: C (x o o), F (134211), G (21 ooo), and C (x o o). Below the chords are two staves of musical notation. The top staff is in common time (indicated by a 'C') and shows eighth-note patterns. The bottom staff is also in common time and shows quarter-note patterns. Below the notation are the lyrics: "This is my song. I like to sing."

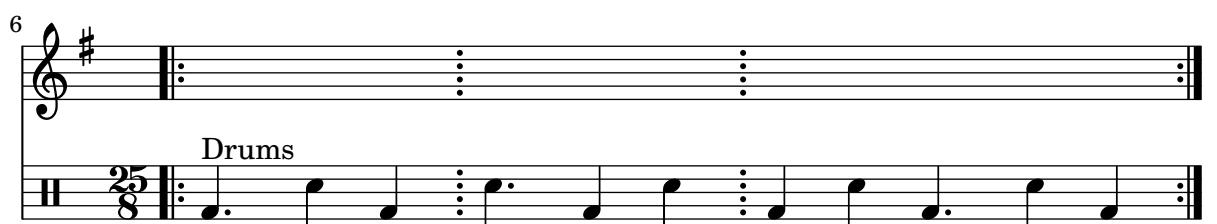

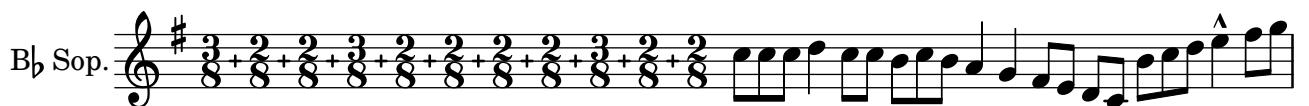

Heavily customized polymetric time signatures

Though the polymetric time signature shown was not the most essential item here, it has been included to show the beat of this piece (which is the template of a real Balkan song!).

```
drum = \new DrumStaff \drummode {
    \bar ".|:" bd4.^{\markup { Drums }} sn4 bd \bar ";" sn4.
    bd4 sn \bar ";" bd sn bd4. sn4 bd \bar ":|."
}

\new Staff \with {
    instrumentName = \markup { \concat { "B" \flat " Sop." } }
}

{
    \melody
    \drum
}
```

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
  >>
}

```

Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the `dash-definition` property. `dash-definition` is a list of `dash-elements`. A `dash-element` is a list of parameters defining the dash behavior for a segment of the slur.

The slur is defined in terms of the bezier parameter t which ranges from 0 at the left end of the slur to 1 at the right end of the slur. **dash-element** is a list (**start-t** **stop-t** **dash-fraction** **dash-period**). The region of the slur from **start-t** to **stop-t** will have a fraction **dash-fraction** of each **dash-period** black. **dash-period** is defined in terms of staff spaces. **dash-fraction** is set to 1 for a solid slur.

```
}
```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the `Beam` grob.

```
\relative c' {
    \time 2/4
    % from upper staff-line (position 2) to center (position 0)
    \override Beam.positions = #'(2 . 0)
    c8 c
    % from center to one above center (position 1)
    \override Beam.positions = #'(0 . 1)
    c8 c
}
```

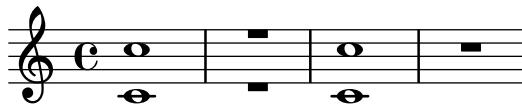

Merging multi-measure rests in a polyphonic part

When using multi-measure rests in a polyphonic staff, the rests will be placed differently depending on the voice they belong to. However they can be printed on the same staff line, using the following setting.

```
normalPos = \revert MultiMeasureRest.direction
```

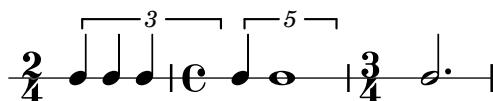

```
{
  <<
  {
    c''1
    R1
    c'''1
    \normalPos
    R1
  }
  \\
  {
    c'1
    R1
    c'1
    \normalPos
    R1
  }
>>
}
```

Modifying tuplet bracket length

Tuplet brackets can be made to run to prefatory matter or the next note. Default tuplet brackets end at the right edge of the final note of the tuplet; full-length tuplet brackets extend farther to the right, either to cover all the non-rhythmic notation up to the following note, or to cover only the whitespace before the next item of notation, be that a clef, time signature, key signature, or another note. The example shows how to switch tuplets to full length mode and how to modify what material they cover.

```
\new RhythmicStaff {
    % Set tuplets to be extendable...
    \set tupletFullLength = ##t
    % ...to cover all items up to the next note
    \set tupletFullLengthNote = ##t
    \time 2/4
    \tuplet 3/2 { c4 4 4 }
    % ...or to cover just whitespace
    \set tupletFullLengthNote = ##f
    \time 4/4
    \tuplet 5/4 { 4 1 }
    \time 3/4
    2.
}
```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the `prefer-dotted-right` property of `NoteCollision`.

```
\new Staff \relative c' <<
{
    f2. f4
    \override Staff.NoteCollision.prefer-dotted-right = ##f
    f2. f4
    \override Staff.NoteCollision.prefer-dotted-right = ##t
    f2. f4
}
\\
{ e4 e e e e e e e e }
```

>>

Multi-measure length control

Multi-measure rests have length according to their total duration which is under the control of `MultiMeasureRest.space-increment`. Note the default value is 2.0.

```
\relative c' {
  \compressFullBarRests
  R1*2 R1*4 R1*64 R1*16
  \override Staff.MultiMeasureRest.space-increment = 2.5
  R1*2 R1*4 R1*64 R1*16
}
```

The first staff starts with a treble clef and a 'c'. It contains four measures: a short rest (2), a longer rest (4), a very long rest (64), and another very long rest (16). The second staff starts at measure 87 and also contains four measures: a short rest (2), a longer rest (4), a very long rest (64), and another very long rest (16).

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest.

Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

```
\relative c' {
  \compressMMRests {
    \textLengthOn
    <>^\markup { [MAJOR GENERAL] }
    R1*19
    <>_ \markup { \italic { Cue: ... it is yours } }
    <>^\markup { A }
    R1*30^ \markup { [MABEL] }
    \textLengthOff
    c4^\markup { CHORUS } d f c
  }
}
```

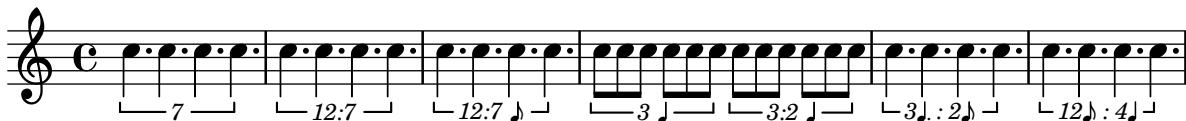

The staff starts with a treble clef and a 'c'. It contains three measures. The first measure is a rest labeled [MAJOR GENERAL] 19. The second measure is a rest labeled [MABEL] A 30. The third measure is a measure of music labeled CHORUS. Below the staff, the text 'Cue: ... it is yours' is centered.

Non-default tuplet numbers

LilyPond also provides formatting functions to print tuplet numbers different than the actual fraction, as well as to append a note value to the tuplet number or tuplet fraction.

```
\relative c'' {
```

```
\once \override TupletNumber.text =
  #(tuplet-number::non-default-tuplet-denominator-text 7)
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::non-default-tuplet-fraction-text 12 7)
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    (tuplet-number::non-default-tuplet-fraction-text 12 7) "8")
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    tuplet-number::calc-denominator-text "4")
\tuplet 3/2 { c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(tuplet-number::append-note-wrapper
    tuplet-number::calc-fraction-text "4")
\tuplet 3/2 { c8 c8 c8 c8 c8 }
\once \override TupletNumber.text =
  #(tuplet-number::fraction-with-notes "4." "8")
\tuplet 3/2 { c4. c4. c4. c4. }
\once \override TupletNumber.text =
  #(tuplet-number::non-default-fraction-with-notes 12 "8" 4 "4")
\tuplet 3/2 { c4. c4. c4. c4. }
}
```

Partcombine and autoBeamOff

The function of `\autoBeamOff` when used with `\partcombine` can be difficult to understand.

It may be preferable to use

```
\set Staff.autoBeaming = ##f
```

instead, to ensure that autobeamng will be turned off for the entire staff.

`\partcombine` apparently works with 3 voices – stem up single, stem down single, stem up combined.

An `\autoBeamOff` call in the first argument to `partcombine` will apply to the voice that is active at the time the call is processed, either stem up single or stem up combined. An `\autoBeamOff` call in the second argument will apply to the voice that is stem down single.

In order to use `\autoBeamOff` to stop all autobeamng when used with `\partcombine`, it will be necessary to use three calls to `\autoBeamOff`.

```
{
  %\set Staff.autoBeaming = ##f % turns off all autobeamng
  \partcombine
  {
    \autoBeamOff % applies to split up stems
    \repeat unfold 4 a'16
    %\autoBeamOff % applies to combined up stems
  }
```

```
\repeat unfold 4 a'8
\repeat unfold 4 a'16
}
{
  \autoBeamOff % applies to down stems
  \repeat unfold 4 f'8
  \repeat unfold 8 f'16 |
}
}
```

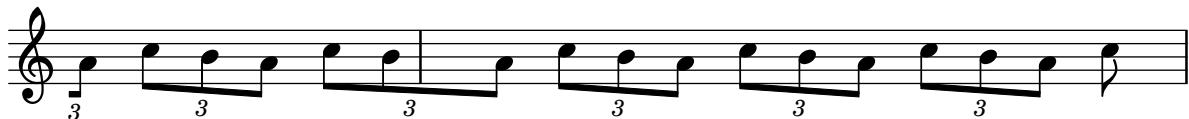

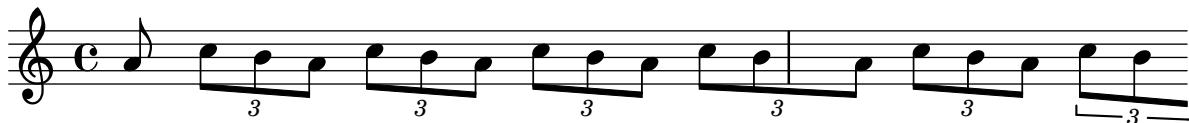

Permitting line breaks within beamed tuplets

This artificial example shows how both manual and automatic line breaks may be permitted to within a beamed triplet. Note that such off-beat triplets have to be beamed manually.

```
\layout {
  \context {
    \Voice
    % Permit line breaks within tuplets
    \remove "Forbid_line_break_engraver"
    % Allow beams to be broken at line breaks
    \override Beam.breakable = ##t
  }
}

\relative c'' {
  a8
  \repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
  % Insert a manual line break within a triplet
  \tuplet 3/2 { c[ b \bar{ } \break a] }
  \repeat unfold 5 { \tuplet 3/2 { c[ b a] } }
  c8
}
```

Positioning grace note beams at the height of normal note beams

When notes are placed on ledger lines, their beams are usually centred on the stave. Grace notes beams are shorter and grace notes on ledger lines may well have beams outside the stave. You can override this beaming for grace notes.

```
\relative c {
```

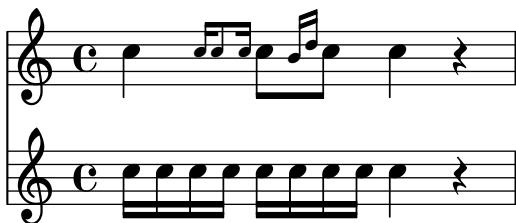

```
f8[ e]
\grace {
  f8[ e]
  \override Stem.no-stem-extend = ##f
  f8[ e]
  \revert Stem.no-stem-extend
}
f8[ e]
```

Positioning grace notes with floating space

Setting the property 'strict-grace-spacing' makes the musical columns for grace notes 'floating', i.e., decoupled from the non-grace notes: first the normal notes are spaced, then the (musical columns of the) graces are put left of the musical columns for the main notes.

```
\relative c'' {
  <<
    \override Score.SpacingSpanner.strict-grace-spacing = ##t
    \new Staff \new Voice {
      \afterGrace c4 { c16[ c8 c16] }
      c8[ \grace { b16 d } c8]
      c4 r
    }
    \new Staff {
      c16 c c c c c c c4 r
    }
  >>
}
```

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, in polyphonic music multi-measure rests in odd-numbered and even-numbered voices are vertically separated. The positioning of multi-measure rests can be controlled as follows:

```
\relative c'' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
```

```

\override MultiMeasureRest.staff-position = #-2
R1
\override MultiMeasureRest.staff-position = #0
R1
\override MultiMeasureRest.staff-position = #2
R1
\override MultiMeasureRest.staff-position = #3
R1
\override MultiMeasureRest.staff-position = #6
R1
\revert MultiMeasureRest.staff-position
\break

% In two Voices, odd-numbered voices are under the top line
<< { R1 } \\ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \\ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \\ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \\ { R1 } \\
  \once \override MultiMeasureRest.staff-position = #0
  { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMLRests
<<
  \revert MultiMeasureRest.direction
  { R1*3 }
  \\
  \revert MultiMeasureRest.direction
  { R1*3 }
>>
}

```

The musical notation consists of two staves. The top staff is in common time (C) and has a treble clef. It contains six measures, each with a single vertical bar (rest). The bottom staff is in 7/8 time (7) and has a treble clef. It also contains six measures, each with a single vertical bar (rest). Measure numbers 1 through 6 are written above the top staff, and the time signature 3 is written above the bottom staff.

Preventing final mark from removing final tuplet

The addition of a final mark can result in the loss of a final tuplet marking. This can be overcome by setting `TupletBracket #'full-length-to-extent` to `false`.

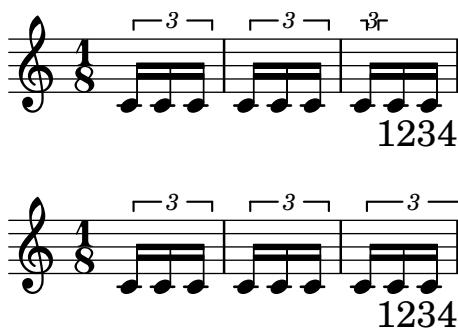

```
\new Staff {
```

```
\set tupletFullLength = ##t
\time 1/8
\tuplet 3/2 { c'16 c'16 c'16 }
\tuplet 3/2 { c'16 c'16 c'16 }
\tuplet 3/2 { c'16 c'16 c'16 }
\override Score.RehearsalMark.break-visibility = ##(#t #t #t)
\override Score.RehearsalMark.direction = #DOWN
\override Score.RehearsalMark.self-alignment-X = #RIGHT
% due to issue 2362 the following line is commented
% \mark "Composed Feb 2007 - Feb 2008"
% and a shorter mark is used.
\mark "1234"
}

\new Staff {
\set tupletFullLength = ##t

\override TupletBracket.full-length-to-extent = ##f

\time 1/8
\tuplet 3/2 { c'16 c'16 c'16 }
\tuplet 3/2 { c'16 c'16 c'16 }
\tuplet 3/2 { c'16 c'16 c'16 }
\override Score.RehearsalMark.break-visibility = ##(#t #t #t)
\override Score.RehearsalMark.direction = #DOWN
\override Score.RehearsalMark.self-alignment-X = #RIGHT
% due to issue 2362 the following line is commented
% \mark "Composed Feb 2007 - Feb 2008"
% and a shorter mark is used.
\mark "1234"
}
```

Printing bar numbers at regular intervals

Bar numbers can be printed at regular intervals by setting the property `barNumberVisibility`. Here the bar numbers are printed every two measures except at the end of the line.

```
\relative c' {
\override Score.BarNumber.break-visibility = #end-of-line-invisible
\set Score.currentBarNumber = #11
% Permit first bar number to be printed
\bar ""
% Print a bar number every second measure
```

```
\set Score.barNumberVisibility = #(every-nth-bar-number-visible 2)
c1 | c | c | c | c
\break
c1 | c | c | c | c
}
```

A musical staff with five measures. The first measure starts with a clef and a key signature. The second measure begins with a bar number '12'. The third measure begins with a bar number '14'. The fourth measure begins with a bar number '16'. The fifth measure begins with a bar number '18'. The sixth measure begins with a bar number '20'.

Printing bar numbers inside boxes or circles

Bar numbers can also be printed inside boxes or circles.

```
\relative c' {
    % Prevent bar numbers at the end of a line and permit them elsewhere
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

    % Increase the size of the bar number by 2
    \override Score.BarNumber.font-size = #2

    % Draw a box round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \repeat unfold 5 { c1 }

    % Draw a circle round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
    \repeat unfold 4 { c1 } \bar "|."
}
```

A musical staff with ten measures. Measures 1 through 4 each have a bar number inside a square box. Measures 5 through 8 each have a bar number inside a circle.

Printing bar numbers with changing regular intervals

The bar number interval can be changed by changing the context function `{set-bar-number-visibility}`.

```
\relative c' {
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \context Score \applyContext #(set-bar-number-visibility 4)
    \repeat unfold 10 c'1
    \context Score \applyContext #(set-bar-number-visibility 2)
    \repeat unfold 10 c
}
```

The image shows two staves of musical notation. The top staff has a treble clef and a common time signature (C). It contains a sequence of eighth notes from bar 5 to 9. The bottom staff also has a treble clef and a common time signature (C). It contains a sequence of eighth notes from bar 11 to 19, with bar numbers 11, 13, 15, 17, and 19 placed below the staff.

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the `direction` property of `MetronomeMark` or `RehearsalMark` appropriately.

```
\layout {
    indent = 0
    ragged-right = ##f
}

{
    % Metronome marks below the staff
    \override Score.MetronomeMark.direction = #DOWN
    \tempo 8. = 120
    c'''1

    % Rehearsal marks below the staff
    \override Score.RehearsalMark.direction = #DOWN
    \mark \default
    c'''1
}
```

The image shows a musical staff with a note followed by a bar line, then another note. Below the staff, there is a metronome mark (a dot over a 'C') with the text '= 120' and a rehearsal mark 'A'.

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized. The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
    indent = #0
    ragged-right = ##t
}

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

\layout {
    \context {
        \Score
```

```
\remove "Timing_translator"
\remove "Default_bar_line_engraver"
\remove "Bar_number_engraver"
\override SpacingSpanner.uniform-stretching = ##t
\override SpacingSpanner.strict-note-spacing = ##t
proportionalNotationDuration = #(ly:make-moment 1/64)
}

\context {
  \Staff
  \consists "Timing_translator"
  \consists "Default_bar_line_engraver"
}

\context {
  \Voice
  \remove "Forbid_line_break_engraver"
  tupletFullLength = ##t
}

Bassklarinette = \new Staff \with {
  \consists "Bar_number_engraver"
  barNumberVisibility = #(every-nth-bar-number-visible 2)
  \override BarNumber.break-visibility = #end-of-line-invisible
} <<

```

```
\score {
<<
    \Bassklarinette
    \Perkussion
>>
}
```

The musical score consists of three systems of music. The first system starts with a treble clef, 3/8 time, and a bassoon part with a sixteenth-note pattern. The second system starts with a bass clef, 3/4 time, and a bassoon part with eighth-note patterns. The third system starts with a treble clef, 3/4 time, and a bassoon part with eighth-note patterns. Measure numbers 2, 3, 4, 5, 6, and 8 are printed above the staves.

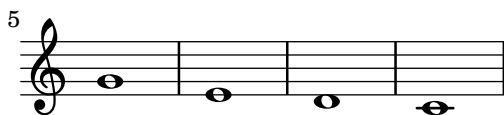

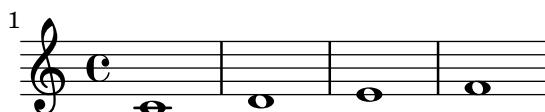

Printing the bar number for the first measure

By default, the first bar number in a score is suppressed if it is less than or equal to '1'. By setting `barNumberVisibility` to `all-bar-numbers-visible`, any bar number can be printed

for the first measure and all subsequent measures. Note that an empty bar line must be inserted before the first note for this to work.

```
\layout {
    indent = 0
    ragged-right = ##t
}

\relative c' {
    \set Score.barNumberVisibility = #all-bar-numbers-visible
    \bar ""
    c1 | d | e | f \break
    g1 | e | d | c
}
```

Redefining grace note global defaults

The global defaults for grace notes are stored in the identifiers `startGraceMusic`, `stopGraceMusic`, `startAcciaccaturaMusic`, `stopAcciaccaturaMusic`, `startAppoggiaturaMusic` and `stopAppoggiaturaMusic`, which are defined in the file `ly/grace-init.ly`. By redefining them other effects may be obtained.

```
startAcciaccaturaMusic = {
    <>(
    \override Flag.stroke-style = #"grace"
    \slurDashed
}

stopAcciaccaturaMusic = {
    \revert Flag.stroke-style
    \slurSolid
    <>
}

\relative c'' {
    \acciaccatura d8 c1
}
```

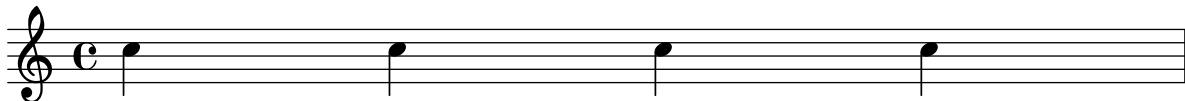

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the `Bar_number_engraver` from the `Score` context.

```
\layout {
  \context {
    \Score
    \omit BarNumber
    % or:
    \%remove "Bar_number_engraver"
  }
}

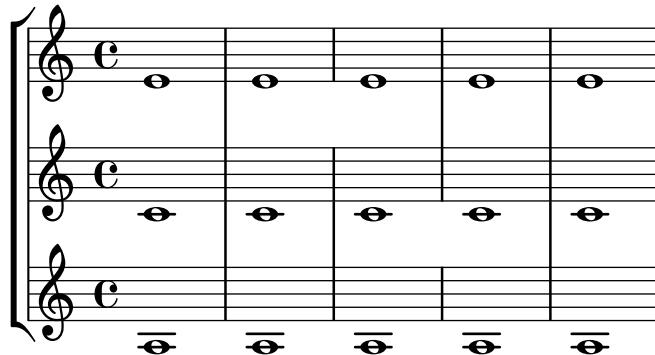

\relative c' {
  c4 c c c \break
  c4 c c c
}
```

Removing connecting bar lines on StaffGroup PianoStaff or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
  \new StaffGroup <<
    \new Staff {
      e1 | e
      \once \override Staff.BarLine.allow-span-bar = ##f
      e1 | e | e
    }
    \new Staff {
      c1 | c | c
      \once \override Staff.BarLine.allow-span-bar = ##f
      c1 | c
    }
    \new Staff {
      a1 | a | a | a | a
    }
  >>
}
```

Rest styles

Rests may be used in various styles.

```
\new Staff \relative c {
    \omit Score.TimeSignature
    \cadenzaOn

    \override Staff.Rest.style = #'mensural
    r\maxima^\markup \typewriter { mensural }
    r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'neomensural
    r\maxima^\markup \typewriter { neomensural }
    r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'classical
    r\maxima^\markup \typewriter { classical }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'z
    r\maxima^\markup \typewriter { z-style }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
    \bar ""
    \break

    \override Staff.Rest.style = #'default
    r\maxima^\markup \typewriter { default }
    r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}
```

classical

z-style

default

Reverting default beam endings

To typeset beams grouped 3-4-3-2 in 12/8 it is necessary first to override the default beam endings in 12/8, and then to set up the new beaming endings:

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians. The standard support for this using `\repeat percent` is unsuitable here since the first beat has to be an ordinary note or rest. This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the `r4` in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
  \once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
  \once \override Rest.thickness = #0.48
  \once \override Rest.slope = #1.7
  r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?))
#{%
  \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
```

```
\override Rest.thickness = #0.48
\override Rest.slope = #1.7
\repeat unfold $count { r4 }
\revert Rest.stencil
#}
)

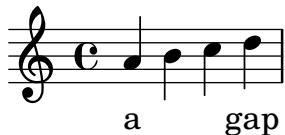

\score {
\relative c' {
c4 d e f |
\rs \rs \rs \rs |
\comp #4 |
}
}
```

Skips in lyric mode (2)

Although **s** skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes ("") or underscores (_) are available. So for example:

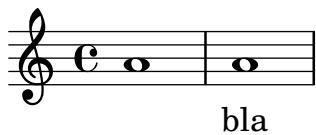

```
<<
\relative c'' { a4 b c d }
\new Lyrics \lyricmode { a4 "" _ gap }
>>
```

Skips in lyric mode

The **s** syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
\relative c'' { a1 | a }
\new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

Stemlets

In some notational conventions beams are allowed to extend over rests. Depending on preference, these beams may drop ‘stemlets’ to help the eye appreciate the rhythm better, and in some modern music the rest itself is omitted and only the stemlet remains.

This snippet shows a progression from traditional notation, to beams over the rest, to stemlets over the rest, to stemlets alone. Stemlets are generated by overriding the 'stemlet-length' property of `Staff.Stem`, while rests are hidden by setting '`transparent = ##t`'.

Some `\markup` elements are included in the source to highlight the different notations.

```
\paper { ragged-right = ##f }

{
  c'16^\markup { traditional } d' r f'
  g'16[^\markup { beams over rests } f' r d']

  % N.B. use Score.Stem to set for the whole score.
  \override Staff.Stem.stemlet-length = #0.75

  c'16[^\markup { stemlets over rests } d' r f']
  g'16[^\markup { stemlets and no rests } f'
    \once \hide Rest
    r16 d']
}
```

Strict beat beaming

Beamlets can be set to point in the direction of the beat to which they belong. The first beam avoids sticking out flags (the default); the second beam strictly follows the beat.

```
\relative c' {
  \time 6/8
  a8. a16 a a
  \set strictBeatBeaming = ##t
  a8. a16 a a
}
```

Subdividing beams

The beams of consecutive 16th (or shorter) notes are, by default, not subdivided. That is, the three (or more) beams stretch unbroken over entire groups of notes. This behavior can be modified to subdivide the beams into sub-groups by setting the property `subdivideBeams`. When set, multiple beams will be subdivided at intervals defined by the current value of `baseMoment` by reducing the multiple beams to the number of beams that indicates the metric value of the subdivision. If the group following the division is shorter than the current metric value (usually because the beam is incomplete) the number of beams reflects the longest possible subdivision group. However, if there is only one note left after the division this restriction isn't applied. Note that `baseMoment` defaults to one over the denominator of the current time signature if not set explicitly. It must be set to a fraction giving the duration of the beam sub-group using

the `ly:make-moment` function, as shown in this snippet. Also, when `baseMoment` is changed, `beatStructure` should also be changed to match the new `baseMoment`:

```
\relative c' {
  c32[ c c c c c c c]
  \set subdivideBeams = ##t
  c32[ c c c c c c c]

  % Set beam sub-group length to an eighth note
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c c c]

  % Set beam sub-group length to a sixteenth note
  \set baseMoment = #(ly:make-moment 1/16)
  \set beatStructure = 4,4,4,4
  c32[ c c c c c c c]

  % Shorten beam by 1/32
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c c] r32

  % Shorten beam by 3/32
  \set baseMoment = #(ly:make-moment 1/8)
  \set beatStructure = 2,2,2,2
  c32[ c c c c] r16.
  r2
}
```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

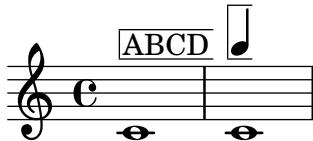

```
% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil
                   (interval-widen x-ext thickness) (cons 0 thickness)))))

  ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
  (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
  (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
  (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
  stencil))
```

```
% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
(define-markup-command (NWS-box layout props arg) (markup?)
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
thickness and padding around the markup."
  (let ((pad (* (magstep font-size) box-padding)))
    (m (interpret-markup layout props arg)))
  (NWS-box-stencil m thickness pad)))

% Test it:

\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note #"4" #1.0 }
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (e.g. $7/4$), but only the numerator (7 in this case). This can be easily done by using `\override Staff.TimeSignature.style = #'single-digit` to change the style permanently. By using `\revert Staff.TimeSignature.style`, this setting can be reversed. To apply the single-digit style to only one time signature, use the `\override` command and prefix it with a `\once`.

```
\relative c' {
    \time 3/4
    c4 c c
    % Change the style permanently
    \override Staff.TimeSignature.style = #'single-digit
    \time 2/4
    c4 c
    \time 3/4
    c4 c c
    % Revert to default style:
    \revert Staff.TimeSignature.style
    \time 2/4
    c4 c
    % single-digit style only for the next time signature
    \once \override Staff.TimeSignature.style = #'single-digit
    \time 5/4
    c4 c c c c
    \time 2/4
    c4 c
}
```

Tweaking grace layout within music

The layout of grace expressions can be changed throughout the music using the functions `add-grace-property` and `remove-grace-property`. The following example undefines the `Stem` direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

```
\relative c' {
    \new Staff {
        $(remove-grace-property 'Voice 'Stem 'direction)
        $(add-grace-property 'Voice 'NoteHead 'style 'cross)
        \new Voice {
            \acciaccatura { f16 } g4
            \grace { d16 e } f4
            \appoggiatura { f,,32 g a } e2
        }
    }
}
```

User defined time signatures

New time signature styles can be defined. The time signature in the second measure should be upside down in both staves.

```
#(add-simple-time-signature-style 'topsy-turvy
  (lambda (fraction)
    (make-rotate-markup 180 (make-compound-meter-markup fraction))))
```

<<

```
\new Staff {
  \time 3/4 f'2.
  \override Score.TimeSignature.style = #'topsy-turvy
  \time 3/4 R2. \bar "|."
}
\new Staff {
  R2. e ''
}
```

>>

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes

    \override Flag.stencil = #modern-straight-flag
    \testnotes

    \override Flag.stencil = #old-straight-flag
    \testnotes

    \override Flag.stencil = #flat-flag
    \testnotes

    \revert Flag.stencil
    \testnotes
}
```

```

}
\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}
}
}

```

Using grace note slashes with normal heads

The slash through the stem found in acciaccaturas can be applied in other situations.

```

\relative c' {
  \override Flag.stroke-style = #"grace"
  c8( d2) e8( f4)
}

```

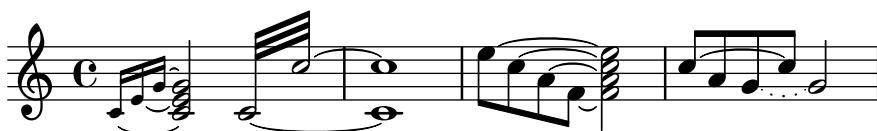

Using ties with arpeggios

Ties are sometimes used to write out arpeggios. In this case, two tied notes need not be consecutive. This can be achieved by setting the `tieWaitForNote` property to `#t`. The same feature is also useful, for example, to tie a tremolo to a chord, but in principle, it can also be used for ordinary consecutive notes.

```

\relative c' {
  \set tieWaitForNote = ##t
  \grace { c16[ ~ e ~ g] ~ } <c, e g>2
  \repeat tremolo 8 { c32 ~ c' ~ } <c c,>1
  e8 ~ c ~ a ~ f ~ <e' c a f>2
  \tieUp
  c8 ~ a
  \tieDown
  \tieDotted
  g8 ~ c g2
}

```

Expressive marks

Section “Expressive marks” in *Notation Reference*

Adding beams slurs ties etc. when using tuplet and non-tuplet rhythms

LilyPond syntax can involve many unusual placements for parentheses, brackets etc., which might sometimes have to be interleaved. For example, when entering a manual beam, the left square bracket has to be placed after the starting note and its duration, not before. Similarly, the right square bracket should directly follow the note which is to be at the end of the requested beaming, even if this note happens to be inside a tuplet section. This snippet demonstrates how to combine manual beaming, manual slurs, ties and phrasing slurs with tuplet sections (enclosed within curly braces).

```
{
r16[ g16 \tuplet 3/2 { r16 e'8} ]
g16( a \tuplet 3/2 { b d e') }
g8[( a \tuplet 3/2 { b d') e'] ~ }
\time 2/4
\tuplet 5/4 { e'32\(\( a b d' e' \) a'4.\)}
}
```

Adding parentheses around an expressive mark or chordal note

The `\parenthesize` function is a special tweak that encloses objects in parentheses. The associated grob is `ParenthesesItem`.

```
\relative c' {
  c2-\parenthesize
  \override ParenthesesItem.padding = #0.1
  \override ParenthesesItem.font-size = #-4
  <d \parenthesize f a>2
}
```

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```
glissandoSkipOn = {
  \override NoteColumn.glissando-skip = ##t
  \hide NoteHead
```

```
\override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
  \revert NoteColumn.glissando-skip
  \undo \hide NoteHead
  \revert NoteHead.no-ledgers
}

\relative c' {
  r8 f8\glissando
  \glissandoSkipOn
  f4 g a a8\noBeam
  \glissandoSkipOff
  a8

  r8 f8\glissando
  \glissandoSkipOn
  g4 a8
  \glissandoSkipOff
  a8 |

  r4 f\glissando \l
  \glissandoSkipOn
  a4\f \r
  \glissandoSkipOff
  b8!\r |
}
```

Adjusting the shape of falls and doits

The `shortest-duration-space` property may be tweaked to adjust the shape of falls and doits.

```
\relative c' {
  \override Score.Spacer.shortest-duration-space = #4.0
  c2-\bendAfter #5
  c2-\bendAfter #-4.75
  c2-\bendAfter #8.5
  c2-\bendAfter #-6
}
```

Alternative breve notes

Breve notes are also available with two vertical lines on each side of the notehead instead of one line and in baroque style.

```
\relative c'' {
    \time 4/2
    c\breve |
    \override Staff.NoteHead.style = #'altdefault
    b\breve
    \override Staff.NoteHead.style = #'baroque
    b\breve
    \revert Staff.NoteHead.style
    a\breve
}
```

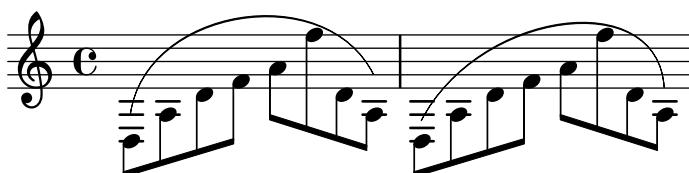

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a) }
```

```
\relative c' {
    \stemDown
    \slurUp
    \slurNotes
    \once \override Slur.eccentricity = #3.0
    \slurNotes
}
```

Breathing signs

Breathing signs are available in different tastes: commas (default), ticks, vees and “railroad tracks” (caesura).

```
\new Staff \relative c'' {
    \key es \major
    \time 3/4
    % this bar contains no \breathe
    << { g4 as g } \\ { es4 bes es } >> |
    % Modern notation:
    % by default, \breathe uses the rcomma, just as if saying:
    % \override BreathingSign.text = #(make-musicglyph-markup "scripts.rcomma")
    << { g4 as g } \\ { es4 \breathe bes es } >> |

    % rvarcomma and lvarcomma are variations of the default rcomma and lcomma
    % N.B.: must use Staff context here, since we start a Voice below
    \override Staff.BreathingSign.text =
        \markup { \musicglyph "scripts.rvarcomma" }
```

```

<< { g4 as g } \\ { es4 \breathe bes es } >> |

% vee
\override BreathingSign.text = \markup { \musicglyph "scripts.upbow" }
es8[ d es f g] \breathe f |

% caesura
\override BreathingSign.text =
\markup { \musicglyph "scripts.caesura.curved" }
es8[ d] \breathe es[ f g f] |
es2 r4 \bar "||"
}

```

Broken Crescendo Hairpin

In order to make parts of a crescendo hairpin invisible, the following method is used: A white rectangle is drawn on top of the respective part of the crescendo hairpin, making it invisible. The rectangle is defined as postscript code within a text markup.

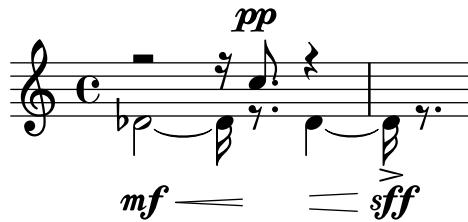

The markup command `with-dimensions` tells LilyPond to consider only the bottom edge of the rectangle when spacing it against the hairpin. The property `staff-padding` prevents the rectangle from fitting between the hairpin and staff.

Make sure the hairpin is in a lower layer than the text markup to draw the rectangle over the hairpin.

```

\relative c' {
  <<
  {
    \dynamicUp
    r2 r16 c'8.\pp r4
  }
  \\
  {
    \override DynamicLineSpanner.layer = #0
    des,2\mf\< ~
    \override TextScript.layer = #2
    \once\override TextScript.staff-padding = #6
    \once\override TextScript.vertical-skyline = #'()
    des16_\markup \with-dimensions #'(2 . 7) #'(0 . 0)
      \with-color #white
      \filled-box #'(2 . 7) #'(0 . 2) #0
    r8. des4 ~ des16->\sff r8.
  }
  >>
}

```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?))
#{%
  \once \override Voice.Hairpin.after-line-breaking =
  #(lambda (grob)
    (let* ((stencil (ly:hairpin::print grob))
           (par-y (ly:grob-parent grob Y))
           (dir (ly:grob-property par-y 'direction))
           (new-stencil (ly:stencil-aligned-to
                         (ly:stencil-combine-at-edge
                           (ly:stencil-aligned-to stencil X CENTER)
                           Y dir
                           (ly:stencil-aligned-to
```

```

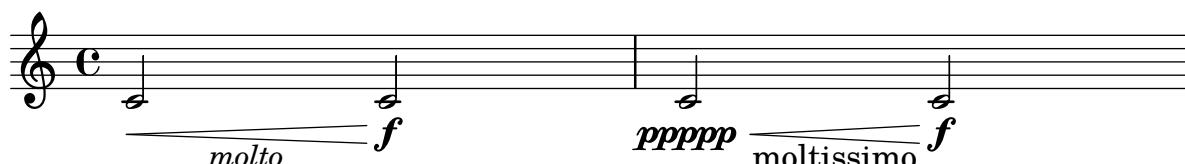

(grob-interpret-markup grob text) X CENTER))
X LEFT))
(staff-space (ly:output-def-lookup
  (ly:grob-layout grob) 'staff-space))
(staff-line-thickness
  (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
(par-x (ly:grob-parent grob X))
(dyn-text (grob::has-interface par-x 'dynamic-text-interface))
(dyn-text-stencil-x-length
  (if dyn-text
    (interval-length
      (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
    0))
(x-shift
  (if dyn-text
    (-
      (+ staff-space dyn-text-stencil-x-length)
      (* 0.5 staff-line-thickness)) 0)))
  (ly:grob-set-property! grob 'Y-offset 0)
  (ly:grob-set-property! grob 'stencil
    (ly:stencil-translate-axis
      new-stencil
      x-shift X))))
#})

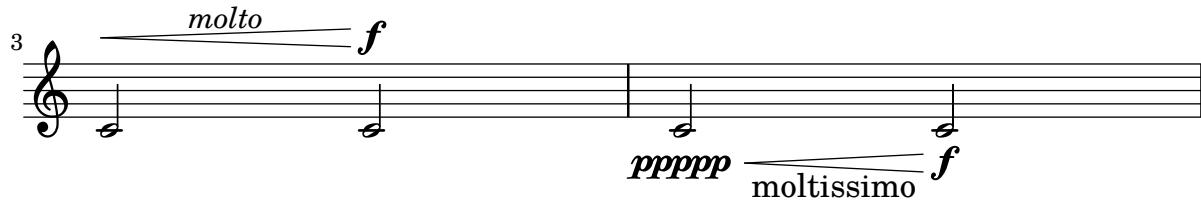

hairpinMolto =
\hairpinWithCenteredText \markup { \italic molto }

hairpinMore =
\hairpinWithCenteredText \markup { \larger moltissimo }

\layout { ragged-right = ##f }

\relative c' {
  \hairpinMolto
  c2< c\f
  \hairpinMore
  c2\ppppp< c\f
  \break
  \hairpinMolto
  c2^< c\f
  \hairpinMore
  c2\ppppp< c\f
}
}
```

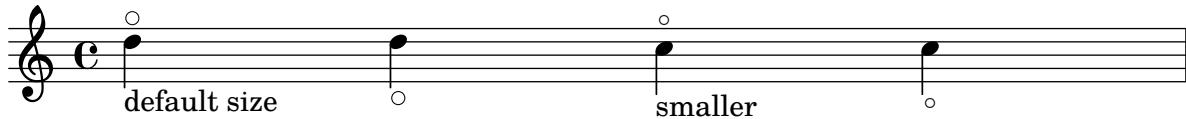

Changing \flageolet mark size

To make the \flageolet circle smaller use the following Scheme function.

```
smallFlageolet =
#(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
        (acons 'font-size -3
              (ly:music-property m 'tweaks)))
  m)

\layout { ragged-right = ##f }

\relative c' {
  d4^\flageolet_\markup { default size } d_\flageolet
  c4^\smallFlageolet_\markup { smaller } c_\smallFlageolet
}
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties `crescendoText` and `decrescendoText`.

The style of the spanner line can be changed by modifying the `'style` property of `DynamicTextSpanner`. The default value is `'dashed-line`, and other possible values include `'line`, `'dotted-line` and `'none`.

```
\relative c' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2< a
  a2 a
  a2 a
  a2 a\mf
}
```

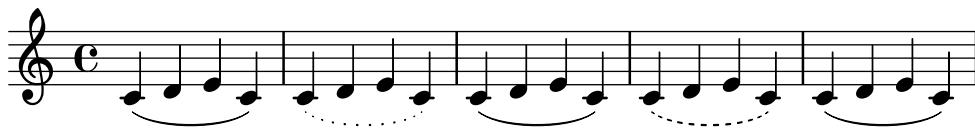

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
```

```
c4( d e c)
\slurDotted
c4( d e c)
\slurSolid
c4( d e c)
\slurDashed
c4( d e c)
\slurSolid
c4( d e c)
}
```

Changing the breath mark symbol

The glyph of the breath mark can be tuned by overriding the `text` property of the `BreathingSign` layout object with any markup text.

```
\relative c' {
  c2
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.rvarcomma" }
  \breathe
  d2
}
```

Changing the number of augmentation dots per note

The number of augmentation dots on a single note can be changed independently of the dots placed after the note.

```
\relative c' {
  c4.. a16 r2 |
  \override Dots.dot-count = #4
  c4.. a16 r2 |
  \override Dots.dot-count = #0
  c4.. a16 r2 |
  \revert Dots.dot-count
  c4.. a16 r2 |
}
```

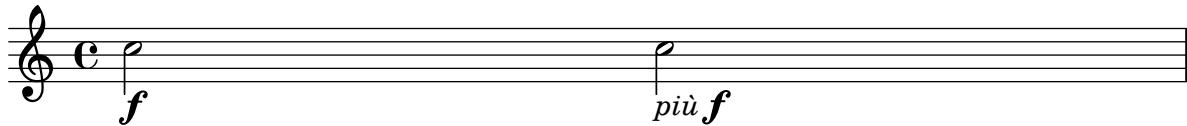

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }

\layout { ragged-right = ##f }

\relative c' {
    c2\f c-\piuF
}
```

Contemporary glissando

A contemporary glissando without a final note can be typeset using a hidden note and cadenza timing.

```
\relative c' {
    \time 3/4
    \override Glissando.style = #'zigzag
    c4 c
    \cadenzaOn
    c4\glissando
    \hideNotes
    c,,4
    \unHideNotes
    \cadenzaOff
    \bar "|"
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the `after-line-breaking` callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper { ragged-right = ##t }

\relative c' {
    \override Hairpin.to-barline = ##f
    \override Glissando.breakable = ##t
```

```
% show hairpin
\override Hairpin.after-line-breaking = ##t
% hide text span
\override TextSpanner.after-line-breaking =
#ly:spanner::kill-zero-spanned-time
e2\<\startTextSpan
% show glissando
\override Glissando.after-line-breaking = ##t
f2\glissando
\break
f,1\!\stopTextSpan
}
```

Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the 'script-priority' property. The lower this number, the closer it will be put to the note. In this example, the `TextScript` (the sharp symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the prall trill (the `Script`) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

```
\relative c''' {
  \once \override TextScript.script-priority = #-100
  a2^\prall^\markup { \sharp }

  \once \override Script.script-priority = #-100
  a2^\prall^\markup { \sharp }
}
```

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the fractions $2/3$ and $1/3$ adjusts the horizontal position.

```
\relative c'' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
```

```

{ c4.( d8) }
{ s4 s\turn }

>>
\transpose c d \relative c' <<
{ c4.( d8) }
{
  s4
  \once \set suggestAccidentals = ##t
  \once \override AccidentalSuggestion.outside-staff-priority = ##f
  \once \override AccidentalSuggestion.avoid-slur = #'inside
  \once \override AccidentalSuggestion.font-size = -3
  \once \override AccidentalSuggestion.script-priority = -1
  \single \hideNotes
  b8-\turn \noBeam
  s8
}
>>
}

```

Creating arpeggios across notes in different voices

An arpeggio can be drawn across notes in different voices on the same staff if the `Span_arpeggio_engraver` is added to the `Staff` context:

```

\new Staff \with {
  \consists "Span_arpeggio_engraver"
}

\relative c' {
  \set Staff.connectArpeggios = ##t
  <<
  { <e' g>4\arpeggio <d f> <d f>2 }
  \\
  { <d, f>2\arpeggio <g b>2 }
  >>
}

```

Creating cross-staff arpeggios in a piano staff

In a `PianoStaff`, it is possible to let an arpeggio cross between the staves by setting the property `PianoStaff.connectArpeggios`.

```

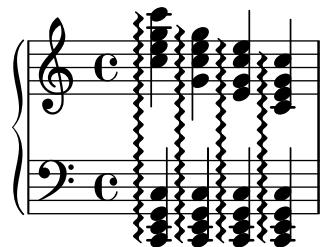

\new PianoStaff \relative c' <<
  \set PianoStaff.connectArpeggios = ##t
  \new Staff {

```

```

<c e g c>4\arpeggio
<g c e g>4\arpeggio
<e g c e>4\arpeggio
<c e g c>4\arpeggio
}
\new Staff {
  \clef bass
  \repeat unfold 4 {
    <c,, e g c>4\arpeggio
  }
}
>>

```

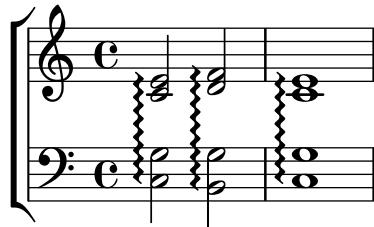

Creating cross-staff arpeggios in other contexts

Cross-staff arpeggios can be created in contexts other than `GrandStaff`, `PianoStaff` and `StaffGroup` if the `Span_arpeggio_engraver` is included in the `Score` context.

```

\score {
  \new ChoirStaff {
    \set Score.connectArpeggios = ##t
    <<
    \new Voice \relative c' {
      <c e>2\arpeggio
      <d f>2\arpeggio
      <c e>1\arpeggio
    }
    \new Voice \relative c {
      \clef bass
      <c g'>2\arpeggio
      <b g'>2\arpeggio
      <c g'>1\arpeggio
    }
    >>
  }
  \layout {
    \context {
      \Score
      \consists "Span_arpeggio_engraver"
    }
  }
}

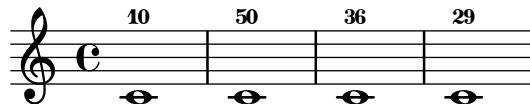

```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{
      \markup \concat {
        \normal-text \italic \fontsize #2 (
          \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    #}))

\relative c'' {
  c4\paren\f c c \dynamicUp c\paren\p
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal

mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
    \key a \major
    \set Score.markFormatter = #format-mark-box-letters
    \once \override Score.RehearsalMark.outside-staff-priority = #5000
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
    \mark \markup { \bold { Senza denti } }

    % the hidden measure and bar line
    % \cadenzaOn turns off automatic calculation of bar numbers
    \cadenzaOn
    \once \override Score.TimeSignature.stencil = ##f
    \time 1/16
    s16 \bar ""
    \cadenzaOff

    \time 4/4
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark \markup { \box \bold Intro }
    d'1
    \mark \default
    d'1
}
```

Senza denti
Intro **A**

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices.

The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaconna from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
<<
{
  d16( a') s a s a[ s a] s a[ s a]
}
\\
{
  \slurUp
  bes,16[ s e](
  \hideNotes a)
  \unHideNotes f[( 
  \hideNotes a)
  \unHideNotes fis](
```

```
\hideNotes a)
\unHideNotes g[(
\hideNotes a)
\unHideNotes gis]( 
\hideNotes a)
}
>>
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
    \override TextSpanner.bound-details.left.text = #"bla"
    \override TextSpanner.bound-details.right.text = #"blu"
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'line
    \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'dashed-line
    \override TextSpanner.bound-details.left.text =
        \markup { \draw-line #'(0 . 1) }
    \override TextSpanner.bound-details.right.text =
        \markup { \draw-line #'(0 . -2) }
    \once \override TextSpanner.bound-details.right.padding = #-2

    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \set Staff.middleCPosition = #-13
    \override TextSpanner.dash-period = #10
    \override TextSpanner.dash-fraction = #0.5
    \override TextSpanner.thickness = #10
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan
```

}

Double glissando

To connect chords with glissando lines, attach a second glissando to a hidden voice.

```
\relative c {
  \clef bass
  <<
  {
    % new voice (= \voiceOne), hidden
    \hideNotes
    % attach glissando to note heads
    e2\glissando g
  }
  \\
  {
    % original voice with chords rearranged so that
    % glissando is attached to a & c
    <e a,>2\glissando <g c,>
  }
  >>
}
```

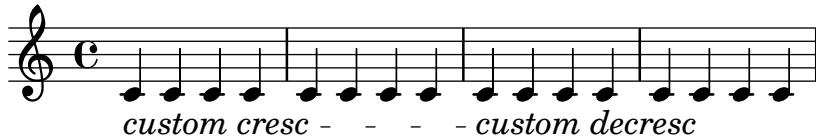

Dynamics custom text spanner postfix

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use -\mycresc, otherwise the spanner start will rather be assigned to the next note.

```
% Two functions for (de)crescendo spanners where you can explicitly give the
% spanner text.
mycresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

mydecresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'DecrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))
```

```
\relative c' {
    c4-\mycresc "custom cresc" c4 c4 c4 |
    c4 c4 c4 c4 |
    c4-\mydecresc "custom decresc" c4 c4 c4 |

}
```

Dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. \< and \> produce hairpins by default, \cresc etc. produce text spanners by default.

```
% Some sample text dynamic spanners, to be used as postfix operators
```

```
crpoco =
#(make-music 'CrescendoEvent
    'span-direction START
    'span-type 'text
    'span-text "cresc. poco a poco")
```

```
\relative c' {
    c4\cresc d4 e4 f4 |
    g4 a4\! b4\crpoco c4 |
    c4 d4 e4 f4 |
    g4 a4\! b4\< c4 |
    g4\dim a4 b4\decresc c4\!
}
```

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

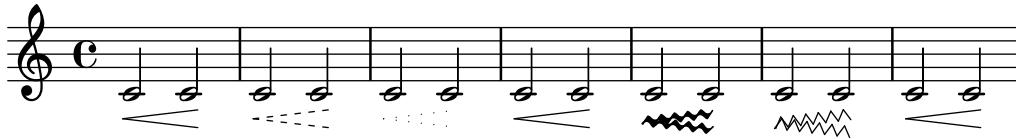

```
\relative c' {
    a2 \glissando
    \once \override NoteColumn.glissando-skip = ##t
    f''4 d,
}
```

Hairpins with different line styles

Hairpins can take any style from `line-interface` - dashed-line, dotted-line, line, trill or zigzag.

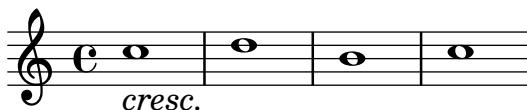

```
\relative c' {
    c2< c\!
    \override Hairpin.style = #'dashed-line
    c2< c\!
    \override Hairpin.style = #'dotted-line
    c2< c\!
    \override Hairpin.style = #'line
    c2< c\!
    \override Hairpin.style = #'trill
    c2< c\!
    \override Hairpin.style = #'zigzag
    c2< c\!
    \revert Hairpin.style
    c2< c\!
}
```

Hiding the extender line for text dynamics

Text style dynamic changes (such as cresc. and dim.) are printed with a dashed line showing their extent. This line can be suppressed in the following way:

```
\relative c'' {
    \override DynamicTextSpanner.style = #'none
    \crescTextCresc
    c1< | d | b | c\!
}
```

Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre pp” horizontally, so that it is aligned as if it were only the `\pp`, there are several approaches:

- * Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

- * Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark, so that after lilypond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.

```

* Shift the dynamic script \once\override ... .X-offset = ...      Drawback:
\once\override is needed for every invocation!

* Set the dimensions of the additional text to 0 (using #:with-dimensions '(0 . 0) '(0 .
0)). Drawback: To LilyPond “sempre” has no extent, so it might put other stuff there and
create collisions (which are not detected by the collision detection!). Also, there seems to be
some spacing, so it's not exactly the same alignment as without the additional text

* Add an explicit shifting directly inside the scheme function for the dynamic-script.

* Set an explicit alignment inside the dynamic-script. By default, this won't have any effect,
only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply
to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center
of pp.

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

% Solution 2: Using a dynamic script & shifting with
%             \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
     #:italic "sempre"
     #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
%             puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
     #:italic "sempre"
     #:dynamic "pp"
     #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp"))))

```

```
% Solution 5: Dynamic with explicit shifting inside the scheme function
semppG =
#(make-dynamic-script
  (markup #:hspace 0
    #:translate '(-18.85 . 0)
    #:line (#:normal-text
              #:italic "sempre"
              #:dynamic "pp")))

% Solution 6: Dynamic with explicit alignment. This has only effect
%           if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%           not at the center of pp
semppMII =
#(make-dynamic-script
  (markup #:line (#:right-align
                  #:normal-text
                  #:italic "sempre"
                  #:dynamic "pp")))

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

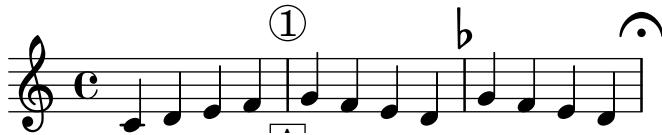

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \flat { \bold \small \italic Fine. } }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
```

```
\mark \markup \center-column { \fermata \box z }
}
```

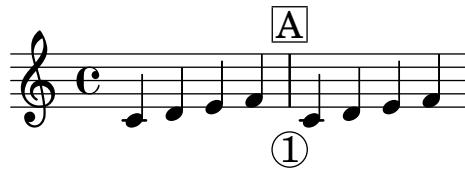

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```
\score {
  \relative c'
  <<
  \new Staff {

```

Inserting a caesura

Caesura marks can be created by overriding the 'text' property of the `BreathingSign` object. A curved caesura mark is also available.

```
\relative c' {
    \override BreathingSign.text = \markup {
        \musicglyph "scripts.caesura.straight"
    }
    c8 e4. \breathe g8. e16 c4

    \override BreathingSign.text = \markup {
        \musicglyph "scripts.caesura.curved"
    }
    g8 e'4. \breathe g8. e16 c4
}
```

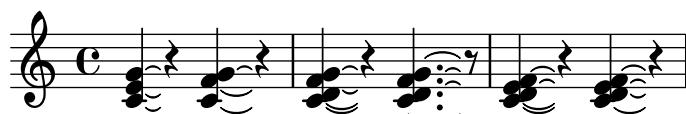

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration'.

```
\relative c' {
    <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
    <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

    <c d e f>4\laissezVibrer r
    \override LaissezVibrerTieColumn.tie-configuration
        = #`((-7 . ,DOWN)
          (-5 . ,DOWN)
          (-3 . ,UP)
          (-1 . ,UP)))
    <c d e f>4\laissezVibrer r
}
```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```
\relative c' {
    \override TextSpanner.bound-padding = #1.0
    \override TextSpanner.style = #'line
    \override TextSpanner.bound-details.right.arrow = ##t
    \override TextSpanner.bound-details.left.text = #"fof"
```

```
\override TextSpanner.bound-details.right.text = #"gag"  

\override TextSpanner.bound-details.right.padding = #0.6  
  

\override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER  

\override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER  
  

\override Glissando.bound-details.right.arrow = ##t  

\override Glissando.arrow-length = #0.5  

\override Glissando.arrow-width = #0.25  
  

a8\startTextSpan gis a4 b\glissando b,  

g'4 c\stopTextSpan c2  
}
```

Making slurs with complex dash structure

Slurs can be made with complex dash patterns by defining the `dash-definition` property. `dash-definition` is a list of `dash-elements`. A `dash-element` is a list of parameters defining the dash behavior for a segment of the slur.

The slur is defined in terms of the bezier parameter `t` which ranges from 0 at the left end of the slur to 1 at the right end of the slur. `dash-element` is a list (`start-t stop-t dash-fraction dash-period`). The region of the slur from `start-t` to `stop-t` will have a fraction `dash-fraction` of each `dash-period` black. `dash-period` is defined in terms of staff spaces. `dash-fraction` is set to 1 for a solid slur.

```
\relative c' {  

  \once \override Slur.dash-definition = #'((0 0.3 0.1 0.75)  

    (0.3 0.6 1 1)  

    (0.65 1.0 0.4 0.75))  

  c4( d e f)  

  \once \override Slur.dash-definition = #'((0 0.25 1 1)  

    (0.3 0.7 0.4 0.75)  

    (0.75 1.0 1 1))  

  c4( d e f)
}
```

Modifying default values for articulation shorthand notation

The shorthands are defined in ‘ly/script-init.ly’, where the variables `dashHat`, `dashPlus`, `dashDash`, `dashBar`, `dashLarger`, `dashDot`, and `dashUnderscore` are assigned default values. The default values for the shorthands can be modified. For example, to associate the `--`

(dashPlus) shorthand with the trill symbol instead of the default + symbol, assign the value `trill` to the variable `dashPlus`:

```
\relative c' { c1-- }
```

```
dashPlus = "trill"
```

```
\relative c' { c1-- }
```

Moving slur positions vertically

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

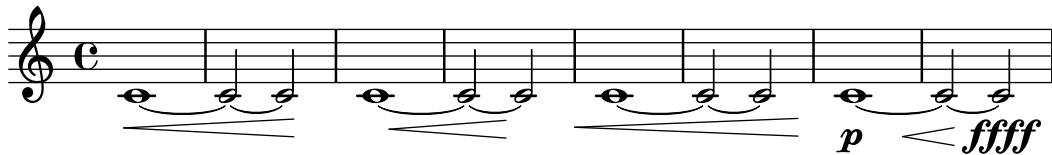

```
\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
  e4( a)
  \override Slur.positions = #'(3 . 3)
  e4( a)
  \override Slur.positions = #'(4 . 4)
  e4( a)
  \override Slur.positions = #'(5 . 5)
  e4( a)
  \override Slur.positions = #'(0 . 5)
  e4( a)
  \override Slur.positions = #'(5 . 0)
  e4( a)
  \stemUp
  \override Slur.positions = #'(-5 . -5)
  e4( a)
  \stemDown
  \revert Slur.positions
  e4( a)
}
```

Moving the ends of hairpins

The ends of hairpins may be offset by setting the `shorten-pair` property of the `Hairpin` object. Positive values move endpoints to the right, negative to the left. Unlike the `minimum-length` property, this property only affects the appearance of the hairpin; it does not adjust horizontal spacing (including the position of bounding dynamics). This method is thus suitable for fine-tuning a hairpin within its allotted space.

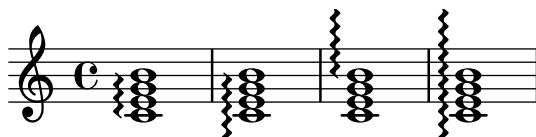

```
{
    c'1~\<
    c'2~ c'!\!
\once \override Hairpin.shorten-pair = #'(2 . 2)
    c'1~\<
    c'2~ c'!\!
\once \override Hairpin.shorten-pair = #'(-2 . -2)
    c'1~\<
    c'2~ c'!\!
    c'1~\p-\tweak shorten-pair #'(2 . 0)\<
    c'2~ c'\ffff
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
    <c e g b>1\arpeggio
\once \override Arpeggio.positions = #'(-5 . 0)
    <c e g b>1\arpeggio
\once \override Arpeggio.positions = #'(0 . 5)
    <c e g b>1\arpeggio
\once \override Arpeggio.positions = #'(-5 . 5)
    <c e g b>1\arpeggio
}
```

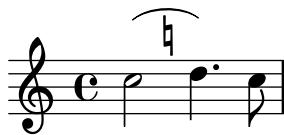

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to false in order to be printed inside slurs.

```
\relative c'' {
```

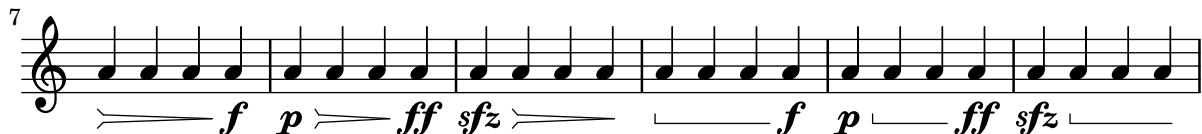

```
\override TextScript.avoid-slur = #'inside
\override TextScript.outside-staff-priority = ##f
c2(^\markup { \halign #'-10 \natural } d4.) c8
}
```

Printing hairpins in various styles

Hairpin dynamics may be created in a variety of styles.

```
\relative c' {
  \override Hairpin.stencil = #flared-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4< a a a\f
  a4\p< a a a\ff
  a4\sfz< a a a\!
  \override Hairpin.stencil = #flared-hairpin
  a4> a a a\f
  a4\p> a a a\ff
  a4\sfz> a a a\!
  \override Hairpin.stencil = #constante-hairpin
  a4> a a a\f
  a4\p> a a a\ff
  a4\sfz> a a a\!
}
```

Printing hairpins using al niente notation

Hairpin dynamics may be printed with a circled tip (“al niente” notation) by setting the `circled-tip` property of the `Hairpin` object to `#t`.

```
\relative c' {
  \override Hairpin.circled-tip = ##t
  c2< c\!
  c4> c< c2\!
}
```

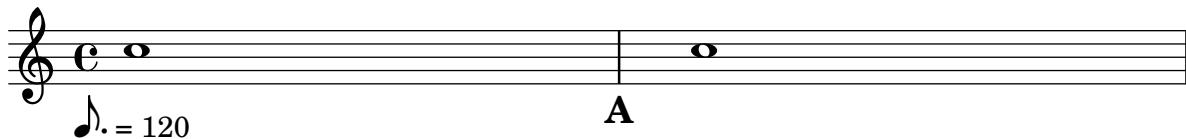

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the `direction` property of `MetronomeMark` or `RehearsalMark` appropriately.

```
\layout {
    indent = 0
    ragged-right = ##f
}

{
    % Metronome marks below the staff
    \override Score.MetronomeMark.direction = #DOWN
    \tempo 8. = 120
    c''1

    % Rehearsal marks below the staff
    \override Score.RehearsalMark.direction = #DOWN
    \mark \default
    c''1
}
```

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the '`to-barline`' property.

```
\relative c' {
    e4< e2.
    e1\!
    \override Hairpin.to-barline = ##f
    e4< e2.
    e1\!
}
```

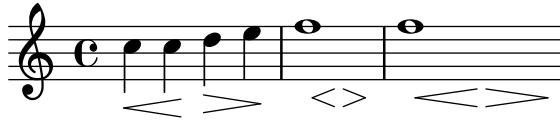

Setting the minimum length of hairpins

If hairpins are too short, they can be lengthened by modifying the `minimum-length` property of the `Hairpin` object.

```
\relative c' {
    c4< c\! d\> e\!
    << f1 { s4 s< s\> s\! } >>
    \override Hairpin.minimum-length = #5
```

```
<< f1 { s4 s\< s\> s\! } >>
}
```

Showing the same articulation above and below a note or chord

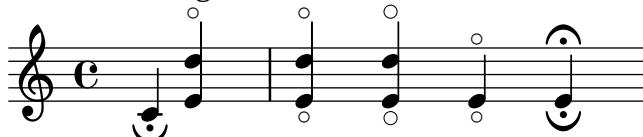

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4 \fermata^ \fermata` will only show a fermata below. The fermata above will simply be ignored. However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `'add-stem-support` would be required. So, the solution is to write the note as a chord and add the articulations inside the `<...>`. The direction will always be above, but one can tweak this via a `\tweak`:

```
% The same as \flageolet, just a little smaller
smallFlageolet =
#(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
        (acons 'font-size -2
              (ly:music-property m 'tweaks)))
  m)

\relative c' {
  s4^"Wrong:"
  c4_\fermata^ \fermata % The second fermata is ignored!
  <e d'>4^ \smallFlageolet_\smallFlageolet

  s4^"Works if written inside a chord:"
  <e_\smallFlageolet d' ^ \smallFlageolet>4
  <e_\flageolet d' ^ \flageolet>4
  <e_\smallFlageolet^ \smallFlageolet>4
  <e_\fermata^ \fermata>4
}
```

Wrong: Works if written inside a chord:

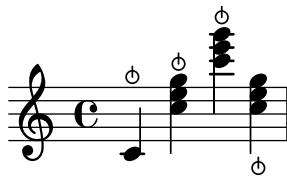

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
  c4 \snappizzicato
```

```
<c' e g>4\snappizzicato
<c' e g>4^\\snappizzicato
<c, e g>4_\snappizzicato
}
```

Using a tick as the breath mark symbol

Vocal and wind music frequently uses a tick mark as a breathing sign. This indicates a breath that subtracts a little time from the previous note rather than causing a short pause, which is indicated by the comma breath mark. The mark can be moved up a little to take it away from the stave.

```
\relative c'' {
  c2
  \breathe
  d2
  \override BreathingSign.Y-offset = #2.6
  \override BreathingSign.text =
    \markup { \musicglyph "scripts.tickmark" }
  c2
  \breathe
  d2
}
```

Using arpeggioBracket to make divisi more visible

The `arpeggioBracket` can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```
\include "english.ly"

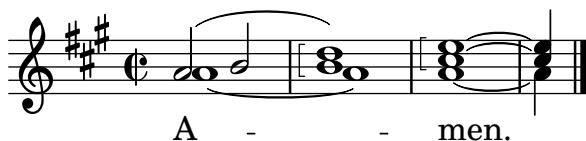

\score {
  \relative c'' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper"
      <<
        { \voiceOne \arpeggioBracket
          a2( b2
          <b d>1\arpeggio)
          <cs e>\arpeggio ~
          <cs e>4
        }
  }
```

```

\addlyrics { \lyricmode { A -- men. } }

>>
\new Voice = "lower"
{ \voiceTwo
  a1 ~
  a
  a ~
  a4 \bar "| ."
}
>>
}
\layout { ragged-right = ##t }
}

```

Using double slurs for legato chords

Some composers write two slurs when they want legato chords. This can be achieved by setting `doubleSlurs`.

```

\relative c' {
  \set doubleSlurs = ##
  <c e>4( <d f> <c e> <d f>)
}

```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```

{
  \override Score.StaffSymbol.layer = #4
  \override Staff.TimeSignature.layer = #3
  b'2 b'^
  \once \override Staff.TimeSignature.whiteout = ##t
  \time 3/4
  b' r4
}

```

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
#(let ((m (make-articulation "stopped")))
  (set! (ly:music-property m 'tweaks)
        (acons 'font-size 3
              (acons 'stencil (lambda (grob)
                                 (grob-interpret-markup
                                  grob
                                  (make-draw-line-markup '(0 . 1))))
              (ly:music-property m 'tweaks))))
  m)

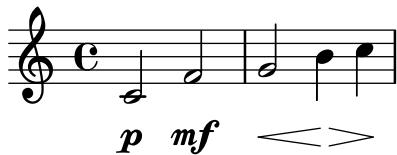

\relative c' {
  a'4^{\upline} a( c d')_ {\upline}
}
```

Vertically aligning dynamics across multiple notes

Dynamics that occur at, begin on, or end on the same note will be vertically aligned. To ensure that dynamics are aligned when they do not occur on the same note, increase the `staff-padding` property of the `DynamicLineSpanner` object.

```
\relative c' {
  \override DynamicLineSpanner.staff-padding = #4
  c2\p f\mf
  g2\< b4\> c\!
}
```

Repeats

Section “Repeats” in *Notation Reference*

Adding volta brackets to additional staves

The `Volta_engraver` by default resides in the `Score` context, and brackets for the repeat are thus normally only printed over the topmost staff. This can be adjusted by adding the `Volta_engraver` to the `Staff` context where the brackets should appear; see also the “Volta multi staff” snippet.

<<

```
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
\new Staff \with { \consists "Volta_engraver" } { c'2 g' e' a' }
\new Staff { \repeat volta 2 { c'1 } \alternative { c' } }
```

>>

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure’s extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
```

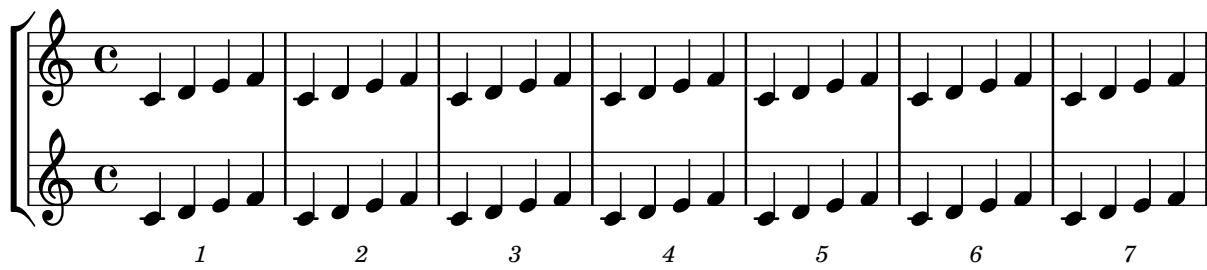

```

}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <-
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
  \new Dynamics {
    \startMeasureCount
    s1*7
    \stopMeasureCount
  }
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```
% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357
```

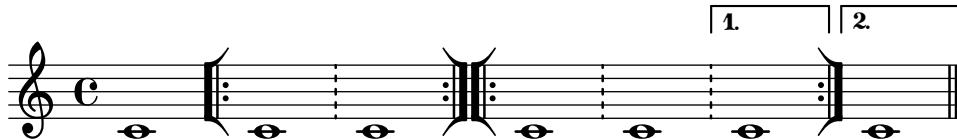

```

\layout {
  \context {
    \Score
    %% Changing the defaults from engraver-init.ly
    defaultBarType = "#!"
    startRepeatType = "#[|:"
    endRepeatType = "#:|]"
    doubleRepeatType = "#:|[]|:"
  }
}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
  }
}

```

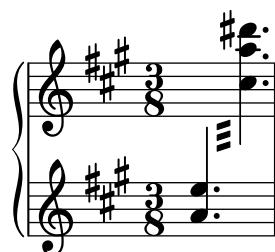

```
{
  %% v2.18 workaround
  \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
  c'
}
}
\bar "|."
}
```

Cross-staff tremolos

Since `\repeat tremolo` expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its `\change Staff` command.

```
\new PianoStaff <<
  \new Staff = "up" \relative c' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
>>
```

Engraving tremolos with floating beams

If a tremolo's total duration is less than a quarter-note, or exactly a half-note, or between a half-note and a whole-note, it is normally typeset with all beams touching the stems. Certain

engraving styles typeset some of these beams as centered floating beams that do not touch the stems. The number of floating beams in this type of tremolo is controlled with the 'gap-count' property of the Beam object, and the size of the gaps between beams and stems is set with the 'gap' property.

```
\relative c'' {
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #2
    \repeat tremolo 8 { a32 f }
    \override Beam.gap-count = #3
    \repeat tremolo 8 { a32 f }

    \override Beam.gap-count = #3
    \override Beam.gap = #1.33
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #1
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.67
    \repeat tremolo 8 { a32 f }
    \override Beam.gap = #0.33
    \repeat tremolo 8 { a32 f }
}
```

Isolated percent repeats

Isolated percents can also be printed.

```
makePercent =
#(define-music-function (note) (ly:music?)
  "Make a percent repeat the same length as NOTE."
  (make-music 'PercentEvent
              'length (ly:music-length note)))

\relative c'' {
    \makePercent s1
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
```

```
\clef bass
c4 r g r
c4 r g r
c4 r g r
c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "|"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
}
```

```
\break
e'4 d'
\repeat unfold 7 {
    g'4 f' e' d'
}
\stopMeasureCount
}
```

A musical score consisting of three staves. The first two staves each have seven measures, labeled 1 through 7 above the notes. The third staff begins at measure 8 and also has seven measures, labeled 8 through 14 above the notes. Each measure contains a single eighth note.

Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```
\relative c'' {
    \set countPercentRepeats = ##t
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
    \repeat percent 10 { c1 } \break
    \set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
    \repeat percent 6 { c1 d1 }
}
```

A musical score consisting of two staves. The first staff contains four measures labeled 11 through 14. The second staff contains three measures labeled 15 through 17. Measure 11 starts with an open circle, followed by a half note, a dotted half note, a half note, a dotted half note, a half note, a dotted half note, and a half note. Measures 12-14 show a similar pattern with different note heads. Measures 15-17 show a similar pattern with different note heads.

Percent repeat counter

Measure repeats of more than two repeats can get a counter when the convenient property is switched, as shown in this example:

```
\relative c'' {
    \set countPercentRepeats = ##t
    \repeat percent 4 { c1 }
}
```

A musical score consisting of one staff containing four measures labeled 11 through 14. Each measure contains a single eighth note. Measures 11 and 12 are labeled with a '2' above them, measures 13 and 14 are labeled with a '4' above them.

Positioning segno and coda (with line break)

If you want to place an exiting segno sign and add text like “D.S. al Coda” next to it where usually the staff lines are you can use this snippet. The coda will resume in a new line. There is a variation documented in this snippet, where the coda will remain on the same line.

```
{
    \clef treble
    \key g \major
    \time 4/4
    \relative c'' {
        \repeat unfold 4 {
            c4 c c c
        }

        % Set segno sign as rehearsal mark and adjust size if needed
        % \once \override Score.RehearsalMark.font-size = #3
        \mark \markup { \musicglyph "scripts.segno" }
        \repeat unfold 2 {
            c4 c c c
        }

        % Set coda sign as rehearsal mark and adjust size if needed
        \once \override Score.RehearsalMark.font-size = #4
        \mark \markup { \musicglyph "scripts.coda" }
        \repeat unfold 2 {
            c4 c c c
        }

        % Should Coda be on anew line?
        % Coda NOT on new line: use \nobreak
        % Coda on new line: DON'T use \nobreak
        % \noBreak

        \bar "||"

        % Set segno sign as rehearsal mark and adjust size if needed
        \once \override Score.RehearsalMark.break-visibility =
            #begin-of-line-invisible
        % \once \override Score.RehearsalMark.font-size = #3
        \mark \markup { \musicglyph "scripts.segno" }

        % Here begins the trickery!
        % \cadenzaOn will suppress the bar count
        % and \stopStaff removes the staff lines.
        \cadenzaOn
        \stopStaff
            % Some examples of possible text-displays

            % text line-aligned
            % =====
            % Move text to the desired position
            % \once \override TextScript.extra-offset = #'( 2 . -3.5 )
```

```
% | <>^\markup { D.S. al Coda } }

% text center-aligned
% =====
% Move text to the desired position
% \once \override TextScript.extra-offset = #'( 6 . -5.0 )
% | <>^\markup { \center-column { D.S. "al Coda" } }

% text and symbols center-aligned
% =====
% Move text to the desired position
% and tweak spacing for optimum text alignment
\repeat unfold 1 {
    s1
    \bar ""
}
\once \override TextScript.extra-offset = #'( 0 . -3.0 )
\once \override TextScript.word-space = #1.5
<>^\markup { \center-column { "D.S. al Coda"
    \line {
        \musicglyph "scripts.coda"
        \musicglyph "scripts.tenuto"
        \musicglyph "scripts.coda"} } }

% Increasing the unfold counter will expand the staff-free space
\repeat unfold 3 {
    s1
    \bar ""
}
% Resume bar count and show staff lines again
\startStaff
\cadenzaOff

% Should Coda be on new line?
% Coda NOT on new line: DON'T use \break
% Coda on new line: use \break
\break

% Show up, you clef and key!
\once \override Staff.KeySignature.break-visibility = #end-of-line-invisible
\once \override Staff.Clef.break-visibility = #end-of-line-invisible

% Set coda sign as rehearsal mark and adjust size and position

% Put the coda sign on top of the (treble-)clef
% depending on coda's line-position

% Coda NOT on new line, use this:
% \once \override Score.RehearsalMark.extra-offset = #'( -2 . 1.75 )

% Coda on new line, use this:
\once \override Score.RehearsalMark.extra-offset = #'( -5 . .5 )
```

```
\once \override Score.RehearsalMark.fontSize = #5
\mark \markup { \musicglyph "scripts.coda" }

% The coda
\repeat unfold 6 {
  c4 c c c
}
\bar "| ."
}
```

D.S. al Coda
⊕ - ⊕

Setting the double repeat default for volte

There are three different styles of double repeats for volte, that can be set using `doubleRepeatType`.

```
\relative c' {
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#:::."
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#:|.:"
  \repeat volta 1 { c1 }
  \set Score.doubleRepeatType = "#:|.:"
  \repeat volta 1 { c1 }
}
```

Shortening volta brackets

By default, the volta brackets will be drawn over all of the alternative music, but it is possible to shorten them by setting `voltaSpannerDuration`. In the next example, the bracket only lasts one measure, which is a duration of $3/4$.

```
\relative c' {
```

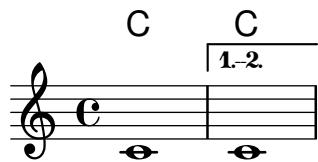

```
\time 3/4
c4 c c
\set Score.voltaSpannerDuration = #(ly:make-moment 3/4)
\repeat volta 5 { d4 d d }
\alternative {
  {
    e4 e e
    f4 f f
  }
  { g4 g g }
}
}
```

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volte can be put under chords.

```
\score {
  <<
  \chords {
    c1
    c1
  }
  \new Staff \with {
    \consists "Volta_engraver"
  }
  {
    \repeat volta 2 { c'1 }
    \alternative { c' }
  }
  >>
  \layout {
    \context {
      \Score
      \remove "Volta_engraver"
    }
  }
}
```

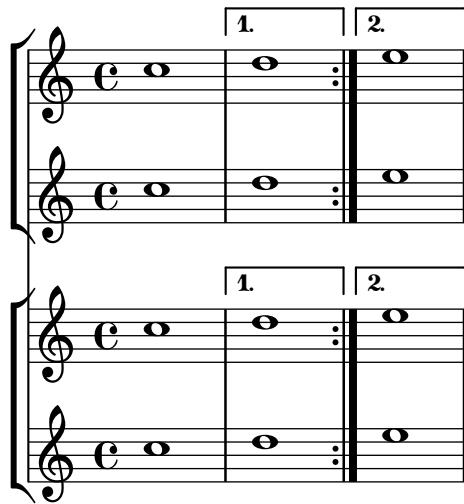

Volta multi staff

By adding the `Volta_engraver` to the relevant staff, volte can be put over staves other than the topmost one in a score.

```
voltaMusic = \relative c' {
```

```
\repeat volta 2 {
    c1
}
\alternative {
    d1
    e1
}
}

<<
\new StaffGroup <<
    \new Staff \voltaMusic
    \new Staff \voltaMusic
>>
\new StaffGroup <<
    \new Staff \with { \consists "Volta_engraver" }
        \voltaMusic
    \new Staff \voltaMusic
>>
>>
```

Volta text markup using repeatCommands

Though volta are best specified using `\repeat volta`, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with `\markup`.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax `#(list (list 'volta textIdentifier))`. Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' {
    c1
    \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
    c4 b d e
    \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
```

```
f1  
\set Score.repeatCommands = #'((volta #f))  
}
```

Simultaneous notes

Section “Simultaneous notes” in *Notation Reference*

Additional voices to avoid collisions

In some instances of complex polyphonic music, additional voices are necessary to prevent collisions between notes. If more than four parallel voices are needed, additional voices can be added by defining a variable using the Scheme function `context-spec-music`.

```
voiceFive = #(context-spec-music (make-voice-props-set 4) 'Voice)
```

```
\relative c' {
  \time 3/4
  \key d \minor
  \partial 2
  <<
  \new Voice {
    \voiceOne
    a4. a8
    e'4 e4. e8
    f4 d4. c8
  }
  \new Voice {
    \voiceTwo
    d,2
    d4 cis2
    d4 bes2
  }
  \new Voice {
    \voiceThree
    f'2
    bes4 a2
    a4 s2
  }
  \new Voice {
    \voiceFive
    s2
    g4 g2
    f4 f2
  }
  >>
}
```

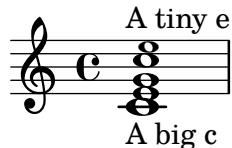

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets < >), before the note to be altered, place the \tweak command, followed by #'font-size and define the proper size like #-2 (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ^\markup { A tiny e }_ \markup { A big c }
}
```

Changing partcombine texts

When using the automatic part combining feature, the printed text for the solo and unison sections may be changed:

```
\new Staff <<
  \set Staff.soloText = #"girl"
  \set Staff.soloIIText = #"boy"
  \set Staff.aDueText = #"together"
  \partcombine
    \relative c'' {
      g4 g r r
      a2 g
    }
    \relative c'' {
      r4 r a( b)
      a2 g
    }
  >>
```

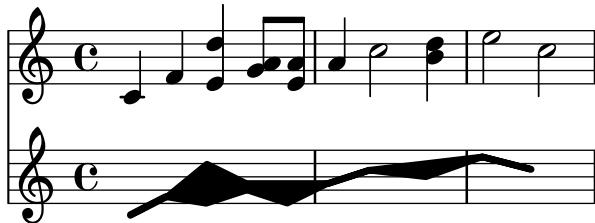

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Combining two parts on the same staff

The part combiner tool (\partcombine command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property printPartCombineTexts to f. For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, \partcombine without texts, and \partcombine with texts.

```

musicDown = \relative c' {
    g4 e4.( d8) c4 |
    r2 g'4( f8 e) |
    d2 \stemDown a
}

\score {
    <<
    \new Staff \with { instrumentName = #"Standard polyphony" }

    << \musicUp \\ \musicDown >>

    \new Staff \with {
        instrumentName = #"PartCombine without text"
        printPartCombineTexts = ##f
    }

    \partcombine \musicUp \musicDown

    \new Staff \with { instrumentName = #"PartCombine with text" }
        \partcombine \musicUp \musicDown
    >>
}

\layout {
    indent = 6.0\cm
    \context {
        \Score
        \override SystemStartBar.collapse-height = #30
    }
}
}

```

Standard polyphony

PartCombine without text

PartCombine with text

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
    \once \override Stem.length = #11
}

fixB = {
    \once \override NoteHead.X-offset = #1.7
    \once \override Stem.length = #7
    \once \override Stem.rotation = #'(45 0 0)
    \once \override Stem.extra-offset = #'(-0.1 . -0.2)
    \once \override Flag.style = #'no-flag
    \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
    << { \fixA <b d!>8 } \\ { \voiceThree \fixB dis } >> s
}
```

Double glissando

To connect chords with glissando lines, attach a second glissando to a hidden voice.

```
\relative c {
    \clef bass
    <<
    {
        % new voice (= \voiceOne), hidden
        \hideNotes
        % attach glissando to note heads
        e2\glissando g
    }
    \\
    {
        % original voice with chords rearranged so that
        % glissando is attached to a & c
        <e a,>2\glissando <g c,>
```

```

}
>>
}
```

Forcing horizontal shift of notes

When the typesetting engine cannot cope, the following syntax can be used to override typesetting decisions. The units of measure used here are staff spaces.

```

\relative c' <<
{
  <d g>2 <d g>
}
\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = #1.7
  <b f'>2
}
>>
```

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```

\relative {
  \time 2/4
  <<
  {
    \once \hide Stem
    \once \override Stem.length = #8
    b'8 ~ 8\noBeam
    \once \hide Stem
    \once \override Stem.length = #8
    g8 ~ 8\noBeam
  }
  \\
  {
    b8 g g e
  }
}
```

```

}
>>
}
```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the `prefer-dotted-right` property of `NoteCollision`.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e }
```

>>

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no `shift` or the same `shift` specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘`ignore-collision`’ property of the `NoteColumn` object to `#t`. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t

\relative c' {
  \new Staff <<
    \new Voice{ \ignore \stemDown f2 g }
    \new Voice{ c2 \stemDown c, }
  >>
}
```

Two \partcombine pairs on one staff

The `\partcombine` function takes two music expressions each containing a part, and distributes them among four Voices named “two” “one” “solo” and “chords” depending on when and how the parts merged into a common voice. The voices output from `\partcombine` can have their layout properties adjusted in the usual way. Here we define extensions of `\partcombine` to make it easier to put four voices on a staff.

```
soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b } alto = { fis4 | e8 fis gis ais b4 b | b ais fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 } bass = { fis8 gis | a4 gis g fis | eis fis
b,2 }

\new Staff << \key b\minor \clef alto \partial 4 \transpose b b' \partcombineUp \soprano
\alto \partcombineDown \tenor \bass >>

\layout {
  \context {
    \Staff
    \accepts "VoiceBox"
  }
  \context {
    \name "VoiceBox"

Staff notation

Section “Staff notation” in *Notation Reference*

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Adding an extra staff at a line break

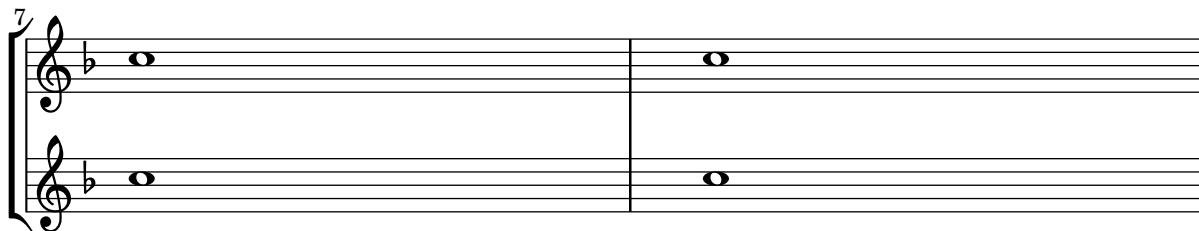

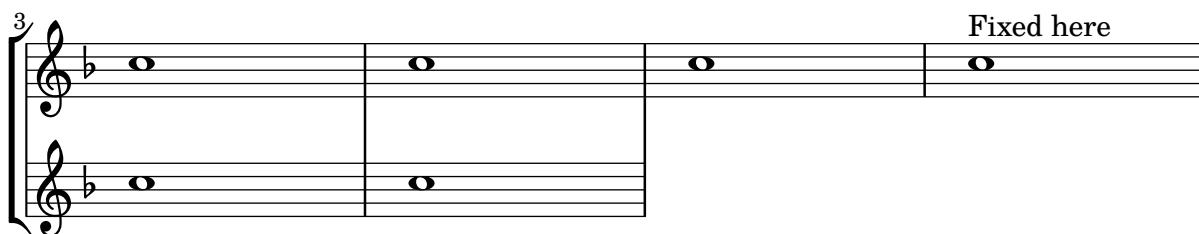

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```
\score {
  \new StaffGroup \relative c'' {
    \new Staff
    \key f \major
    c1 c^"Unwanted extra space" \break
    << { c1 | c }
    \new Staff {
      \key f \major
      \once \omit Staff.TimeSignature
      c1 | c
    }
  }
>>
c1 | c^"Fixed here" \break
<< { c1 | c }
\new Staff {
```

```

\once \set Staff.explicitKeySignatureVisibility = #end-of-line-invisible
\key f \major
\once \omit Staff.TimeSignature
c1 | c
}
>>
}
}

```

Adding an extra staff

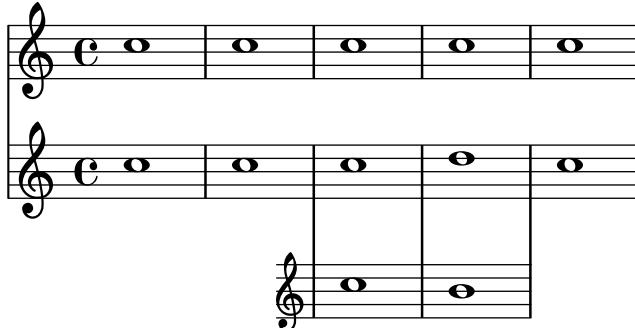

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
    \new Staff \relative c' {
      c1 | c | c | c | c
    }
    \new StaffGroup \relative c' {
      \new Staff {
        c1 | c
        <<
        {
          c1 | d
        }
        \new Staff {
          \once \omit Staff.TimeSignature
          c1 | b
        }
      }
    >>
    c1
  }
}

```

```
>>
}
```

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
(#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?))
 (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
  (interpret-markup layout props
    (markup
      #:translate (cons (/ target-x 2) (/ target-y 2)))
      #:rotate angle-deg
      #:translate (cons (/ length -2) 0)
      #:concat (#:draw-line (cons length 0)
        #:arrow-head X RIGHT fill))))
```

```
splitStaffBarLineMarkup = \markup \with-dimensions #'(0 . 0) #'(0 . 0) {

}
}

```

The image shows a musical score with four staves. The top staff is labeled 'SI SII' and has four notes: e, f, g, h. The second staff is labeled 'AI AII' and has four notes: e, f, g, h. The third staff is labeled 'T B' and has four notes: e, f, g, h. The fourth staff is labeled 'S A' and has four notes: i, j, k, l. Below the 'S A' staff is another staff labeled 'T B' with notes i, j, k, l.

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either `#UP` or `#DOWN` to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

```

cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
      <>-markup { \tiny #name }
      $music
    }
  #})
}

flute = \relative c' {
  \transposition c'
  s4 s4 e g
}
\addQuote "flute" { \flute }

clarinet = \relative c' {

```

```

\transposition bes
fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c' {
  \transposition c'
  \cueWhile "clarinet" "Clar." #DOWN { c4. g8 }
  \cueWhile "flute" "Flute" #UP { g4 bes4 }
}
pianoLH = \relative c { c4 <c' e> e, <g c> }

\score {
  <<
  \new Staff {
    \new Voice = "singer" {
      \singer
    }
  }
  \new Lyrics {
    \lyricsto "singer"
    \words
  }
  \new PianoStaff <<
    \new Staff {
      \new Voice {
        \pianoRH
      }
    }
    \new Staff {
      \clef "bass"
      \pianoLH
    }
  >>
  >>
}

```

A musical score consisting of three staves. The top staff is for the Singer, starting with a treble clef, 'C' key signature, and a dotted quarter note. It contains the lyrics 'here's the lyr-ics'. The middle staff is for the Flute, also with a treble clef and 'C' key signature, and is labeled 'Flute'. The bottom staff is for the Clarinet and Bass, with a bass clef and 'C' key signature, and is labeled 'Clar.'. The piano RH part is indicated by a treble clef and 'C' key signature above the singer staff, and the piano LH part is indicated by a bass clef and 'C' key signature below the bass staff.

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}

\relative c' {
    r8 f8\glissando
    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff
    a8

    r8 f8\glissando
    \glissandoSkipOn
    g4 a8
    \glissandoSkipOff
    a8 |

    r4 f\glissando \l
    \glissandoSkipOn
    a4\f \r
    \glissandoSkipOff
    b8!\r |
}
```

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

```
\relative c'{
    \set Score.alternativeNumberingStyle = #'numbers
    \repeat volta 3 { c4 d e f | }
    \alternative {
        { c4 d e f | c2 d \break }
        { f4 g a b | f4 g a b | f2 a | \break }
```

```

    { c4 d e f | c2 d }
}
c1 \break
\set Score.alternativeNumberingStyle = #'numbers-with-letters
\repeat volta 3 { c,4 d e f | }
\alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
}
c1
}

```

The image shows a musical score with six staves of music. The first staff (measures 1-4) consists of quarter notes. The second staff (measures 5-8) consists of eighth-note patterns. The third staff (measures 9-12) consists of sixteenth-note patterns. The fourth staff (measures 13-16) consists of eighth-note patterns. The fifth staff (measures 17-20) consists of sixteenth-note patterns. The sixth staff (measures 21-24) consists of eighth-note patterns. Measure numbers are placed above the staves: 1, 2, 3, 4, 5, and 6b for the top section, and 1, 2, 3, 4, 5, and 6c for the bottom section.

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```

\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
  }
}

```

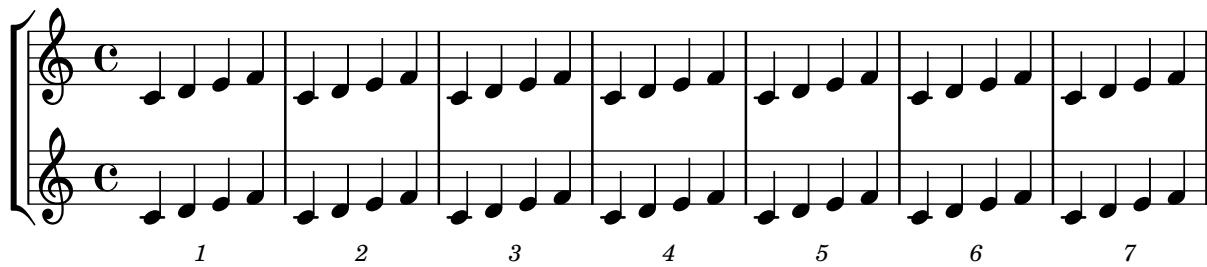

```

\override MeasureCounter.font-encoding = #'latin1
\override MeasureCounter.font-shape = #'italic
% to control the distance of the Dynamics context from the staff:
\override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
}
\context {
  \Score
  \remove "Bar_number_engraver"
}
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
\new Staff {
  \pattern
}
\new Staff {
  \pattern
}
\new Dynamics {
  \startMeasureCount
  s1*7
  \stopMeasureCount
}
>>

```

Changing the default bar lines

Default bar lines can be changed when re-defined in a score context.

```
% http://lsr.di.unimi.it/LSR/Item?id=964
%=> http://lists.gnu.org/archive/html/lilypond-user/2014-03/msg00126.html
%=> http://lilypond.1069038.n5.nabble.com/Changing-the-default-end-repeat-bracket-tc169357
```

```

\layout {
\context {
  \Score
  %% Changing the defaults from engraver-init.ly
  defaultBarType = "#!"
  startRepeatType = "#"[|:"
  endRepeatType = "#":|]"
  doubleRepeatType = "#":|][|:"
}

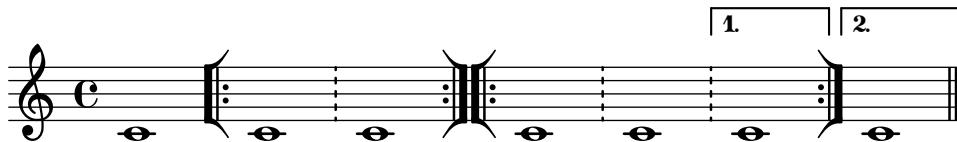

```

```

}

%% example:
{
  c'1
  \repeat volta 2 { \repeat unfold 2 c' }
  \repeat volta 2 { \repeat unfold 2 c' }
  \alternative {
    { c' }
    {
      %% v2.18 workaround
      \once\override Score.VoltaBracket.shorten-pair = #'(1 . -1)
      c'
    }
  }
  \bar "|."
}

```

Changing the number of lines in a staff

The number of lines in a staff may be changed by overriding the `StaffSymbol.line-count`.

```

upper = \relative c' {
  c4 d e f
}

lower = \relative c {
  \clef bass
  c4 b a g
}

\score {
  \context PianoStaff <-
    \new Staff {
      \upper
    }
    \new Staff {
      \override Staff.StaffSymbol.line-count = #4
      \lower
    }
  >>
}

```

Changing the staff size

Though the simplest way to resize staves is to use `#(set-global-staff-size xx)`, an individual staff's size can be changed by scaling the properties 'staff-space' and `fontSize`.

```
<<
\new Staff {
  \relative c' {
    \dynamicDown
    c8\ff c c c c c c
  }
}
\new Staff \with {
  fontSize = #-3
  \override StaffSymbol.staff-space = #(magstep -3)
} {
  \clef bass
  c8 c c c c\f c c c
}
>>
```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```
#(set-global-staff-size 20)
```

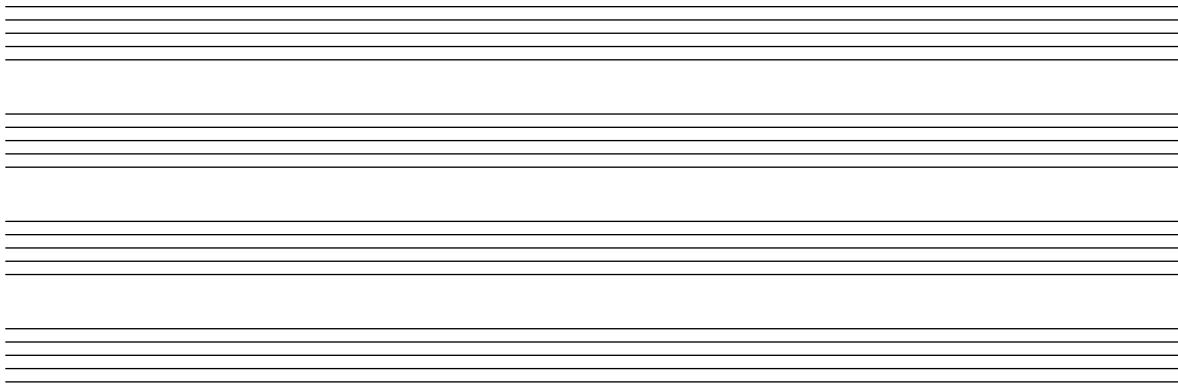

```
\score {
{
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
```

```
\Score
  \remove "Bar_number_engraver"
}
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob) (grob-interpret-markup grob
  #{
    \markup\combine
      \musicglyph "clefs.C"
      \translate #'(-3 . -2)
      \musicglyph "clefs.F"
  #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

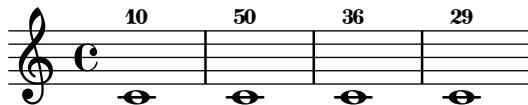

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
```

}

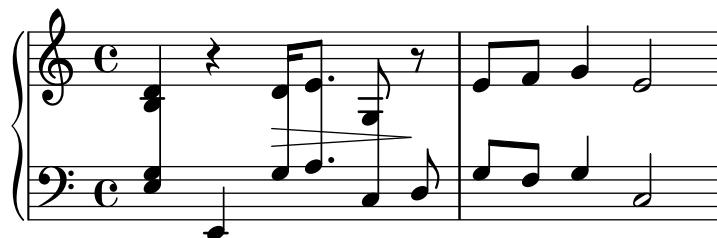

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
    \new Staff {
      <b d'>4 r d'16> e'8. g8 r\!
      e'8 f' g'4 e'2
    }
    \new Staff {
      \clef bass
      \voiceOne
      \autoBeamOff
      \crossStaff { <e g>4 e, g16 a8. c8} d
      \autoBeamOn
      g8 f g4 c2
    }
  >>
}
```

Display bracket with only one staff in a system

If there is only one staff in one of the staff types `ChoirStaff` or `StaffGroup`, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding `collapse-height` to set its value to be less than the number of staff lines in the staff.

Note that in contexts such as `PianoStaff` and `GrandStaff` where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

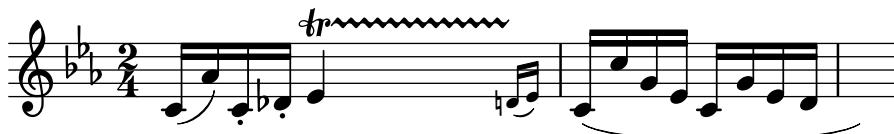

```
\score {
    \new StaffGroup <<
        % Must be lower than the actual number of staff lines
        \override StaffGroup.SystemStartBracket.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
        c'1
    }
    >>
}
\score {
    \new PianoStaff <<
        \override PianoStaff.SystemStartBrace.collapse-height = #4
        \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
        c'1
    }
    >>
}
```

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly. To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```
\relative c' {
    \key c\minor
    \time 2/4
    c16( as') c,-. des-.
    \once\override TrillSpanner.minimum-length = #15
    \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
    \afterGrace es4
    \startTrillSpan { d16[( \stopTrillSpan es)] }
    c( c' g es c g' es d
    \hideNotes
    c8)
}
```

Extending glissandi across repeats

A glissando which extends into several \alternative blocks can be simulated by adding a hidden grace note with a glissando at the start of each \alternative block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```

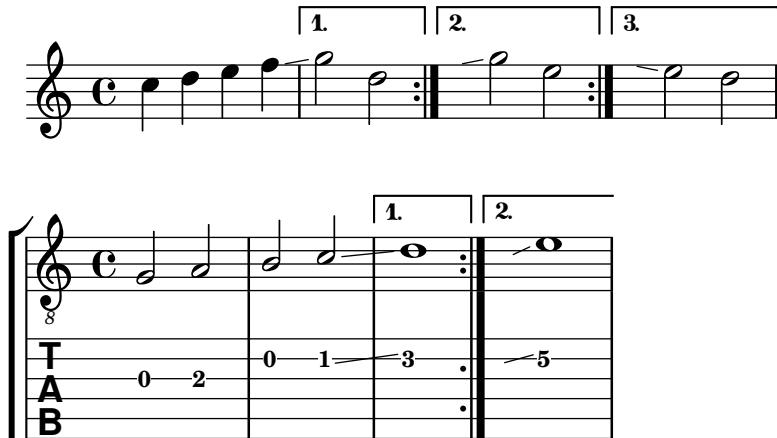

repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
      = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = #3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
      { \repeatGliss f e2 d }
    }
  }
}

music = \relative c' {
  \voiceOne
  \repeat volta 2 {
    g a b c\glissando
  }
  \alternative {
    { d1 }
    { \repeatGliss c \once \omit StringNumber e1\2 }
  }
}

\score {
  \new StaffGroup <<
    \new Staff <<
      \context Voice { \clef "G_8" \music }
    >>
    \new TabStaff <<

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default. Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

```

The image displays a musical score consisting of six staves. Each staff begins with a treble clef and a common time signature (C). Staff 1 features a flared tie between two eighth notes. Staffs 2 through 6 each contain four eighth notes connected by standard horizontal ties.

Forcing measure width to adapt to MetronomeMark's width

By default, metronome marks do not influence horizontal spacing. This can be solved through a simple override, as shown in the second half of the example.

```
example = {
  \tempo "Allegro"
  R1*6
  \tempo "Rall."
  R1*2
  \tempo "A tempo"
  R1*8
}

{
  \compressMMRests {
    \example
    R1
    R1
    \override Score.MetronomeMark.extra-spacing-width = #'(-3 . 0)
    \example
  }
}
```

Glissandi can skip grobs

NoteColumn grobs can be skipped over by glissandi.

```
\relative c' {
  a2 \glissando
  \once \override NoteColumn.glissando-skip = ##t
  f''4 d,
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

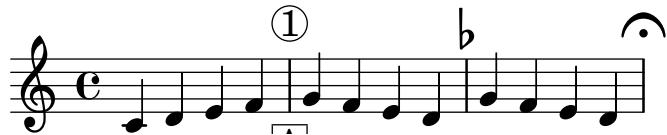

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.base-line-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.base-line-skip = #9
```

```
\mark \markup \center-column { \flat { \bold \small \italic Fine. } }
g f e d |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
\mark \markup \center-column { \fermata \box z }
}
```

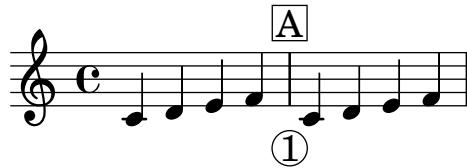

How to print two rehearsals marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```

Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. Musicians today are used to bar lines, but these were not known during the period of mensural music. As a compromise, bar lines are often printed between the staves, a layout style called mensurstriche layout.

Inserting score fragments above a staff as markups

The `\markup` command is quite versatile. In this snippet, it contains a `\score` block instead of texts or marks.

```
tuning = \markup {
  \score {
    \new Staff \with { \remove "Time_signature_engraver" }
    {
      \clef bass
      <c, g, d g>1
    }
    \layout { ragged-right = ##t indent = 0\cm }
  }
}

\header {
  title = "Solo Cello Suites"
  subtitle = "Suite IV"
  subsubtitle = \markup { Originalstimmung: \raise #0.5 \tuning }
```

```

}

\layout { ragged-right = ##f }

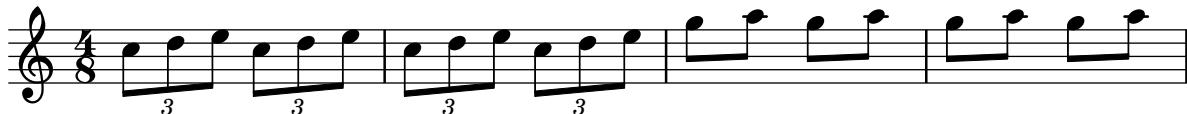

\relative c'' {
  \time 4/8
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  \tuplet 3/2 { c8 d e } \tuplet 3/2 { c d e }
  g8 a g a
  g8 a g a
}

```

Solo Cello Suites

Suite IV

Originalstimmung:  

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in `layout` as well.

```

%
% \layout {
%   \context {
%     \Score
%     stringOneTopmost = ##f
%   }
%   \context {
%     \TabStaff
%     tablatureFormat = #fret-letter-tablature-format
%   }
% }

m = {
  \cadenzaOn
  e, b, e gis! b e'
  \bar "||"
}

<<
  \new Staff { \clef "G_8" >_ "default" \m >_ "italian (historic)" \m }
  \new TabStaff {
    \m
    \set Score.stringOneTopmost = ##f
  }

```

```
\set TabStaff.tablatureFormat = #fret-letter-tablature-format
\m
}
>>
```

Chord Progression:

Measure 1: C major (Treble Clef, 8th note time signature)

Measure 2: G major (Bass Clef, 8th note time signature)

Measure 3: G major (Bass Clef, 8th note time signature)

Measure 4: C major (Bass Clef, 8th note time signature)

Letter tablature formatting

Tablature can be formatted using letters instead of numbers.

```
music = \relative c {  
    c4 d e f  
    g4 a b c  
    d4 e f g  
}
```

```
<<
\new Staff {
    \clef "G_8"
    \music
}
\new TabStaff \with {
    tablatureFormat = #fret-letter-tablature-format
}
{
    \music
}
>>
```

A musical staff with a treble clef and a common time signature (indicated by 'C'). The melody consists of eighth notes. Below the staff is a guitar neck diagram with three frets. The strings are labeled with letters: 'G' for the top string, 'A' for the second string, and 'B' for the bottom string. Fret 1 is marked with a vertical line. Fingerings are indicated above the strings: 'a' at the open B string, 'c' at the first fret of the A string, 'd' at the open G string, 'a' at the first fret of the G string, 'c' at the first fret of the A string, 'a' at the first fret of the B string, 'b' at the second fret of the B string, and 'd' at the open G string.

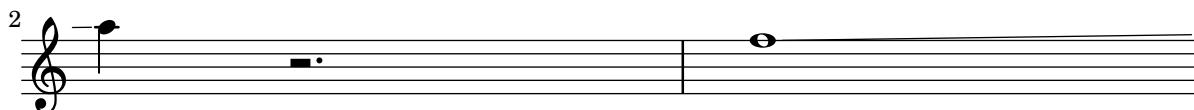

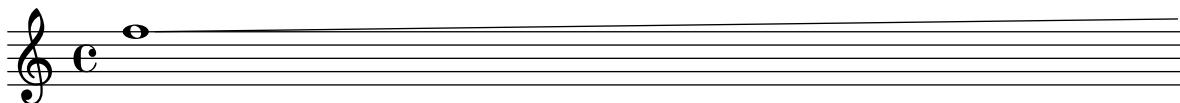

Making glissandi breakable

Setting the `breakable` property to `#t` in combination with `after-line-breaking` allows a glissando to break if it occurs at a line break:

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
```

```
}
```

```
\relative c'' {
    \override Glissando.breakable = ##t
    \override Glissando.after-line-breaking = ##t
    f1\glissando |
    \break
    a4 r2. |
    f1\glissando
    \once \glissandoSkipOn
    \break
    a2 a4 r4 |
}
```

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```
{
    \override Staff.StaffSymbol.line-positions =
        #'(-4 -2 -0.2 0 0.2 2 4)
    d'4 e' f' g'
}
```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```
<<
\context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
    c4 r g r
}
```

```

c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>

```

Mensurstriche layout (bar lines between the staves)

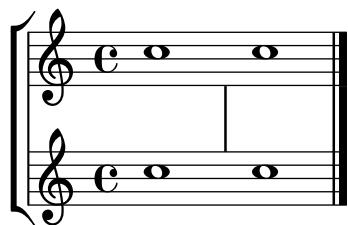

The mensurstriche-layout where the bar lines do not show on the staves but between staves can be achieved with a `StaffGroup` instead of a `ChoirStaff`. The bar line on staves is blanked out using `\hide`.

```

global = {
  \hide Staff.BarLine
  s1 s
  % the final bar line is not interrupted
  \undo \hide Staff.BarLine
  \bar "|."
}

\new StaffGroup \relative c' {
  <<
    \new Staff { << \global { c1 c } >> }
    \new Staff { << \global { c c } >> }
  >>
}

```

Modifying the Ottava bracket slope

It is possible to change the slope of the Ottava bracket.

```

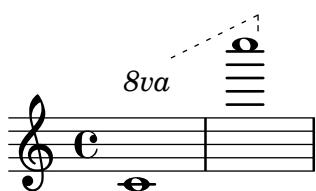

\relative c'' {
  \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
  \override Staff.OttavaBracket.bound-details =
    #'((left . ((Y . 0) ; Change the integer here
                (attach-dir . ,LEFT)
                (padding . 0)
                (stencil-align-dir-y . ,CENTER)))
      (right . ((Y . 5) ; Change the integer here

```

```

(padding . 0)
(attach-dir . ,RIGHT)
(text . ,(make-draw-dashed-line-markup (cons 0 -1.2))))))
\override Staff.OttavaBracket.left-bound-info =
#ly:line-spanner::calc-left-bound-info-and-text
\override Staff.OttavaBracket.right-bound-info =
#ly:line-spanner::calc-right-bound-info
\ottava #1
c1
c'''1
}

```

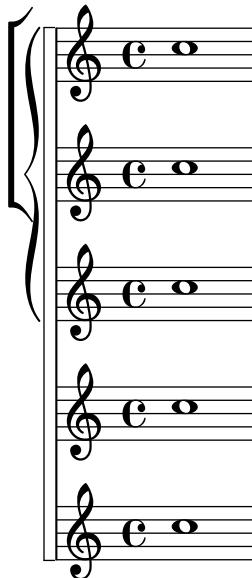

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```

\new StaffGroup
\relative c' <<
\set StaffGroup.systemStartDelimiterHierarchy
= #'(SystemStartSquare (SystemStartBrace (SystemStartBracket a
                                         (SystemStartSquare b) ) c ) d)
\new Staff { c1 }
>>

```

Non-traditional key signatures

The commonly used `\key` command sets the `keyAlterations` property, in the `Staff` context.

To create non-standard key signatures, set this property directly. The format of this command is a list:

```
\set Staff.keyAlterations = #`(((octave . step) . alter) ((octave . step) .
alter) ...) where, for each element in the list, octave specifies the octave (0 being the
octave from middle C to the B above), step specifies the note within the octave (0 means C
and 6 means B), and alter is ,SHARP ,FLAT ,DOUBLE-SHARP etc. (Note the leading comma.)
```

Alternatively, for each item in the list, using the more concise format `(step . alter)` specifies that the same alteration should hold in all octaves.

For microtonal scales where a “sharp” is not 100 cents, `alter` refers to the alteration as a proportion of a 200-cent whole tone.

Here is an example of a possible key signature for generating a whole-tone scale:

```
\relative {
  \set Staff.keyAlterations = #`((6 . ,FLAT)
                                (5 . ,FLAT)
                                (3 . ,SHARP))
  c'4 d e fis
  aes4 bes c2
}
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "||"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}
```

The musical score consists of three staves, each in common time (indicated by 'C'). The top staff contains measures 1 through 7. The middle staff continues measures 1 through 7. The bottom staff begins at measure 8 and ends at measure 14. Measures are numbered above each staff. The music consists of eighth-note patterns.

Orchestra choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```
fluteMusic = \relative c' { \key g \major g'1 b }
```

```
% Pitches as written on a manuscript for Clarinet in A
% are transposed to concert pitch.

clarinetMusic = \transpose c' a
    \relative c'' { \key bes \major bes1 d }

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

<<

```
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }
```

>>

Quoting another voice with transposition

Quotations take into account the transposition of both source and target. In this example, all instruments play sounding middle C; the target is an instrument in F. The target part may be transposed using `\transpose`. In this case, all the pitches (including the quoted ones) are transposed.

```
}
```

```
\addQuote sax {
    \transposition es'
    \repeat unfold 16 { a8 }
}

quoteTest = {
    % french horn
    \transposition f
    g'4
    << \quoteDuring #"clarinet" { \skip 4 } s4^"clar." >>
    << \quoteDuring #"sax" { \skip 4 } s4^"sax." >>
    g'4
}

{
    \new Staff \with {
        instrumentName = \markup { \column { Horn "in F" } }
    }
    \quoteTest
    \transpose c' d' << \quoteTest s4_ "up a tone" >>
}
```

Quoting another voice

The `quotedEventTypes` property determines the music event types which should be quoted. The default value is (`note-event rest-event tie-event beam-event tuplet-span-event`), which means that only the notes, rests, ties, beams and tuplets of the quoted voice will appear in the `\quoteDuring` expression. In the following example, a 16th rest is not quoted since `rest-event` is not in `quotedEventTypes`.

For a list of event types, consult the “Music classes” section of the Internals Reference.

```
\addQuote quoteMe \quoteMe

original = \relative c' {
    c8 d s2
    \once \override NoteColumn.ignore-collision = ##t
    es8 gis8
}

<<
```

```
\new Staff \with { instrumentName = "quoteMe" }
\quoteMe

\new Staff \with { instrumentName = "orig" }
\original

\new Staff \with {
  instrumentName = "orig+quote"
  quotedEventTypes = #'(note-event articulation-event)
}
\relative c''

<<
\original
\new Voice {
  s4
  \set fontSize = #-4
  \override Stem.length-fraction = #(magstep -4)
  \quoteDuring #"quoteMe" { \skip 2. }
}
>>
>>
```

Removing brace on first line of piano score

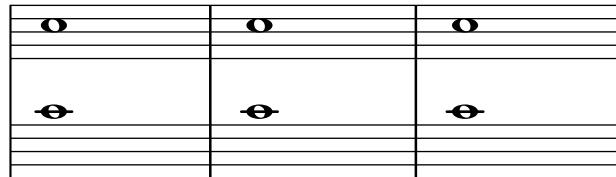

This snippet removes the first brace from a PianoStaff or a GrandStaff. It may be useful when cutting and pasting the engraved image into existing music.

It uses \alterBroken.

```
someMusic = {
  \once \override Staff.Clef.stencil = ##f
  \once \override Staff.TimeSignature.stencil = ##f
  \repeat unfold 3 c1 \break
  \repeat unfold 5 c1 \break
  \repeat unfold 5 c1
}

\score {
  \new PianoStaff
  <<
  \new Staff = "right" \relative c' \someMusic
  \new Staff = "left" \relative c' { \clef F \someMusic }
}
>>
```

```
\layout {
    indent=75
    \context {
        \PianoStaff
        \alterBroken transparent #'(##t) SystemStartBrace
    }
}
```

4

9

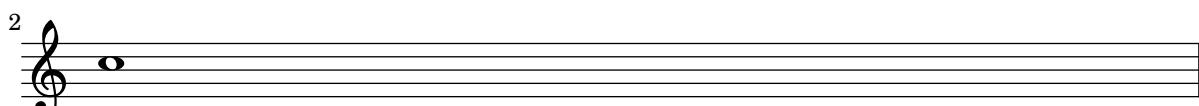

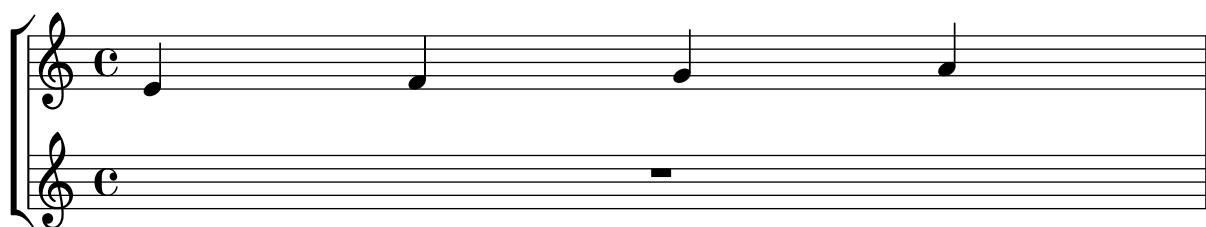

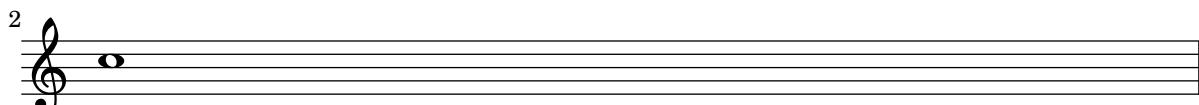

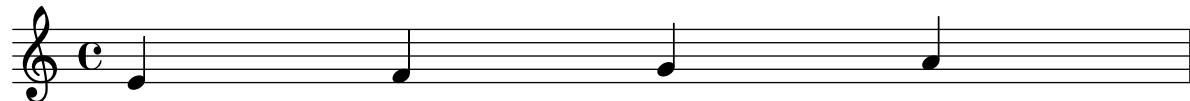

Removing the first empty line

The first empty staff can also be removed from the score by setting the `VerticalAxisGroup` property `remove-first`. This can be done globally inside the `\layout` block, or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (`Staff` applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

```
\layout {
    \context {
        \Staff \RemoveEmptyStaves
        % To use the setting globally, uncomment the following line:
        % \override VerticalAxisGroup.remove-first = ##t
    }
}
\new StaffGroup <<
    \new Staff \relative c' {
        e4 f g a \break
        c1
    }
    \new Staff {
        % To use the setting globally, comment this line,
    }
}
```

```
% uncomment the line in the \layout block above
\override Staff.VerticalAxisGroup.remove-first = ##t
R1 \break
R
}
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>
```

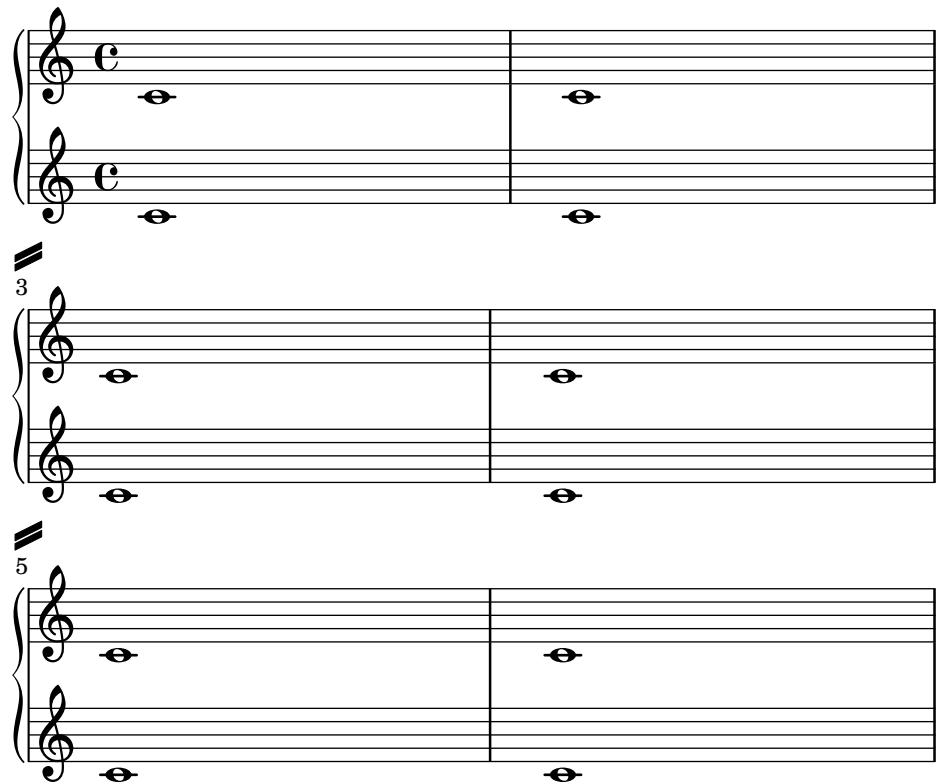

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}

notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}
```

```
\book {
  \score {
    \new GrandStaff <<
      \new Staff \notes
      \new Staff \notes
    >>
  }
}
```

Tick bar lines

'Tick' bar lines are often used in music where the bar line is used only for coordination and is not meant to imply any rhythmic stress.

```
\relative c' {
  \set Score.defaultBarType = #""
  c4 d e f
  g4 f e d
  c4 d e f
  g4 f e d
  \bar "|."
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
  \time 2/4
  a4 b8 c
}
```

Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines `middleCClefPosition` must also be specified, with positive or negative values moving `middleCPosition` up or down respectively, relative to the staff's center line.

For example, `\clef "treble_8"` is equivalent to setting the `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition` and `clefTransposition`. Note

that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{
    % The default treble clef
    \key f \major
    c'1
    % The standard bass clef
    \set Staff.clefGlyph = #"clefs.F"
    \set Staff.clefPosition = #2
    \set Staff.middleCPosition = #6
    \set Staff.middleCClefPosition = #6
    \key g \major
    c'1
    % The baritone clef
    \set Staff.clefGlyph = #"clefs.C"
    \set Staff.clefPosition = #4
    \set Staff.middleCPosition = #4
    \set Staff.middleCClefPosition = #4
    \key f \major
    c'1
    % The standard choral tenor clef
    \set Staff.clefGlyph = #"clefs.G"
    \set Staff.clefPosition = #-2
    \set Staff.clefTransposition = #-7
    \set Staff.middleCPosition = #1
    \set Staff.middleCClefPosition = #1
    \key f \major
    c'1
    % A non-standard clef
    \set Staff.clefPosition = #0
    \set Staff.clefTransposition = #0
    \set Staff.middleCPosition = #-4
    \set Staff.middleCClefPosition = #-4
    \key g \major
    c'1 \break

    % The following clef changes do not preserve
    % the normal relationship between notes, key signatures
    % and clefs:

    \set Staff.clefGlyph = #"clefs.F"
    \set Staff.clefPosition = #2
    c'1
    \set Staff.clefGlyph = #"clefs.G"
    c'1
    \set Staff.clefGlyph = #"clefs.C"
    c'1
    \set Staff.clefTransposition = #7
```

```
c'1
\set Staff.clefTransposition = #0
\set Staff.clefPosition = #0
c'1

% Return to the normal clef:

\set Staff.middleCPosition = #0
c'1
}
```

6

Two \partcombine pairs on one staff

The `\partcombine` function takes two music expressions each containing a part, and distributes them among four Voices named “two” “one” “solo” and “chords” depending on when and how the parts merged into a common voice. The voices output from `\partcombine` can have their layout properties adjusted in the usual way. Here we define extensions of `\partcombine` to make it easier to put four voices on a staff.

```
soprano = { d'4 | cis' b e' d'8 cis' | cis'2 b } alto = { fis4 | e8 fis gis a is b4 b | b a is fis2 }
tenor = { a8 b | cis' dis' e'4 b8 cis' d'4 | gis cis' dis'2 } bass = { fis8 gis | a4 gis g fis | eis fis
b,2 }
```

```
\new Staff << \key b\minor \clef alto \partial 4 \transpose b b' \partcombineUp \soprano
\alto \partcombineDown \tenor \bass >>
```

```
\layout {
  \context {
    \Staff
    \accepts "VoiceBox"
  }
  \context {
    \name "VoiceBox"
    \type "Engraver_group"
    \defaultchild "Voice"
    \accepts "Voice"
  }
}

partcombineUp =
#(define-music-function (partOne partTwo)
  (ly:music? ly:music?))
"Take the music in @var{partOne} and @var{partTwo} and return
a @code{VoiceBox} named @q{Up} containing @code{Voice}s
that contain @var{partOne} and @var{partTwo} merged into one
voice where feasible. This variant sets the default voicing"
```

```

in the output to use upward stems."
#{

  \new VoiceBox = "Up" <<
    \context Voice = "one" { \voiceOne }

        \clef bass
    }
}
```

```

}
>>
}

```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<http://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLine`s are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```

bars = {
    \tempo "Allegro" 4=120
    s1*2
    \repeat unfold 5 { \mark \default s1*2 }
    \bar "||"
    \tempo "Adagio" 4=40
    s1*2
    \repeat unfold 8 { \mark \default s1*2 }
    \bar "|."
}

winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

Musical staff notation for a simple choral setting. The music is in common time (indicated by 'c'). The key signature is C major (indicated by a 'C' and a sharp sign). The melody consists of two voices: soprano (treble clef) and basso (bass clef). The lyrics are: 'Wer nur den lieben Gott lässt wal-'.

Pupil: Here's my version!

Musical staff notation for a pupil's improved version of the choral setting. The music is in common time (indicated by 'c'). The key signature is C major (indicated by a 'C' and a sharp sign). The melody consists of two voices: soprano (treble clef) and basso (bass clef). The lyrics are: 'Wer nur den lieben Gott lässt wal-'.

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

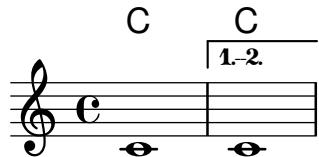

Musical staff notation for a version of J.S. Bach's chorale. The music is in common time (indicated by 'c'). The key signature is C major (indicated by a 'C' and a sharp sign). The melody consists of two voices: soprano (treble clef) and basso (bass clef). The lyrics are: 'Wer nur den lieben Gott lässt wal-'.

The image displays three staves of musical notation, each consisting of a treble clef staff and a bass clef staff. The notation is in common time, with a key signature of one sharp. The lyrics "ten und hof - fet auf ihn al - le Zeit" are written below the notes. The first staff shows a single voltaic marking (a brace with a colon) placed below the first chord. The second staff shows a brace with a colon placed below the first chord, and a repeat sign with a brace and colon placed below the second chord. The third staff shows a brace with a colon placed below the first chord, and a repeat sign with a brace and colon placed below the second chord, indicating a repeat of the first section.

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volta can be put under chords.

```

Editorial annotations

Section “Editorial annotations” in *Notation Reference*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' {
    c4-1 d-2 f-4 e-3
}
```

Adding links to objects

To add a link to a grob-stencil you could use `add-link` as defined here. Works with `\override` and `\tweak`. Drawback: `point-and-click` will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
(#(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (begin
            (let* (
              (x-ext (ly:stencil-extent stil X))
              (y-ext (ly:stencil-extent stil Y))
              (url-expr (list 'url-link url-strg `(quote ,x-ext) `(quote ,y-ext)))
              (new-stil (ly:stencil-add
                          (ly:make-stencil url-expr x-ext y-ext) stil)))
              (ly:grob-set-property! grob 'stencil new-stil)))
            #f))))

Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014
```

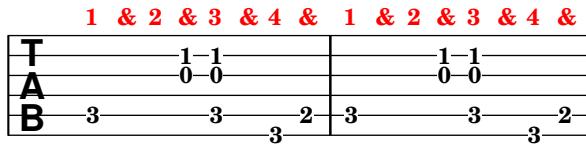

```
high  = { r4 r8 <g c'> q r8 r4 }

low = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
```

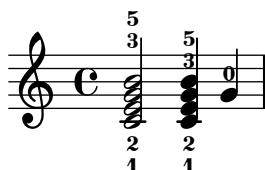

```
\new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
}
\layout {
    \context {
        \TabStaff
        \clef moderntab
        \revert TextScript.stencil
        \override TextScript.font-series = #'bold
        \override TextScript.font-size = #-2
        \override TextScript.color = #red
    }
    \context {
        \Score
        proportionalNotationDuration = #(ly:make-moment 1/8)
    }
}
}
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct `<>`, even if it is only a single note.

```
\relative c' {
    <c-1 e-2 g-3 b-5>2
    \override Fingering.staff-padding = #'()
    <c-1 e-2 g-3 b-5>4 <g'-0>
}
```

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

```
\relative c'{
    \set Score.alternativeNumberingStyle = #'numbers
    \repeat volta 3 { c4 d e f | }
    \alternative {
        { c4 d e f | c2 d \break }
        { f4 g a b | f4 g a b | f2 a | \break }
        { c4 d e f | c2 d }
    }
```

```

c1 \break
\set Score.alternativeNumberingStyle = #'numbers-with-letters
\repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
c1
}

```

Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```

\layout {
  \context {
    \Voice
      \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
}

```

```
c2\startGroup
d2\stopGroup
}
```

Analysis brackets with labels

Text may be added to analysis brackets through the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command. Bracket text will be parenthesized after a line break.

```
\layout {
  \context {
    \Voice
      \consists "Horizontal_bracket_engraver"
      \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c''\startGroup d''\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e''\startGroup d''\stopGroup
  c''
  -\tweak HorizontalBracketText.text \markup \bold \huge "b" \startGroup
  -\tweak HorizontalBracketText.text "a" \startGroup
  d''\stopGroup
  e''-\tweak HorizontalBracketText.text "a'" \startGroup
  d''\stopGroup\stopGroup
  c''-\tweak HorizontalBracketText.text foo \startGroup d' e' f'
  \break
  g' a' b' c''\stopGroup
}
```

Applying note head styles depending on the step of the scale

The `shapeNoteStyles` property can be used to define various note head styles for each step of the scale (as set by the key signature or the `tonic` property). This property requires a set of symbols, which can be purely arbitrary (geometrical expressions such as `triangle`, `cross`, and `xcircle` are allowed) or based on old American engraving tradition (some latin note names are also allowed).

That said, to imitate old American song books, there are several predefined note head styles available through shortcut commands such as `\aikenHeads` or `\sacredHarpHeads`.

This example shows different ways to obtain shape note heads, and demonstrates the ability to transpose a melody without losing the correspondence between harmonic functions and note head styles.

```
fragment = {
    \key c \major
    c2 d
    e2 f
    g2 a
    b2 c
}

\new Staff {
    \transpose c d
    \relative c' {
        \set shapeNoteStyles = ##(do re mi fa
                                #f la ti)
        \fragment
    }
}

\break

\relative c' {
    \set shapeNoteStyles = ##(cross triangle fa #f
                                mensural xcircle diamond)
    \fragment
}
}
```

Avoiding collisions with chord fingerings

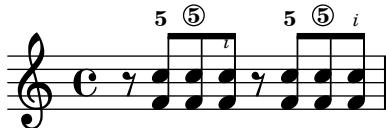

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

```
\relative c' {
```

```
\set fingeringOrientations = #'(up)
\set stringNumberOrientations = #'(up)
\set strokeFingerOrientations = #'(up)

% Default behavior
r8
<f c'{-}5>8
<f c'{\5}>8
<f c'{-\rightHandFinger #2}>8

% No tweak needed
r8
<f c'{-}5>8
<f c'{\5}>8
% Corrected to avoid collisions
\override StrokeFinger.add-stem-support = ##t
<f c'{-\rightHandFinger #2}>8
}
```

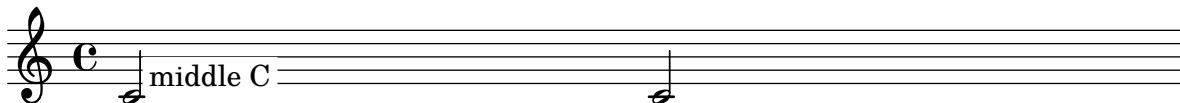

Blanking staff lines using the \whiteout command

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```
\layout {
    ragged-right = ##f
}

\relative c' {
    \override TextScript.extra-offset = #'(2 . 4)
    c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}
```

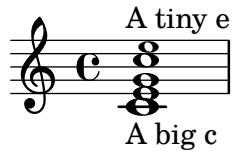

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `<>`), before the note to be altered, place the `\tweak` command, followed by `#'font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
    <\tweak font-size #+2 c e g c
    \tweak font-size #-2 e>1
    ^\markup { A tiny e }_\markup { A big c }
```

}

Changing the appearance of a slur from solid to dotted or dashed

The appearance of slurs may be changed from solid to dotted or dashed.

```
\relative c' {
  c4( d e c)
  \slurDotted
  c4( d e c)
  \slurSolid
  c4( d e c)
  \slurDashed
  c4( d e c)
  \slurSolid
  c4( d e c)
}
```

Coloring notes depending on their pitch

It is possible to color note heads depending on their pitch and/or their names: the function used in this example even makes it possible to distinguish enharmonics.

```
%Association list of pitches to colors.
#define color-mapping
(list
  (cons (ly:make-pitch 0 0 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 0 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 1 FLAT) (x11-color 'green))
  (cons (ly:make-pitch 0 2 NATURAL) (x11-color 'red))
  (cons (ly:make-pitch 0 2 SHARP) (x11-color 'green))
  (cons (ly:make-pitch 0 3 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 3 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 4 SHARP) (x11-color 'red))
  (cons (ly:make-pitch 0 5 NATURAL) (x11-color 'green))
  (cons (ly:make-pitch 0 5 FLAT) (x11-color 'red))
  (cons (ly:make-pitch 0 6 SHARP) (x11-color 'red))
  (cons (ly:make-pitch 0 1 NATURAL) (x11-color 'blue))
  (cons (ly:make-pitch 0 3 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 4 FLAT) (x11-color 'blue))
  (cons (ly:make-pitch 0 5 SHARP) (x11-color 'blue))
  (cons (ly:make-pitch 0 6 FLAT) (x11-color 'blue))))
```

```
%Compare pitch and alteration (not octave).
(define (pitch>equals? p1 p2)
  (and
    (= (ly:pitch-alteration p1) (ly:pitch-alteration p2))
    (= (ly:pitch-notename p1) (ly:pitch-notename p2)))))

(define (pitch-to-color pitch)
  (let ((color (assoc pitch color-mapping pitch>equals?)))
    (if color
        (cdr color)))))

(define (color-notehead grob)
  (pitch-to-color
    (ly:event-property (event-cause grob) 'pitch)))

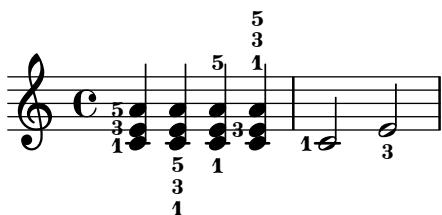

\score {
  \new Staff \relative c' {
    \override NoteHead.color = #color-notehead
    c8 b d dis ees f g aes
  }
}
```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct `<>` even if it is a single note.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
}
```

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the fractions `2/3` and `1/3` adjusts the horizontal position.

```
\relative c' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
  { c4.( d8) }
  { s4 s\turn }
  >>
  \transpose c d \relative c' <<
  { c4.( d8) }
  {
    s4
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \single \hideNotes
    b8-\turn \noBeam
    s8
  }
  >>
}
```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```
#{set-global-staff-size 20}
```

```
\score {
  {
    \repeat unfold 12 { s1 \break }
  }
  \layout {
    indent = 0\in
    \context {
      \Staff
      \remove "Time_signature_engraver"
      \remove "Clef_engraver"
      \remove "Bar_engraver"
    }
  }
}
```

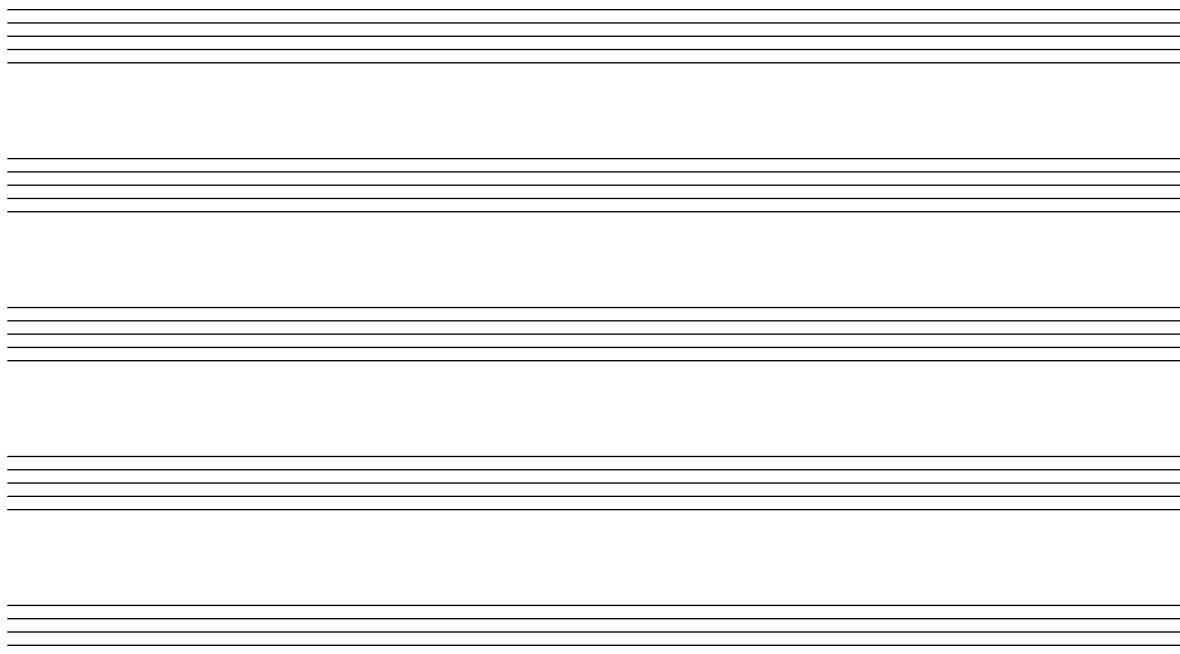

```
\context {
    \Score
    \remove "Bar_number_engraver"
}

}

% uncomment these lines for "letter" size
%{
\paper {
    #(set-paper-size "letter")
    ragged-last-bottom = ##f
    line-width = 7.5\in
    left-margin = 0.5\in
    bottom-margin = 0.25\in
    top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
    #(set-paper-size "a4")
    ragged-last-bottom = ##f
    line-width = 180
    left-margin = 15
    bottom-margin = 10
    top-margin = 10
}
%}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
  c1-10
  c1-50
  c1-36
  c1-29
}
```

Default direction of stems on the center line of the staff

The default direction of stems on the center line of the staff is set by the `Stem.neutral-direction` property.

```
\relative c'' {
  a4 b c b
  \override Stem.neutral-direction = #up
  a4 b c b
  \override Stem.neutral-direction = #down
  a4 b c b
}
```

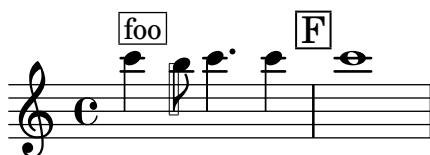

Drawing boxes around grobs

The `\print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c' {
    \override TextScript.stencil =
        #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
    c'4^"foo"

    \override Stem.stencil =
        #(make-stencil-boxer 0.05 0.25 ly:stem::print)
    \override Score.RehearsalMark.stencil =
        #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
    b8

    \revert Stem.stencil
    \revert Flag.stencil
    c4. c4
    \mark "F"
    c1
}
```

Drawing circles around note heads

Here is how to circle a note.

```
circle =
\once \override NoteHead.stencil = #(lambda (grob)
  (let* ((note (ly:note-head::print grob))
         (combo-stencil (ly:stencil-add
                           note
                           (circle-stencil note 0.1 0.8))))
    (ly:make-stencil (ly:stencil-expr combo-stencil)
                    (ly:stencil-extent note X)
                    (ly:stencil-extent note Y)))))

{ \circle c' }
```

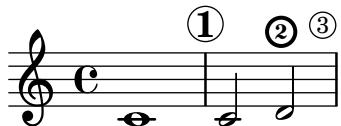

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
    c1
```

```
\set Score.markFormatter =
  #(lambda (mark context)
    (make-circle-markup (format-mark-numbers mark context)))
\mark \default

c2 d^{\markup {
  \override #'(thickness . 3) {
    \circle \finger 2
  }
}}
\override Score.BarNumber.break-visibility = #all-visible
\override Score.BarNumber.stencil =
  #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

```
\relative c' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke" }

  b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
  s2
  a'1
}
```

Grid lines: changing their appearance

The appearance of grid lines can be changed by overriding some of their properties.

```
\score {
  \new ChoirStaff <-
  \new Staff {
    \relative c' {
      \stemUp
      c'4. d8 e8 f g4
    }

```

Grid lines: emphasizing rhythms and notes synchronization

Regular vertical lines can be drawn between staves to show note synchronization; however, in case of monophonic music, you may want to make the second stave invisible, and make the lines shorter like in this snippet.

```

\score {
  \new ChoirStaff {
    \relative c' <-
    \new Staff {
      \time 12/8
      \stemUp
      c4. d8 e8 f g4 f8 e8. d16 c8
    }
  }
}

```

```

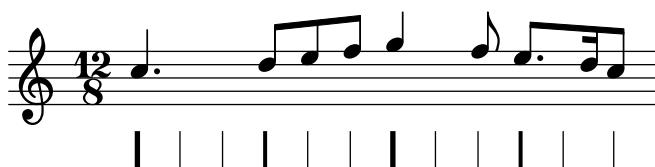

}

\new Staff {
    % hides staff and notes so that only the grid lines are visible
    \hideNotes
    \hide Staff.BarLine
    \override Staff.StaffSymbol.line-count = #0
    \hide Staff.TimeSignature
    \hide Staff.Clef

    % dummy notes to force regular note spacing
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
    \once \override Score.GridLine.thickness = #4.0
    c8 c c
    \once \override Score.GridLine.thickness = #3.0
    c8 c c
}
>>
}

\layout {
    \context {
        \Score
        \consists "Grid_line_span_engraver"
        % center grid lines horizontally below note heads
        \override NoteColumn.X-offset = #-0.5
    }
    \context {
        \Staff
        \consists "Grid_point_engraver"
        gridInterval = #(ly:make-moment 1/8)
        % set line length and positioning:
        % two staff spaces above center line on hidden staff
        % to four spaces below center line on visible staff
        \override GridPoint.Y-extent = #'(2 . -4)
    }
    ragged-right = ##t
}
}

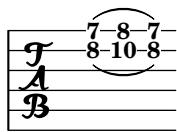

```

Hammer on and pull off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the `doubleSlurs` property to `#t`.

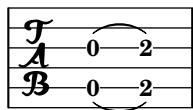

```
\new TabStaff {
    \relative c' {
        % chord hammer-on and pull-off
        \set doubleSlurs = ##t
        <g' b>8( <a c> <g b>
    }
}
```

Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

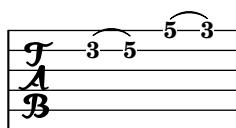

```
\new TabStaff {
    \relative c' {
        << { \voiceOne g2( a) }
        \\ { \voiceTwo a,( b) }
        >> \oneVoice
    }
}
```

Hammer on and pull off

Hammer-on and pull-off can be obtained using slurs.

```
\new TabStaff {
    \relative c' {
        d4( e\2)
        a( g)
    }
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

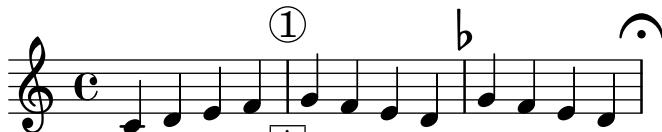

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
  c d e f |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \circle 1 \box A }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \mark \markup \center-column { \flat { \bold \small \italic Fine. } }
  g f e d |
  \once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
  \once \override Score.RehearsalMark.baseline-skip = #9
  \override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
  \mark \markup \center-column { \fermata \box z }
}
```

How to print two rehearsal marks above and below the same barline (method 2)

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

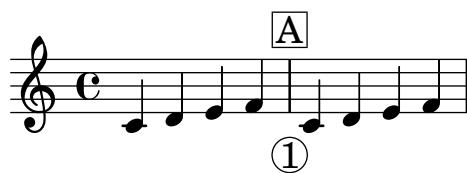

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```
\score {
  \relative c'

Making some staff lines thicker than the others

For educational purposes, a staff line can be thickened (e.g., the middle line, or to emphasize the line of the G clef). This can be achieved by adding extra lines very close to the line that should be emphasized, using the `line-positions` property of the `StaffSymbol` object.

```

{
  \override Staff.StaffSymbol.line-positions =
    #'(-4 -2 -0.2 0 0.2 2 4)
  d'4 e' f' g'
}

```

Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

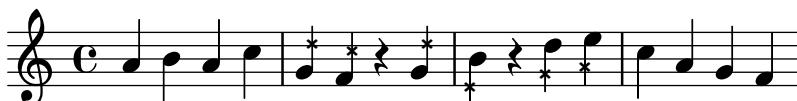

```

speakOn = {
    \override Stem.stencil =
    #(lambda (grob)
        (let* ((x-parent (ly:grob-parent grob X))
               (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
        (if is-rest?
            empty-stencil
            (ly:stencil-combine-at-edge
             (ly:stem::print grob)
             Y
             (- (ly:grob-property grob 'direction))
             (grob-interpret-markup grob
                 (markup #:center-align #:fontsize -4
                         #:musicglyph "noteheads.s2cross"))
             -2.3))))
    )
}

speakOff = {
    \revert Stem.stencil
    \revert Flag.stencil
}

\score {
    \new Staff {
        \relative c' {
            a4 b a c
            \speakOn
            g4 f r g
            b4 r d e
            \speakOff
            c4 a g f
        }
    }
}

```

Measure counter

This snippet provides a workaround for emitting measure counters using transparent percent repeats.

```

<<
\context Voice = "foo" {
    \clef bass
    c4 r g r
    c4 r g r
}

```

```

c4 r g r
c4 r g r
}
\context Voice = "foo" {
  \set countPercentRepeats = ##t
  \hide PercentRepeat
  \override PercentRepeatCounter.staff-padding = #1
  \repeat percent 4 { s1 }
}
>>

```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```

\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "|"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {

```

```
    g'4 f' e' d'  
}
```

1 2 3 4 5 6 7

8 2 3 4 5 6 7

(7) 8 9 10 11 12 13 14

Positioning fingering indications precisely

Generally the options available for positioning the fingering of chords work well by default, but if one of the indications needs to positioned more precisely the following tweak may be used. This is particularly useful for correcting the positioning when intervals of a second are involved.

```

\relative c' {
    \set fingeringOrientations = #'(left)
    <c-1 d-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(0 . 0.2)-2 a'-5>4
    \set fingeringOrientations = #'(down)
    <c-1 d-2 a'-5>4
    <c-\tweak extra-offset #'(0 . -1.1)-1
    d-\tweak extra-offset #'(-1.2 . -1.8)-2 a'-5>4
    \set fingeringOrientations = #'(down right up)
    <c-1 d-\tweak extra-offset #'(-0.3 . 0)-2 a'-5>4
    <c-1 d-\tweak extra-offset #'(-1 . 1.2)-2 a'-5>4
    \set fingeringOrientations = #'(up)
    <c-1 d-\tweak extra-offset #'(0 . 1.1)-2
    a'-\tweak extra-offset #'(0 . 1)-5>4
    <c-1 d-\tweak extra-offset #'(-1.2 . 1.5)-2
    a'-\tweak extra-offset #'(0 . 1.4)-5>4
}

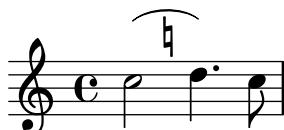

```

The image shows the beginning of Beethoven's Violin Concerto in D major. The key signature is one sharp (D major). The time signature is common time. The music is written for violin and piano. The first measure starts with a half note in the bass clef, followed by a eighth-note pair. The second measure continues with eighth-note pairs. Below the notes, fingerings are indicated: 5, 5, 2, 2; 1, 1; 5, 5; 1, 1; 2, 2; 1, 1.

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to false in order to be printed inside slurs.

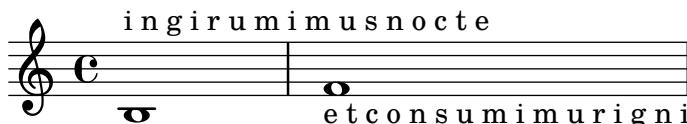

```
\relative c' {
  \override TextScript.avoid-slur = #'inside
  \override TextScript.outside-staff-priority = ##f
  c2(^\markup { \halign #-10 \natural } d4.) c8
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

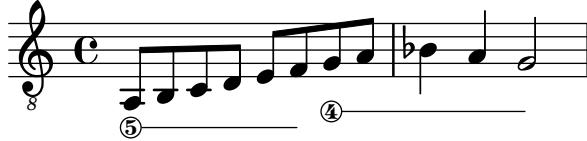

```
stringNumberSpanner =
#(define-music-function (StringNumber) (string?)
#{
  \override TextSpanner.style = #'solid
  \override TextSpanner.font-size = #-5
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.text =
    \markup { \circle \number $StringNumber }
#})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
```

```

b c d e f\stopTextSpan
\stringNumberSpanner "4"
g\startTextSpan a
bes4 a g2\stopTextSpan
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

parallelogram =
#(ly:make-stencil (list 'embedded-ps
  "gsave
  currentpoint translate
  newpath
  0 0.25 moveto
  1.3125 0.75 lineto
  1.3125 -0.25 lineto
  0 -0.75 lineto
  closepath
  fill
  grestore" )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \override NoteHead.stencil = \parallelogram
normalNoteHeads = \revert NoteHead.stencil

\relative c' {
  \myNoteHeads
  g4 d'
  \normalNoteHeads
  <f, \tweak stencil \parallelogram b e>4 d
}

```

Using the whiteout property

Any graphical object can be printed over a white background to mask parts of objects that lie beneath. This can be useful to improve the appearance of collisions in complex situations when repositioning objects is impractical. It is necessary to explicitly set the `layer` property to control which objects are masked by the white background.

In this example the collision of the tie with the time signature is improved by masking out the part of the tie that crosses the time signature by setting the `whiteout` property of `TimeSignature`. To do this `TimeSignature` is moved to a layer above `Tie`, which is left in the default layer of 1, and `StaffSymbol` is moved to a layer above `TimeSignature` so it is not masked.

```
{
\override Score.StaffSymbol.layer = #4
\override Staff.TimeSignature.layer = #3
b'2 b'~
\once \override Staff.TimeSignature.whiteout = ##t
\time 3/4
b' r4
}
```

Section “Text” in *Notation Reference*

Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

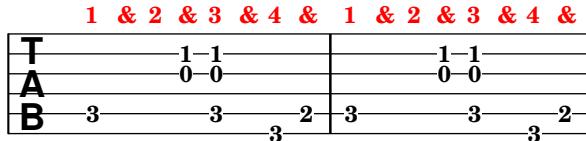

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014
```

```
high  = { r4 r8 <g c'> q r8 r4 }

low  = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
% first, define a variable to hold the formatted date:
date = #(strftime "%d-%m-%Y" (localtime (current-time)))

% use it in the title block:
\header {
  title = "Including the date!"
```

```

    subtitle = \date
}

\score {
    \relative c' {
        c4 c c c
    }
}
% and use it in a \markup block:
\markup {
    \date
}

```

Including the date!

20-08-2018

20-08-2018

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```

% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\score {
    \new StaffGroup <<

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #LEFT
            instrumentName = \markup \left-column {
                "Left aligned"
                "instrument name"
            }
            shortInstrumentName = "Left"
        }

        { c''1 \break c''1 }

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #CENTER
            instrumentName = \markup \center-column {
                Centered
                "instrument name"
            }
            shortInstrumentName = "Centered"
        }

        { g'1 g'1}

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #RIGHT
            instrumentName = \markup \right-column {
                "Right aligned"
                "instrument name"
            }
            shortInstrumentName = "Right"
        }

        { e'1 e'1 }

    >>

    \layout {
        ragged-right = ##t
    }
}
```

```

    indent = 4\cm
    short-indent = 2\cm
}
}

```

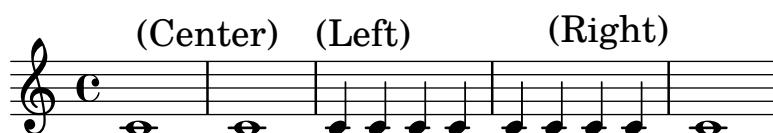

Aligning objects created with the \mark command

By default the \mark command centers objects over a bar line. This behavior can be modified to align at right or left.

```

\relative c' {
    c1 \mark "(Center)"
    c1
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark "(Left)"
    c4 c c c
    c4 c c c
    \once \override Score.RehearsalMark.self-alignment-X = #RIGHT
    \mark "(Right)"
    c1
}

```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
```

```

<<
\new Staff {
    \relative c' {
        \new Voice = "vocal" {
            c d^~\markup default d e
            c d^~\markup "right aligned" d e
            c d^~\markup "center aligned" d e
            c d^~\markup "reset to default" d e
        }
    }
\new Lyrics \lyricsto "vocal" {
    word word word
    \set lyricMelismaAlignment = #RIGHT
    word word word
    \set lyricMelismaAlignment = #CENTER
    word word word
    \unset lyricMelismaAlignment
    word word word
}
>>
}

```

Blanking staff lines using the \whiteout command

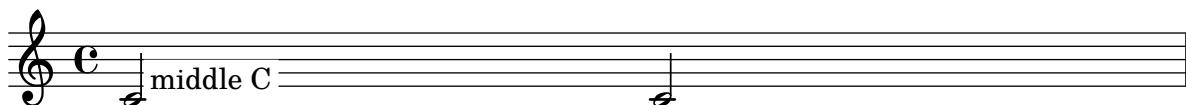

The `\whiteout` command underlays a markup with a white box. Since staff lines are in a lower layer than most other grobs, this white box will not overlap any other grob.

```

\layout {
    ragged-right = ##f
}

\relative c' {
    \override TextScript.extra-offset = #'(2 . 4)
    c2-\markup { \whiteout \pad-markup #0.5 "middle C" } c
}

```

Center text below hairpin dynamics

This example provides a function to typeset a hairpin (de)crescendo with some additional text below it, such as “molto” or “poco”. The added text will change the direction according to the direction of the hairpin. The Hairpin is aligned to DynamicText.

The example also illustrates how to modify the way an object is normally printed, using some Scheme code.

```
hairpinWithCenteredText =
#(define-music-function (text) (markup?))
#{{
 \once \override Voice.Hairpin.after-line-breaking =
 #(lambda (grob)
  (let* ((stencil (ly:hairpin::print grob))
         (par-y (ly:grob-parent grob Y))
         (dir (ly:grob-property par-y 'direction))
         (new-stencil (ly:stencil-aligned-to
                      (ly:stencil-combine-at-edge
                       (ly:stencil-aligned-to stencil X CENTER)
                       Y dir
                       (ly:stencil-aligned-to
                        (grob-interpret-markup grob text) X CENTER)))
                      X LEFT))
    (staff-space (ly:output-def-lookup
                  (ly:grob-layout grob) 'staff-space))
    (staff-line-thickness
     (ly:output-def-lookup (ly:grob-layout grob) 'line-thickness))
    (par-x (ly:grob-parent grob X))
    (dyn-text (grob::has-interface par-x 'dynamic-text-interface))
    (dyn-text-stencil-x-length
     (if dyn-text
         (interval-length
          (ly:stencil-extent (ly:grob-property par-x 'stencil) X))
         0))
    (x-shift
     (if dyn-text
         (-
          (+ staff-space dyn-text-stencil-x-length)
          (* 0.5 staff-line-thickness)) 0)))
    (ly:grob-set-property! grob 'Y-offset 0)
    (ly:grob-set-property! grob 'stencil
      (ly:stencil-translate-axis
       new-stencil
       x-shift X))))
  #})
}

hairpinMolto =
\hairpinWithCenteredText \markup { \italic molto }

hairpinMore =
\hairpinWithCenteredText \markup { \larger moltissimo }

\layout { ragged-right = ##f }

\relative c' {
  \hairpinMolto
  c2< c\f
  \hairpinMore
  c2\pppp\< c\f
```

```
\break
\hairpinMolto
c2^< c\f
\hairpinMore
c2\ppppp< c\f
}
```

The musical score consists of four staves of music. Each staff begins with a note followed by a hairpin dynamic. The first staff has a hairpin labeled 'molto' and a forte dynamic 'f'. The second staff has a hairpin labeled 'molto' and a forte dynamic 'f'. The third staff has a hairpin labeled 'molto' and a forte dynamic 'f'. The fourth staff has a hairpin labeled 'ppppp' and a forte dynamic 'f'.

Changing ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

Short text is especially useful when a brief ottava is used.

```
{
  c'2
  \ottava #1
  \set Staff.ottavation = #"8"
  c''2
  \ottava #0
  c'1
  \ottava #1
  \set Staff.ottavation = #"Text"
  c''1
}
```

The musical score shows a single staff of music. The first note is enclosed in a bracket labeled '8-1', indicating it is an octave higher than normal. The second note is enclosed in a bracket labeled 'Text1', indicating it is an octave lower than normal.

Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```
\paper {
  % change for other default global staff size.
  myStaffSize = #20
  %{
    run
      lilypond -dshow-available-fОНts blabla
      to show all fonts available in the process log.
  %}
}
```

```

#define fonts
  (make-pango-font-tree "Times New Roman"
    "Nimbus Sans,Nimbus Sans L"
    "Luxi Mono"
  ;;
    "Helvetica"
  ;;
    "Courier"
  (/ myStaffSize 20)))
}

\relative c' {
  c4^\markup {
    roman: foo \bold bla \italic bar \italic \bold baz
  }
  c'4_^\markup {
    \override #'(font-family . sans)
    {
      sans: foo \bold bla \italic bar \italic \bold baz
    }
  }
  c'2^\markup {
    \override #'(font-family . typewriter)
    {
      mono: foo \bold bla \italic bar \italic \bold baz
    }
  }
}
}

```

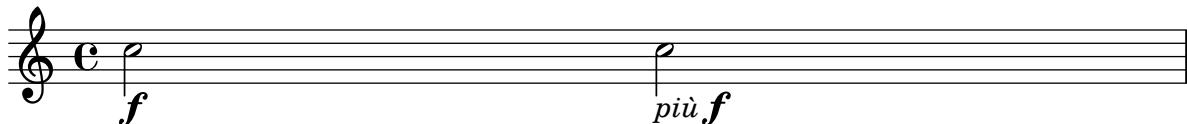

Combining dynamics with markup texts

Some dynamics may involve text indications (such as “più forte” or “piano subito”). These can be produced using a `\markup` block.

```
piuF = \markup { \italic più \dynamic f }
```

```
\layout { ragged-right = ##f }
```

```
\relative c' {
  c2\f c-\piuF
}
```

Combining two parts on the same staff

The part combiner tool (`\partcombine` command) allows the combination of several different parts on the same staff. Text directions such as “solo” or “a2” are added by default; to remove them, simply set the property `printPartCombineTexts` to `f`. For vocal scores (hymns), there is no need to add “solo/a2” texts, so they should be switched off. However, it might be better not to use it if there are any solos, as they won’t be indicated. In such cases, standard polyphonic notation may be preferable.

This snippet presents the three ways two parts can be printed on a same staff: standard polyphony, `\partcombine` without texts, and `\partcombine` with texts.

```

musicDown = \relative c' {
    g4 e4.( d8) c4 |
    r2 g'4( f8 e) |
    d2 \stemDown a
}

\score {
    <<
    \new Staff \with { instrumentName = #"Standard polyphony" }

    << \musicUp \\ \musicDown >>

    \new Staff \with {
        instrumentName = #"PartCombine without text"
        printPartCombineTexts = ##f
    }
}

\partcombine \musicUp \musicDown

\new Staff \with { instrumentName = #"PartCombine with text" }
    \partcombine \musicUp \musicDown
>>
\layout {
    indent = 6.0\cm
    \context {
        \Score
        \override SystemStartBar.collapse-height = #30
    }
}
}
```

Standard polyphony

PartCombine without text

PartCombine with text

The figure shows three staves of musical notation. The first staff, labeled 'Standard polyphony', contains two voices: a soprano voice with eighth-note patterns and a basso continuo voice with quarter-note patterns. The second staff, labeled 'PartCombine without text', shows the same musical content but lacks any text or dynamic markings. The third staff, labeled 'PartCombine with text', includes the same musical content but features text annotations: 'Solo' above the soprano staff and 'a2' below it, indicating a solo section for the soprano and a dynamic marking.

Creating "real" parenthesized dynamics

Although the easiest way to add parentheses to a dynamic mark is to use a `\markup` block, this method has a downside: the created objects will behave like text markups, and not like dynamics.

However, it is possible to create a similar object using the equivalent Scheme code (as described in the Notation Reference), combined with the `make-dynamic-script` function. This way, the markup will be regarded as a dynamic, and therefore will remain compatible with commands such as `\dynamicUp` or `\dynamicDown`.

```
paren =
#(define-event-function (dyn) (ly:event?)
  (make-dynamic-script
    #{
      \markup \concat {
        \normal-text \italic \fontsize #2 (
          \pad-x #0.2 #(ly:music-property dyn 'text)
        \normal-text \italic \fontsize #2 )
      }
    #})))
\relative c' {
  c4)paren\f c c \dynamicUp c)paren\p
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
  \key a \major
  \set Score.markFormatter = #format-mark-box-letters
  \once \override Score.RehearsalMark.outside-staff-priority = #5000
  \once \override Score.RehearsalMark.self-alignment-X = #LEFT
  \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
```

```
\mark \markup { \bold { Senza denti } }

% the hidden measure and bar line
% \cadenzaOn turns off automatic calculation of bar numbers
\cadenzaOn
\once \override Score.TimeSignature.stencil = ##f
\time 1/16
s16 \bar ""
\cadenzaOff

\time 4/4
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\mark \markup { \box \bold Intro }
d'1
\mark \default
d'1
}
```

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
  \override TextSpanner.bound-details.left.text = #"bla"
  \override TextSpanner.bound-details.right.text = #"blu"
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'line
  \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  a4 \startTextSpan
  b4 c
  a4 \stopTextSpan

  \override TextSpanner.style = #'dashed-line
  \override TextSpanner.bound-details.left.text =
    \markup { \draw-line #'(0 . 1) }
  \override TextSpanner.bound-details.right.text =
    \markup { \draw-line #'(0 . -2) }
  \once \override TextSpanner.bound-details.right.padding = #-2

  a4 \startTextSpan
```

```

b4 c
a4 \stopTextSpan

\set Staff.middleCPosition = #-13
\override TextSpanner.dash-period = #10
\override TextSpanner.dash-fraction = #0.5
\override TextSpanner.thickness = #10
a4 \startTextSpan
b4 c
a4 \stopTextSpan
}

```

Demonstrating all headers

All header fields with special meanings.

```

\header {
    copyright = "copyright"
    title = "title"
    subtitle = "subtitle"

Embedding native PostScript in a \markup block

PostScript code can be directly inserted inside a \markup block.

% PostScript is a registered trademark of Adobe Systems Inc.

```

\relative c' {
  a4-\markup { \postscript "3 4 moveto 5 3 rlineto stroke" }
  -\markup { \postscript "[ 0 1 ] 0 setdash 3 5 moveto 5 -3 rlineto stroke" }

  b4-\markup { \postscript "3 4 moveto 0 0 1 2 8 4 20 3.5 rcurveto stroke" }
  s2
  a'1
}

```

Formatting lyrics syllables

Markup mode may be used to format individual syllables in lyrics.

```
mel = \relative c' { c4 c c c }
lyr = \lyricmode {
    Lyrics \markup { \italic can } \markup { \with-color #red contain }
    \markup { \fontsize #8 \bold Markup! }
}

<<
\new Voice = melody \mel
\new Lyrics \lyricsto melody \lyr
>>
```

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

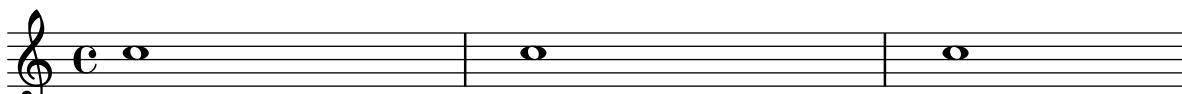

```
\lyrics {
    wa~o~a
}
```

waoa

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. `#-1` is left, `#0` is center and `#1` is right; however, you can use `#LEFT`, `#CENTER` and `#RIGHT` as well.

```
\layout { ragged-right = ##f }
\relative c' {
    c1
    c1
    c1
}
\addlyrics {
    \once \override LyricText.self-alignment-X = #LEFT
    "This is left-aligned"
    \once \override LyricText.self-alignment-X = #CENTER
    "This is centered"
    \once \override LyricText.self-alignment-X = #1
    "This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

Markup lines

Text that can spread over pages is entered with the \markuplines command.

%% updated/modified by P.P.Schneider on Feb. 2014

```
#(set-default-paper-size "a6")

#(define-markup-list-command (paragraph layout props args) (markup-list?)
  (interpret-markup-list layout props
    (make-justified-lines-markup-list (cons (make-hspace-markup 2) args)))))

% Candide, Voltaire

}
```

Il y avait en Westphalie, dans le château de M. le

baron de Thunder-ten-tronckh, un jeune garçon à qui

la nature avait donné les mœurs les plus douces. Sa

physionomie annonçait son âme. Il avait le jugement

assez droit, avec l'esprit le plus simple ; c'est, je crois,
pour cette raison qu'on le nommait Candide. Les
anciens domestiques de la maison soupçonnaient qu'il
était fils de la sœur de monsieur le baron et d'un bon et
honnête gentilhomme du voisinage, que cette
demoiselle ne voulut jamais épouser parce qu'il n'avait
pu prouver que soixante et onze quartiers, et que le
reste de son arbre généalogique avait été perdu par
l'injure du temps.

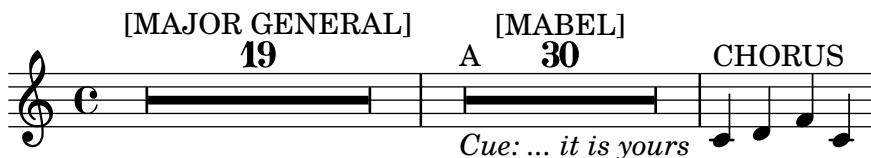

Monsieur le baron était un des plus puissants
seigneurs de la Westphalie, car son château avait une
porte et des fenêtres. Sa grande salle même était ornée
d'une tapisserie. Tous les chiens de ses basses-cours
composaient une meute dans le besoin ; ses
palefreniers étaient ses piqueurs ; le vicaire du village
était son grand-aumônier. Ils l'appelaient tous
monseigneur, et ils riaient quand il faisait des contes.

Multi-measure rest markup

Markups attached to a multi-measure rest will be centered above or below it. Long markups attached to multi-measure rests do not cause the measure to expand. To expand a multi-measure rest to fit the markup, use an empty chord with an attached markup before the multi-measure rest.

Text attached to a spacer rest in this way is left-aligned to the position where the note would be placed in the measure, but if the measure length is determined by the length of the text, the text will appear to be centered.

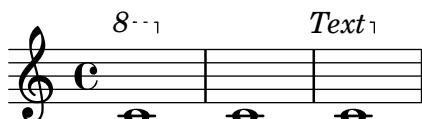

```
\relative c' {
    \compressMMLRests {
        \textLengthOn
        <>^markup { [MAJOR GENERAL] }
        R1*19
        <>_markup { \italic { Cue: ... it is yours } }
        <>^markup { A }
        R1*30^markup { [MABEL] }
        \textLengthOff
        c4^markup { CHORUS } d f c
    }
}
```

Ottava text

Internally, `\ottava` sets the properties `ottavation` (for example, to `8va` or `8vb`) and `middleCPosition`. To override the text of the bracket, set `ottavation` after invoking `\ottava`.

```
{
    \ottava #1
    \set Staff.ottavation = #"8"
    c''1
    \ottava #0
    c'1
    \ottava #1
    \set Staff.ottavation = #"Text"
    c''1
}
```

Outputting the version number

By putting the output of `lilypond-version` into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with `lilypond-book`. Another possibility is to append the version number to the doc-string, in this manner:

```
\score {
```

```
\new Lyrics {
  \override Score.RehearsalMark.self-alignment-X = #LEFT
  \mark #(string-append "Processed with LilyPond version " (lilypond-version))
  s2
}
}
```

Processed with LilyPond version 2.19.82

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
  \layout { }
  \midi { }
}
}
```

Printing bar numbers with changing regular intervals

The bar number interval can be changed by changing the context function `{set-bar-number-visibility}`.

```
\relative c' {
  \override Score.BarNumber.break-visibility = #end-of-line-invisible
  \context Score \applyContext #(set-bar-number-visibility 4)
  \repeat unfold 10 c'1
  \context Score \applyContext #(set-bar-number-visibility 2)
  \repeat unfold 10 c
}
```

The musical score consists of two staves. The top staff starts with a clef of G and a key signature of one sharp. It has bar numbers 5 and 9 above the bars. The bottom staff starts with a clef of G and a key signature of one sharp. It has bar numbers 11, 13, 15, 17, and 19 below the bars. Both staves have a common time signature.

Printing marks at the end of a line

Marks can be printed at the end of the current line, instead of the beginning of the following line. In such cases, it might be preferable to align the right end of the mark with the bar line.

```
\relative c'' {
  g2 c
  d,2 a'
  \once \override Score.RehearsalMark.break-visibility = #end-of-line-visible
  \once \override Score.RehearsalMark.self-alignment-X = #RIGHT
  \mark "D.C. al Fine"
  \break
  g2 b,
  c1 \bar "||"
}
```

The musical score shows a single staff starting with a clef of G and a key signature of one sharp. The first three measures have normal note heads. The fourth measure ends with a rehearsal mark containing the text "D.C. al Fine" at the end of the bar line.

Printing marks on every staff

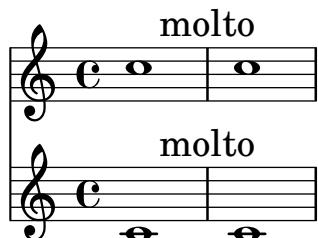

Although text marks are normally only printed above the topmost staff, they may also be printed on every staff.

```
\score {
  <<
  \new Staff { c''1 \mark "molto" c'' }
```

```

\new Staff { c'1 \mark "molto" c' }
>>
\layout {
  \context {
    \Score
    \remove "Mark_engraver"
    \remove "Staff_collecting_engraver"
  }
  \context {
    \Staff
    \consists "Mark_engraver"
    \consists "Staff_collecting_engraver"
  }
}
}

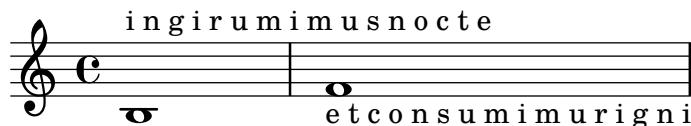

```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^\"markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_\"markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
  }
}
```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```
<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
```

```
\override LyricText.extra-offset = #'(0 . 8.6)
\override LyricExtender.extra-offset = #'(0 . 8.6)
\override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }
>>
```

Stand-alone two-column markup

Stand-alone text may be arranged in several columns using \markup commands:

```
\markup {
  \fill-line {
    \hspace #1
    \column {
      \line { O sacrum convivium }
      \line { in quo Christus sumitur, }
      \line { recolitur memoria passionis ejus, }
      \line { mens impletur gratia, }
      \line { futurae gloriae nobis pignus datur. }
      \line { Amen. }
    }
    \hspace #2
    \column \italic {
      \line { O sacred feast }
      \line { in which Christ is received, }
      \line { the memory of His Passion is renewed, }
      \line { the mind is filled with grace, }
      \line { and a pledge of future glory is given to us. }
      \line { Amen. }
    }
    \hspace #1
  }
}
```

O sacrum convivium
in quo Christus sumitur,
recolitur memoria passionis ejus,
mens impletur gratia,
futurae gloriae nobis pignus datur.
Amen.

O sacred feast
in which Christ is received,
the memory of His Passion is renewed,
the mind is filled with grace,
and a pledge of future glory is given to us.
Amen.

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
```

```

#(define-music-function (StringNumber) (string?)
  #{
    \override TextSpanner.style = #'solid
    \override TextSpanner.font-size = #-5
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.text =
      \markup { \circle \number $StringNumber }
  #})
}

\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}

```

Three-sided box

This example shows how to add a markup command to get a three sided box around some text (or other markup).

```

% New command to add a three sided box, with sides north, west and south
% Based on the box-stencil command defined in scm/stencil.scm
% Note that ";" is used to comment a line in Scheme
#(define-public (NWS-box-stencil stencil thickness padding)
  "Add a box around STENCIL, producing a new stencil."
  (let* ((x-ext (interval-widen (ly:stencil-extent stencil X) padding))
         (y-ext (interval-widen (ly:stencil-extent stencil Y) padding))
         (y-rule (make-filled-box-stencil (cons 0 thickness) y-ext))
         (x-rule (make-filled-box-stencil
                   (interval-widen x-ext thickness) (cons 0 thickness))))
    ;; (set! stencil (ly:stencil-combine-at-edge stencil X 1 y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil X LEFT y-rule padding))
    (set! stencil (ly:stencil-combine-at-edge stencil Y UP x-rule 0.0))
    (set! stencil (ly:stencil-combine-at-edge stencil Y DOWN x-rule 0.0))
    stencil))

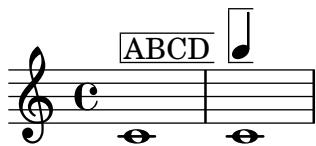

% The corresponding markup command, based on the \box command defined
% in scm/define-markup-commands.scm
#(define-markup-command (NWS-box layout props arg) (markup?))
  #:properties ((thickness 0.1) (font-size 0) (box-padding 0.2))
  "Draw a box round @var{arg}. Looks at @code{thickness},
@code{box-padding} and @code{font-size} properties to determine line
width and height of the box.")

```

```
thickness and padding around the markup."
(let ((pad (* (magstep font-size) box-padding))
      (m (interpret-markup layout props arg)))
  (NWS-box-stencil m thickness pad)))
```

% Test it:

```
\relative c' {
  c1^\markup { \NWS-box ABCD }
  c1^\markup { \NWS-box \note #"4" #1.0 }
}
```

UTF-8

Various scripts may be used for texts (like titles and lyrics) by entering them in UTF-8 encoding, and using a Pango based backend. Depending on the fonts installed, this fragment will render Bulgarian (Cyrillic), Hebrew, Japanese and Portuguese.

```
% Font settings for Cyrillic and Hebrew
% Linux Libertine fonts contain Cyrillic and Hebrew glyphs.
\paper {
  #(define fonts
    (set-global-fonts
      #:roman "Linux Libertine O,serif"
      #:sans "Linux Biolinum O,sans-serif"
      #:typewriter "Linux Libertine Mono O,monospace"
    )))
}

% Cyrillic font
bulgarian = \lyricmode {
  Жълтата дюля беше щастлива, че пухът, който цъфна, замръзна като гъон.
}

hebrew = \lyricmode {
  .
}

japanese = \lyricmode {

}

% "a legal song to you"
portuguese = \lyricmode {
  à vo -- cê uma can -- ção legal
```

}

```
\relative c' {
  c2 d
  e2 f
  g2 f
  e1
}
\addlyrics { \bulgarian }
\addlyrics { \hebrew }
\addlyrics { \japanese }
\addlyrics { \portuguese }
```

The image shows a musical score with two staves. The top staff is in common time (indicated by '4/4') and has a key signature of one sharp (indicated by 'C'). The lyrics are aligned below the staff:

Жълтата	дюля	беше	щастлива,
いろはにはへど	ちりぬるを	わがよたれぞ	つねならむ
à	vo -	- cê	uma

The bottom staff is also in common time (indicated by '4/4') and has a key signature of one sharp (indicated by 'C'). The lyrics are aligned above the staff:

чe	пухът,	кoйто
うみのおくや	накът	ажъ
can -	маке фукоэде	あさきゆめみじ
	- ção	legal

Vocal ensemble template with lyrics aligned below and above the staves

This template is basically the same as the simple “Vocal ensemble” template, with the exception that here all the lyrics lines are placed using `alignAboveContext` and `alignBelowContext`.

```
global = {
  \key c \major
  \time 4/4
}

sopMusic = \relative c'' {
  c4 c c8[( b)] c4
}
sopWords = \lyricmode {
  hi hi hi hi
}

altoMusic = \relative c' {
  e4 f d e
}
altoWords = \lyricmode {
  ha ha ha ha
```

```
}

tenorMusic = \relative c' {
    g4 a f g
}
tenorWords = \lyricmode {
    hu hu hu hu
}

bassMusic = \relative c {
    c4 c g c
}
bassWords = \lyricmode {
    ho ho ho ho
}

\score {

    \new ChoirStaff <<
        \new Staff = "women" <<
            \new Voice = "sopranos" { \voiceOne << \global \sopMusic >> }
            \new Voice = "altos" { \voiceTwo << \global \altoMusic >> }

```

Volta text markup using repeatCommands

Though volte are best specified using \repeat volta, the context property `repeatCommands` must be used in cases where the volta text needs more advanced formatting with \markup.

Since `repeatCommands` takes a list, the simplest method of including markup is to use an identifier for the text and embed it in the command list using the Scheme syntax #(list (list 'volta textIdentifier)). Start- and end-repeat commands can be added as separate list elements:

```
voltaAdLib = \markup { 1. 2. 3... \text \italic { ad lib. } }

\relative c' {
  c1
  \set Score.repeatCommands = #(list (list 'volta voltaAdLib) 'start-repeat)
  c4 b d e
  \set Score.repeatCommands = #'((volta #f) (volta "4.") end-repeat)
  f1
  \set Score.repeatCommands = #'((volta #f))
}
```

Vocal music

Section “Vocal music” in *Notation Reference*

Adding ambitus per voice

Ambitus can be added per voice. In this case, the ambitus must be moved manually to prevent collisions.

```
\new Staff <<
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c'' {
    \override Ambitus.X-offset = #2.0
    \voiceOne
    c4 a d e
    f1
  }
  \new Voice \with {
    \consists "Ambitus_engraver"
  } \relative c' {
    \voiceTwo
    es4 f g as
    b1
  }
>>
```

Adding indicators to staves which get split after a break

This snippet defines the `\splitStaffBarLine`, `convUpStaffBarLine` and `convDownStaffBarLine` commands. These add arrows at a bar line, to denote that several voices sharing a staff will each continue on a staff of their own in the next system, or that voices split in this way recombine.

```
(#(define-markup-command (arrow-at-angle layout props angle-deg length fill)
  (number? number? boolean?))
  (let* (
    (PI-OVER-180 (/ (atan 1 1) 34))
    (degrees->radians (lambda (degrees) (* degrees PI-OVER-180)))
    (angle-rad (degrees->radians angle-deg))
    (target-x (* length (cos angle-rad)))
    (target-y (* length (sin angle-rad))))
  (interpret-markup layout props
    (markup
      #:translate (cons (/ target-x 2) (/ target-y 2)))
      #:rotate angle-deg
      #:translate (cons (/ length -2) 0)

    \override VerticalAxisGroup.remove-first = ##t
  }
}
```

The image shows three staves of vocal music. The top staff is for Soprano A (S A) in treble clef, with notes c, c, d, d and lyrics a, b, c, d. The middle staff is for Tenor B (T B) in bass clef, with notes c, c, d, d and lyrics a, b, c, d. The bottom staff is divided into two parts: Alto I (SI) and Alto II (SII) in treble clef, with notes e, f, g, h and lyrics e, f, g, h; and Tenor B (T B) in bass clef, with notes e, f, g, h and lyrics e, f, g, h. The third staff begins with a measure number 3. The top part has notes c, c, d, d and lyrics i, j, k, l. The bottom part has notes c, c, d, d and lyrics i, j, k, l.

Adding orchestral cues to a vocal score

This shows one approach to simplify adding many orchestral cues to the piano reduction in a vocal score. The music function `\cueWhile` takes four arguments: the music from which the cue is to be taken, as defined by `\addQuote`, the name to be inserted before the cue notes, then either `#UP` or `#DOWN` to specify either `\voiceOne` with the name above the staff or `\voiceTwo` with the name below the staff, and finally the piano music in parallel with which the cue notes are to appear. The name of the cued instrument is positioned to the left of the cued notes. Many passages can be cued, but they cannot overlap each other in time.

```

cueWhile =
#(define-music-function
  (instrument name dir music)
  (string? string? ly:dir? ly:music?)
  #{
    \cueDuring $instrument #dir {
      \once \override TextScript.self-alignment-X = #RIGHT
      \once \override TextScript.direction = $dir
      <>- \markup { \tiny #name }
      $music
    }
  }
)
```

```
        }
    #})}

flute = \relative c' {
    \transposition c'
    s4 s4 e g
}
\addQuote "flute" { \flute }

clarinet = \relative c' {
    \transposition bes
    fis4 d d c
}
\addQuote "clarinet" { \clarinet }

singer = \relative c' { c4. g8 g4 bes4 }
words = \lyricmode { here's the lyr -- ics }

pianoRH = \relative c' {
    \transposition c'

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

% Default layout:

<<

```
\new Staff \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'(basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Aligning syllables with melisma

By default, lyrics syllables that start a melisma are left aligned on their note. The alignment can be altered using the `lyricMelismaAlignment` property.

```
\score {
    <<
        \new Staff {
            \relative c'
```

```
\new Voice = "vocal" {
    c d^~\markup default d e
    c d^~\markup "right aligned" d e
    c d^~\markup "center aligned" d e
    c d^~\markup "reset to default" d e
}
}

\new Lyrics \lyricsto "vocal" {
    word word word
    \set lyricMelismaAlignment = #RIGHT
    word word word
    \set lyricMelismaAlignment = #CENTER
    word word word
    \unset lyricMelismaAlignment
    word word word
}
>>
}
```

Ambitus with multiple voices

Adding the `Ambitus_engraver` to the `Staff` context creates a single ambitus per staff, even in the case of staves with multiple voices.

```
\new Staff \with {
    \consists "Ambitus_engraver"
}
<<
\new Voice \relative c'' {
    \voiceOne
    c4 a d e
    f1
}
\new Voice \relative c' {
    \voiceTwo
    es4 f g as
    b1
}
>>
```

Ambitus

Ambitus indicate pitch ranges for voices.

Accidentals only show up if they are not part of the key signature. `AmbitusNoteHead` grobs also have ledger lines.

```
\layout {
  \context {
    \Voice
    \consists "Abitus_engraver"
  }
}

<<
\new Staff {
  \relative c' {
    \time 2/4
    c4 f'
  }
}
\new Staff {
  \relative c' {
    \time 2/4
    \key d \major
    cis4 as'
  }
}
>>
```

Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
\include "gregorian.ly"

chant = \relative c' {
  \set Score.timing = ##f
  f4 a2 \divisioMinima
  g4 b a2 f2 \divisioMaior
  g4( f) f( g) a2 \finalis
}

verba = \lyricmode {
  Lo -- rem ip -- sum do -- lor sit a -- met
}
```

```
\score {
    \new Staff <<
        \new Voice = "melody" \chant
        \new Lyrics = "one" \lyricsto melody \verba
    >>
    \layout {
        \context {
            \Staff
            \remove "Time_signature_engraver"
            \remove "Bar_engraver"
            \hide Stem
        }
        \context {
            \Voice
            \override Stem.length = #0
        }
        \context {

8. Today if ye will hear his voice *
harden' not your' hearts : as in the pro-
vocation * and as in the **day** of tempt-'
-ation' in the' wilderness.

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
  \new Staff <<
    \new Voice = "alice" {
      f'4^\aliceSings g' r2 |
      s1 |
      f'4^\aliceSings g' r2 |
      s1 | \break
      % ...
    }

    \voiceOne
    s2 a'8^\aliceSings a' b'4 |
    \oneVoice
    g'1
  }

  \new Voice = "eve" {
    s1 |
    a'2^\eveSings g' |
    s1 |
    a'2^\eveSings g'
    % ...
  }

  \voiceTwo
  f'4^\eveSings a'8 g' f'4 e' |
  \oneVoice
  s1
}
>>
```

```
\new Lyrics \lyricsto "alice" {
    may -- be
    sec -- ond
    %
    ...
    Shut up, you fool!
}

\new Lyrics \lyricsto "eve" {
    that the
    words are
    %
    ...
    ...and then I was like--
}

>>
```

The musical score consists of two staves. The top staff is for Alice, starting with a treble clef, common time, and a key signature of one sharp. It contains four measures of music with lyrics: "may - be", "that", "the", and "sec - ond". The bottom staff is for Eve, also in treble clef and common time. It contains five measures of music with lyrics: "...and", "then", "I", "Shut up, you", and "fool!". The lyrics are placed below the notes, aligned with the start of each measure.

Changing stanza fonts

Fonts can be changed independently for each stanza, including the font used for printing the stanza number.

```
\relative c' {
    \time 3/4
    g2 e4
    a2 f4
    g2.
}
\addlyrics {
    \set stanza = #"1. "
    Hi, my name is Bert.
}
\addlyrics {
    \override StanzaNumber.font-name = #"DejaVu Sans"
    \set stanza = #"2. "
    \override LyricText.font-family = #'typewriter
    Oh, ché -- ri, je t'aime
}
```

A musical staff in 3/4 time with a treble clef. It contains four measures of music. The first measure has three quarter notes. The second measure has one quarter note and one half note. The third measure has two quarter notes. The fourth measure has one quarter note followed by a dotted half note.

1. Hi, my name is Bert.
 2. Oh, ché-ri, je t'aime

Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren't always the same length.

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \bar "||"
    \stemOff a'\breve g'4 a'4
    \stemOn f'2 \bar "||"
    \stemOff a'\breve^\markup { \italic flexe }
    \stemOn g'2 \bar "||"
  }
}
```

Forcing hyphens to be shown

If LilyPond does not think there is space for a hyphen, it will be omitted. The behaviour can be overridden with the `minimum-distance` property of `LyricHyphen`.

```
\relative c' {
  c32 c c c
  c32 c c c
  c32 c c c
  c32 c c c
}
\addlyrics {
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #1.0
  syl -- lab word word
  \override LyricHyphen.minimum-distance = #2.0
  syl -- lab word word
  \revert LyricHyphen.minimum-distance
  syl -- lab word word
}
```

Formatting lyrics syllables

Markup mode may be used to format individual syllables in lyrics.

```
mel = \relative c' { c4 c c c }
```

```

lyr = \lyricmode {
    Lyrics \markup { \italic can } \markup { \with-color #red contain }
    \markup { \fontsize #8 \bold Markup! }
}

<<
    \new Voice = melody \mel
    \new Lyrics \lyricsto melody \lyr
>>

```

Lyrics *can contain* **Markup!**

How to put ties between syllables in lyrics

This can be achieved by separating those syllables by tildes.

```
\lyrics {
    wa~o~a
}
```

wa o a

Hymn template

This code shows one way of setting out a hymn tune when each line starts and ends with a partial measure. It also shows how to add the verses as stand-alone text under the music.

```

Timeline = {
    \time 4/4
    \tempo 4=96
    \partial 2
    s2 | s1 | s2 \breathe s2 | s1 | s2 \bar "||" \break
    s2 | s1 | s2 \breathe s2 | s1 | s2 \bar "||"
}

```

```
SopranoMusic = \relative g' {
    g4 g | g g g g | g g g g | g g g g | g2
    g4 g | g g g g | g g g g | g g g g | g2
}
```

```
AltoMusic = \relative c' {
    d4 d | d d d d | d d d d | d d d d | d2
    d4 d | d d d d | d d d d | d d d d | d2
}
```

```
TenorMusic = \relative a {
    b4 b | b b b b | b b b b | b b b b | b2
    b4 b | b b b b | b b b b | b b b b | b2
}
```

```
BassMusic = \relative g {
    g4 g | g g g g | g g g g | g g g g | g2

```

The image shows two staves of musical notation. The top staff is in G major (indicated by a sharp sign) and common time (indicated by a 'c'). It begins with a C-clef. The bottom staff is in G major (indicated by a sharp sign) and common time, indicated by a bass F-clef and a 'c'. Both staves feature a series of eighth-note chords followed by a single sixteenth note.

```

This is line one of the first verse
This is line two of the same
And here's line three of the first verse
And the last line of the same

```

Lyrics alignment

Horizontal alignment for lyrics can be set by overriding the `self-alignment-X` property of the `LyricText` object. `#-1` is left, `#0` is center and `#1` is right; however, you can use `#LEFT`, `#CENTER` and `#RIGHT` as well.

```

\layout { ragged-right = ##f }
\relative c' {
    c1
    c1
    c1
}
\addlyrics {
    \once \override LyricText.self-alignment-X = #LEFT
    "This is left-aligned"
    \once \override LyricText.self-alignment-X = #CENTER
    "This is centered"
    \once \override LyricText.self-alignment-X = #1
}

```

```
"This is right-aligned"
}
```

This is left-aligned This is centered This is right-aligned

Marking notes of spoken parts with a cross on the stem

This example shows how to put crosses on stems. Mark the beginning of a spoken section with the `\speakOn` keyword, and end it with the `\speakOff` keyword.

```
speakOn = {
  \override Stem.stencil =
  #(lambda (grob)
    (let* ((x-parent (ly:grob-parent grob X))
           (is-rest? (ly:grob? (ly:grob-object x-parent 'rest))))
      (if is-rest?
          empty-stencil
          (ly:stencil-combine-at-edge
           (ly:stem::print grob)
           Y
           (- (ly:grob-property grob 'direction))
           (grob-interpret-markup grob
             (markup #:center-align #:fontsize -4
                   #:musicglyph "noteheads.s2cross"))
           -2.3))))
  )
}

speakOff = {
  \revert Stem.stencil
  \revert Flag.stencil
}

\score {
  \new Staff {
    \relative c' {
      a4 b a c
      \speakOn
      g4 f r g
      b4 r d e
      \speakOff
      c4 a g f
    }
  }
}
```

Obtaining 2.12 lyrics spacing in newer versions

The vertical spacing engine changed since version 2.14. This can cause lyrics to be spaced differently.

It is possible to set properties for `Lyric` and `Staff` contexts to get the spacing engine to behave as it did in version 2.12.

```

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4
```

```
  a b c d
}
```

```
text = \lyricmode {
  Aaa Bee Cee Dee
}
```

```
upper = \relative c' {
  \clef treble
  \key c \major
  \time 4/4
```

```

    a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  <<
  \new Voice = "mel" { \autoBeamOff \melody }
  \new Lyrics \lyricsto mel \text
  \new PianoStaff <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  >>
  \layout {
    \context { \Staff \RemoveEmptyStaves }
  }
  \midi { }
}

```

Putting lyrics inside the staff

Lyrics can be moved vertically to place them inside the staff. The lyrics are moved with `\override LyricText.extra-offset = #'(0 . dy)` and there are similar commands to move the extenders and hyphens. The offset needed is established with trial and error.

```

<<
\new Staff <<
  \new Voice = "voc" \relative c' { \stemDown a bes c8 b c4 }
>>
\new Lyrics \with {
  \override LyricText.extra-offset = #'(0 . 8.6)
  \override LyricExtender.extra-offset = #'(0 . 8.6)
  \override LyricHyphen.extra-offset = #'(0 . 8.6)
} \lyricsto "voc" { La la -- la __ _ la }

```

>>

SATB Choir template - four staves

SATB choir template (four staves)

```

    \new Voice = "bass" <<
        \global
        \bassnotes
    >>
    \new Lyrics \lyricsto "bass" \basswords
>>
>>
}
```

The musical score consists of four staves. The top two staves are in treble clef (Tenor and Bass). The bottom two staves are in bass clef (Alto and Soprano). The Tenor staff has a dynamic 'p' at the beginning and ends with 'f'. The Bass staff has a dynamic 'p'. The Alto staff has a dynamic 'mp'. The Soprano staff has a dynamic 'mf'. The lyrics are: do do do do; re re re re; mi mi mi mi; mi mi mi mi.

Single staff template with notes lyrics and chords

This template allows the preparation of a song with melody, words, and chords.

```
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4
    a4 b c d
}
```

```
text = \lyricmode {
    Aaa Bee Cee Dee
}
```

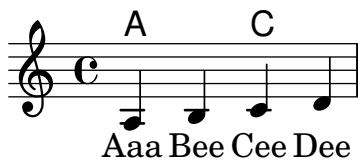

```
harmonies = \chordmode {
    a2 c
```

```

}

\score {
  <<
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Voice = "one" { \autoBeamOff \melody }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}

```

Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

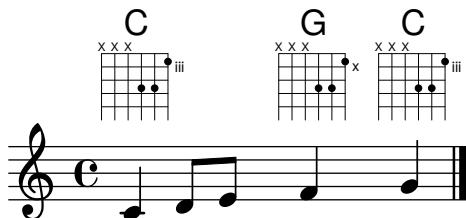

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
  c4 d8 e f4 g
  \bar "|."
}

\score {
  <<
  \context ChordNames { \theChords }
  \context FretBoards { \theChords }
  \new Staff {

```

```
\context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
  \lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
  \lyricsto "voiceMelody" \verseII
}
>>
\layout { }
\midi { }
}
```

1. This is the first verse
2. This is the second verse.

Single staff template with notes and lyrics

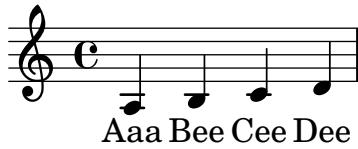

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

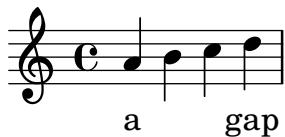

\score{
  <<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Skips in lyric mode (2)

Although **s** skips cannot be used in `\lyricmode` (it is taken to be a literal “s”, not a space), double quotes (") or underscores (_) are available. So for example:

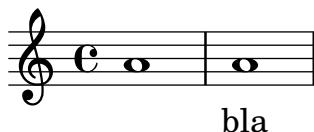

```
<<
  \relative c' { a4 b c d }
  \new Lyrics \lyricmode { a4 " " _ gap }
>>
```

Skips in lyric mode

The **s** syntax for skips is only available in note mode and chord mode. In other situations, for example, when entering lyrics, using the `\skip` command is recommended.

```
<<
  \relative c' { a1 | a }
  \new Lyrics \lyricmode { \skip 1 bla1 }
>>
```

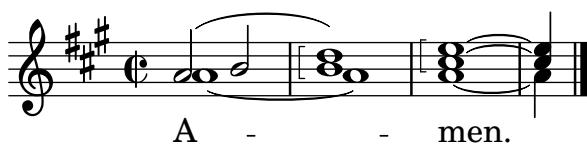

Using arpeggioBracket to make divisi more visible

The `arpeggioBracket` can be used to indicate the division of voices where there are no stems to provide the information. This is often seen in choral music.

```
\include "english.ly"

\score {
  \relative c' {
    \key a \major
    \time 2/2
    <<
      \new Voice = "upper"
      <<
        { \voiceOne \arpeggioBracket
          a2( b2
          <b d>1\arpeggio)
          <cs e>\arpeggio ~
          <cs e>4
        }
      \addlyrics { \lyricmode { A -- men. } }
    >>
    \new Voice = "lower"
```

```
{
  \voiceTwo
    a1 ~
    a
    a ~
    a4 \bar "| ."
}
>>
}
\layout { ragged-right = ##t }
}
```

Using tags to produce mensural and modern music from the same source

By using tags, it's possible to use the same music to produce both mensural and modern music. In this snippet, a function `menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags are used to produce different types of bar line at the end of the music, but tags can also be used where other differences are needed: for example using “whole measure rests” (`R1`, `R\breve` etc.) in modern music, but normal rests (`r1`, `r\breve`, etc.) in the mensural version. Note that converting mensural music to its modern equivalent is usually referred to as `transcription`.

```

menrest = #(define-music-function (note)
  (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #})

MensStyle = {
  \autoBeamOff
  \override NoteHead.style = #'petrucci
  \override Score.BarNumber.transparent = ##t
  \override Stem.neutral-direction = #up
}

finalis = {
  \once \override BreathingSign.stencil = #ly:breathing-sign::finalis
  \once \override BreathingSign.Y-offset = #0
  \once \override BreathingSign.minimum-X-extent = #'(-1.0 . 0.0)
  \once \override BreathingSign.minimum-Y-extent = #'(-2.5 . 2.5)

  \breathe
}

Music = \relative c' {
  \set Score.tempohideNote = ##t
  \key f \major
}
```

```

}
>>
```

Vertically centered common lyrics

In a vocal piece where there are several (two, four or more) lines of lyrics and common lyrics for all voices at some point, the common lyrics may be made to appear vertically centered, as shown in the following example:

```
dropLyrics = {
    \override LyricText.extra-offset = #'(0 . -4.5)
    \override LyricHyphen.extra-offset = #'(0 . -4.5)
    \override LyricExtender.extra-offset = #'(0 . -4.5)
    \override StanzaNumber.extra-offset = #'(0 . -4.5)
}

raiseLyrics = {
    \revert LyricText.extra-offset
    \revert LyricHyphen.extra-offset
    \revert LyricExtender.extra-offset
    \revert StanzaNumber.extra-offset
}

skipFour = \repeat unfold 4 { \skip 8 }

lyricsA = \lyricmode {
    The first verse has
    \dropLyrics
    \set stanza = #" All:"
    the com -- mon __ words
    \raiseLyrics
    used in all four.
}

lyricsB = \lyricmode { In stan -- za two, \skipFour al -- so ap -- pear. }

lyricsC = \lyricmode { By the third verse, \skipFour are get -- ting dull. }

lyricsD = \lyricmode { Last stan -- za, and \skipFour get used once more. }

melody = \relative c' {
    c4 d e f |
    g f e8( e f) d |
    c4 e d c |
}

\score {
    <<
    \new Voice = m \melody
    \new Lyrics \lyricsto m \lyricsA
    \new Lyrics \lyricsto m \lyricsB
    \new Lyrics \lyricsto m \lyricsC
    \new Lyrics \lyricsto m \lyricsD
    >>
}
```

The first verse has used in all four.
In stan - za two, al - so ap - pear.
By the third verse, All: the common words are get - ting dull.
Last stan - za, and get used once more.

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes will also apply to the piano reduction.

        % \new Lyrics \lyricsto "basses" \bassWords
    >>
}
```

A musical score for a vocal ensemble. It features two staves: a soprano staff (treble clef) and a bass staff (bass clef). The soprano staff contains four measures of 'hi' and one measure of 'ha'. The bass staff contains four measures of 'hu' and one measure of 'ho'. The music is in common time (indicated by 'c') and G major (indicated by 'G').

Vocal ensemble template with verse and refrain

This template creates a score which starts with a solo verse and continues into a refrain for two voices. It also demonstrates the use of spacer rests within the \global variable to define meter changes (and other elements common to all parts) throughout the entire score.

```
global = {
    \key g \major

    % verse
    \time 3/4
```

```
s2.*2
\break

% refrain
\time 2/4

    >>
    \layout {
        ragged-right = ##t
        \context { \Staff
            % these lines prevent empty staves from being printed
            \RemoveEmptyStaves
            \override VerticalAxisGroup.remove-first = ##t
        }
    }
}

```

A detailed musical score for a vocal ensemble template. It features two staves: a soprano staff in treble clef and a bass staff in bass clef. The soprano staff has lyrics "la la la la" over four measures. The bass staff has lyrics "dum dum dum dum" over four measures. The score is in 3/4 time with a key signature of one sharp.

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

```

\paper {
    top-system-spacing.basic-distance = #10
    score-system-spacing.basic-distance = #20
    system-system-spacing.basic-distance = #20
}

```

```

```

A musical score for four voices (Soprano, Alto, Tenor, Bass) and a basso continuo. The score is in common time (C). The soprano part consists of four measures of 'hi'. The alto part consists of four measures of 'ha'. The tenor part consists of four measures of 'hu'. The bass part consists of four measures of 'ho'. The basso continuo part is shown below the vocal staves, consisting of four measures of quarter notes.

Chords

Section “Chord notation” in *Notation Reference*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

Adding bar lines to ChordNames context

To add bar line indications in the `ChordNames` context, add the `Bar_engraver`.

```
\new ChordNames \with {
    \override BarLine.bar-extent = #'(-2 . 2)
    \consists "Bar_engraver"
}

\chordmode {
    f1:maj7 f:7 bes:7
}
```

F \triangle | F 7 | B \flat 7 |

Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

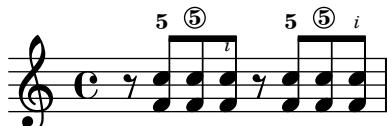

```

\relative c' {
    \set fingeringOrientations = #'(up)
    \set stringNumberOrientations = #'(up)
    \set strokeFingerOrientations = #'(up)

    % Default behavior
    r8
    <f c'{-5}>8
    <f c'{\5}>8
    <f c'{-\rightHandFinger #2}>8

    % No tweak needed
    r8
    <f c'{-5}>8
    <f c'{\5}>8
    % Corrected to avoid collisions
    \override StrokeFinger.add-stem-support = ##t
    <f c'{-\rightHandFinger #2}>8
}

```

Bar chords notation for Guitar (with Text Spanner)

Here is how to print bar chords (or barre chords) or half-bar chords (just uncomment the appropriate line for to select either one). The syntax is : \bbarre #'fret number' note(s)

%%% Cut here ----- Start 'bbarred.ly'

```

Changing chord separator

The separator between different parts of a chord name can be set to any markup.

```

\chords {
  c:7sus4
  \set chordNameSeparator
    = \markup { \typewriter | }
  c:7sus4
}

```

C⁷sus4 C^{7|sus4}

Changing the chord names to German or semi-German notation

The english naming of chords (default) can be changed to german (\germanChords replaces B and Bes with H and B) or semi-german (\semiGermanChords replaces B and Bes with H and Bb).

```

scm = \chordmode {
  c1/c | cis/cis
  b1/b | bis/bis | bes/bes
}

\layout {
  ragged-right = ##t
  \context {
    \ChordNames
    \consists "Instrument_name_engraver"
  }
}

<<
\new ChordNames {
  \set instrumentName = #"default"
  \scm
}
\new ChordNames {
  \set instrumentName = #"german"
  \germanChords \scm
}
\new ChordNames {
  \set instrumentName = #"semi-german"
  \semiGermanChords \scm
}
\new ChordNames {
  \set instrumentName = #"italian"
  \italianChords \scm
}
\new ChordNames {
  \set instrumentName = #"french"
  \frenchChords \scm
}
\context Voice { \scm }

>>

```

default	C/C	C#/C#	B/B	B#/B#	B♭/B♭
german	C/c	C#/cis	H/h	H#/his	B/b
semi-german	C/c	C#/cis	H/h	H#/his	B♭/b
italian	Do/Do	Do#/Do#	Si/Si	Si#/Si#	Si♭/Si♭
french	Do/Do	Do#/Do#	Si/Si	Si#/Si#	Si♭/Si♭

Changing the positions of figured bass alterations

Accidentals and plus signs can appear before or after the numbers, depending on the `figuredBassAlterationDirection` and `figuredBassPlusDirection` properties.

```
\figures {
  <6\+> <5+> <6 4-> r
  \set figuredBassAlterationDirection = #RIGHT
  <6\+> <5+> <6 4-> r
  \set figuredBassPlusDirection = #RIGHT
  <6\+> <5+> <6 4-> r
  \set figuredBassAlterationDirection = #LEFT
  <6\+> <5+> <6 4-> r
}
```

+6 #5 6
 +6 5# 6
 6+ 5# 6
 6+ #5 6

Chord name exceptions

The property `chordNameExceptions` can be used to store a list of special notations for specific chords.

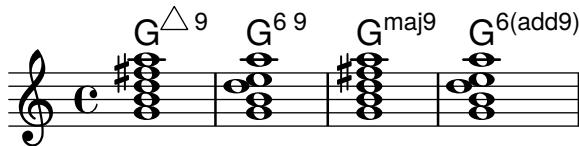

```
% modify maj9 and 6(add9)
% Exception music is chords with markups
chExceptionMusic = {
  <c e g b d'>1-\markup { \super "maj9" }
  <c e g a d'>1-\markup { \super "6(add9)" }
}

% Convert music to list and prepend to existing exceptions.
chExceptions = #( append
  ( sequential-music-to-chord-exceptions chExceptionMusic #t)
  ignatzekExceptions)

theMusic = \chordmode {
  g1:maj9 g1:6.9
  \set chordNameExceptions = #chExceptions
  g1:maj9 g1:6.9
}

\layout {
  ragged-right = ##t
}
```

```
<< \context ChordNames \theMusic
    \context Voice \theMusic
>>
```

chord name major7

The layout of the major 7 can be tuned with `majorSevenSymbol`.

```
\chords {
  c:7+
  \set majorSevenSymbol = \markup { j7 }
  c:7+
}
```

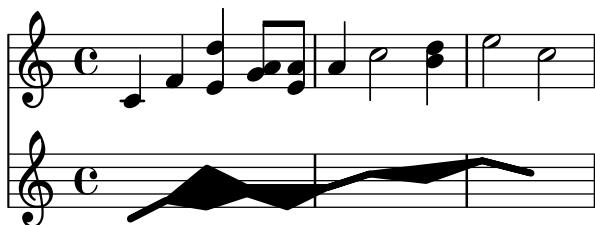

C^{\triangle} C^{j7}

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
  c4 f <e d'>4
  <g a>8 <e a> a4 c2 <d b>4
  e2 c
}

<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

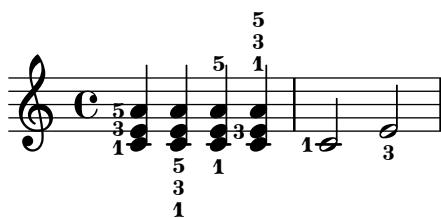

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct `<>` even if it is a single note.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
```

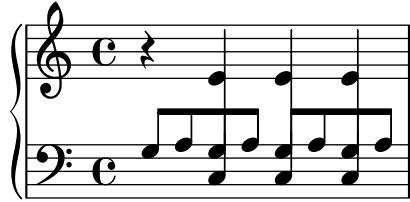

```
\set fingeringOrientations = #'(down right up)
<c-1 e-3 a-5>4
\set fingeringOrientations = #'(up)
<c-1 e-3 a-5>4
\set fingeringOrientations = #'(left)
<c-1>2
\set fingeringOrientations = #'(down)
<e-3>2
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
  \new Staff = bottom
    \relative c' {
      \clef bass
      \voiceOne
      g8 a g a g a g a
    }
>>
```

Displaying complex chords

Here is a way to display a chord where the same note is played twice with different accidentals.

```
fixA = {
    \once \override Stem.length = #11
}

fixB = {
    \once \override NoteHead.X-offset = #1.7
    \once \override Stem.length = #7
    \once \override Stem.rotation = #'(45 0 0)
    \once \override Stem.extra-offset = #'(-0.1 . -0.2)
    \once \override Flag.style = #'no-flag
    \once \override Accidental.extra-offset = #'(4 . -.1)
}

\relative c' {
    << { \fixA <b d!>8 } \\ { \voiceThree \fixB dis } >> s
}
```

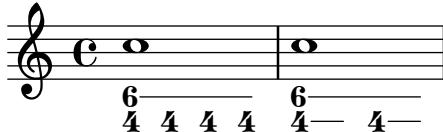

Manually break figured bass extenders for only some numbers

Figured bass often uses extenders to indicate continuation of the corresponding step. However, in this case lilypond is in greedy-mode and uses extenders whenever possible. To break individual extenders, one can simply use a modifier `\!` to a number, which breaks any extender attributed to that number right before the number.

```
bassfigures = \figuremode {
    \set useBassFigureExtenders = ##t
    <6 4>4 <6 4\!> <6 4\!> <6 4\!> | <6\! 4\!> <6 4> <6 4\!> <6 4>
}

<<
\new Staff \relative c'' { c1 c1 }
\new FiguredBass \bassfigures
>>
```

Showing chords at changes

Chord names can be displayed only at the start of lines and when the chord changes.

```
harmonies = \chordmode {
    c1:m c:m \break c:m c:m d
}
```

```
<<
\new ChordNames {
    \set chordChanges = ##t
    \harmonies
}
\new Staff {
    \relative c' { \harmonies }
}
>>
```

The image shows two musical staves. The top staff starts with a C major chord (C, E, G) in common time. The bottom staff starts with a G major chord (G, B, D) in common time. Both staves have a bass line below them. The top staff's bass line consists of a C note followed by a G note. The bottom staff's bass line consists of a G note followed by a D note. The top staff has a 'Cm' label above it. The bottom staff has a '3' label above it.

Simple lead sheet

When put together, chord names, a melody, and lyrics form a lead sheet:

```
<<
\chords { c2 g:sus4 f e }
\relative c' {
    a4 e c8 e r4
    b2 c4( d)
}
\addlyrics { One day this shall be free __ }
>>
```

The image shows a single musical staff in common time. It features a melody consisting of eighth and sixteenth notes on the first three strings of a guitar. Below the staff, the lyrics 'One day this shall be free' are written. Above the staff, the chords are labeled: 'C', 'G^{sus4}', 'F', and 'E'.

Single staff template with notes lyrics and chords

This template allows the preparation of a song with melody, words, and chords.

```
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4
```

```

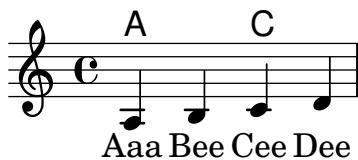

a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {
  a2 c
}

\score {
  <<
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Voice = "one" { \autoBeamOff \melody }
  \new Lyrics \lyricsTo "one" \text
>>
\layout { }
\midi { }
}

```

Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
  \set stanza = #"1."
  This is the first verse
}

verseII = \lyricmode {
  \set stanza = #"2."
  This is the second verse.
}

theChords = \chordmode {
  % insert chords for chordnames and fretboards here
  c2 g4 c
}

staffMelody = \relative c' {
  \key c \major
  \clef treble
  % Type notes for melody here
}

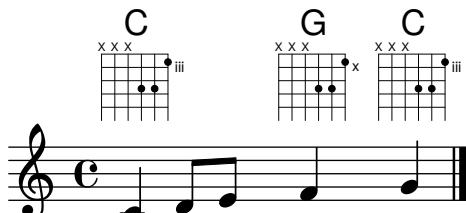

```

```

c4 d8 e f4 g
\bar "|."
}

\score {
<<
\context ChordNames { \theChords }
\context FretBoards { \theChords }
\new Staff {
\context Voice = "voiceMelody" { \staffMelody }
}
\new Lyrics = "lyricsI" {
\lyricsto "voiceMelody" \verseI
}
\new Lyrics = "lyricsII" {
\lyricsto "voiceMelody" \verseII
}
>>
\layout { }
\midi { }
}

```

1. This is the first verse
2. This is the second verse.

Single staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```

melody = \relative c' {
\clef treble
\key c \major
\time 4/4

f4 e8[ c] d4 g
a2 ~ a
}

harmonies = \chordmode {
c4:m f:min7 g:maj c:aug
d2:dim b4:5 e:sus
}

\score {
<<
\new ChordNames {
\set chordChanges = ##t
}

```

```
\harmonies
}
\new Staff \melody
>>
\layout{ }
\midi { }
}
```

A musical staff in common time (C) showing a melody. The notes are: Cm, Fm⁷, G△, C+, D°, B, E^{sus4}. The staff has a treble clef and a key signature of one sharp.

Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```
<<
\relative c' {
  c8 c b b a a c16 c b b
  c8 c b b a a c16 c b b
  c8 c b b a a c c b b
}
\fignures {
  \set useBassFigureExtenders = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##f
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>8
}
>>
```

A musical staff in common time (C) showing a melody above a figured bass line. The bass line consists of pairs of vertical stems with horizontal dashes, indicating vertical centering of extender lines. The stems are labeled with figures: #6/4 over 3, and #6/4 over 3.

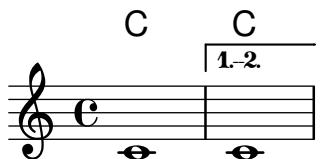

Volta below chords

By adding the `Volta_engraver` to the relevant staff, volta can be put under chords.

```
\score {
  <<
  \chords {
    c1
    c1
  }
```

```
}

\new Staff \with {
    \consists "Volta_engraver"
}
{
    \repeat volta 2 { c'1 }
    \alternative { c' }
}
>>
\layout {
    \context {
        \Score
        \remove "Volta_engraver"
    }
}
}
```

Keyboards

Section “Keyboard and other multi-staff instruments” in *Notation Reference*

Accordion-discant symbols

This snippet has been obsoleted by predefined markup commands, see ‘Accordion Registers’ in the Notation Reference. It’s still useful as a simple demonstration of how to combine symbols: the placement of the symbols added with \markup can be tweaked by changing the \translate-scaled arguments. \translate-scaled is used here rather than \translate in order to let the positioning of the symbol parts adapt to changes of font-size.

```

discant = \markup {
    \musicglyph "accordion.discant"
}

dot = \markup {
    \musicglyph "accordion.dot"
}

\layout { ragged-right = ##t }

% 16 voets register
accBasson = ^\markup {
    \combine
    \discant
    \translate-scaled #'(0 . 0.5) \dot
}

% een korig 8 en 16 voets register
accBandon = ^\markup {
    \combine
    \discant
    \combine
    \translate-scaled #'(0 . 0.5) \dot
    \translate-scaled #'(0 . 1.5) \dot
}

accVCello = ^\markup {
    \combine
    \discant
    \combine
    \translate-scaled #'(0 . 0.5) \dot
    \combine
    \translate-scaled #'(0 . 1.5) \dot
    \translate-scaled #'(1 . 1.5) \dot
}

% 4-8-16 voets register
accHarmon = ^\markup {
    \combine

}
```

The image shows three staves of musical notation, each with five measures. The first staff begins at measure 1, the second at measure 6, and the third at measure 11. Above each note in the measures, there is a small circle containing a dot or dots, representing different accordion registers. The staves are in common time and treble clef.

Accordion register symbols

Accordion register symbols are available as \markup as well as as standalone music events (as register changes tend to occur between actual music events. Bass registers are not overly standardized. The available commands can be found in 'Accordion Registers' in the Notation Reference.

```
#(use-modules (scm accreg))
```

```
\new PianoStaff
<<
\new Staff \relative {
  \clef treble \discant "10" r8 s32 f'[ bes f] s e[ a e] s d[ g d] s16 e32[ a]
  <<
  { r16 <f bes> r <e a> r <d g> }
  \\
  { d r a r bes r }
  >> |
  <cis e a>1
}
\new Staff \relative {
  \clef treble \freeBass "1" r8 d'32 s16. c32 s16. bes32 s16. a32[ cis] s16
  \clef bass \stdBass "Master"
```

```
<<
{ r16 <f, bes d>^"b" r <e a c>^"am" r <d g bes>^"gm" |
<e a cis>1^"a" }
\\
{ d8_"D" c_"C" bes_"B" | a1_"A" }
>>
}
>>
```

The musical score consists of two staves. The top staff is in common time with a treble clef. It contains a single note with a circle and a dot above it, followed by a cluster of six eighth notes. The bottom staff is also in common time with a treble clef. It contains a single note with a circle and a dot above it, followed by a cluster of six eighth notes. Both staves have a key signature of one sharp. The notes are labeled with their corresponding letters (b, am, gm, a) and numbers (D, C, B, A) below them.

Changing the text for sustain markings

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```
\relative c' {
\sustainNotes
\set Staff.pedalSustainStrings = #'("P" "P-" "-")
\sustainNotes
\set Staff.pedalSustainStrings = #'("d" "de" "e")
\sustainNotes
\set Staff.pedalSustainStrings = #'("M" "M-" "-")
\sustainNotes
\set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
\sustainNotes
}
```

The musical score shows a single staff in common time with a treble clef. It features a series of eighth notes. Above each note is a sustain marking: a circle with a dot for the first note, followed by a circle with a star for the second note, then a circle with a dash for the third note, a simple circle for the fourth note, a circle with a dot for the fifth note, a circle with a dash for the sixth note, and a circle with a star for the seventh note.

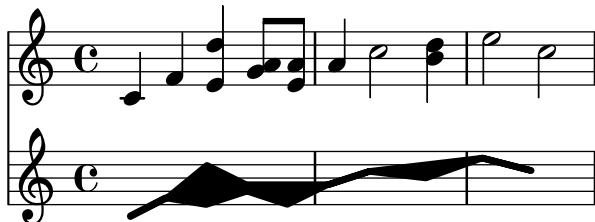

Clusters

Clusters are a device to denote that a complete range of notes is to be played.

```
fragment = \relative c' {
c4 f <e d'>4
<g a>8 <e a> a4 c2 <d b>4
e2 c
```

```
}
```

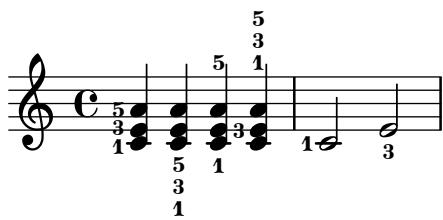

```
<<
  \new Staff \fragment
  \new Staff \makeClusters \fragment
>>
```

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct <> even if it is a single note.

```
\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)
  <e-3>2
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices.

The solution is to add invisible notes to one of the voices, using `\hideNotes`.

This example is measure 235 of the Ciaconna from Bach's 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
```

```
\\
{
    \slurUp
    bes,16[ s e](
    \hideNotes a)
    \unHideNotes f[( 
    \hideNotes a)
    \unHideNotes fis]( 
    \hideNotes a)
    \unHideNotes g[( 
    \hideNotes a)
    \unHideNotes gis]( 
    \hideNotes a)
}
>>
}
```

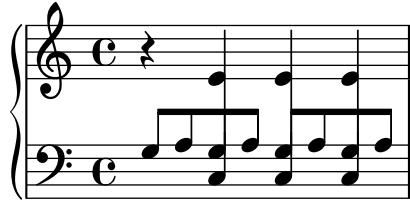

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
\new Staff = bottom
  \relative c' {
    \clef bass
```

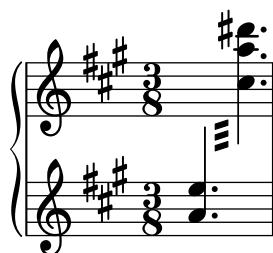

```
\voiceOne
g8 a g a g a g a
}
>>
```

Cross-staff tremolos

Since `\repeat tremolo` expects exactly two musical arguments for chord tremolos, the note or chord which changes staff within a cross-staff tremolo should be placed inside curly braces together with its `\change Staff` command.

```
\new PianoStaff <=
  \new Staff = "up" \relative c' {
    \key a \major
    \time 3/8
    s4.
  }
  \new Staff = "down" \relative c' {
    \key a \major
    \time 3/8
    \voiceOne
    \repeat tremolo 6 {
      <a e'>32
      {
        \change Staff = "up"
        \voiceTwo
        <cis a' dis>32
      }
    }
  }
>>
```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```
\paper { ragged-right = ##f }
\relative c' {
  c2\sostenutoOn c
```

```

c2\sostenutoOff c
\once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
c2\sostenutoOn c
c2\sostenutoOff c
\once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
c2\sostenutoOn c
c2\sostenutoOff c
}

```

Indicating cross-staff chords with arpeggio bracket

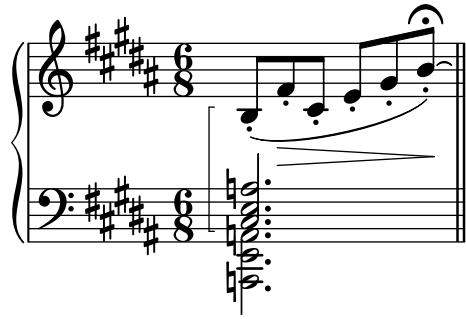

An arpeggio bracket can indicate that notes on two different staves are to be played with the same hand. In order to do this, the `PianoStaff` must be set to accept cross-staff arpeggios and the arpeggios must be set to the bracket shape in the `PianoStaff` context.

(Debussy, Les collines d'Anacapri, m. 65)

```

\new PianoStaff <<
  \set PianoStaff.connectArpeggios = ##t
  \override PianoStaff.Arpeggio.stencil = #ly:arpeggio::brew-chord-bracket
  \new Staff {
    \relative c' {
      \key b \major
      \time 6/8
      b8-.( \arpeggio fis'-.\> cis-. e-. gis-. b-. ) \! \fermata ^ \laissezVibrer
      \bar "||"
    }
  }
  \new Staff {
    \relative c' {
      \clef bass
      \key b \major
      <<
        {
          <a e cis>2. \arpeggio
        }
        \\
        {
          <a, e a,>2.
        }
      >>
    }
  }
>>

```

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in `\key c \major`. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a `\transpose` section.

```

}

}

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration'.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
```

```
<c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

<c d e f>4\laissezVibrer r
\override LaissezVibrerTieColumn.tie-configuration
  = #`((-7 . ,DOWN)
    (-5 . ,DOWN)
    (-3 . ,UP)
    (-1 . ,UP))
<c d e f>4\laissezVibrer r
}
```

Piano template (simple)

Here is a simple piano staff with some notes.

```
lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

\score {
  \new PianoStaff \with { instrumentName = #"Piano" }
  <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c' {
  \clef treble
  \key c \major
  \time 4/4
```

```

    a4 b c d
}

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {

>>
}

```

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes will also apply to the piano reduction.

The musical score consists of four staves, each representing a different voice. The top two staves are in soprano and alto range, while the bottom two are in tenor and bass range. The music is in common time, with a key signature of C major indicated by a 'C' on each staff. The vocal parts are as follows:

- Soprano (Top Staff):** Sings "hi" on quarter notes. The first note has a vertical bar line, and the second note has a fermata over it.
- Alto (Second Staff):** Sings "ha" on quarter notes. The first note has a vertical bar line, and the second note has a fermata over it.
- Tenor (Third Staff):** Sings "hu" on quarter notes. The first note has a vertical bar line, and the second note has a fermata over it.
- Bass (Bottom Staff):** Sings "ho" on quarter notes. The first note has a vertical bar line, and the second note has a fermata over it.

Percussion

Section “Percussion” in *Notation Reference*

Adding drum parts

Using the powerful pre-configured tools such as the `\drummode` function and the `DrumStaff` context, inputting drum parts is quite easy: drums are placed at their own staff positions (with a special clef symbol) and have note heads according to the drum. Attaching an extra symbol to the drum or restricting the number of lines is possible.

```
drl = \drummode {
    bd4 sn8 bd bd4 << bd ss >>
    bd8 tommh tommh bd toml toml bd tomfh16 tomfh
}
timb = \drummode {
    timh4 ssh timl8 ssh r timh r4
    ssh8 timl r4 cb8 cb
}

\score {
<<
\new DrumStaff \with {
    instrumentName = #"timbales"
    drumStyleTable = #timbales-style
    \override StaffSymbol.line-count = #2
    \override BarLine.bar-extent = #'(-1 . 1)
}
<<
\timb
>>
\new DrumStaff \with { instrumentName = #"drums" }
<<
    \new DrumVoice { \stemUp \drl }
    \new DrumVoice { \stemDown \drl }
>>
>>
\layout { }
\midi { \tempo 4 = 120 }
}
```

The image shows a musical score with two staves. The top staff is labeled "timbales" and the bottom staff is labeled "drums". Both staves begin with a clef (treble for timbales, bass for drums). The timbales staff contains several note heads: a solid black circle, an 'x', a 'x' with a diagonal line through it, a 'y', a 'p', a 'z', an 'x', a 'z', and a 'p'. Below these are three symbols: 'crash' (an 'x' with a diagonal line), 'h.h.' (two 'x's with '+' signs), and 'x.'. The drums staff contains note heads: a solid black circle, a 'p', a 'z', an 'x', a 'z', a 'p', a 'z', and a 'p'. Below these are three symbols: a '+' sign, an 'o', and another '+' sign.

Customize `drumPitchNames` `drumStyleTable` and `drumPitchTable` in `layout` and `midi`

If you want to use customized drum-pitch-names for an own drum-style with proper output for layout and midi, follow the steps as demonstrated in the code below. In short:

* define the names * define the appearance * tell LilyPond to use it for layout * assign pitches to the names * tell LilyPond to use them for midi

```
%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#cust

%%%%%%%%%%%%%
%%
%% To use custom drum-pitch-names for your score and midi you need to follow
%% this route:
%%
%% LAYOUT:
%% %%%%
%%

%% (1) Define a name and put it in `drumPitchNames'
%%      This can be done at toplevel with
%%          drumPitchNames #'my-name = #'my-name
%%      or shorter:
%%          drumPitchNames.my-name = #'my-name
%%      It's possible to add an alias as well.
%% (2) Define how it should be printed
%%      Therefore put them into a toplevel-list, where each entry should look:
%%          (my-name
%%              note-head-style-or-default
%%              articulation-string-or-#f
%%              staff-position)
%% Example:
%%     #(define my-style
%%         '(
%%             (my-name default "tenuto" -1)
%%             ; ...
%%         ))
%% (3) Tell LilyPond to use this custom-definitions, with
%%      drumStyleTable = #(alist->hash-table my-style)
%%      in a \layout or \with
%%
%% Now we're done for layout, here a short, but complete example:
%%     \new DrumStaff
%%         \with { drumStyleTable = #(alist->hash-table my-style) }
%%             \drummode { my-name }

%%%%%
%% MIDI:
%% %%%%
%%

%% (1) Again at toplevel, assign a pitch to your custom-note-name
%%      midiDrumPitches #'my-name = #(ly:make-pitch -1 4 FLAT)
%%      or shorter:
%%          midiDrumPitches.my-name = ges
%% Note that you have to use the name, which is in drumPitchNames, no alias
```

```

%% (2) Tell LilyPond to use this pitch(es), with
%%      drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%% Example:
%%   \score {
%%     \new DrumStaff
%%     \with {
%%       drumStyleTable = #(alist->hash-table my-style)
%%       drumPitchTable = #(alist->hash-table midiDrumPitches)
%%     }
%%     \drummode { my-name4 }
%%     \layout {}
%%     \midi {}
%%   }

%%%%%%%
%% TESTING
%%%%%%%
%% To test whether all is fine, run the following sequence in terminal:
%%   lilypond my-file.ly
%%   midi2ly my-file.midi
%%   gedit my-file-midi.ly
%%

%% Which will do:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%   (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%

Swing

Trumpet

Alto Sax

Bari Sax

Trombone

Guitar

Piano

Bass

Drums

The score consists of eight staves, each representing an instrument. The first four staves (Trumpet, Alto Sax, Bari Sax, Trombone) are grouped together by a brace. The last four staves (Guitar, Piano, Bass, Drums) are also grouped by a brace. Measure 1: All instruments play quarter notes. Measure 2: All instruments play quarter notes. Measure 3: All instruments play quarter notes. Measure 4: The Bari Sax begins a solo section, indicated by a bracket above it. It plays eighth-note patterns. The other instruments continue to play quarter notes. Measure 5: The Bari Sax continues its solo. The other instruments play quarter notes. Measure 6: The Bari Sax continues its solo. The other instruments play quarter notes. Measure 7: The Bari Sax continues its solo. The other instruments play quarter notes. Measure 8: The Bari Sax continues its solo. The other instruments play quarter notes. Measure 9: The Bari Sax continues its solo. The other instruments play quarter notes. Measure 10: The Bari Sax continues its solo. Percussion beaters

Graphic symbols for percussion instruments are not natively supported; however it is possible to include such symbols, either as an external EPS file or as embedded PostScript code inside a markup, as demonstrated in this example.

```
stick = \markup {
  \with-dimensions #'(0 . 5) #'(0 . 5)
  \postscript "

Printing music with different time signatures

In the following snippet, two parts have a completely different time signature, yet remain synchronized. The bar lines can no longer be printed at the `Score` level; to allow independent bar lines in each part, the `Default_barline_engraver` and `Timing_translator` are moved from the `Score` context to the `Staff` context.

If bar numbers are required, the `Bar_number_engraver` should also be moved, since it relies on properties set by the `Timing_translator`; a `\with` block can be used to add bar numbers to the relevant staff.

```
\paper {
    indent = #0
    ragged-right = ##t
}

global = { \time 3/4 { s2.*3 } \bar "" \break { s2.*3 } }

The musical score consists of two staves. The top staff is for the Bassclarinet, starting with a quarter note followed by a dotted half note. It then moves to a 3/4 time signature with a quarter note, followed by a bass clef, a bar line, and a 7/8 time signature with a dotted half note. The bottom staff is for the Percussion, starting with a 3/4 time signature and a bass clef, followed by a dotted half note. The score then changes to a 2/4 time signature with a bass clef, followed by a dotted half note.

(4)

The musical score consists of two systems of music. The top system starts with a treble clef, a key signature of one sharp, and a common time signature. It contains four measures: measure 1 has a single note followed by a fermata; measure 2 is in 3/8 time with a note followed by a fermata; measure 3 is in 4/4 time with a note followed by a fermata; measure 4 is in 6/8 time with a note followed by a fermata. Measures 5 and 6 show changes in time signature: 3/8, 2/4, 3/8, and 3/4. The bottom system starts with a bass clef, a key signature of one sharp, and a common time signature. It contains three measures: measure 1 has a note followed by a fermata; measure 2 is in 3/4 time with a note followed by a fermata; measure 3 is in 3/4 time with a note followed by a fermata.

Fretted strings

Section “Fretted string instruments” in *Notation Reference*

Adding fingerings to a score

Fingering instructions can be entered using a simple syntax.

```
\relative c' {
    c4-1 d-2 f-4 e-3
}
```

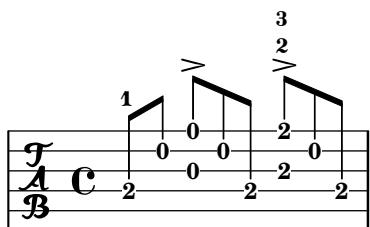

Adding fingerings to tablatures

To add fingerings to tablatures, use a combination of `\markup` and `\finger`.

```
one = \markup { \finger 1 }
two = \markup { \finger 2 }
threeTwo = \markup {
    \override #'(baseline-skip . 2)
    \column {
        \finger 3
        \finger 2
    }
}
threeFour = \markup {
    \override #'(baseline-skip . 2)
    \column {
        \finger 3
        \finger 4
    }
}

\score {
    \new TabStaff {
        \tabFullNotation
        \stemUp
        e8\4^one b\2 <g\3 e'\1>[ b\2 e\4]
        <a\3 fis'\1>^\\threeTwo[ b\2 e\4]
    }
}
```

Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

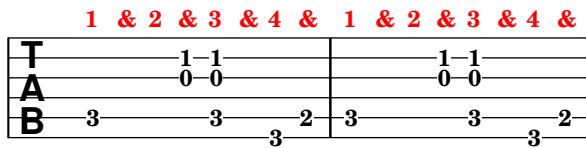

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014

high = { r4 r8 <g c'> q r8 r4 }

low = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

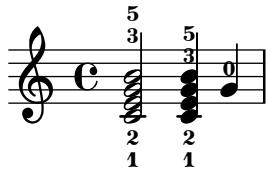

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct `<>`, even if it is only a single note.

```
\relative c' {
  <c-1 e-2 g-3 b-5>2
  \override Fingerling.staff-padding = #'()
  <c-1 e-2 g-3 b-5>4 <g'-0>
}
```

Bar chords notation for Guitar (with Text Spanner)

Here is how to print bar chords (or barre chords) or half-bar chords (just uncomment the appropriate line for to select either one). The syntax is : \bbarre #'fret_number' note(s)
%%%%%%%%%%%%% %%%%%%%%%%%%%% %%%%%%%%%%%%%% %%%%%%%%%%%%%% %%%%%%%%%%%%%%
%% %%%%/%/% Cut here ----- Start 'bbarred.ly'

```

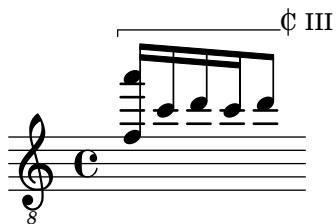

%% C with slash -----
cWithSlash = \markup {

      (text . ,#{ \markup { \draw-line #'( 0 . -.5) } #})
      (Y . 0)
      (padding . 0.25)
      (attach-dir . -2))
     (right
      (text . ,#{ \markup { \cWithSlash #str } #})
      (Y . 0)
      (padding . 0.25)
      (attach-dir . 2)))
\% uncomment this line for make full barred
  % \once \override TextSpanner.bound-details.left.text = \markup{"B" #str}
  $music
#})
%% %%%%%% Cut here ----- End 'bbarred.ly'
%% Copy and change the last line for full barred. Rename in 'fbarred.ly'

```

```
%%%%%%%%%%%%%
```

```
%% Syntax: \bbarre {"text" { notes } - text = any number of box
\relative c' { \clef "G_8" \stemUp \bbarre {"III" { <f a'>16[ c' d c d8] } }
```

Changing fret orientations

Fret diagrams can be oriented in three ways. By default the top string or fret in the different orientations will be aligned.

```
\include "predefined-guitar-fretboards.ly"

<<
\chords {
  c1
  c1
  c1
}
\new FretBoards {
  \chordmode {
    c1
    \override FretBoard.fret-diagram-details.orientation =
      #'landscape
    c1
    \override FretBoard.fret-diagram-details.orientation =
      #'opposing-landscape
    c1
  }
}
\new Voice {
  c'1
  c'1
  c'
}
>>
```

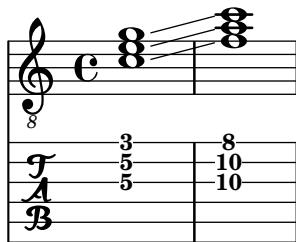

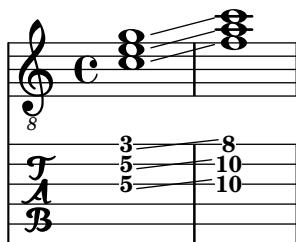

Chord glissando in tablature

Slides for chords are indicated by default in both `Staff` and `TabStaff`. String numbers are necessary for `TabStaff` because automatic string calculations are different for chords and for single notes.

```
myMusic = \relative c' {
  <c e g>1 \glissando <f a c>
}

\score {
  <<
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \myMusic
  >>
}

\score {
  <<
  \new Staff {
    \clef "treble_8"
    \myMusic
  }
  \new TabStaff \with { \override Glissando.style = #'none } {
    \myMusic
  }
  >>
}
```

ChordChanges for FretBoards

FretBoards can be set to display only when the chord changes or at the beginning of a new line.

```
\include "predefined-guitar-fretboards.ly"
```

```

myChords = \chordmode {
  c1 c1 \break
  \set chordChanges = ##t
  c1 c1 \break
  c1 c1
}

<<
\new ChordNames { \myChords }
\new FretBoards { \myChords }
\new Staff { \myChords }
>>

```

The image shows a musical score with three staves. Each staff begins with a fretboard diagram above it, indicating fingerings: 'x' for muted, 'o' for open, and dots for specific fingers (1, 2, 3). The first staff starts at measure 1 with a C major chord (root position). The second staff starts at measure 3 with an E major chord (first inversion). The third staff starts at measure 5 with a G major chord (root position). The staves are separated by vertical bar lines.

Controlling the placement of chord fingerings

The placement of fingering numbers can be controlled precisely. For fingering orientation to apply, you must use a chord construct `<>` even if it is a single note.

```

\relative c' {
  \set fingeringOrientations = #'(left)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(down right up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(up)
  <c-1 e-3 a-5>4
  \set fingeringOrientations = #'(left)
  <c-1>2
  \set fingeringOrientations = #'(down)

```

```
<e-3>2
}

```

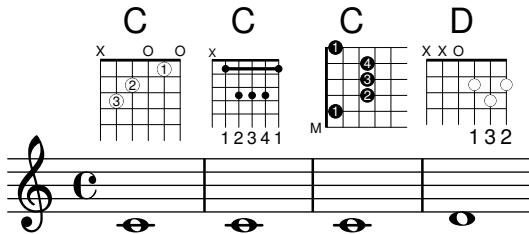

Customizing fretboard fret diagrams

Fret diagram properties can be set through 'fret-diagram-details'. For FretBoard fret diagrams, overrides are applied to the `FretBoards.FretBoard` object. Like `Voice`, `FretBoards` is a bottom level context, therefore can be omitted in property overrides.

```
\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
    #guitar-tuning
    #"x;1-1-(;3-2;3-3;3-4;1-1-);"

<<
\new ChordNames {
    \chordmode { c1 | c | c | d }
}
\new FretBoards {
    % Set global properties of fret diagram
    \override FretBoards.FretBoard.size = #'1.2
    \override FretBoard.fret-diagram-details.finger-code = #'in-dot
    \override FretBoard.fret-diagram-details.dot-color = #'white
    \chordmode {
        c
        \once \override FretBoard.size = #'1.0

Customizing markup fret diagrams

Fret diagram properties can be set through '`fret-diagram-details`'. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

<<

```
\chords { c1 | c | c | d }

\new Voice = "mel" {
    \textLengthOn
    % Set global properties of fret diagram
    \override TextScript.size = #'1.2
    \override TextScript.fret-diagram-details.finger-code = #'in-dot
    \override TextScript.fret-diagram-details.dot-color = #'white

    %% C major for guitar, no barre, using defaults
    % terse style
    c'1^markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }

    %% C major for guitar, barred on third fret
    % verbose style
    % size 1.0
    % roman fret label, finger labels below string, straight barre
    c'1^markup {
        % standard size
        \override #'(size . 1.0) {
            \override #'(fret-diagram-details . (
                (number-type . roman-lower)
                (finger-code . in-dot)
                (barre-type . straight))) {
                \fret-diagram-verbose #'((mute 6)
                    (place-fret 5 3 1)
                    (place-fret 4 5 2)
                    (place-fret 3 5 3)
                    (place-fret 2 5 4)
                    (place-fret 1 3 1)
                    (barre 5 1 3))
            }
        }
    }

    %% C major for guitar, barred on third fret
    % verbose style
}
```

```
% landscape orientation, arabic numbers, M for mute string
% no barre, fret label down or left, small mute label font
c'1^markup {
  \override #'(fret-diagram-details . (
    (finger-code . below-string)

    \fret-diagram-terse "x;x;o;2-1;3-2;2-3;"
  }
}
}

>>
```

Defining predefined fretboards for other instruments

Predefined fret diagrams can be added for new instruments in addition to the standards used for guitar. This file shows how this is done by defining a new string-tuning and a few predefined fretboards for the Venezuelan cuatro.

This file also shows how fingerings can be included in the chords used as reference points for the chord lookup, and displayed in the fret diagram and the TabStaff, but not the music.

These fretboards are not transposable because they contain string information. This is planned to be corrected in the future.

```
% add FretBoards for the Cuatro
%   Note: This section could be put into a separate file
%         predefined-cuatro-fretboards.ly
%         and \included into each of your compositions

cuatroTuning = #'(,(ly:make-pitch 0 6 0)
                  ,(ly:make-pitch 1 3 SHARP)
                  ,(ly:make-pitch 1 1 0)
                  ,(ly:make-pitch 0 5 0))

dSix = { <a\4 b\1 d\3 fis\2> }
dMajor = { <a\4 d\1 d\3 fis \2> }

Fingerings string indications and right-hand fingerings

This example combines left-hand fingering, string indications, and right-hand fingering.

```
(#(define RH rightHandFinger)
```

```
\relative c {
    \clef "treble_8"
    <c-3\5-\RH #1 >4
    <e-2\4-\RH #2 >4
    <g-0\3-\RH #3 >4
    <c-1\2-\RH #4 >4
}
```

Flamenco notation

For flamenco guitar, special notation is used:

- * a golpe symbol to indicate a slap on the guitar body with the nail of the ring finger
- * an arrow to indicate (the direction of) strokes
- * different letters for fingering ("p": thumb, "i": index finger, "m": middle finger, "a": ring finger and "x": little finger)
- * 3- and 4-finger rasgueados; stroke upwards with all fingers, ending with an up- and down using the index finger
- * abanicos: strokes (in tuples) with thumb (down), little and index finger (both up). There's also an abanico 2 where middle and ring finger are used instead of the little finger.
- * alza pua: fast playing with the thumb

Most figures use arrows in combination with fingering; with abanicos and rasgueados, note-heads are printed only for the first chord.

This snippet contains some header-like code that can be copied as 'flamenco.ly' and included in source files.

```
%%%%%% Cut here ----- Start 'flamenco.ly'
```

```
% Text indicators :

Fretboards alternate tables

Alternate fretboard tables can be created. These would be used in order to have alternate fretboards for a given chord.

In order to use an alternate fretboard table, the table must first be created. Fretboards are then added to the table.

The created fretboard table can be blank, or it can be copied from an existing table.

The table to be used in displaying predefined fretboards is selected by the property \predefinedDiagramTable.

```
\include "predefined-guitar-fretboards.ly"
```

```
% Make a blank new fretboard table
#(define custom-fretboard-table-one (make-fretboard-table))

% Make a new fretboard table as a copy of default-fret-table
#(define custom-fretboard-table-two (make-fretboard-table default-fret-table))

% Add a chord to custom-fretboard-table-one
\storePredefinedDiagram #custom-fretboard-table-one
    \chordmode{c}
    #guitar-tuning
    "3-(;3;5;5;5;3-);"

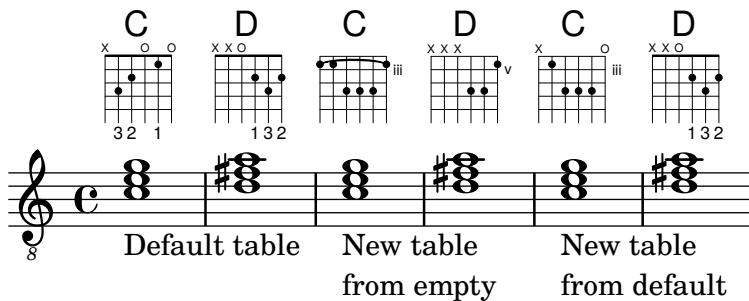

% Add a chord to custom-fretboard-table-two
\storePredefinedDiagram #custom-fretboard-table-two
    \chordmode{c}
    #guitar-tuning
    "x;3;5;5;5;o;"

Guitar slides

Unlike glissandos, slides may go from an imprecise point of the fretboard to a specific fret. A good way to do this is to add a hidden grace note before the note which is actually played, as demonstrated in the following example.

```
%% Hide fret number: useful to draw slide into/from a casual point of
%% the fretboard.
hideFretNumber = {
    \once \hide TabNoteHead
    \once \hide NoteHead
    \once \hide Stem
    \once \override NoteHead.no-ledgers = ##t
    \once \override Glissando.bound-details.left.padding = #0.3
}

music = \relative c' {
    \grace { \hideFretNumber d8\2 \glissando s2 } g2\2
    \grace { \hideFretNumber g8\2 \glissando s2 } d2 |

    \grace { \hideFretNumber c,8 \glissando s } f4\5^\markup \tiny { Slide into }
    \grace { \hideFretNumber f8 \glissando s } a4\4
    \grace { \hideFretNumber e'8\3 \glissando s } b4\3^\markup \tiny { Slide from }
    \grace { \hideFretNumber b'8 \glissando s2 } g4 |
}

\score {
    <<

    }
    \new TabStaff {
        \music
    }
    >>
}
```

Guitar strum rhythms

For guitar music, it is possible to show strum rhythms, along with melody notes, chord names and fret diagrams.

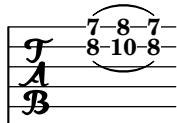

```
\include "predefined-guitar-fretboards.ly"
<<
\new ChordNames {
  \chordmode {
    c1 | f | g | c
  }
}
\new FretBoards {
  \chordmode {
    c1 | f | g | c
  }
}
\new Voice \with {
  \consists "Pitch_squash_engraver"
} {
  \relative c' {
    \improvisationOn
    c4 c8 c c4 c8 c
    f4 f8 f f4 f8 f
    g4 g8 g g4 g8 g
    c4 c8 c c4 c8 c
  }
}
\new Voice = "melody" {
  \relative c' {
    c2 e4 e4
    f2. r4
    g2. a4
    e4 c2.
  }
}
\new Lyrics {
  \lyricsto "melody" {
    This is my song.
    I like to sing.
  }
}
>>
```

The diagram illustrates four chords: C (x o o), F (134211), G (21 ooo), and C (x o o). Below the chords are two staves of musical notation. The top staff consists of eighth-note patterns. The bottom staff has lyrics: "This is my song. I like to sing." with corresponding musical notes.

Hammer on and pull off using chords

When using hammer-on or pull-off with chorded notes, only a single arc is drawn. However “double arcs” are possible by setting the `doubleSlurs` property to `#t`.

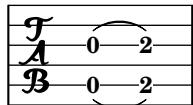

```
\new TabStaff {
  \relative c' {
    % chord hammer-on and pull-off
    \set doubleSlurs = #t
    <g' b>8( <a c> <g b>
  }
}
```

Hammer on and pull off using voices

The arc of hammer-on and pull-off is upwards in voices one and three and downwards in voices two and four:

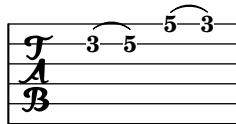

```
\new TabStaff {
  \relative c' {
    << { \voiceOne g2( a) }
    \\ { \voiceTwo a,( b) }
    >> \oneVoice
  }
}
```

Hammer on and pull off

Hammer-on and pull-off can be obtained using slurs.

```
\new TabStaff {
  \relative c' {
    d4( e\2)
    a( g)
  }
}
```

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

1) modify #'padding or #'extra-offset values (as shown in the first snippet)

2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

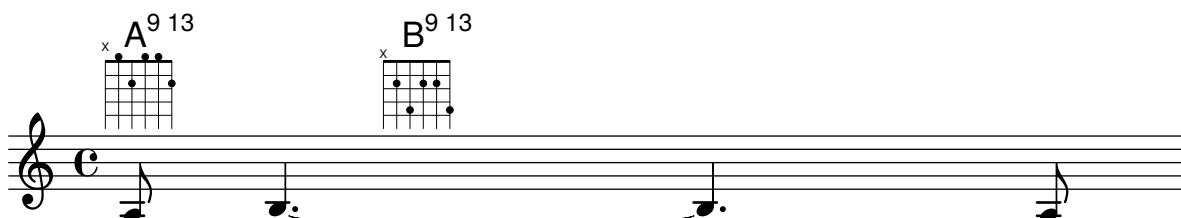

If you need to move the fret according with a rhythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

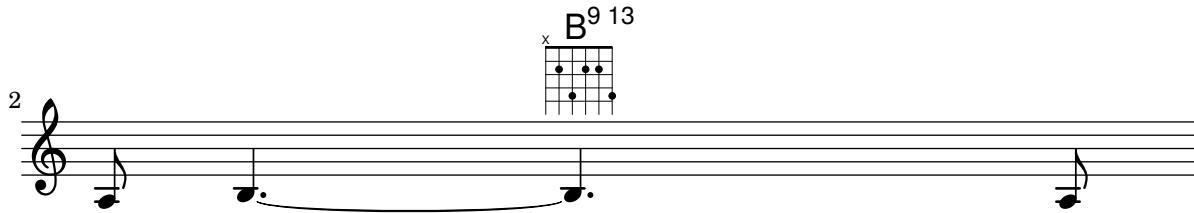

```

harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13
}

\score

Laissez vibrer ties

Laissez vibrer ties have a fixed size. Their formatting can be tuned using 'tie-configuration'.

```
\relative c' {
  <c e g>4\laissezVibrer r <c f g>\laissezVibrer r
  <c d f g>4\laissezVibrer r <c d f g>4.\laissezVibrer r8

  <c d e f>4\laissezVibrer r
  \override LaissezVibrerTieColumn.tie-configuration
    = #'(((-7 . ,DOWN)
          (-5 . ,DOWN)
          (-3 . ,UP)
```

```

        (-1 . ,UP))
<c d e f>4\laissezVibrer r
}

```

Let TabStaff print the topmost string at bottom

In tablatures usually the first string is printed topmost. If you want to have it at the bottom change the `stringOneTopmost`-context-property. For a context-wide setting this could be done in `layout` as well.

```

%
% \layout {
%   \context {
%     \Score
%     stringOneTopmost = ##f
%   }
%   \context {
%     \TabStaff
%     tablatureFormat = #fret-letter-tablature-format
%   }
% }

The image displays three staves of musical notation, likely for a fretless string instrument like a guitar or bass. Each staff consists of five horizontal lines representing the strings. The notes are represented by small diamond shapes. Below each staff, there is a set of three letters (T, A, B) indicating the tuning of the strings.

- Staff 1:** Treble clef. Notes: ♪, ♪, ♪, ♪, ♪. Labels: "1st harm.", "2nd harm.", "3rd harm.". Fingerings: (12), (12), (7), (7), (19), (19), (5), (5), (24), (24).

Unfretted strings

Section “Unfretted string instruments” in *Notation Reference*

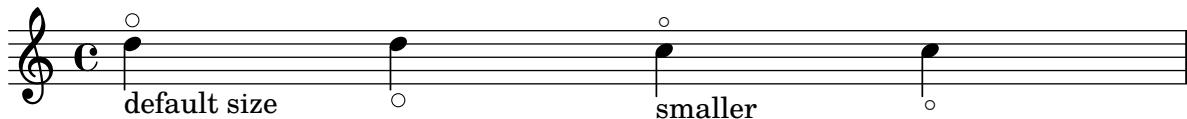

Changing \flageolet mark size

To make the \flageolet circle smaller use the following Scheme function.

```
smallFlageolet =
#(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
        (acons 'font-size -3
              (ly:music-property m 'tweaks)))
  m)

\layout { ragged-right = ##f }

\relative c' {
  d4^{\smallFlageolet_\markup { default size } d_\flageolet}
  c4^{\smallFlageolet_\markup { smaller } c_\smallFlageolet}
}
```

Creating slurs across voices

In some situations, it may be necessary to create slurs between notes from different voices.

The solution is to add invisible notes to one of the voices, using \hideNotes.

This example is measure 235 of the Ciaconna from Bach’s 2nd Partita for solo violin, BWV 1004.

```
\relative c' {
  <<
  {
    d16( a') s a s a[ s a] s a[ s a]
  }
  \\
  {
    \slurUp
    bes,16[ s e]( \hideNotes a)
    \unHideNotes f[( \hideNotes a)
    \unHideNotes fis]( \hideNotes a)
    \unHideNotes g[( \hideNotes a)
    \unHideNotes gis]( \hideNotes a)
  }
  >>
```

}

Dotted harmonics

Artificial harmonics using \harmonic do not show dots. To override this behavior, set the context property `harmonicDots`.

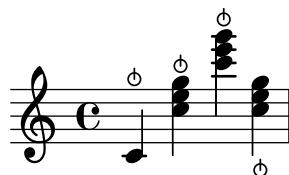

```
\relative c''' {
    \time 3/4
    \key f \major
    \set harmonicDots = ##t
    <bes f'\harmonic>2. ~
    <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
    <fis cis'\harmonic>2.
    <bes f'\harmonic>2.
}
```

Snap-pizzicato or Bartok pizzicato

A snap-pizzicato (also known as “Bartok pizzicato”) is a “strong pizzicato where the string is plucked vertically by snapping and rebounds off the fingerboard of the instrument” (Wikipedia). It is denoted by a circle with a vertical line going from the center upwards outside the circle.

```
\relative c' {
    c4\snappizzicato
    <c' e g>4\snappizzicato
    <c' e g>4^{\snappizzicato}
    <c, e g>4_\snappizzicato
}
```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a \global section for time and key signatures

```

```

A musical score for four unfretted string instruments: Violin 1, Violin 2, Viola, and Cello. The score is arranged in four staves. Each staff begins with a dynamic instruction 'f' followed by a note 'e'. The notes for each instrument are as follows:

- Violin 1:** G clef, notes c, e, g.
- Violin 2:** G clef, notes c, e, g.
- Viola:** B clef, notes c, e, g.
- Cello:** F clef, notes c, e, g.

String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the `\tag` feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. `piece.ly` contains all the music definitions. The other files – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly`, and `vlc.ly` – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

```
Violinone = \new Voice {
    \relative c'' {
        c2 d e1
        \bar "|."
    }
}

Violintwo = \new Voice {
    \relative c'' {
        g2 f e1
        \bar "|."
    }
}

Viola = \new Voice {
    \relative c' {
        \clef alto
        e2 d c1
        \bar "|."
    }
}

Cello = \new Voice {
    \relative c' {
        \clef bass
        c2 b a1

Ancient notation

Section “Ancient notation” in *Notation Reference*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    \%bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    \%bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

```

The image displays two staves of musical notation. The top staff consists of five horizontal lines. It contains various note heads, including triangles, diamonds, and squares, along with rests. A key signature of one sharp is indicated. The bottom staff also consists of five horizontal lines and follows a similar pattern of note heads and rests, but it includes a key signature of one flat. Both staves are in common time.

Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
\include "gregorian.ly"

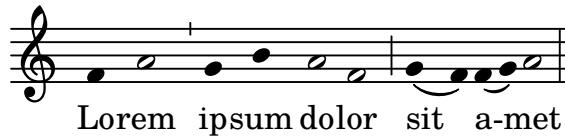

chant = \relative c' {
    \set Score.timing = ##f

}
```

Incipit

When transcribing mensural music, an incipit at the beginning of the piece is useful to indicate the original key and tempo. Musicians today are used to bar lines, but these were not known during the period of mensural music. As a compromise, bar lines are often printed between the staves, a layout style called mensurstriche layout.

}
```

Using tags to produce mensural and modern music from the same source

By using tags, it's possible to use the same music to produce both mensural and modern music. In this snippet, a function `menrest` is introduced, allowing mensural rests to be pitched as in the original, but with modern rests in the standard staff position. Tags are used to produce different types of bar line at the end of the music, but tags can also be used where other differences are needed: for example using “whole measure rests” (`R1`, `R\breve` etc.) in modern music, but normal rests (`r1`, `r\breve`, etc.) in the mensural version. Note that converting mensural music to its modern equivalent is usually referred to as `transcription`.

```

menrest = #(define-music-function (note)
  (ly:music?)
  #{
    \tag #'mens $(make-music 'RestEvent note)
    \tag #'mod $(make-music 'RestEvent note 'pitch '())
  #})

MensStyle = {
  \autoBeamOff

Vertical line as a baroque articulation mark

This short vertical line placed above the note is commonly used in baroque music. Its meaning can vary, but generally indicates notes that should be played with more “weight”. The following example demonstrates how to achieve such a notation.

```
upline =
#(let ((m (make-articulation "stopped")))
  (set! (ly:music-property m 'tweaks)
        (acons 'font-size 3
              (acons 'stencil (lambda (grob)
                                (grob-interpret-markup
                                  grob
```

```
(make-draw-line-markup '(0 . 1))))  
(ly:music-property m 'tweaks))))  
m)  
  
\relative c' {  
  a'4^\\upline a( c d')_\\upline  
}  
  
}
```

World music

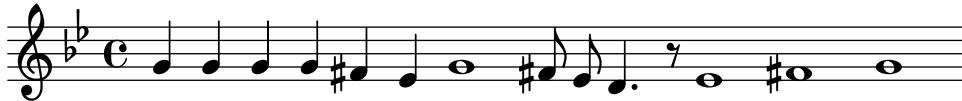

Section “World music” in *Notation Reference*

Arabic improvisation

For improvisations or taqasim which are temporarily free, the time signature can be omitted and `\cadenzaOn` can be used. Adjusting the accidental style might be required, since the absence of bar lines will cause the accidental to be marked only once. Here is an example of what could be the start of a hijaz improvisation:

```
\include "arabic.ly"

\relative sol' {
    \key re \kurd
    \accidentalStyle forget
    \cadenzaOn
    sol4 sol sol sol fad mib sol1 fad8 mib re4. r8 mib1 fad sol
}
```

Makam example

Makam is a type of melody from Turkey using 1/9th-tone microtonal alterations. Consult the initialization file ‘ly/makam.ly’ for details of pitch names and alterations.

```
% Initialize makam settings
\include "makam.ly"

\relative c' {
    \set Staff.keyAlterations = #`((6 . ,(- KOMA)) (3 . ,BAKIYE))
    c4 cc db fk
    gbm4 gfc gfb efk
    fk4 db cc c
}
```

Printing text from right to left

It is possible to print text from right to left in a markup object, as demonstrated here.

```
{
  b1^markup {
    \line { i n g i r u m i m u s n o c t e }
  }
  f'_markup {
    \override #'(text-direction . -1)
    \line { i n g i r u m i m u s n o c t e }
```

}

}

ingirumimusnocte
etconsumimurigni

A musical score consisting of a single staff in common time (indicated by 'C'). The staff begins with a sharp sign (F#) and ends with a flat sign (B). The lyrics 'ingirumimusnocte' and 'etconsumimurigni' are written above the staff, corresponding to the notes. The first note is a sharp (F#), followed by a whole note (B), a sharp (D#), and another sharp (F#).

Contexts and engravers

Section “Changing defaults” in *Notation Reference*

Section “Contexts and engravers” in *Learning Manual*

Adding a figured bass above or below the notes

When writing a figured bass, you can place the figures above or below the bass notes, by defining the `BassFigureAlignmentPositioning.direction` property (exclusively in a `Staff` context). Choices are `#UP` (or `#1`), `#CENTER` (or `#0`) and `#DOWN` (or `#-1`).

This property can be changed as many times as you wish. Use `\once \override` if you don’t want the override to apply to the whole score.

```
bass = {
    \clef bass
    g4 b, c d
    e d8 c d2
}

continuo = \figuremode {
    <_>4 <6>4 <5/>4
    \override Staff.BassFigureAlignmentPositioning.direction = #UP
    %\bassFigureStaffAlignmentUp
    < _+ >4 <6>
    \set Staff.useBassFigureExtenders = ##t
    \override Staff.BassFigureAlignmentPositioning.direction = #DOWN
    %\bassFigureStaffAlignmentDown
    <4>4. <4>8 <_+>4
}

\score {
    <<
        \new Staff = bassStaff \bass
        \context Staff = bassStaff \continuo
    >>
}
```

Adding an extra staff at a line break

When adding a new staff at a line break, some extra space is unfortunately added at the end of the line before the break (to fit in a key signature change, which will never be printed anyway). The workaround is to add a setting of `Staff.explicitKeySignatureVisibility` as is shown in the example.

```
\score {
    \new StaffGroup \relative c' {
        \new Staff
        \key f \major
```

```

c1 c^"Unwanted extra space" \break
<< { c1 | c }
  \new Staff {
    \key f \major

    \key f \major
    \once \omit Staff.TimeSignature
    c1 | c
  }
>>
}
}
}

```

The image displays three sets of musical staves. The first set shows a single staff with two notes, labeled "Unwanted extra space". The second set shows two staves, each with one note, labeled "Fixed here". The third set shows two staves, with the top staff having two notes and the bottom staff having one note, demonstrating how an extra staff can be added.

Adding an extra staff

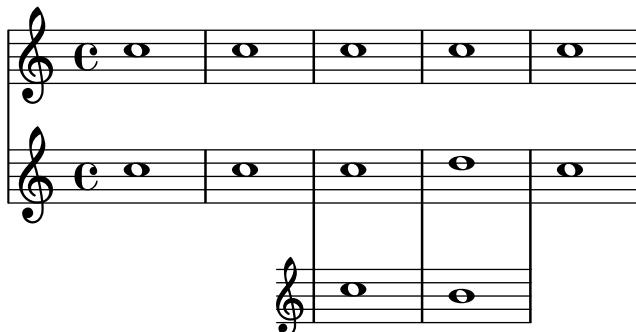

An extra staff can be added (possibly temporarily) after the start of a piece.

```

\score {
  <<
  \new Staff \relative c' {
    c1 | c | c | c | c
  }
  \new StaffGroup \relative c' {
    \new Staff {
      c1 | c
      <<

```

```
{
  c1 | d
}
\new Staff {
  \once \omit Staff.TimeSignature
  c1 | b
}
>>
c1
}
}
>>
}
```

Automatically changing the stem direction of the middle note based on the melody

LilyPond can alter the stem direction of the middle note on a staff so that it follows the melody, by adding the `Melody_engraver` to the `Voice` context and overriding the `neutral-direction` of Stem.

```
\relative c' {
  \time 3/4
  a8 b g f b g |
  c b d c b c |
}

\layout {
  \context {
    \Voice
    \consists "Melody_engraver"
    \autoBeamOff
    \override Stem.neutral-direction = #'()
  }
}
```

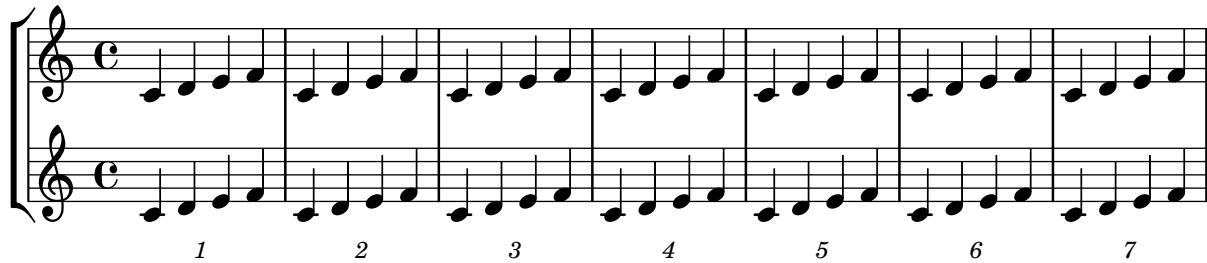

Centered measure numbers

Scores of large ensemble works often have bar numbers placed beneath the system, centered horizontally on the measure's extent. This snippet shows how the `Measure_counter_engraver` may be used to simulate this notational practice. Here, the engraver has been added to a `Dynamics` context.

```
\layout {
  \context {
    \Dynamics
    \consists #Measure_counter_engraver
    \override MeasureCounter.direction = #DOWN
    \override MeasureCounter.font-encoding = #'latin1
    \override MeasureCounter.font-shape = #'italic
    % to control the distance of the Dynamics context from the staff:
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing.padding = #2
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

pattern = \repeat unfold 7 { c'4 d' e' f' }

\new StaffGroup <<
  \new Staff {
    \pattern
  }
  \new Staff {
    \pattern
  }
\new Dynamics {
  \startMeasureCount
  s1*7
  \stopMeasureCount
}
>>
```

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the `Staff_performer` to the `Voice` context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different `midiInstrument`.

```
\score {
  \new Staff <<
    \new Voice \relative c''' {
      \set midiInstrument = #"flute"
      \voiceOne
      \key g \major
      \time 2/2
      r2 g-"Flute" ~
      g fis ~
      fis4 g8 fis e2 ~
      e4 d8 cis d2
    }
    \new Voice \relative c' {
      \set midiInstrument = #"clarinet"
      \voiceTwo
      b1-"Clarinet"
      a2. b8 a
      g2. fis8 e
      fis2 r
    }
  >>
  \layout { }
  \midi {
    \context {
      \Staff
      \remove "Staff_performer"
    }
    \context {
      \Voice
      \consists "Staff_performer"
    }
    \tempo 2 = 72
  }
}
```

Changing time signatures inside a polymetric section using `\scaleDurations`

The `measureLength` property, together with `measurePosition`, determines when a bar line is needed. However, when using `\scaleDurations`, the scaling of durations makes it difficult to change time signatures. In this case, `measureLength` should be set manually, using the `ly:make-moment` callback. The second argument must be the same as the second argument of `\scaleDurations`.

```
\layout {
  \context {
    \Score
    \remove "Timing_translator"
    \remove "Default_bar_line_engraver"
  }
  \context {
    \Staff
    \consists "Timing_translator"
    \consists "Default_bar_line_engraver"
  }
}

<<
\new Staff {
  \scaleDurations 8/5 {
    \time 6/8
    \set Timing.measureLength = #(ly:make-moment 6/5)
    b8 b b b b b
    \time 2/4
    \set Timing.measureLength = #(ly:make-moment 4/5)
    b4 b
  }
}
\new Staff {
  \clef bass
  \time 2/4
  c2 d e f
}
>>
```

Chant or psalms notation

This form of notation is used for Psalm chant, where verses aren't always the same length.

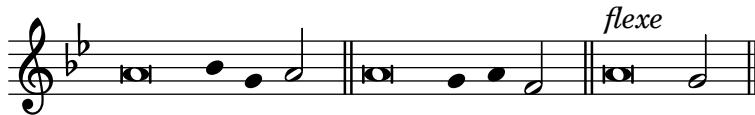

```
stemOff = \hide Staff.Stem
stemOn  = \undo \stemOff
```

```
\score {
  \new Staff \with { \remove "Time_signature_engraver" }
  {
    \key g \minor
    \cadenzaOn
    \stemOff a'\breve bes'4 g'4
    \stemOn a'2 \bar "||"
    \stemOff a'\breve g'4 a'4
```

```

\stemOn f'2 \bar "||"
\stemOff a'\breve^\markup { \italic flexe }
\stemOn g'2 \bar "||"
}
}

```

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

```
#(set-global-staff-size 20)
```

```

\score {
{
  \repeat unfold 12 { s1 \break }
}

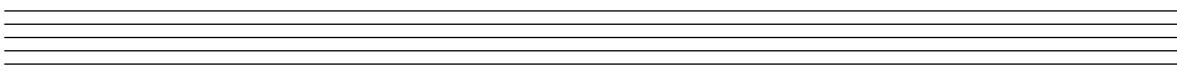

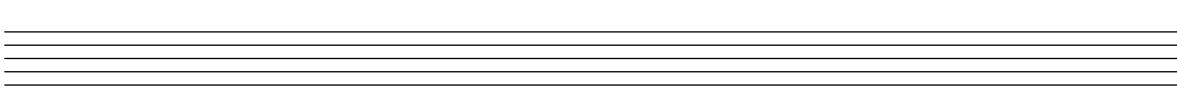

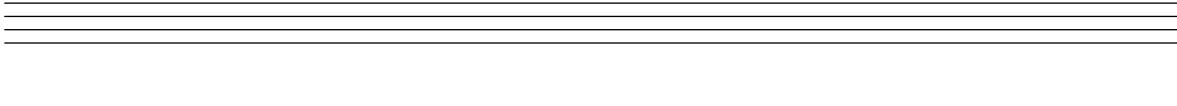

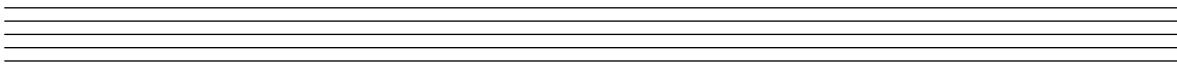

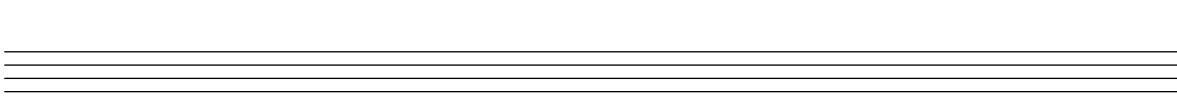

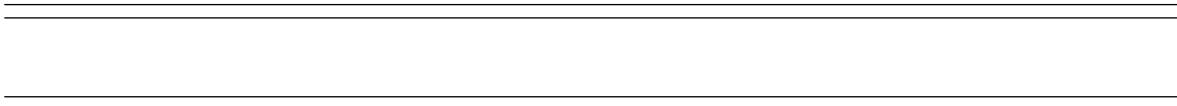

\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
}

```

```
ragged-last-bottom = ##f
line-width = 180
left-margin = 15
bottom-margin = 10
top-margin = 10
}
%}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{ \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
    \musicglyph "clefs.F"
  #})))
  clefPosition = #3
  middleCPosition = #3
  middleCClefPosition = #3
}

{
  \key d\minor
  f bes, f bes,
}
```

Cross staff stems

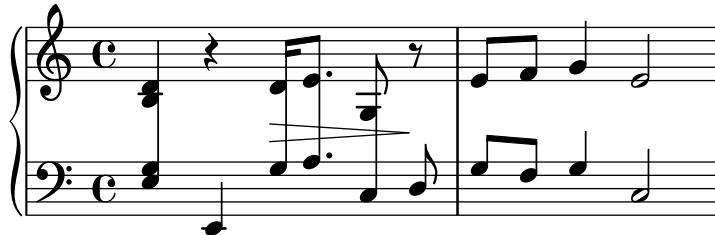

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
  \new Staff {
    <b d'>4 r d'16> e'8. g8 r\!
    e'8 f' g'4 e'2
  }
}
```

```
\new Staff {
    \clef bass
    \voiceOne
    \autoBeamOff
    \crossStaff { <e g>4 e, g16 a8. c8} d
    \autoBeamOn
    g8 f g4 c2
}
>>
}
```

Defining an engraver in Scheme: ambitus engraver

This example demonstrates how the ambitus engraver may be defined on the user side, with a Scheme engraver.

This is basically a rewrite in Scheme of the code from `lily/ambitus-engraver.cc`.

```
#(use-modules (oop goops))

%%% Grob utilities
%%%

Displaying a whole GrandStaff system if only one of its staves is alive

In orchestral scores sometimes single or groups of instruments are silent for a while and their staves can be removed for that time (with `\removeEmptyStaves`).

When they play again it is often preferred to show the staves of all instruments of such a group. this can be done adding the `Keep_alive_together_engraver` in the grouper (e.g. a GrandStaff or a StaffGroup)

In the example the violins are silent in the 2nd system and in the 3rd system. Only the first violin plays the last measure but the staff of the second violin is also displayed.

Engravers one-by-one

The notation problem, creating a certain symbol, is handled by plugins. Each plugin is called an Engraver. In this example, engravers are switched on one by one, in the following order:

- note heads,
- staff symbol,
- clef,
- stem,
- beams, slurs, accents,
- accidentals, bar lines, time signature and key signature.

Engravers are grouped. For example, note heads, slurs, beams etc. form a **Voice** context. Engravers for key signature, accidentals, bar line, etc. form a **Staff** context.

```
%% sample music
topVoice = \relative c' {
    \key d \major
    es8([ g] a[ fis])
    b4
    b16[-. b-. b-. cis-.]
    d4->
}
```

```
botVoice = \relative c' {
    \key d \major
    c8[( f] b[ a])
    es4
    es16[-. es-. es-. fis-.]
    b4->
}
```

```
hoom = \relative c {
    \key d \major
    \clef bass
    g8-. r
    r4
    fis8-.
    r8
    r4
    b'4->
```

```
}

pah = \relative c' {
    r8 b-.
    r4
    r8 g8-.
    r16 g-. r8
    \clef treble
    fis'4->
}

Mensurstriche layout (bar lines between the staves)

The mensurstriche-layout where the bar lines do not show on the staves but between staves can be achieved with a `StaffGroup` instead of a `ChoirStaff`. The bar line on staves is blanked out using `\hide`.

```
global = {
    \hide Staff.BarLine
    s1 s
    % the final bar line is not interrupted
    \undo \hide Staff.BarLine
    \bar "|."
}

\new StaffGroup \relative c' {
    <<
        \new Staff { << \global { c1 c } >> }
        \new Staff { << \global { c c } >> }
    >>
}
```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```
\new StaffGroup
\relative c' <<
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'( SystemStartSquare ( SystemStartBrace ( SystemStartBracket a
                                              ( SystemStartSquare b ) ) c ) d )
  \new Staff { c1 }
  \new Staff { c1 }
>>
```

Numbering groups of measures

This snippet demonstrates the use of the `Measure_counter_engraver` to number groups of successive measures. Any stretch of measures may be numbered, whether consisting of repetitions or not.

The engraver must be added to the appropriate context. Here, a `Staff` context is used; another possibility is a `Dynamics` context.

The counter is begun with `\startMeasureCount` and ended with `\stopMeasureCount`. Numbering will start by default with 1, but this behavior may be modified by overriding the `count-from` property.

When a measure extends across a line break, the number will appear twice, the second time in parentheses.

```
\layout {
  \context {
    \Staff
    \consists #Measure_counter_engraver
  }
}

\new Staff {
  \startMeasureCount
  \repeat unfold 7 {
    c'4 d' e' f'
  }
  \stopMeasureCount
  \bar "| |"
  g'4 f' e' d'
  \override Staff.MeasureCounter.count-from = #2
  \startMeasureCount
  \repeat unfold 5 {
    g'4 f' e' d'
  }
  g'4 f'
  \bar ""
  \break
  e'4 d'
  \repeat unfold 7 {
    g'4 f' e' d'
  }
  \stopMeasureCount
}
```

Removing bar numbers from a score

Bar numbers can be removed entirely by removing the `Bar_number_engraver` from the `Score` context.

```
\layout {
  \context {
    \Score
      \omit BarNumber
    % or:
    %\remove "Bar_number_engraver"
  }
}

\relative c' {
  c4 c c c \break
  c4 c c c
}
```

Use square bracket at the start of a staff group

The system start delimiter `SystemStartSquare` can be used by setting it explicitly in a `StaffGroup` or `ChoirStaff` context.

```
\score {
  \new StaffGroup { <<
    \set StaffGroup.systemStartDelimiter = #'SystemStartSquare
    \new Staff { c'4 d' e' f' }
    \new Staff { c'4 d' e' f' }
  >> }
}
```

Using marklines in a Frenched score

Using `MarkLine` contexts (such as in LSR1010 (<http://lsr.di.unimi.it/LSR/Item?id=1010>)) in a Frenched score can be problematic if all the staves between two `MarkLines` are removed in one system. The `Keep_alive_together_engraver` can be used within each `StaffGroup` to keep the `MarkLine` alive only as long as the other staves in the group stay alive.

```
bars = {
```

```
\tempo "Allegro" 4=120
s1*2
\repeat unfold 5 { \mark \default s1*2 }
\bar "||"
\tempo "Adagio" 4=40
s1*2
\repeat unfold 8 { \mark \default s1*2 }
\bar "|."
}
winds = \repeat unfold 120 { c''4 }
trumpet = { \repeat unfold 8 g'2 R1*16 \repeat unfold 4 g'2 R1*8 }
trombone = { \repeat unfold 4 c'1 R1*8 d'1 R1*17 }
strings = \repeat unfold 240 { c''8 }

B

This musical score consists of four staves: Winds, Trumpet, Trombone, and Strings. The Winds and Trombone staves feature sixteenth-note patterns. The Trumpet staff features eighth-note patterns. The Strings staff features sixteenth-note patterns. The score is divided into measures by vertical bar lines, and specific measures are labeled with letters A and B above them.

6

Winds

C D

Strings

C D E

The musical score consists of four systems of music. Each system has three staves: Winds (top), Tbn (middle), and Strings (bottom). The first system (measures 11-14) includes lyrics 'E' above the top staff, 'F' above the bottom staff, and 'Adagio (♩ = 40)' below the middle staff. The second system (measures 16-19) includes lyrics 'G' above the top staff, 'H' above the bottom staff, and 'Adagio (♩ = 40)' below the middle staff. The third system (measures 21-24) includes lyrics 'J' above the top staff, 'K' above the middle staff, 'L' above the bottom staff, and 'Adagio (♩ = 40)' below the middle staff. The fourth system (measures 26-29) includes lyrics 'M' above the top staff, 'N' above the bottom staff, and 'Adagio (♩ = 40)' below the middle staff.

Vocal ensemble template with lyrics aligned below and above the staves

This template is basically the same as the simple “Vocal ensemble” template, with the exception that here all the lyrics lines are placed using `alignAboveContext` and `alignBelowContext`.

```

Tweaks and overrides

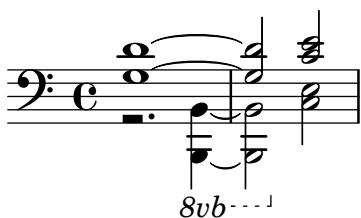

Section “Changing defaults” in *Notation Reference*

Section “Tweaking output” in *Learning Manual*

Adding an ottava marking to a single voice

If you have more than one voice on the staff, setting octavation in one voice will transpose the position of notes in all voices for the duration of the ottava bracket. If the ottavation is only intended to apply to one voice, the middleCPosition and ottava bracket may be set explicitly. In this snippet, the bass clef usually has middleCPosition set to 6, six positions above the center line, so in the 8va portion middleCPosition is 7 positions (one octave) higher still.

```
{
  \clef bass
  << { <g d'>1~ q2 <c' e'> }
  \\
  {
    r2.
    \set Staff.ottavation = #"8vb"
    \once \override Staff.OttavaBracket.direction = #DOWN
    \set Voice.middleCPosition = #(+ 6 7)
    <b,,, b,,,>4 ~ |
    q2
    \unset Staff.ottavation
    \unset Voice.middleCPosition
    <c e>2
  }
  >>
}
```

Adding links to objects

To add a link to a grob-stencil you could use `add-link` as defined here. Works with `\override` and `\tweak`. Drawback: `point-and-click` will be disturbed for the linked grobs.

Limitation: Works for PDF only.

The linked objects are colored with a separate command.

```
 #(define (add-link url-strg)
  (lambda (grob)
    (let* ((stil (ly:grob-property grob 'stencil)))
      (if (ly:stencil? stil)
          (begin
            (let* (
              (x-ext (ly:stencil-extent stil X))
              (y-ext (ly:stencil-extent stil Y)))
```

```
(url-expr (list 'url-link url-strg `(quote ,x-ext) `(quote ,y-ext)))
  (new-stil (ly:stencil-add
    (ly:make-stencil url-expr x-ext y-ext) stil)))
  (ly:grob-set-property! grob 'stencil new-stil)))
#f)))))

Adding markups in a tablature

By default markups does not show in a tablature. To make them appear, simply use the command `\revert TabStaff.TextScript.stencil`

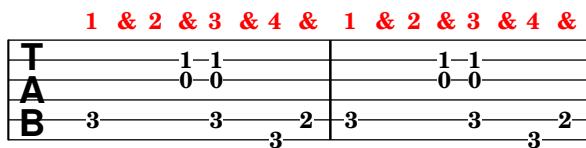

```
%% http://lsr.di.unimi.it/LSR/Item?id=919
% by P.P.Schneider on June 2014
```

```
high  = { r4 r8 <g c'> q r8 r4 }

low = { c4 r4 c8 r8 g,8 b, }

pulse = { s8^"1" s^"&" s^"2" s^"&" s^"3" s^"&" s^"4" s^"&" }

\score {
  \new TabStaff {
    \repeat unfold 2 << \high \\ \low \\ \pulse >>
  }
  \layout {
    \context {
      \TabStaff
      \clef moderntab
      \revert TextScript.stencil
      \override TextScript.font-series = #'bold
      \override TextScript.font-size = #-2
      \override TextScript.color = #red
    }
    \context {
      \Score
      proportionalNotationDuration = #(ly:make-moment 1/8)
    }
  }
}
```

Adding timing marks to long glissandi

Skipped beats in very long glissandi are sometimes indicated by timing marks, often consisting of stems without noteheads. Such stems can also be used to carry intermediate expression markings.

If the stems do not align well with the glissando, they may need to be repositioned slightly.

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

glissandoSkipOff = {
    \revert NoteColumn.glissando-skip
    \undo \hide NoteHead
    \revert NoteHead.no-ledgers
}

\relative c' {
    r8 f8\glissando
    \glissandoSkipOn
    f4 g a a8\noBeam
    \glissandoSkipOff

    \glissandoSkipOff
    a8 |

    r4 f\glissando \l
    \glissandoSkipOn
    a4\f \r
    \glissandoSkipOff
    b8!\! r |
}
```

Adjusting grace note spacing

The space given to grace notes can be adjusted using the `spacing-increment` property of `Score.GraceSpacing`.

```
graceNotes = {
    \grace { c4 c8 c16 c32 }
    c8
}

\relative c' {
    c8
    \graceNotes
    \override Score.GraceSpacing.spacing-increment = #2.0
    \graceNotes
```

```
\revert Score.GraceSpacing.spacing-increment
\graceNotes
}
```

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```
% Default layout:
<<
    \new Staff \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
    \new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa aa }
>>
```

Altering the length of beamed stems

Stem lengths on beamed notes can be varied by overriding the `beamed-lengths` property of the `details` of the `Stem`. If a single value is used as an argument, the length applies to all stems. When multiple arguments are used, the first applies to eighth notes, the second to sixteenth notes and so on. The final argument also applies to all notes shorter than the note length of the final argument. Non-integer arguments may also be used.

```
\relative c' {
    \override Stem.details.beamed-lengths = #'(2)
```

```
a8[ a] a16[ a] a32[ a]
\override Stem.details.beamed-lengths = #'(8 10 12)
a8[ a] a16[ a] a32[ a] r8
\override Stem.details.beamed-lengths = #'(8)
a8[ a]
\override Stem.details.beamed-lengths = #'(8.5)
a8[ a]
\revert Stem.details
a8[ a] a16[ a] a32[ a] r16
}
```

Alternative bar numbering

Two alternative methods for bar numbering can be set, especially for when using repeated music.

```

\relative c'{
  \set Score.alternativeNumberingStyle = #'numbers
  \repeat volta 3 { c4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1 \break
  \set Score.alternativeNumberingStyle = #'numbers-with-letters
  \repeat volta 3 { c,4 d e f | }
  \alternative {
    { c4 d e f | c2 d \break }
    { f4 g a b | f4 g a b | f2 a | \break }
    { c4 d e f | c2 d }
  }
  c1
}

```

The image shows three staves of musical notation. The top staff begins with a treble clef, a 'C' key signature, and a '1' measure number. It consists of eight notes: a dotted half note followed by six eighth notes. The middle staff begins with a treble clef, a '2' key signature, and a '2' measure number. It consists of eight notes: four eighth notes, a quarter note, another quarter note, and three eighth notes. The bottom staff begins with a treble clef, a '2' key signature, and a '3' measure number. It consists of seven notes: a dotted half note followed by six eighth notes.

The image shows three staves of musical notation. Staff 5 starts with a treble clef, a sharp key signature, and a common time signature. It has a bracket labeled '1.' above it, spanning the first six notes. Staff 6b starts with a treble clef and a common time signature. It has a bracket labeled '2.' above it, spanning the first six notes. Staff 6c starts with a treble clef and a common time signature. It has a bracket labeled '3.' above it, spanning the first six notes.

Analysis brackets above the staff

Simple horizontal analysis brackets are added below the staff by default. The following example shows a way to place them above the staff instead.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
  }
}

\relative c' {
  \once \override HorizontalBracket.direction = #UP
  c2\startGroup
  d2\stopGroup
}
```

Analysis brackets with labels

Text may be added to analysis brackets through the `text` property of the `HorizontalBracketText` grob. Adding different texts to brackets beginning at the same time requires the `\tweak` command. Bracket text will be parenthesized after a line break.

```
\layout {
  \context {
    \Voice
    \consists "Horizontal_bracket_engraver"
    \override HorizontalBracket.direction = #UP
  }
}

{
  \once\override HorizontalBracketText.text = "a"
  c'2\startGroup d'2\stopGroup
  \once\override HorizontalBracketText.text = "a'"
  e'2\startGroup d'2\stopGroup
  c'
```

```

-\tweak HorizontalBracketText.text \markup \bold \huge "b" \startGroup
-\tweak HorizontalBracketText.text "a" \startGroup
d''\stopGroup
e''-\tweak HorizontalBracketText.text "a'" \startGroup
d'''\stopGroup\stopGroup
c''-\tweak HorizontalBracketText.text foo \startGroup d' e' f'
\break
g' a' b' c'''\stopGroup
}

```

The image shows two staves of musical notation. The top staff is in common time (C) and features a series of eighth notes. Brackets above the notes group them into sets: the first two notes are grouped by a bracket labeled 'a'; the next two notes are grouped by a bracket labeled 'a''; the next two notes are grouped by a bracket labeled 'a'; the next two notes are grouped by a bracket labeled 'a''; and the last four notes are grouped by a bracket labeled 'foo'. The bottom staff is in 4/4 time and shows a single bracket labeled '(foo)' grouping four notes.

Asymmetric slurs

Slurs can be made asymmetric to match an asymmetric pattern of notes better.

```
slurNotes = { d,8( a' d f a f' d, a ) }
```

```

\relative c' {
  \stemDown
  \slurUp
  \slurNotes
  \once \override Slur.eccentricity = #3.0
  \slurNotes
}

```

The image shows a staff of musical notation in common time (C). It features a sequence of notes with slurs. The slurs are curved and do not follow a straight horizontal line, which is characteristic of asymmetric slurs used to match the specific timing and position of the notes.

Avoiding collisions with chord fingerings

Fingerings and string numbers applied to individual notes will automatically avoid beams and stems, but this is not true by default for fingerings and string numbers applied to the individual notes of chords. The following example shows how this default behavior can be overridden.

```

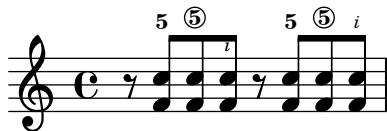

\relative c' {
  \set fingeringOrientations = #'(up)
  \set stringNumberOrientations = #'(up)
  \set strokeFingerOrientations = #'(up)

  % Default behavior
}

```

```
r8
<f c'-'5>8
<f c'\5>8
<f c'-'\\rightHandFinger #2 >8

% No tweak needed
r8
<f c'-'5>8
<f c'\5>8
% Corrected to avoid collisions
\override StrokeFinger.add-stem-support = ##t
<f c'-'\\rightHandFinger #2 >8
}
```

Caesura ("railtracks") with fermata

A caesura is sometimes denoted by a double “railtracks” breath mark with a fermata sign positioned above. This snippet shows an optically pleasing combination of railtracks and fermata.

```
\relative c' {
  c2.
  % construct the symbol
  \override BreathingSign.text = \markup {
    \override #'(direction . 1)
    \override #'(baseline-skip . 1.8)
    \dir-column {
      \translate #'(0.155 . 0)
      \center-align \musicglyph "scripts.caesura.curved"
      \center-align \musicglyph "scripts.ufermata"
    }
  }
  \breathe c4
  % set the breathe mark back to normal
  \revert BreathingSign.text
  c2. \breathe c4
  \bar "|."
}
```

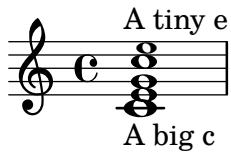

Changing a single note's size in a chord

Individual note heads in a chord can be modified with the `\tweak` command inside a chord, by altering the `font-size` property.

Inside the chord (within the brackets `< >`), before the note to be altered, place the `\tweak` command, followed by `#'font-size` and define the proper size like `#-2` (a tiny note head).

```
\relative c' {
  <\tweak font-size #+2 c e g c
  \tweak font-size #-2 e>1
  ^\markup { A tiny e }_ \markup { A big c }
}
```

Changing beam thickness and spacing

To make beams thicker or thinner alter the `Beam.beam-thickness` property. To adjust the spacing between beams alter the `Beam.length-fraction` property.

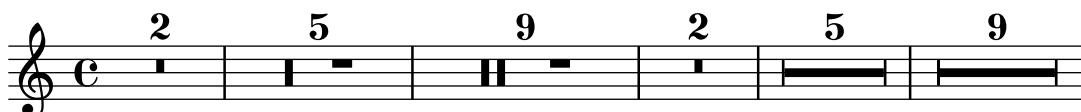

```
\relative f' {
  \time 1/8
  \override Beam.beam-thickness = #0.4
  \override Beam.length-fraction = #0.8
  c32 c c c
  \revert Beam.beam-thickness % 0.48 is default thickness
  \revert Beam.length-fraction % 1.0 is default spacing
  c32 c c c
  \override Beam.beam-thickness = #0.6
  \override Beam.length-fraction = #1.3
  c32 c c c
}
```

Changing form of multi-measure rests

If there are ten or fewer measures of rests, a series of longa and breve rests (called in German “Kirchenpausen” - church rests) is printed within the staff; otherwise a simple line is shown. This default number of ten may be changed by overriding the `expand-limit` property.

```
\relative c'' {
  \compressMMRests {
    R1*2 | R1*5 | R1*9
    \override MultiMeasureRest.expand-limit = #3
    R1*2 | R1*5 | R1*9
  }
}
```

Changing properties for individual grobs

The `\applyOutput` command allows the tuning of any layout object, in any context. It requires a Scheme function with three arguments.

```
#(define (mc-squared grob grob-origin context)
  (let ((sp (ly:grob-property grob 'staff-position)))
    (ly:grob-set-property!
      grob 'stencil
      (grob-interpret-markup grob
        #{
          \markup \lower #0.5
          #(case sp
            ((-5) "m")
            ((-3) "c ")
            ((-2) #{
              \markup \teeny \bold 2 #
            })
            (else "bla")) #})))))

\relative c' {
  <d f g b>2
  \applyOutput Voice.NoteHead #mc-squared
  <d f g b>2
}
```

Changing text and spanner styles for text dynamics

The text used for crescendos and decrescendos can be changed by modifying the context properties `crescendoText` and `decrescendoText`.

The style of the spanner line can be changed by modifying the `'style` property of `DynamicTextSpanner`. The default value is `'dashed-line`, and other possible values include `'line`, `'dotted-line` and `'none`.

```
\relative c'' {
  \set crescendoText = \markup { \italic { cresc. poco } }
  \set crescendoSpanner = #'text
  \override DynamicTextSpanner.style = #'dotted-line
  a2\< a
  a2 a
  a2 a
  a2 a\mf
}
```

Changing the default text font family

The default font families for text can be overridden with `make-pango-font-tree`.

```
\paper {
```

```
% change for other default global staff size.
myStaffSize = #20
%{
    run
        lilypond -dshow-available-fonts blabla
        to show all fonts available in the process log.
%}

#define fonts
(make-pango-font-tree "Times New Roman"
                        "Nimbus Sans,Nimbus Sans L"
                        "Luxi Mono"
;;
                        "Helvetica"
;;
                        "Courier"
        (/ myStaffSize 20)))
}

\relative c' {
    c4^\markup {
        roman: foo \bold bla \italic bar \italic \bold baz
    }
    c'4_\markup {
        \override #'(font-family . sans)
    {
        sans: foo \bold bla \italic bar \italic \bold baz
    }
}
c'2^\markup {
    \override #'(font-family . typewriter)
    {
        mono: foo \bold bla \italic bar \italic \bold baz
    }
}
}
}
```

Changing the staff size

Though the simplest way to resize staves is to use `#(set-global-staff-size xx)`, an individual staff's size can be changed by scaling the properties `'staff-space` and `fontSize`.

```
<<
\new Staff {
    \relative c' {
        \dynamicDown
        c8\ff c c c c c c c
```

```

        }
    }
\new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
} {
    \clef bass
    c8 c c c c\f c c c
}
>>

```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```

\score {
    \new Staff \relative c' {
        \tempo 4 = 160
        c4 e g b
        c4 b d c
        \set Score.tempoHideNote = ##t
        \tempo 4 = 96
        d,,4 fis a cis
        d4 cis e d
    }
    \layout { }
    \midi { }
}

```

Changing the text for sustain markings

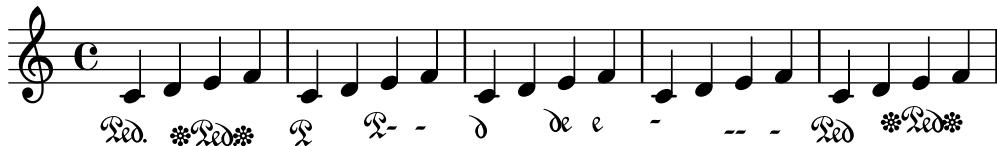

`Staff.pedalSustainStrings` can be used to set the text used for pedal down and up. Note that the only valid strings are those found in the list of pedal glyphs - the values used this snippet constitute an exhaustive list.

```
sustainNotes = { c4\sustainOn d e\sustainOff\sustainOn f\sustainOff }
```

```

\relative c' {
    \sustainNotes
    \set Staff.pedalSustainStrings = #'("P" "P-" "-")
    \sustainNotes
}
```

```
\set Staff.pedalSustainStrings = #'("d" "de" "e")
\sustainNotes
\set Staff.pedalSustainStrings = #'("M" "M-" "-")
\sustainNotes
\set Staff.pedalSustainStrings = #'("Ped" "*Ped" "*")
\sustainNotes
}
```

Controlling spanner visibility after a line break

The visibility of spanners which end on the first note following a line break is controlled by the `after-line-breaking` callback `ly:spanner::kill-zero-spanned-time`.

For objects such as glissandos and hairpins, the default behaviour is to hide the spanner after a break; disabling the callback will allow the left-broken span to be shown.

Conversely, spanners which are usually visible, such as text spans, can be hidden by enabling the callback.

```
\paper { ragged-right = ##t }

\relative c' {
  \override Hairpin.to-barline = ##f
  \override Glissando.breakable = ##t
  % show hairpin
  \override Hairpin.after-line-breaking = ##t
  % hide text span
  \override TextSpanner.after-line-breaking =
    #ly:spanner::kill-zero-spanned-time
  e2<\startTextSpan
  % show glissando
  \override Glissando.after-line-breaking = ##t
  f2\glissando
  \break
  f,1\!\\stopTextSpan
}
```

Controlling the vertical ordering of scripts

The vertical ordering of scripts is controlled with the 'script-priority' property. The lower this number, the closer it will be put to the note. In this example, the **TextScript** (the sharp symbol) first has the lowest priority, so it is put lowest in the first example. In the second, the prall trill (the **Script**) has the lowest, so it is on the inside. When two objects have the same priority, the order in which they are entered determines which one comes first.

```
\relative c''' {
    \once \override TextScript.script-priority = #-100
    a2^{\prall^{\markup { \sharp }}} % sharp symbol lowest

    \once \override Script.script-priority = #-100
    a2^{\prall^{\markup { \sharp }}} % sharp symbol inside
}
```

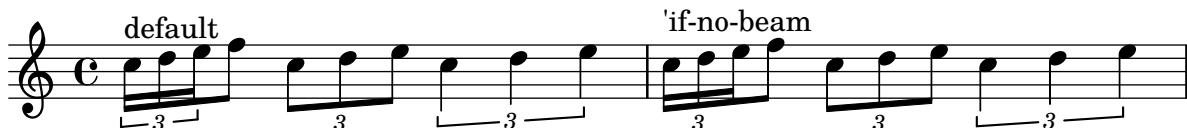

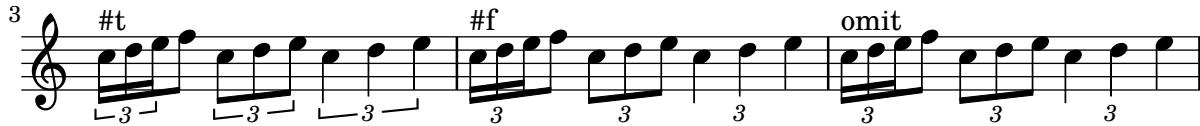

Controlling tuplet bracket visibility

The default behavior of tuplet-bracket visibility is to print a bracket unless there is a beam of the same length as the tuplet. To control the visibility of tuplet brackets, set the property 'bracket-visibility' to either **#t** (always print a bracket), **#f** (never print a bracket) or **#'if-no-beam** (only print a bracket if there is no beam).

```
music = \relative c' {
    \tuplet 3/2 { c16[ d e ] f8]
    \tuplet 3/2 { c8 d e }
    \tuplet 3/2 { c4 d e }
}

\new Voice {
    \relative c' {
        << \music s4#"default" >>
        \override TupletBracket.bracket-visibility = #'if-no-beam
        << \music s4#"if-no-beam" >>
        \override TupletBracket.bracket-visibility = ##t
        << \music s4#"#t" >>
        \override TupletBracket.bracket-visibility = ##f
        << \music s4#"#f" >>
        %% v2.18 :
        \omit TupletBracket
        << \music s4#"omit" >>
    }
}
```

Creating a delayed turn

Creating a delayed turn, where the lower note of the turn uses the accidental, requires several overrides. The `outside-staff-priority` property must be set to `#f`, as otherwise this would take precedence over the `avoid-slur` property. Changing the fractions `2/3` and `1/3` adjusts the horizontal position.

```
\relative c'' {
  c2*2/3 ( s2*1/3\turn d4) r
  <<
  { c4.( d8) }
  { s4 s\turn }
>>
\transpose c d \relative c'' <<
  { c4.( d8) }
  {
    s4
    \once \set suggestAccidentals = ##t
    \once \override AccidentalSuggestion.outside-staff-priority = ##f
    \once \override AccidentalSuggestion.avoid-slur = #'inside
    \once \override AccidentalSuggestion.font-size = -3
    \once \override AccidentalSuggestion.script-priority = -1
    \single \hideNotes
    b8-\turn \noBeam
    s8
  }
>>
}
```

Creating custom key signatures

LilyPond supports custom key signatures. In this example, print for D minor with an extended range of printed flats.

```
\new Staff \with {
  \override StaffSymbol.line-count = #8
  \override KeySignature.flat-positions = #'((-7 . 6))
  \override KeyCancellation.flat-positions = #'((-7 . 6))
  % presumably sharps are also printed in both octaves
  \override KeySignature.sharp-positions = #'((-6 . 7))
  \override KeyCancellation.sharp-positions = #'((-6 . 7))

  \override Clef.stencil = #
  (lambda (grob)(grob-interpret-markup grob
  #{
    \markup\combine
    \musicglyph "clefs.C"
    \translate #'(-3 . -2)
```

```
\musicglyph "clefs.F"
#})
    clefPosition = #3
    middleCPosition = #3
    middleCClefPosition = #3
}

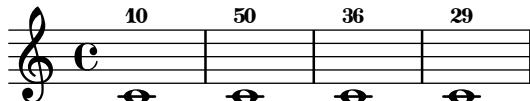

{
    \key d\minor
    f bes, f bes,
}
```

Creating double-digit fingerings

Creating fingerings larger than 5 is possible.

```
\relative c' {
    c1-10
    c1-50
    c1-36
    c1-29
}
```

Creating simultaneous rehearsal marks

Unlike text scripts, rehearsal marks cannot be stacked at a particular point in a score: only one `RehearsalMark` object is created. Using an invisible measure and bar line, an extra rehearsal mark can be added, giving the appearance of two marks in the same column. This method may also prove useful for placing rehearsal marks at both the end of one system and the start of the following system.

```
{
    \key a \major
    \set Score.markFormatter = #format-mark-box-letters
    \once \override Score.RehearsalMark.outside-staff-priority = #5000
    \once \override Score.RehearsalMark.self-alignment-X = #LEFT
    \once \override Score.RehearsalMark.break-align-symbols = #'(key-signature)
    \mark \markup { \bold { Senza denti } }

    % the hidden measure and bar line
    % \cadenzaOn turns off automatic calculation of bar numbers
    \cadenzaOn
    \once \override Score.TimeSignature.stencil = ##f
    \time 1/16
    s16 \bar ""
    \cadenzaOff
```

```
\time 4/4
\once \override Score.RehearsalMark.self-alignment-X = #LEFT
\mark \markup { \box \bold Intro }
d'1
\mark \default
d'1
}
```

Senza denti

Intro A

Creating text spanners

The `\startTextSpan` and `\stopTextSpan` commands allow the creation of text spanners as easily as pedal indications or octavations. Override some properties of the `TextSpanner` object to modify its output.

```
\paper { ragged-right = ##f }

\relative c' {
    \override TextSpanner.bound-details.left.text = #"bla"
    \override TextSpanner.bound-details.right.text = #"blu"
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'line
    \once \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \override TextSpanner.style = #'dashed-line
    \override TextSpanner.bound-details.left.text =
        \markup { \draw-line #'(0 . 1) }
    \override TextSpanner.bound-details.right.text =
        \markup { \draw-line #'(0 . -2) }
    \once \override TextSpanner.bound-details.right.padding = #-2

    a4 \startTextSpan
    b4 c
    a4 \stopTextSpan

    \set Staff.middleCPosition = #-13
    \override TextSpanner.dash-period = #10
    \override TextSpanner.dash-fraction = #0.5
    \override TextSpanner.thickness = #10
    a4 \startTextSpan
    b4 c
```

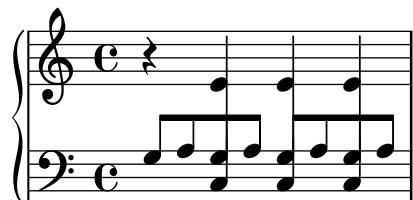

```
a4 \stopTextSpan
}
```

Cross-staff chords - beaming problems workaround

Sometimes it is better to use stems from the upper staff for creating cross-staff chords, because no problems with automatic beam collision avoidance then arise. If the stems from the lower staff were used in the following example, it would be necessary to change the automatic beam collision avoidance settings so that it doesn't detect collisions between staves using `\override Staff.Beam.collision-voice-only = ##t`

```
\new PianoStaff <<
  \new Staff = up
    \relative c' {
      <<
        { r4
          \override Stem.cross-staff = ##t
          \override Stem.length = #19 % this is in half-spaces,
            % so it makes stems 9.5 staffspaces long
          \override Stem.Y-offset = #-6 % stems are normally lengthened
            % upwards, so here we must lower the stem by the amount
            % equal to the lengthening - in this case (19 - 7) / 2
            % (7 is default stem length)
          e e e }
        { s4
          \change Staff = "bottom"
          \override NoteColumn.ignore-collision = ##t
          c, c c
        }
      >>
    }
  \new Staff = bottom
    \relative c' {
      \clef bass
      \voiceOne
      g8 a g a g a g a
    }
>>
```

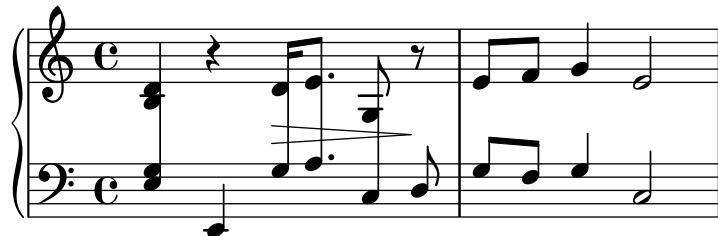

Cross staff stems

This snippet shows the use of the `Span_stem_engraver` and `\crossStaff` to connect stems across staves automatically.

The stem length need not be specified, as the variable distance between noteheads and staves is calculated automatically.

```
\layout {
  \context {
    \PianoStaff
    \consists #Span_stem_engraver
  }
}

{
  \new PianoStaff <<
    \new Staff {
      <b d'>4 r d'16> e'8. g8 r\!
      e'8 f' g'4 e'2
    }
    \new Staff {
      \clef bass
      \voiceOne
      \autoBeamOff
      \crossStaff { <e g>4 e, g16 a8. c8} d
      \autoBeamOn
      g8 f g4 c2
    }
  >>
}
```

Custodes

Custodes may be engraved in various styles.

```
\layout { ragged-right = ##t }

\new Staff \with { \consists "Custos_engraver" } \relative c' {
  \override Staff.Custos.neutral-position = #4

Customizing fretboard fret diagrams

Fret diagram properties can be set through 'fret-diagram-details'. For FretBoard fret diagrams, overrides are applied to the FretBoards.FretBoard object. Like Voice, FretBoards is a bottom level context, therefore can be omitted in property overrides.

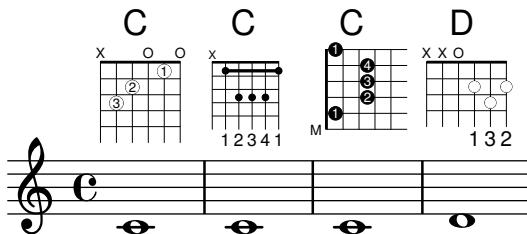

```

\include "predefined-guitar-fretboards.ly"
\storePredefinedDiagram #default-fret-table \chordmode { c' }
    #guitar-tuning
    #"'x;1-1-(;3-2;3-3;3-4;1-1-);"

<<
\new ChordNames {
    \chordmode { c1 | c | c | d }
}
\new FretBoards {
    % Set global properties of fret diagram
    \override FretBoards.FretBoard.size = #'1.2
    \override FretBoard.fret-diagram-details.finger-code = #'in-dot
    \override FretBoard.fret-diagram-details.dot-color = #'white
}

```

```
\chordmode {
    c
    \once \override FretBoard.size = #'1.0
    \once \override FretBoard.fret-diagram-details.barre-type = #'straight
    \once \override FretBoard.fret-diagram-details.dot-color = #'black
    \once \override FretBoard.fret-diagram-details.finger-code = #'below-string
    c'
    \once \override FretBoard.fret-diagram-details.barre-type = #'none
    \once \override FretBoard.fret-diagram-details.number-type = #'arabic
    \once \override FretBoard.fret-diagram-details.orientation = #'landscape
    \once \override FretBoard.fret-diagram-details.mute-string = #"M"
    \once \override FretBoard.fret-diagram-details.label-dir = #LEFT
    \once \override FretBoard.fret-diagram-details.dot-color = #'black
    c'
    \once \override FretBoard.fret-diagram-details.finger-code = #'below-string
    \once \override FretBoard.fret-diagram-details.dot-radius = #0.35
    \once \override FretBoard.fret-diagram-details.dot-position = #0.5
    \once \override FretBoard.fret-diagram-details.fret-count = #3
    d
}
}
\new Voice {
    c'1 | c' | c' | d'
}
>>
```

Customizing markup fret diagrams

Fret diagram properties can be set through 'fret-diagram-details'. For markup fret diagrams, overrides can be applied to the `Voice.TextScript` object or directly to the markup.

```
<<
\chords { c1 | c | c | d }

\new Voice = "mel" {
    \textLengthOn
    % Set global properties of fret diagram
    \override TextScript.size = #'1.2
    \override TextScript.fret-diagram-details.finger-code = #'in-dot
    \override TextScript.fret-diagram-details.dot-color = #'white

    %% C major for guitar, no barre, using defaults
    % terse style
    c'1^markup { \fret-diagram-terse "x;3-3;2-2;o;1-1;o;" }

Display bracket with only one staff in a system

If there is only one staff in one of the staff types `ChoirStaff` or `StaffGroup`, by default the bracket and the starting bar line will not be displayed. This can be changed by overriding `collapse-height` to set its value to be less than the number of staff lines in the staff.

Note that in contexts such as `PianoStaff` and `GrandStaff` where the systems begin with a brace instead of a bracket, another property has to be set, as shown on the second system in the example.

```

\score {
  \new StaffGroup <<
    % Must be lower than the actual number of staff lines
    \override StaffGroup.SystemStartBracket.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}
\score {
  \new PianoStaff <<
    \override PianoStaff.SystemStartBrace.collapse-height = #4
    \override Score.SystemStartBar.collapse-height = #4
    \new Staff {
      c'1
    }
  >>
}

```

Displaying grob ancestry

When working with grob callbacks, it can be helpful to understand a grob's ancestry. Most grobs have parents which influence the positioning of the grob. X- and Y-parents influence the horizontal and vertical positions for the grob, respectively. Additionally, each parent may have parents of its own.

Unfortunately, there are several aspects of a grob's ancestry that can lead to confusion:

- * The types of parents a grob has may depend on context.
- * For some grobs, the X- and Y-parents are the same.
- * A particular “ancestor” may be related to a grob in multiple ways.
- * The concept of “generations” is misleading.

For example, the `System` grob can be both parent (on the Y-side) and grandparent (twice on the X-side) to a `VerticalAlignment` grob.

This macro prints (to the console) a textual representation of a grob's ancestry.

When called this way:

```
{ \once \override NoteHead.before-line-breaking = #display-ancestry c }
```

The following output is generated:

```
NoteHead X, Y: NoteColumn X: PaperColumn X, Y: System Y: VerticalAxisGroup X:  
NonMusicalPaperColumn X, Y: System Y: VerticalAlignment X: NonMusicalPaperColumn  
X, Y: System Y: System

}

```

Dotted harmonics

Artificial harmonics using \harmonic do not show dots. To override this behavior, set the context property `harmonicDots`.

```

\relative c''' {
  \time 3/4
  \key f \major
  \set harmonicDots = ##t
  <bes f'\harmonic>2. ~
  <bes f'\harmonic>4. <a e'\harmonic>8( <gis dis'\harmonic> <g d'\harmonic>)
  <fis cis'\harmonic>2.
  <bes f'\harmonic>2.
}

```

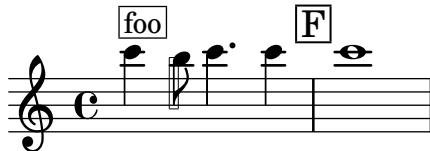

Drawing boxes around grobs

The `\print`-function can be overridden to draw a box around an arbitrary grob.

```
\relative c' {
    \override TextScript.stencil =
        #(make-stencil-boxer 0.1 0.3 ly:text-interface::print)
    c'4^"foo"

    \override Stem.stencil =
        #(make-stencil-boxer 0.05 0.25 ly:stem::print)
    \override Score.RehearsalMark.stencil =
        #(make-stencil-boxer 0.15 0.3 ly:text-interface::print)
    b8

    \revert Stem.stencil
    \revert Flag.stencil
    c4. c4
    \mark "F"
    c1
}
```

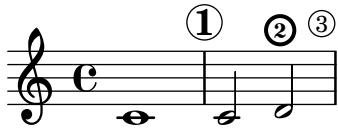

Drawing circles around various objects

The `\circle` markup command draws circles around various objects, for example fingering indications. For other objects, specific tweaks may be required: this example demonstrates two strategies for rehearsal marks and measure numbers.

```
\relative c' {
    c1
    \set Score.markFormatter =
        #(lambda (mark context)
            (make-circle-markup (format-mark-numbers mark context)))
    \mark \default

    c2 d^{\markup {
        \override #'(thickness . 3) {
            \circle \finger 2
        }
    }}
    \override Score.BarNumber.break-visibility = #all-visible
    \override Score.BarNumber.stencil =
        #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
}
```

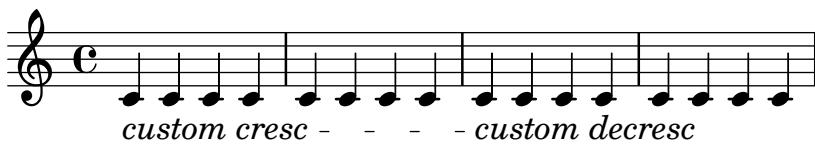

Dynamics custom text spanner postfix

Postfix functions for custom crescendo text spanners. The spanners should start on the first note of the measure. One has to use -\mycresc, otherwise the spanner start will rather be assigned to the next note.

```
% Two functions for (de)crescendo spanners where you can explicitly give the
% spanner text.
mycresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

mydecresc =
#(define-music-function (mymarkup) (markup?))
  (make-music 'DecrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text mymarkup))

\relative c' {

  c4 c4 c4 c4 |
  c4-\mydecresc "custom decresc" c4 c4 c4 |
  c4 c4\! c4 c4
}
```

Dynamics text spanner postfix

Custom text spanners can be defined and used with hairpin and text crescendos. \< and \> produce hairpins by default, \cresc etc. produce text spanners by default.

```
% Some sample text dynamic spanners, to be used as postfix operators
crpoco =
#(make-music 'CrescendoEvent
              'span-direction START
              'span-type 'text
              'span-text "cresc. poco a poco")

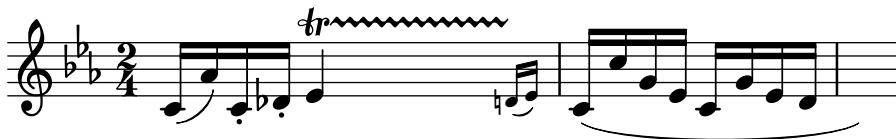

\relative c' {
  c4\cresc d4 e4 f4 |
  g4 a4\! b4\crpoco c4 |
  c4 d4 e4 f4 |
  g4 a4\! b4\< c4 |
  g4\dim a4 b4\decresc c4\!
}
```

Extending a TrillSpanner

For `TrillSpanner`, the `minimum-length` property becomes effective only if the `set-spacing-rods` procedure is called explicitly. To do this, the `springs-and-rods` property should be set to `ly:spanner::set-spacing-rods`.

```
\relative c' {
  \key c\minor
  \time 2/4
  c16( as') c,-. des-
  \once\override TrillSpanner.minimum-length = #15
  \once\override TrillSpanner.springs-and-rods = #ly:spanner::set-spacing-rods
  \afterGrace es4
  \startTrillSpan { d16[( \stopTrillSpan es)] }
  c( c' g es c g' es d
  \hideNotes
  c8)
}
```

Extending glissandi across repeats

A glissando which extends into several `\alternative` blocks can be simulated by adding a hidden grace note with a glissando at the start of each `\alternative` block. The grace note should be at the same pitch as the note which starts the initial glissando. This is implemented here with a music function which takes the pitch of the grace note as its argument.

Note that in polyphonic music the grace note must be matched with corresponding grace notes in all other voices.

```
repeatGliss = #(define-music-function (grace)
  (ly:pitch?)
  #{
    % the next two lines ensure the glissando is long enough
    % to be visible
    \once \override Glissando.springs-and-rods
    = #ly:spanner::set-spacing-rods
    \once \override Glissando.minimum-length = #3.5
    \once \hideNotes
    \grace $grace \glissando
  #})

\score {
  \relative c'' {
    \repeat volta 3 { c4 d e f\glissando }
    \alternative {
      { g2 d }
      { \repeatGliss f g2 e }
    }
  }
}
```

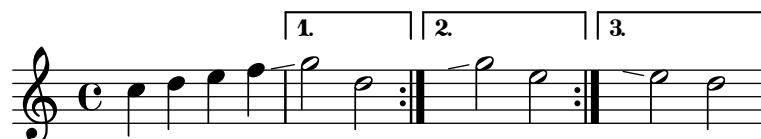

```

        { \repeatGliss f e2 d }
    }
}
}

music = '\relative c' {
    \voiceOne
    \repeat volta 2 {
        g a b c\glissando
    }
    \alternative {
        { d1 }
        { \repeatGliss c \once \omit StringNumber e1\2 }
    }
}

\score {
    \new StaffGroup <<
        \new Staff <<
            \context Voice { \clef "G_8" \music }
        >>
        \new TabStaff <<
            \context TabVoice { \clef "moderntab" \music }
        >>
    >>
}
}

```

Fine-tuning pedal brackets

The appearance of pedal brackets may be altered in different ways.

```

\paper { ragged-right = ##f }
\relative c' {
    c2\sostenutoOn c
    c2\sostenutoOff c
    \once \override Staff.PianoPedalBracket.shorten-pair = #'(-7 . -2)
    c2\sostenutoOn c
    c2\sostenutoOff c
    \once \override Staff.PianoPedalBracket.edge-height = #'(0 . 3)
}

```

```
c2\sostenutoOn c
c2\sostenutoOff c
}
```

Flat Ties

The function takes the default `Tie.stencil` as an argument, calculating the result relying on the extents of this default. Further tweaking is possible by overriding `Tie.details.height-limit` or with `\shape`. It's also possible to change the custom-definition on the fly.

```
%% http://lsr.di.unimi.it/LSR/Item?id=1031
```

```

Forcing horizontal shift of notes

When the typesetting engine cannot cope, the following syntax can be used to override typesetting decisions. The units of measure used here are staff spaces.

```
\relative c' <<
{
  <d g>2 <d g>
}
\\
{
  <b f'>2
  \once \override NoteColumn.force-hshift = #1.7
  <b f'>2
}
>>
```

Fret diagrams explained and developed

This snippet shows many possibilities for obtaining and tweaking fret diagrams.

```
<<
\chords {
    a2 a
    \repeat unfold 3 {

}
```

Horizontally aligning custom dynamics (e.g. "sempre pp" "piu f" "subito p")

Some dynamic expressions involve additional text, like “sempre pp”. Since dynamics are usually centered under the note, the `\pp` would be displayed way after the note it applies to.

To correctly align the “sempre pp” horizontally, so that it is aligned as if it were only the `\pp`, there are several approaches:

- * Simply use `\once\override DynamicText.X-offset = #-9.2` before the note with the dynamics to manually shift it to the correct position. Drawback: This has to be done manually each time you use that dynamic markup...

- * Add some padding (`#:hspace 7.1`) into the definition of your custom dynamic mark, so that after lilypond center-aligns it, it is already correctly aligned. Drawback: The padding really takes up that space and does not allow any other markup or dynamics to be shown in that position.

- * Shift the dynamic script `\once\overrideX-offset = ...` Drawback: `\once\override` is needed for every invocation!

- * Set the dimensions of the additional text to 0 (using `#:with-dimensions '(0 . 0) '(0 . 0)`). Drawback: To LilyPond “sempre” has no extent, so it might put other stuff there and

create collisions (which are not detected by the collision detection!). Also, there seems to be some spacing, so it's not exactly the same alignment as without the additional text

```
* Add an explicit shifting directly inside the scheme function for the dynamic-script.

* Set an explicit alignment inside the dynamic-script. By default, this won't have any effect,
only if one sets X-offset! Drawback: One needs to set DynamicText.X-offset, which will apply
to all dynamic texts! Also, it is aligned at the right edge of the additional text, not at the center
of pp.

% Solution 1: Using a simple markup with a particular halign value
% Drawback: It's a markup, not a dynamic command, so \dynamicDown
%           etc. will have no effect
semppMarkup = \markup { \halign #1.4 \italic "sempre" \dynamic "pp" }

% Solution 2: Using a dynamic script & shifting with
%             \once \override ...X-offset = ..
% Drawback: \once \override needed for every invocation
semppK =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
     #:italic "sempre"
     #:dynamic "pp")))

% Solution 3: Padding the dynamic script so the center-alignment
%             puts it at the correct position
% Drawback: the padding really reserves the space, nothing else can be there
semppT =
#(make-dynamic-script
  (markup #:line
    (#:normal-text
     #:italic "sempre"
     #:dynamic "pp"
     #:hspace 7.1)))

% Solution 4: Dynamic, setting the dimensions of the additional text to 0
% Drawback: To lilypond "sempre" has no extent, so it might put
%           other stuff there => collisions
% Drawback: Also, there seems to be some spacing, so it's not exactly the
%           same alignment as without the additional text
semppM =
#(make-dynamic-script
  (markup #:line
    (#:with-dimensions '(0 . 0) '(0 . 0)
      #:right-align
      #:normal-text
      #:italic "sempre"
      #:dynamic "pp")))

% Solution 5: Dynamic with explicit shifting inside the scheme function
semppG =
#(make-dynamic-script
  (markup #:hskip 0
```

```

    #:translate '(-18.85 . 0)
    #:line (#:normal-text
            #:italic "sempre"
            #:dynamic "pp"))

% Solution 6: Dynamic with explicit alignment. This has only effect
%             if one sets X-offset!
% Drawback: One needs to set DynamicText.X-offset!
% Drawback: Aligned at the right edge of the additional text,
%             not at the center of pp
semppMII =
#(make-dynamic-script

How to change fret diagram position

If you want to move the position of a fret diagram, for example, to avoid collision, or to place it between two notes, you have various possibilities:

- 1) modify #'padding or #'extra-offset values (as shown in the first snippet)
- 2) you can add an invisible voice and attach the fret diagrams to the invisible notes in that voice (as shown in the second example).

If you need to move the fret according with a rythmic position inside the bar (in the example, the third beat of the measure) the second example is better, because the fret is aligned with the third beat itself.

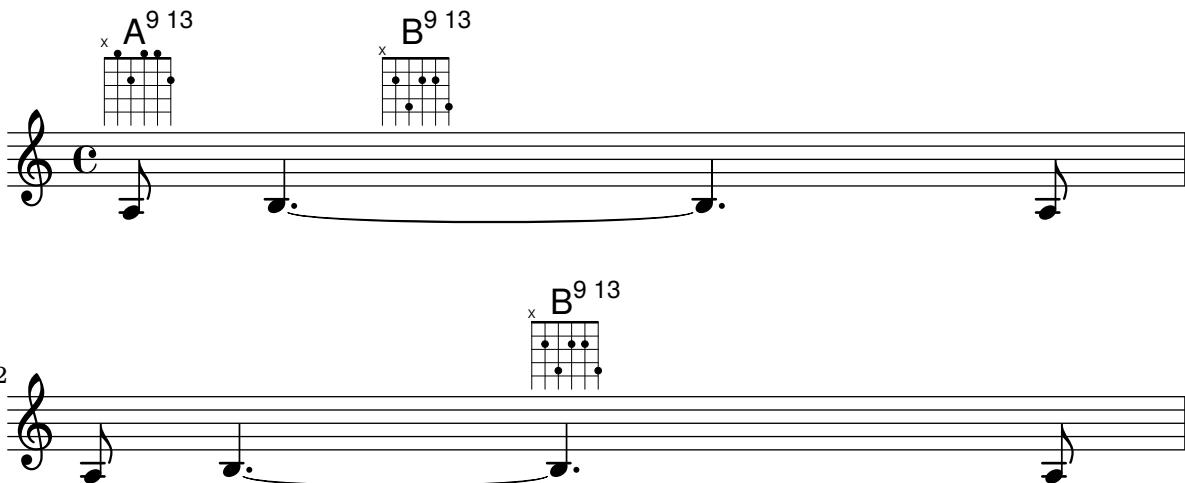

```

harmonies = \chordmode
{
  a8:13
  % THE FOLLOWING IS THE COMMAND TO MOVE THE CHORD NAME
  \once \override ChordNames.ChordName.extra-offset = #'(10 . 0)
  b8:13 s2.
  % THIS LINE IS THE SECOND METHOD
  s4 s4 b4:13
}

\score
{
  <<
    \new ChordNames \harmonies
    \new Staff
    {a8^\markup { \fret-diagram "6-x;5-0;4-2;3-0;2-0;1-2;" } }
  % THE FOLLOWING IS THE COMMAND TO MOVE THE FRET DIAGRAM
  \once \override TextScript.extra-offset = #'(10 . 0)
  b4.^^\markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" } b4. a8\break
}

```

```
% HERE IS THE SECOND METHOD
<<
{ a8 b4.^ b4. a8}
{ s4 s4 s4^ \markup { \fret-diagram "6-x;5-2;4-4;3-2;2-2;1-4;" }
}
>>
}
>>
}
```

How to print two rehearsal marks above and below the same barline (method 1)

This method prints two 'rehearsal marks', one on top of the other. It shifts the lower rehearsal mark below the staff and then adds padding above it in order to place the upper rehearsal mark above the staff.

By adjusting the extra-offset and baseline-skip values you can increase or decrease the overall space between the rehearsal mark and the staff.

Because nearly every type of glyph or string can be made to behave like a rehearsal mark it is possible to centre those above and below a bar line.

Adding the appropriate 'break visibility' as shown in snippet 1 will allow you to position two marks at the end of a line as well.

Note: Method 1 is less complex than Method 2 but does not really allow for fine tuning of placement of one of the rehearsal marks without affecting the other. It may also give some problems with vertical spacing, since using `extra-offset` does not change the bounding box of the mark from its original value.

```
\relative c'{
c d e f |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\mark \markup \center-column { \circle 1 \box A }
g f e d |
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\mark \markup \center-column { \flat { \bold \small \italic Fine. } }
g f e d |
```

```
\once \override Score.RehearsalMark.extra-offset = #'(0 . -8.5)
\once \override Score.RehearsalMark.baseline-skip = #9
\override Score.RehearsalMark.break-visibility = #begin-of-line-invisible
\mark \markup \center-column { \fermata \box z }
}
```

How to print two rehearsal marks above and below the same barline (method 2)

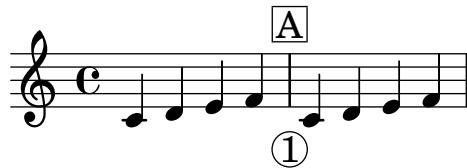

This method prints two 'rehearsal marks' - one above the stave and one below, by creating two voices, adding the Rehearsal Mark engraver to each voice - without this no rehearsal mark is printed - and then placing each rehearsal mark UP and DOWN in each voice respectively.

This method (as opposed to method 1) is more complex, but allows for more flexibility, should it be needed to tweak each rehearsal mark independently of the other.

```
\score {
  \relative c'
  <<
  \new Staff {
    <<
    \new Voice \with {
      \consists Mark_engraver
      \consists "Staff_collecting_engraver"
    }
    { c4 d e f
      \mark \markup { \box A }
      c4 d e f
    }
    \new Voice \with {
      \consists Mark_engraver
      \consists "Staff_collecting_engraver"
      \override RehearsalMark.direction = #DOWN
    }
    { s4 s s s
      \mark \markup { \circle 1 }
      s4 s s s
    }
  >>
}
>>
\layout {
  \context {
    \Score
    \remove "Mark_engraver"
    \remove "Staff_collecting_engraver"
  }
}
```

```

    }
}
}
```

Inserting a caesura

Caesura marks can be created by overriding the 'text' property of the `BreathingSign` object. A curved caesura mark is also available.

```
\relative c' {
  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.straight"
  }
  c8 e4. \breathe g8. e16 c4

  \override BreathingSign.text = \markup {
    \musicglyph "scripts.caesura.curved"
  }
  g8 e'4. \breathe g8. e16 c4
}
```

Keep change clefs full sized

When a clef is changed, the clef sign displayed is smaller than the initial clef. This can be overridden with `full-size-change`.

```
\relative c' {
  \clef "treble"
  c1
  \clef "bass"
  c1
  \clef "treble"
  c1
  \override Staff.Clef.full-size-change = ##t
  \clef "bass"
  c1
  \clef "treble"
  c1
  \revert Staff.Clef.full-size-change
  \clef "bass"
  c1
  \clef "treble"
  c1
}
```

Line arrows

Arrows can be applied to text-spanners and line-spanners (such as the Glissando).

```
\relative c' {
    \override TextSpanner.bound-padding = #1.0
    \override TextSpanner.style = #'line
    \override TextSpanner.bound-details.right.arrow = ##t
    \override TextSpanner.bound-details.left.text = #"fof"
    \override TextSpanner.bound-details.right.text = #"gag"
    \override TextSpanner.bound-details.right.padding = #0.6

    \override TextSpanner.bound-details.right.stencil-align-dir-y = #CENTER
    \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER

    \override Glissando.bound-details.right.arrow = ##t
    \override Glissando.arrow-length = #0.5
    \override Glissando.arrow-width = #0.25

    a8\startTextSpan gis a4 b\glissando b,
    g'4 c\stopTextSpan c2
}
```

Making an object invisible with the 'transparent' property

Setting the `transparent` property will cause an object to be printed in “invisible ink”: the object is not printed, but all its other behavior is retained. The object still takes up space, it takes part in collisions, and slurs, ties and beams can be attached to it.

This snippet demonstrates how to connect different voices using ties. Normally, ties only connect two notes in the same voice. By introducing a tie in a different voice, and blanking the first up-stem in that voice, the tie appears to cross voices.

```
\relative {
    \time 2/4
    <<
    {
        \once \hide Stem
        \once \override Stem.length = #8
        b'8 ~ 8\noBeam
        \once \hide Stem
        \once \override Stem.length = #8
        g8 ~ 8\noBeam
    }
    \\
    {
        b8 g g e
    }
```

```
>>
}
```

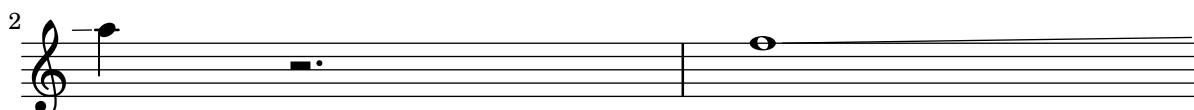

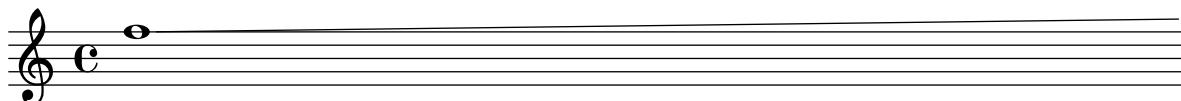

Making glissandi breakable

Setting the `breakable` property to `#t` in combination with `after-line-breaking` allows a glissando to break if it occurs at a line break:

```
glissandoSkipOn = {
    \override NoteColumn.glissando-skip = ##t
    \hide NoteHead
    \override NoteHead.no-ledgers = ##t
}

\relative c' {
    \override Glissando.breakable = ##t
    \override Glissando.after-line-breaking = ##t
    f1\glissando |
    \break
    a4 r2. |
    f1\glissando
    \once \glissandoSkipOn
    \break
    a2 a4 r4 |
}
```

Manually controlling beam positions

Beam positions may be controlled manually, by overriding the `positions` setting of the `Beam` grob.

```
\relative c' {
    \time 2/4
    % from upper staff-line (position 2) to center (position 0)
    \override Beam.positions = #'(2 . 0)
    c8 c
```

```
% from center to one above center (position 1)
\override Beam.positions = #'(0 . 1)
c8 c
}
```

Mensurstriche layout (bar lines between the staves)

The mensurstriche-layout where the bar lines do not show on the staves but between staves can be achieved with a `StaffGroup` instead of a `ChoirStaff`. The bar line on staves is blanked out using `\hide`.

```
global = {
    \hide Staff.BarLine
    s1 s
    % the final bar line is not interrupted
    \undo \hide Staff.BarLine
    \bar "|."
}

\new StaffGroup \relative c' {
    <<
        \new Staff { << \global { c1 c } >> }
        \new Staff { << \global { c c } >> }
    >>
}
```

Modifying the Ottava bracket slope

It is possible to change the slope of the Ottava bracket.

```
\relative c' {
    \override Staff.OttavaBracket.stencil = #ly:line-spanner::print
    \override Staff.OttavaBracket.bound-details =
        #`((left . ((Y . 0) ; Change the integer here
                    (attach-dir . ,LEFT)
                    (padding . 0)
                    (stencil-align-dir-y . ,CENTER)))
            (right . ((Y . 5) ; Change the integer here
                      (padding . 0)
                      (attach-dir . ,RIGHT)
                      (text . ,(make-draw-dashed-line-markup (cons 0 -1.2))))))
    \override Staff.OttavaBracket.left-bound-info =
```

```
#ly:line-spanner::calc-left-bound-info-and-text
\override Staff.OttavaBracket.right-bound-info =
  #ly:line-spanner::calc-right-bound-info
\ottava #1
c1
c'''1
}
```

Moving dotted notes in polyphony

When a dotted note in the upper voice is moved to avoid a collision with a note in another voice, the default is to move the upper note to the right. This behaviour can be over-ridden by using the `prefer-dotted-right` property of `NoteCollision`.

```
\new Staff \relative c' <<
{
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##f
  f2. f4
  \override Staff.NoteCollision.prefer-dotted-right = ##t
  f2. f4
}
\\
{ e4 e e e e e e e e }
```

>>

Moving slur positions vertically

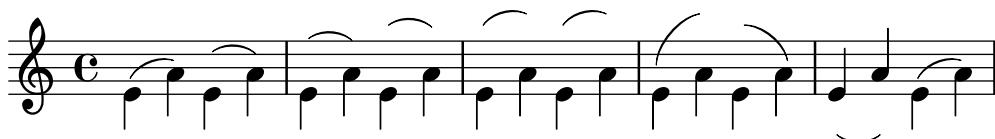

The vertical position of a slur can be adjusted using the `positions` property of `Slur`. The property has 2 parameters, the first referring to the left end of the slur and the second to the right. The values of the parameters are not used by LilyPond to make an exact movement of the slur - instead it selects what placement of the slur looks best, taking into account the parameter values. Positive values move the slur up, and are appropriate for notes with stems down. Negative values move downward slurs further down.

```
\relative c' {
  \stemDown
  e4( a)
  \override Slur.positions = #'(1 . 1)
  e4( a)
  \override Slur.positions = #'(2 . 2)
  e4( a)
  \override Slur.positions = #'(3 . 3)
```

```

e4( a)
\override Slur.positions = #'(4 . 4)
e4( a)
\override Slur.positions = #'(5 . 5)
e4( a)
\override Slur.positions = #'(0 . 5)
e4( a)
\override Slur.positions = #'(5 . 0)
e4( a)
\stemUp
\override Slur.positions = #'(-5 . -5)
e4( a)
\stemDown
\revert Slur.positions
e4( a)
}

```

Nesting staves

The property `systemStartDelimiterHierarchy` can be used to make more complex nested staff groups. The command `\set StaffGroup.systemStartDelimiterHierarchy` takes an alphabetical list of the number of staves produced. Before each staff a system start delimiter can be given. It has to be enclosed in brackets and takes as much staves as the brackets enclose. Elements in the list can be omitted, but the first bracket takes always the complete number of staves. The possibilities are `SystemStartBar`, `SystemStartBracket`, `SystemStartBrace`, and `SystemStartSquare`.

```

\new StaffGroup
\relative c' {
  \set StaffGroup.systemStartDelimiterHierarchy
    = #'( SystemStartSquare ( SystemStartBrace ( SystemStartBracket a
                                              ( SystemStartSquare b ) ) c ) d )
  \new Staff { c1 }
  \new Staff { c1 }
}
>>

```

Overriding articulations of distinct type

Sometimes you may want to affect a single articulation-type. Although it is always possible to use `\tweak`, it might become tedious to do so for every single sign of a whole score. The following shows how to tweak articulations with a list of custom-settings. One use-case might be to create a style-sheet.

With 2.16.2 it is possible to put the proposed function, `\customScripts`, into a `\layout-` block.

% Code by David Nalesnik and Thomas Morley

```
#(define (custom-script-tweaks ls)
  (lambda (grob)
    (let* ((type (ly:prob-property
                  (assoc-ref (ly:grob-properties grob) 'cause)
                  'articulation-type))
           (tweaks (assoc-ref ls type)))
      (if tweaks
          (for-each
            (lambda (x) (ly:grob-set-property! grob (car x) (cdr x)))
            tweaks)))))

customScripts =
#(define-music-function (settings)(list?))
#{
  \override Script.before-line-breaking =
  #(custom-script-tweaks settings)
#}

revertCustomScripts = { \revert Script.before-line-breaking }

%%%%%%%%%%%%%
% Example:
%%%%%%%%%%%%%

% Predefine a list of desired tweaks.
#(define my-settings-1
  '(
```

```

("staccato" . ((color . (1 0 0))(padding . 0.5)))
("accent" . ((font-size . 0)(color . (1 0 0))))
("tenuto" . ((rotation . (45 0 0)) (padding . 2)(font-size . 10)))
("staccatissimo" . ((padding . 1) (color . (1 0 0))))
("segno" . ((font-size . 0)(color . (1 0 0))))
))

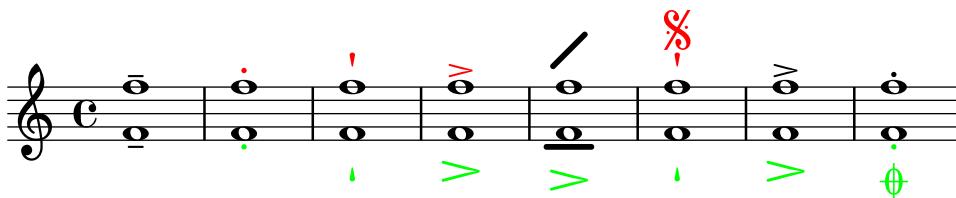

#define my-settings-2
'(
("staccato" . ((color . (0 1 0))))
("accent" . ((font-size . 4)(color . (0 1 0))(padding . 1.5)))
("tenuto" . ((font-size . 10)))
("staccatissimo" . ((padding . 2) (color . (0 1 0))))
("coda" . ((color . (0 1 0)) (padding . 1)))
))

one =
\relative c' {
f1--
\customScripts #my-settings-1
f-. f-! f-> f-- f-!\segno
\revertCustomScripts
f-> f-.
}

two =
\relative c' {
f1--
\customScripts #my-settings-2
f-. f-! f-> f---> f-!
f-> f-. \coda
}

\new Staff <<
\new Voice { \voiceOne \one }
\new Voice { \voiceTwo \two }
>>

```

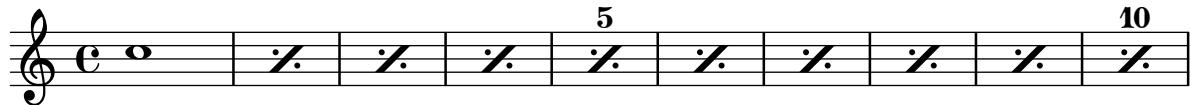

Percent repeat count visibility

Percent repeat counters can be shown at regular intervals by setting the context property `repeatCountVisibility`.

```
\relative c' {
\set countPercentRepeats = ##
\set repeatCountVisibility = #(every-nth-repeat-count-visible 5)
```

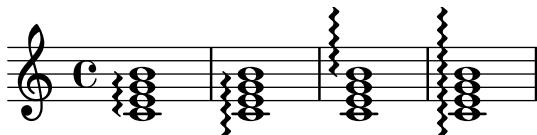

```
\repeat percent 10 { c1 } \break
\set repeatCountVisibility = #(every-nth-repeat-count-visible 2)
\repeat percent 6 { c1 d1 }
}
```

Positioning arpeggios

If you need to extend or shorten an arpeggio, you can modify the upper and lower start positions independently.

```
\relative c' {
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 0)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(0 . 5)
  <c e g b>1\arpeggio
  \once \override Arpeggio.positions = #'(-5 . 5)
  <c e g b>1\arpeggio
}
```

Positioning multi-measure rests

Unlike ordinary rests, there is no predefined command to change the staff position of a multi-measure rest symbol of either form by attaching it to a note. However, in polyphonic music multi-measure rests in odd-numbered and even-numbered voices are vertically separated. The positioning of multi-measure rests can be controlled as follows:

```
\relative c'' {
  % Multi-measure rests by default are set under the fourth line
  R1
  % They can be moved using an override
  \override MultiMeasureRest.staff-position = #-2
  R1
  \override MultiMeasureRest.staff-position = #0
  R1
  \override MultiMeasureRest.staff-position = #2
  R1
  \override MultiMeasureRest.staff-position = #3
  R1
  \override MultiMeasureRest.staff-position = #6
```

```

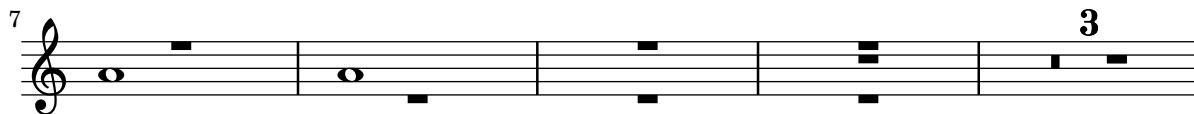

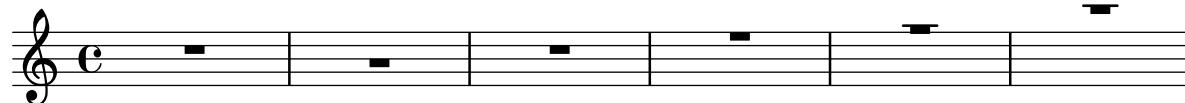

R1
\revert MultiMeasureRest.staff-position
\break

% In two Voices, odd-numbered voices are under the top line
<< { R1 } \\ { a1 } >>
% Even-numbered voices are under the bottom line
<< { a1 } \\ { R1 } >>
% Multi-measure rests in both voices remain separate
<< { R1 } \\ { R1 } >>

% Separating multi-measure rests in more than two voices
% requires an override
<< { R1 } \\ { R1 } \\
    \once \override MultiMeasureRest.staff-position = #0
    { R1 }
>>

% Using compressed bars in multiple voices requires another override
% in all voices to avoid multiple instances being printed
\compressMMRests
<<
    \revert MultiMeasureRest.direction
    { R1*3 }
    \\
    \revert MultiMeasureRest.direction
    { R1*3 }
>>
}

```

Positioning text markups inside slurs

Text markups need to have the `outside-staff-priority` property set to false in order to be printed inside slurs.

```

\relative c' {
    \override TextScript.avoid-slur = #'inside
    \override TextScript.outside-staff-priority = ##f
    c2(^\markup { \halign #-10 \natural } d4.) c8
}

```

Printing bar numbers inside boxes or circles

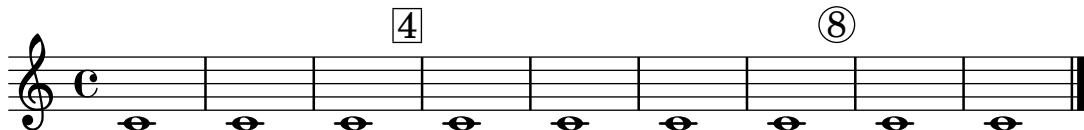

Bar numbers can also be printed inside boxes or circles.

```
\relative c' {
    % Prevent bar numbers at the end of a line and permit them elsewhere
    \override Score.BarNumber.break-visibility = #end-of-line-invisible
    \set Score.barNumberVisibility = #(every-nth-bar-number-visible 4)

    % Increase the size of the bar number by 2
    \override Score.BarNumber.font-size = #2

    % Draw a box round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-boxer 0.1 0.25 ly:text-interface::print)
    \repeat unfold 5 { c1 }

    % Draw a circle round the following bar number(s)
    \override Score.BarNumber.stencil
        = #(make-stencil-circler 0.1 0.25 ly:text-interface::print)
    \repeat unfold 4 { c1 } \bar "|."
}
```

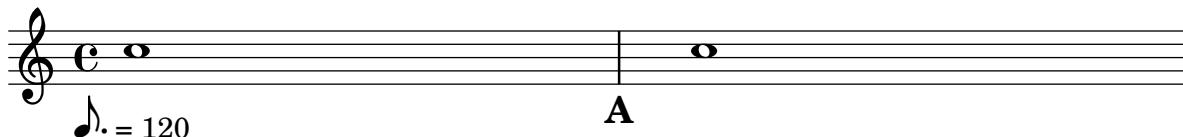

Printing metronome and rehearsal marks below the staff

By default, metronome and rehearsal marks are printed above the staff. To place them below the staff simply set the `direction` property of `MetronomeMark` or `RehearsalMark` appropriately.

```
\layout {
    indent = 0
    ragged-right = ##f
}

{
    % Metronome marks below the staff
    \override Score.MetronomeMark.direction = #DOWN
    \tempo 8. = 120
    c'''1

    % Rehearsal marks below the staff
    \override Score.RehearsalMark.direction = #DOWN
    \mark \default
    c'''1
}
```

Printing note names with and without an octave marker

The `NoteNames` context can be used to print the text value of notes. The `printOctaveNames` property turns on or off the representation of the octave of the note.

```
scale = \relative c' {
    a4 b c d
    e4 f g a
}

\new Staff {
    <<
        \scale
        \context NoteNames {
            \set printOctaveNames = ##f
            \scale
        }
    >>
    R1
    <<
        \scale
        \context NoteNames {
            \set printOctaveNames = ##t
            \scale
        }
    >>
}
}
```

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c'' <<
    \override Score.SpacingSpanner.strict-note-spacing = ##t
    \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
    \new Staff {
        c8[ c \clef alto c c \grace { d16 } c8 c] c4
        c2 \grace { c16[ c16] } c2
    }
    \new Staff {
        c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
        c1
    }
>>
```

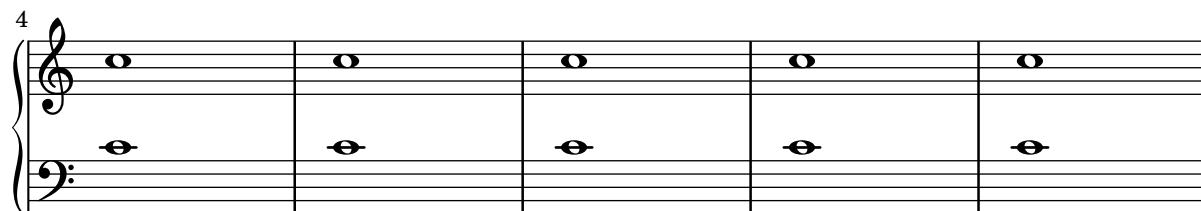

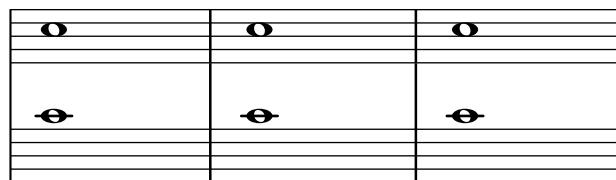

Removing brace on first line of piano score

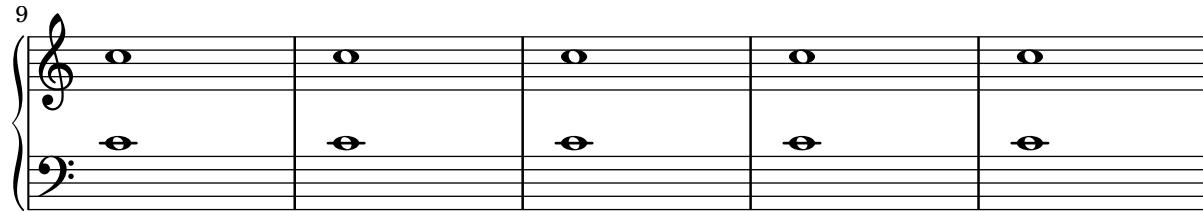

This snippet removes the first brace from a `PianoStaff` or a `GrandStaff`. It may be useful when cutting and pasting the engraved image into existing music.

It uses `\alterBroken`.

```
someMusic = {
    \once \override Staff.Clef.stencil = ##f
    \once \override Staff.TimeSignature.stencil = ##f
    \repeat unfold 3 c1 \break
    \repeat unfold 5 c1 \break
    \repeat unfold 5 c1
}

\score {
    \new PianoStaff
    <<
        \new Staff = "right" \relative c' \someMusic
        \new Staff = "left" \relative c' { \clef F \someMusic }
    >>
    \layout {
        indent=75
        \context {
            \PianoStaff
            \alterBroken transparent #'(##t) SystemStartBrace
        }
    }
}
```

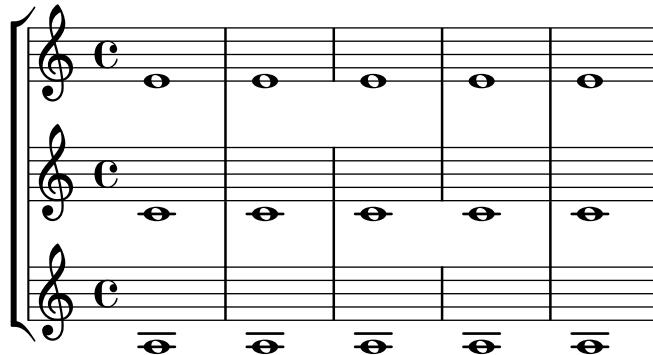

Removing connecting bar lines on StaffGroup PianoStaff or GrandStaff

By default, bar lines in StaffGroup, PianoStaff, or GrandStaff groups are connected between the staves. This behaviour can be overridden on a staff-by-staff basis.

```
\relative c' {
    \new StaffGroup <<
        \new Staff {
            e1 | e
            \once \override Staff.BarLine.allow-span-bar = ##f
            e1 | e | e
        }
        \new Staff {
            c1 | c | c
            \once \override Staff.BarLine.allow-span-bar = ##f
            c1 | c
        }
        \new Staff {
            a1 | a | a | a | a
        }
    >>
}
```

Removing the first empty line

The first empty staff can also be removed from the score by setting the `VerticalAxisGroup` property `remove-first`. This can be done globally inside the `\layout` block, or locally inside the specific staff that should be removed. In the latter case, you have to specify the context (`Staff` applies only to the current staff) in front of the property.

The lower staff of the second staff group is not removed, because the setting applies only to the specific staff inside of which it is written.

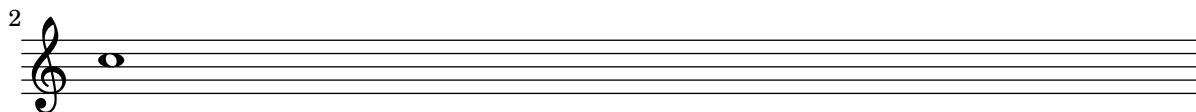

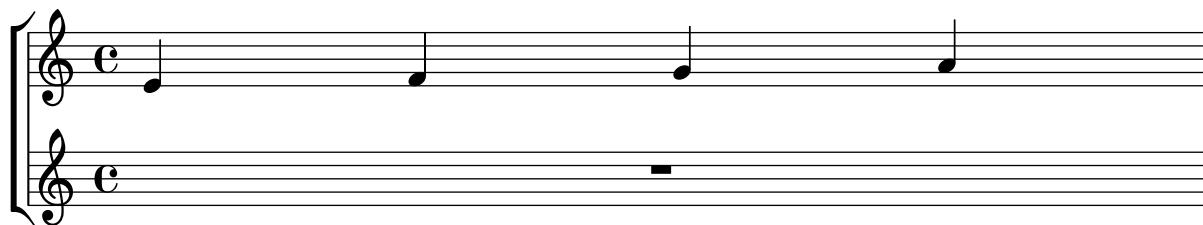

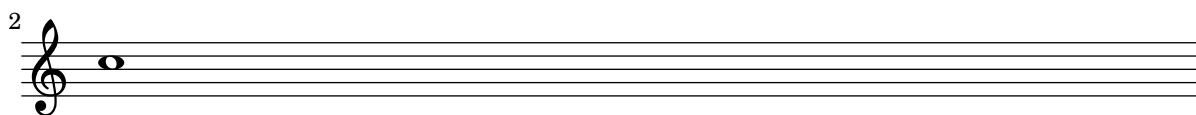

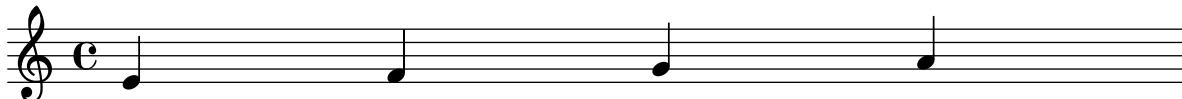

```
\layout {
    \context {
        \Staff \RemoveEmptyStaves
        % To use the setting globally, uncomment the following line:
        % \override VerticalAxisGroup.remove-first = ##t
```

```

    }
}

\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    % To use the setting globally, comment this line,
    % uncomment the line in the \layout block above
    \override Staff.VerticalAxisGroup.remove-first = ##t
    R1 \break
    R
  }
>>
\new StaffGroup <<
  \new Staff \relative c' {
    e4 f g a \break
    c1
  }
  \new Staff {
    R1 \break
    R
  }
>>

```

Rest styles

Rests may be used in various styles.

```
\new Staff \relative c {
  \omit Score.TimeSignature
```

```
\cadenzaOn

\override Staff.Rest.style = #'mensural
r\maxima^\markup \typewriter { mensural }
r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
\bar ""
\break

\override Staff.Rest.style = #'neomensural
r\maxima^\markup \typewriter { neomensural }
r\longa r\breve r1 r2 r4 r8 r16 s32 s64 s128 s128
\bar ""
\break

\override Staff.Rest.style = #'classical
r\maxima^\markup \typewriter { classical }
r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
\bar ""
\break

\override Staff.Rest.style = #'z
r\maxima^\markup \typewriter { z-style }
r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
\bar ""
\break

\override Staff.Rest.style = #'default
r\maxima^\markup \typewriter { default }
r\longa r\breve r1 r2 r4 r8 r16 r32 r64 r128 s128
}
```

The image displays five musical staves, each with a treble clef and four measures. The staves are labeled above them:

- mensural**: Shows standard rests (solid black bars).
- neomensural**: Shows rests with vertical stems extending downwards.
- classical**: Shows rests with vertical stems extending upwards.
- z-style**: Shows rests with diagonal stems sloping downwards to the right.
- default**: Shows standard rests (solid black bars) again.

Rhythmic slashes

In “simple” lead-sheets, sometimes no actual notes are written, instead only “rhythmic patterns” and chords above the measures are notated giving the structure of a song. Such a feature is for example useful while creating/transcribing the structure of a song and also when sharing lead sheets with guitarists or jazz musicians. The standard support for this using `\repeat percent` is unsuitable here since the first beat has to be an ordinary note or rest. This example shows two solutions to this problem, by redefining ordinary rests to be printed as slashes. (If the duration of each beat is not a quarter note, replace the `r4` in the definitions with a rest of the appropriate duration).

```
% Macro to print single slash
rs = {
    \once \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash
    \once \override Rest.thickness = #0.48
    \once \override Rest.slope = #1.7
    r4
}

% Function to print a specified number of slashes
comp = #(define-music-function (count) (integer?)
  #{
    \override Rest.stencil = #ly:percent-repeat-item-interface::beat-slash

Separating key cancellations from key signature changes

By default, the accidentals used for key cancellations are placed adjacent to those for key signature changes. This behavior can be changed by overriding the `'break-align-orders` property of the `BreakAlignment` grob.

The value of `'break-align-orders` is a vector of length 3, with quoted lists of breakable items as elements. This example only modifies the second list, moving `key-cancellation` before `staff-bar`; by modifying the second list, break alignment behavior only changes in the middle of a system, not at the beginning or the end.

```
\new Staff {
  \override Score.BreakAlignment.break-align-orders =
```

```

##((left-edge ambitus breathing-sign clef staff-bar
    key-cancellation key-signature time-signature custos)

(left-edge ambitus breathing-sign clef key-cancellation
    staff-bar key-signature time-signature custos)

(left-edge ambitus breathing-sign clef key-cancellation
    key-signature staff-bar time-signature custos))

\key des \major
c'1
\bar "||"
\key bes \major
c'1
}

```

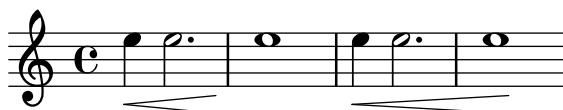

Setting hairpin behavior at bar lines

If the note which ends a hairpin falls on a downbeat, the hairpin stops at the bar line immediately preceding. This behavior can be controlled by overriding the 'to-barline' property.

```

\relative c' {
  e4< e2.
  e1!
  \override Hairpin.to-barline = ##f
  e4< e2.
  e1!
}

```

Setting system separators

System separators can be inserted between systems. Any markup can be used, but \slashSeparator has been provided as a sensible default.

```

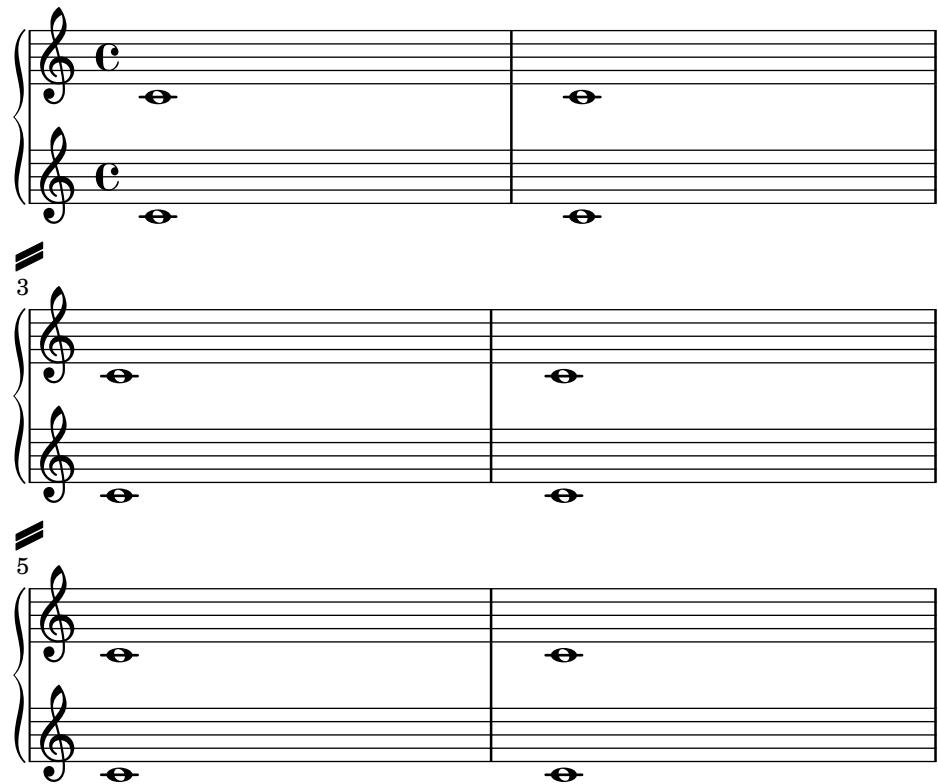

\paper {
  system-separator-markup = \slashSeparator
  line-width = 120
}

notes = \relative c' {
  c1 | c \break
  c1 | c \break
  c1 | c
}

\book {

```

```
\score {  
    \new GrandStaff <<  
        \new Staff \notes  
        \new Staff \notes  
    >>  
}  
}
```

Showing the same articulation above and below a note or chord

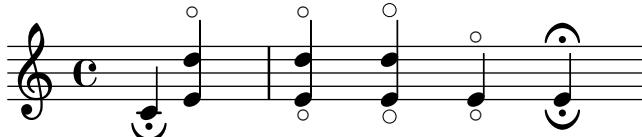

By default, LilyPond does not allow the same articulation (e.g., an accent, a fermata, a flageolet, etc.) to be displayed above and below a note. For example, `c4_\fermata^\fermata` will only show a fermata below. The fermata above will simply be ignored. However, one can stick scripts (just like fingerings) inside a chord, which means it is possible to have as many articulations as desired. This approach has the advantage that it ignores the stem and positions the articulation relative to the note head. This can be seen in the case of the flageolets in the snippet. To mimic the behaviour of scripts outside a chord, `'add-stem-support` would be required. So, the solution is to write the note as a chord and add the articulations inside the `<...>`. The direction will always be above, but one can tweak this via a `\tweak`:

```
% The same as \flageolet, just a little smaller
smallFlageolet =
#(let ((m (make-articulation "flageolet")))
  (set! (ly:music-property m 'tweaks)
    (acons 'font-size -2
      (ly:music-property m 'tweaks)))
  m)

\relative c' {
  s4^"Wrong:"
  c4_\fermata^\fermata % The second fermata is ignored!
  <e d'>4^{\smallFlageolet_}\smallFlageolet

  s4^"Works if written inside a chord:"
  <e_\smallFlageolet d'`^{\smallFlageolet}>4
  <e_\flageolet d'`^{\flageolet}>4
  <e_\smallFlageolet`^{\smallFlageolet}>4
  <e_\fermata`^{\fermata}>4
}
```

Wrong: Works if written inside a chord:

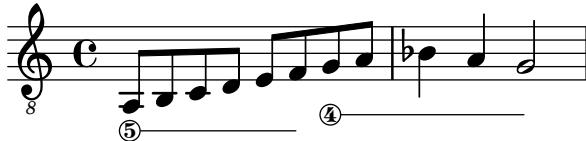

String number extender lines

Make an extender line for string number indications, showing that a series of notes is supposed to be played all on the same string.

```
stringNumberSpanner =
#(define-music-function (StringNumber) (string?)
#{ 
  \override TextSpanner.style = #'solid
  \override TextSpanner.font-size = #-5
  \override TextSpanner.bound-details.left.stencil-align-dir-y = #CENTER
  \override TextSpanner.bound-details.left.text =
    \markup { \circle \number $StringNumber }
#})
```

```
\relative c {
  \clef "treble_8"
  \stringNumberSpanner "5"
  \textSpannerDown
  a8\startTextSpan
  b c d e f\stopTextSpan
  \stringNumberSpanner "4"
  g\startTextSpan a
  bes4 a g2\stopTextSpan
}
```

Suppressing warnings for clashing note columns

If notes from two voices with stems in the same direction are placed at the same position, and both voices have no shift or the same shift specified, the error message ‘warning: ignoring too many clashing note columns’ will appear when compiling the LilyPond file. This message can be suppressed by setting the ‘ignore-collision’ property of the `NoteColumn` object to `#t`. Please note that this does not just suppress warnings but stops LilyPond trying to resolve collisions at all and so may have unintended results unless used with care.

```
ignore = \override NoteColumn.ignore-collision = ##t
```

```
\relative c' {
  \new Staff <<
    \new Voice{ \ignore \stemDown f2 g }
    \new Voice{ c2 \stemDown c, }
  >>
}
```

Time signature in parentheses - method 3

Another way to put the time signature in parenthesis

```
\relative c'' {
  \override Staff.TimeSignature.stencil = #(lambda (grob)
    (parenthesize-stencil (ly:time-signature::print grob) 0.1 0.4 0.4 0.1 ))
  \time 2/4
  a4 b8 c
}
```

Time signature in parentheses

The time signature can be enclosed within parentheses.

```
\relative c' {
    \override Staff.TimeSignature.stencil = #(lambda (grob)
        (bracketify-stencil (ly:time-signature::print grob) Y 0.1 0.2 0.1))
    \time 2/4
    a4 b8 c
}
```

Time signature printing only the numerator as a number (instead of the fraction)

Sometimes, a time signature should not print the whole fraction (e.g. 7/4), but only the numerator (7 in this case). This can be easily done by using `\override Staff.TimeSignature.style = #'single-digit` to change the style permanently. By using `\revert Staff.TimeSignature.style`, this setting can be reversed. To apply the single-digit style to only one time signature, use the `\override` command and prefix it with a `\once`.

```
\relative c' {
    \time 3/4
    c4 c c
    % Change the style permanently
    \override Staff.TimeSignature.style = #'single-digit
    \time 2/4
    c4 c
    \time 3/4
    c4 c c
    % Revert to default style:
    \revert Staff.TimeSignature.style
    \time 2/4
    c4 c
    % single-digit style only for the next time signature
    \once \override Staff.TimeSignature.style = #'single-digit
    \time 5/4
    c4 c c c c
    \time 2/4
    c4 c
}
```

Tuplet bracket and change staff

This snippet shows how to set a tuplet starting in a lower staff and finishing in the upper one.

```
aigues = \relative c' {
    \time 6/8
```

```

s4.
\stemDown
c16[ bes' e]
\stemUp
g c e
\stemDown
g8
}

basses = \relative c {
  \time 3/4
  \clef F
  \tweak positions #'(4.5 . 9.5)
  \tweak edge-height #'(1 . -1)
  \tuplet 7/6 {
    c16[ bes' e]
    \change Staff = md
    \stemUp
    g[ c e g]
  }
  s4.s8
}

\new PianoStaff
\with { \omit TimeSignature }
<<
  \new Staff = md \aigues
  \new Staff = mg \basses
>>

```

Tweaking clef properties

Changing the Clef glyph, its position, or the ottavation does not change the position of subsequent notes on the staff. To get key signatures on their correct staff lines `middleCClefPosition` must also be specified, with positive or negative values moving middle C up or down respectively, relative to the staff's center line.

For example, `\clef "treble_8"` is equivalent to setting the `clefGlyph`, `clefPosition` (the vertical position of the clef itself on the staff), `middleCPosition` and `clefTransposition`. Note that when any of these properties (except `middleCPosition`) are changed a new clef symbol is printed.

The following examples show the possibilities when setting these properties manually. On the first line, the manual changes preserve the standard relative positioning of clefs and notes, whereas on the second line, they do not.

```
{  
    % The default treble clef  
    \key f \major  
    c'1  
    % The standard bass clef  
    \set Staff.clefGlyph = #"clefs.F"  
    \set Staff.clefPosition = #2  
    \set Staff.middleCPosition = #6  
    \set Staff.middleCClefPosition = #6  
    \key g \major  
    c'1  
    % The baritone clef  
    \set Staff.clefGlyph = #"clefs.C"  
    \set Staff.clefPosition = #4  
    \set Staff.middleCPosition = #4  
    \set Staff.middleCClefPosition = #4  
    \key f \major  
    c'1  
    % The standard choral tenor clef  
    \set Staff.clefGlyph = #"clefs.G"  
    \set Staff.clefPosition = #-2  
    \set Staff.clefTransposition = #-7  
    \set Staff.middleCPosition = #1  
    \set Staff.middleCClefPosition = #1  
    \key f \major  
    c'1  
    % A non-standard clef  
    \set Staff.clefPosition = #0  
    \set Staff.clefTransposition = #0  
    \set Staff.middleCPosition = #-4  
    \set Staff.middleCClefPosition = #-4  
    \key g \major  
    c'1 \break  
  
    % The following clef changes do not preserve  
    % the normal relationship between notes, key signatures  
    % and clefs:  
  
    \set Staff.clefGlyph = #"clefs.F"  
    \set Staff.clefPosition = #2  
    c'1  
    \set Staff.clefGlyph = #"clefs.G"  
    c'1  
    \set Staff.clefGlyph = #"clefs.C"  
    c'1  
    \set Staff.clefTransposition = #7  
    c'1  
    \set Staff.clefTransposition = #0  
    \set Staff.clefPosition = #0  
    c'1  
  
    % Return to the normal clef:
```

```
\set Staff.middleCPosition = #0
c'1
}
```

Tweaking grace layout within music

The layout of grace expressions can be changed throughout the music using the functions `add-grace-property` and `remove-grace-property`. The following example undefines the `Stem` direction for this grace, so that stems do not always point up, and changes the default note heads to crosses.

```
\relative c' {
  \new Staff {
    $(remove-grace-property 'Voice 'Stem 'direction)
    $(add-grace-property 'Voice 'NoteHead 'style 'cross)
    \new Voice {
      \acciaccatura { f16 } g4
      \grace { d16 e } f4
      \appoggiatura { f,,32 g a } e2
    }
  }
}
```

Using alternative flag styles

Alternative styles of flag on eighth and shorter notes can be displayed by overriding the `stencil` property of `Flag`. Valid values are `modern-straight-flag`, `old-straight-flag` and `flat-flag`.

```
testnotes = {
  \autoBeamOff
  c8 d16 c32 d64 \acciaccatura { c8 } d64 r4
}

\score {
  \relative c' {
    \time 2/4
    \testnotes
    \override Flag.stencil = #modern-straight-flag
  }
}
```

```
\testnotes

\override Flag.stencil = #old-straight-flag
\testnotes

\override Flag.stencil = #flat-flag
\testnotes

\revert Flag.stencil
\testnotes
}

\layout {
  indent = 0
  \context {
    \Score
    \override NonMusicalPaperColumn.line-break-permission = ##f
  }
}
}
```

Using ly:grob-object to access grobs with \tweak

Some grobs can be accessed “laterally” from within another grob’s callback. These are usually listed as “layout objects” in the “Internal properties” section of a grob-interface. The function `ly:grob-object` is used to access these grobs.

Demonstrated below are some ways of accessing grobs from within a NoteHead callback, but the technique is not limited to NoteHeads. However, the NoteHead callback is particularly important, since it is the implicit callback used by the `\tweak` command.

The example function defined below ("display-grobs") is probably not that useful, but it demonstrates that the grobs are indeed being accessed.

Example console output:

```
#Grob Accidental () #Grob Stem
#(define (notehead-get-accidental notehead)
  ;; notehead is grob
  (ly:grob-object notehead 'accidental-grob))

#(define (notehead-get-arpeggio notehead)
  ;; notehead is grob
  (let ((notecolumn (notehead-get-notecolumn notehead)))
    (ly:grob-object notecolumn 'arpeggio)))

#(define (notehead-get-notecolumn notehead)
  ;; notehead is grob
  (ly:grob-parent notehead X))

#(define (notehead-get-stem notehead)
  ;; notehead is grob
```

```

(let ((notecolumn (notehead-get-notecolumn notehead)))
  (ly:grob-object notecolumn 'stem)))

#(define (display-grobs notehead)
  ;; notehead is grob
  (let ((accidental (notehead-get-accidental notehead))
        (arpeggio (notehead-get-arpeggio notehead))
        (stem (notehead-get-stem notehead)))
    (format (current-error-port) "~2&~a\n" (make-string 20 #\‐))
    (for-each
      (lambda (x) (format (current-error-port) "~a\n" x))
      (list accidental arpeggio stem)))

\relative c' {
  %% display grobs for each note head:
  \%override NoteHead.before-line-breaking = #display-grobs
  <c
  %% or just for one:
  \tweak before-line-breaking #display-grobs
  es
  g>1\arpeggio
}

```

Using PostScript to generate special note head shapes

When a note head with a special shape cannot easily be generated with graphic markup, PostScript code can be used to generate the shape. This example shows how a parallelogram-shaped note head is generated.

```

parallelogram =
#(ly:make-stencil (list 'embedded-ps
  "gsave
  currentpoint translate
  newpath
  0 0.25 moveto
  1.3125 0.75 lineto
  1.3125 -0.25 lineto
  0 -0.75 lineto
  closepath
  fill
  grestore" )
  (cons 0 1.3125)
  (cons -.75 .75))

myNoteHeads = \%override NoteHead.stencil = \parallelogram
normalNoteHeads = \%revert NoteHead.stencil

\relative c' {
  \myNoteHeads
}

```

```

g4 d'
\normalNoteHeads
<f, \tweak stencil \parallelogram b e>4 d
}

```

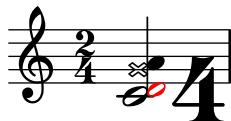

Using the \tweak command to tweak individual grobs

With the `\tweak` command, every grob can be tuned directly. Here are some examples of available tweaks.

```

\relative c' {
  \time 2/4
  \set fingeringOrientations = #'(right)
  <
    \tweak font-size #3 c
    \tweak color #red d-\tweak font-size #8 -4
    \tweak style #'cross g
    \tweak duration-log #2 a
  >2
}

```

Vertically aligned dynamics and textscripts

All `DynamicLineSpanner` objects (hairpins and dynamic texts) are placed with their reference line at least '`staff-padding`' from the staff, unless other notation forces them to be farther. Setting '`staff-padding`' to a sufficiently large value aligns the dynamics.

The same idea, together with `\textLengthOn`, is used to align the text scripts along their baseline.

```

music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}

```

The image displays two staves of music. The top staff is in common time (indicated by 'C') and has a treble clef. It features a sequence of notes with dynamics: a piano dynamic ('p') followed by a forte dynamic ('f'), another 'p', another 'f' with a dynamic beam, and finally a 'p'. Above the staff, the words 'gorgeous' and 'fantastic' are written in a small, sans-serif font, positioned to align with the notes. The bottom staff is also in common time ('C') and has a treble clef. It follows a similar pattern of dynamics: 'p', 'f', 'p', 'f' (with a dynamic beam), and 'p'. Above this staff, the words 'gorgeous' and 'fantastic' are also written, aligned with the notes.

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

```
\paper {
    ragged-right = ##t
}

\relative c' <<
    \new Staff = "1" { c4 c s2 }
    \new Staff = "2" { c4 c s2 }
    \new Staff = "3" { c4 c s2 }
    { \skip 2
      <<
        \lyrics {
            \set alignBelowContext = #'1"
            lyrics4 below
        }
        \new Staff \with {
            alignAboveContext = #'3"
            fontSize = #-2
            \override StaffSymbol.staff-space = #(magstep -2)
            \remove "Time_signature_engraver"
        } {
            \tuplet 6/4 {
                \override TextScript.padding = #3
                c8[{"ossia above" d e d e f}]
            }
        }
    >>
}
```

Vertically centering paired figured bass extenders

Where figured bass extender lines are being used by setting `useBassFigureExtenders` to true, pairs of congruent figured bass extender lines are vertically centered if `figuredBassCenterContinuations` is set to true.

```
<<
\relative c' {
  c8 c b b a a c16 c b b
  c8 c b b a a c16 c b b
  c8 c b b a a c c b b
}
\figures {
  \set useBassFigureExtenders = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##t
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>16 r
  \set figuredBassCenterContinuations = ##f
  <6+ 4 3>4 <6 4 3>8 r
  <6+ 4 3>4 <6 4 3>8 <4 3+>8
}
>>
```

A musical staff in common time with a treble clef and a 'C' key signature. It features a continuous series of eighth-note patterns. Below the notes, pairs of vertical extender lines are placed under specific notes to indicate figured bass continuations. The extender lines are consistently positioned relative to the note heads, demonstrating the effect of the 'figuredBassCenterContinuations' setting.

Paper and layout

Section “Spacing issues” in *Notation Reference*

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\score {
  \new StaffGroup <<

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #LEFT
      instrumentName = \markup \left-column {
        "Left aligned"
        "instrument name"
      }
      shortInstrumentName = "Left"
    }

    { c'1 \break c'1 }

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #CENTER
      instrumentName = \markup \center-column {
        Centered
        "instrument name"
      }
      shortInstrumentName = "Centered"
    }

    { g'1 g'1}

    \new Staff \with {
      \override InstrumentName.self-alignment-X = #RIGHT
      instrumentName = \markup \right-column {
        "Right aligned"
        "instrument name"
      }
      shortInstrumentName = "Right"
    }

    { e'1 e'1 }

  >>

  \layout {
    ragged-right = ##t
    indent = 4\cm
    short-indent = 2\cm
  }
}
```

Arranging separate lyrics on a single line

Sometimes you may want to put lyrics for different performers on a single line: where there is rapidly alternating text, for example. This snippet shows how this can be done with `\override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f`.

```
\layout {
  \context {
    \Lyrics
    \override VerticalAxisGroup.nonstaff-nonstaff-spacing.minimum-distance = ##f
  }
}

aliceSings = \markup { \smallCaps "Alice" }
eveSings = \markup { \smallCaps "Eve" }

<<
\new Staff <<
  \new Voice = "alice" {
    f'4^aliceSings g' r2 |
    s1 |
    f'4^aliceSings g' r2 |
    s1 | \break
    % ...
  }

  \voiceOne
  s2 a'8^aliceSings a' b'4 |
  \oneVoice
```

```

g'1
}
\new Voice = "eve" {
    s1 |
    a'2^eveSings g' |
    s1 |
    a'2^eveSings g'
    % ...
    \voiceTwo
    f'4^eveSings a'8 g' f'4 e' |
    \oneVoice
    s1
}
>>
\new Lyrics \lyricsto "alice" {
    may -- be
    sec -- ond
    % ...
    Shut up, you fool!
}
\new Lyrics \lyricsto "eve" {
    that the
    words are
    % ...
    ...and then I was like--
}
>>

```

The musical score consists of two staves. The top staff starts with a quarter note for 'ALICE', followed by a dash, then a quarter note for 'EVE', followed by a dash. This pattern repeats three times. The lyrics below the staff are: 'may - be', 'that the', 'sec - ond', 'words are'. The bottom staff begins with a half note for 'EVE', followed by a quarter note, then a half note for 'ALICE', followed by a quarter note. This pattern repeats. The lyrics below the staff are: '...and then I was like--', 'Shut up, you fool!', and 'like--'.

Book parts

\bookpart can be used to split a book into several parts. Each part last page can be affected by `ragged-last-bottom`. Header and footer markups can detect a part last page, and make the difference with the book last page.

```
#(set-default-paper-size "a6")
```

```
\book {
    %% book paper, which is inherited by all children bookparts
    \paper {
        ragged-last-bottom = ##t
```

```
%% Page footer: add a different part-tagline at part last page
oddFooterMarkup = \markup {
  \column {
    \fill-line {
      %% Copyright header field only on book first page.
      \on-the-fly #first-page \fromproperty #'header:copyright
    }
    \fill-line {
      %% Part tagline header field only on each part last page.
      \on-the-fly #part-last-page \fromproperty #'header:parttagline
    }
    \fill-line {
      %% Tagline header field only on book last page.
      \on-the-fly #last-page \fromproperty #'header:tagline
    }
  }
}

%% book header, which is inherited by the first bookpart

Changing the staff size

Though the simplest way to resize staves is to use #(set-global-staff-size xx), an individual staff's size can be changed by scaling the properties 'staff-space and fontSize.

```
<<
\new Staff {
    \relative c' {
        \dynamicDown
        c8\ff c c c c c c c
    }

\new Staff \with {
    fontSize = #-3
    \override StaffSymbol.staff-space = #(magstep -3)
} {
    \clef bass
    c8 c c c c\f c c c
}
>>
```

Clip systems

This code shows how to clip (extract) snippets from a full score.

This file needs to be run separately with `-dclip-systems`; the snippets page may not adequately show the results.

The result will be files named ‘`base-from-start-to-end[-count].eps`’.

If system starts and ends are included, they include extents of the System grob, e.g., instrument names.

Grace notes at the end point of the region are not included.

Regions can span multiple systems. In this case, multiple EPS files are generated.

```
c1
d1
\grace c16 e1
\key d \major
f1 \break
\clef bass
g,1
fis1
}
}

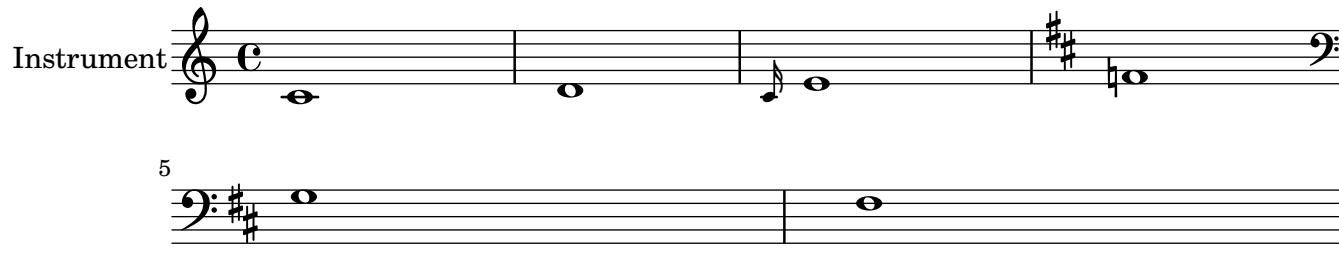

\book {
\score {
\origScore
\layout {
% Each clip-region is a (START . END) pair
% where both are rhythmic-locations.

% (make-rhythmic-locations BAR-NUMBER NUM DEN)
% means NUM/DEN whole-notes into bar numbered BAR-NUMBER

clip-regions = #(list
(cons
(make-rhythmic-location 2 0 1)
(make-rhythmic-location 4 0 1))

(cons
(make-rhythmic-location 0 0 1)
(make-rhythmic-location 4 0 1))

(cons
(make-rhythmic-location 0 0 1)
(make-rhythmic-location 6 0 1))
)
}
}
```

clips

from-2.0.1-to-4.0.1-clip.eps

Creating blank staves

To create blank staves, generate empty measures then remove the `Bar_number_engraver` from the `Score` context, and the `Time_signature_engraver`, `Clef_engraver` and `Bar_engraver` from the `Staff` context.

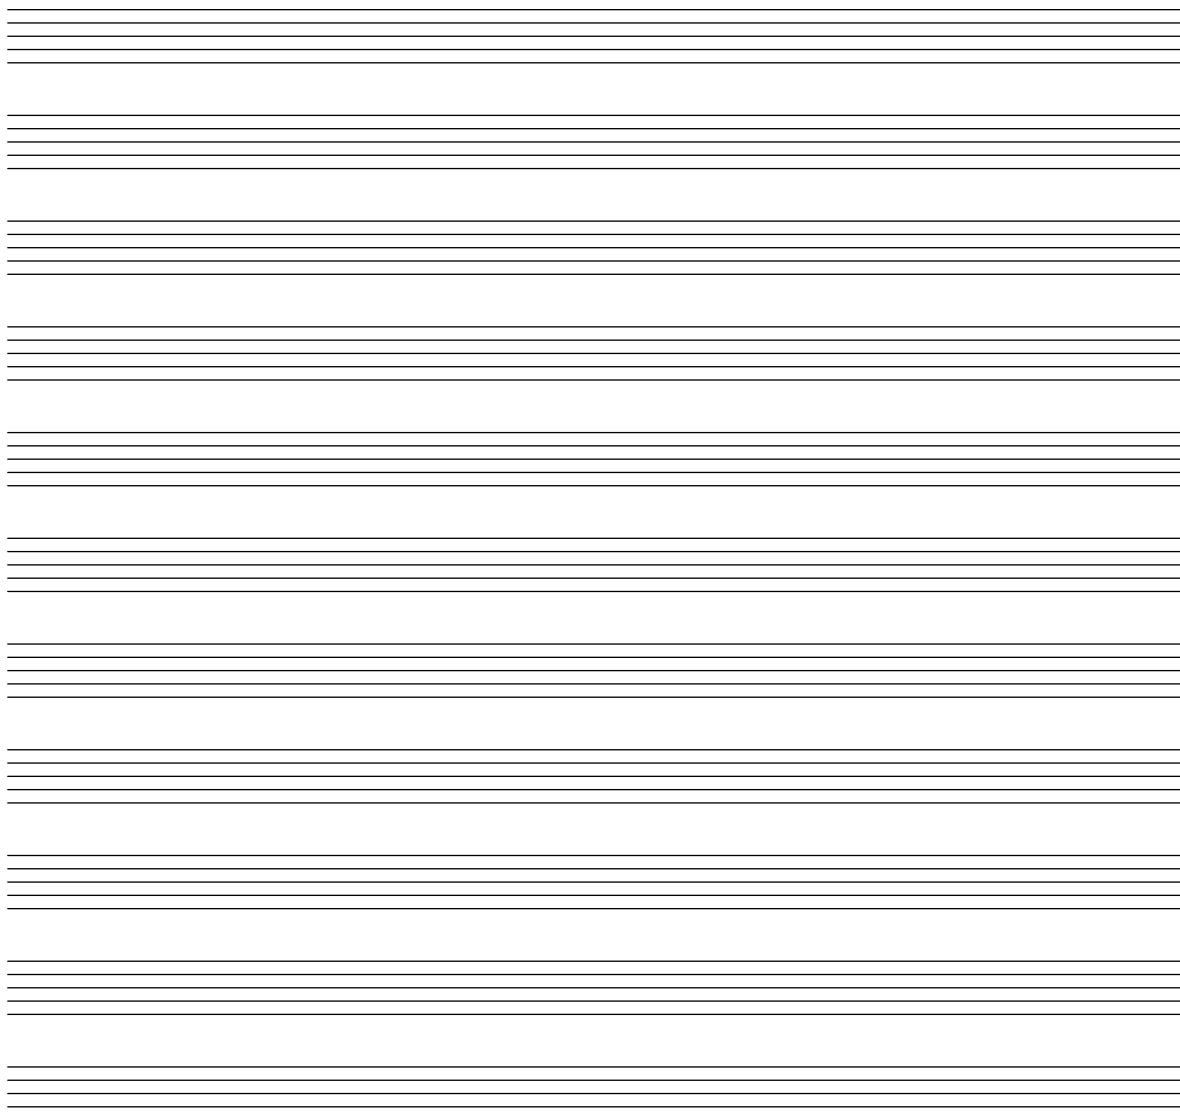

```
#(set-global-staff-size 20)

\score {
{
  \repeat unfold 12 { s1 \break }
}
\layout {
  indent = 0\in
  \context {
    \Staff
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
    \remove "Bar_engraver"
  }
  \context {
    \Score
    \remove "Bar_number_engraver"
  }
}
}

% uncomment these lines for "letter" size
%{
\paper {
  #(set-paper-size "letter")
  ragged-last-bottom = ##f
  line-width = 7.5\in
  left-margin = 0.5\in
  bottom-margin = 0.25\in
  top-margin = 0.25\in
}
%}

% uncomment these lines for "A4" size
%{
\paper {
  #(set-paper-size "a4")
  ragged-last-bottom = ##f
  line-width = 180
  left-margin = 15
  bottom-margin = 10
  top-margin = 10
}
%}
```

Demonstrating all headers

All header fields with special meanings.

```
\header {
    copyright = "copyright"
    title = "title"
    subtitle = "subtitle"
    composer = "composer"
    arranger = "arranger"
    instrument = "instrument"

    opus = "opus"
    piece = "piece"
    poet = "poet"
    texidoc = "All header fields with special meanings."
    copyright = "public domain"
    enteredby = "jcn"
    source = "urtext"
}
```

```
\layout {
    ragged-right = ##f
}

\score {
    \relative c' { c1 | c | c | c }
}

\score {
    \relative c' { c1 | c | c | c }
    \header {
        title = "localtitle"
        subtitle = "localsubtitle"
        composer = "localcomposer"
        arranger = "localarranger"
        instrument = "localinstrument"
        metre = "localmetre"
        opus = "localopus"
        piece = "localpiece"
        poet = "localpoet"
        copyright = "localcopyright"
    }
}
```

	title	
	subtitle	
poet	instrument	composer
		arranger

piece	opus
-------	------

localpiece	localopus
------------	-----------

Setting system separators

System separators can be inserted between systems. Any markup can be used, but `\slashSeparator` has been provided as a sensible default.

```
\paper {
    system-separator-markup = \slashSeparator
    line-width = 120
}
```

```
notes = \relative c' {
    c1 | c \break
    c1 | c \break
    c1 | c
}

\book {
    \score {
        \new GrandStaff <<
            \new Staff \notes
            \new Staff \notes
        >>
    }
}
```

The image shows three staves of musical notation, each consisting of five horizontal lines. The notation is divided into measures by vertical bar lines. Each measure contains two notes, one on each staff. The top staff begins with a clef (G-clef) and a 'C' (common time). The middle staff begins with a clef (G-clef) and a '3' (three-quarter time). The bottom staff begins with a clef (G-clef) and a '5' (five-quarter time). The notes are represented by small circles with stems.

Table of contents

A table of contents is included using `\markuplist \table-of-contents`. The TOC items are added with the `\tocItem` command.

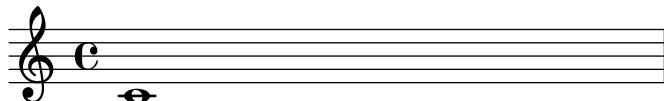

```
#(set-default-paper-size "a6")

\book {
  \markuplist \table-of-contents
  \pageBreak
  \tocItem \markup { The first score }
  \score {
    {
      c'1 \pageBreak
      \mark "A" \tocItem \markup { Mark A }
      d'1
    }
  }
  \pageBreak
  \tocItem \markup { The second score }
  \score {
    { e'1 }
    \header { piece = "Second score" }
  }
}
```

Table of Contents

Exercise: Improve the given choral

Teacher: This is a simple setting of the choral. Please improve it.

A musical score for two voices (Soprano and Bass) in common time. The key signature is common (no sharps or flats). The vocal parts are separated by a vertical bar. The lyrics are written below the notes. The piano accompaniment is shown in the bass clef staff.

Soprano lyrics: Wer nur den lieben

Bass lyrics: Gott lässt wal -

Pupil: Here's my version!

A musical score for two voices (Soprano and Bass) in common time. The key signature is common (no sharps or flats). The vocal parts are separated by a vertical bar. The lyrics are written below the notes. The piano accompaniment is shown in the bass clef staff.

Soprano lyrics: Wer nur den lieben

Bass lyrics: Gott lässt wal -

Teacher: Well, you simply copied and transposed a version of J.S.Bach.
Do you know this one?

A musical score for two voices (Soprano and Bass) in common time. The key signature is common (no sharps or flats). The vocal parts are separated by a vertical bar. The lyrics are written below the notes. The piano accompaniment is shown in the bass clef staff.

Soprano lyrics: Wer nur den lieben

Bass lyrics: Gott lässt wal -

The image shows three staves of musical notation, likely for a three-part setting (e.g., Soprano, Alto, Bass). The music is in common time (indicated by '3'). The key signature changes from G major (no sharps or flats) to A major (one sharp) at the beginning of the second measure. The lyrics are written below the notes:

ten und hof - fet auf ihn al - le Zeit

ten und hof - fet auf ihn al - le Zeit

ten und hof - fet auf ihn al - le Zeit

The notation includes various note values (eighth and sixteenth notes), rests, and dynamic markings like 'p' (piano).

Titles

Section “Titles and headers” in *Notation Reference*

Adding the current date to a score

With a little Scheme code, the current date can easily be added to a score.

```
% first, define a variable to hold the formatted date:
date = #(strftIME "%d-%m-%Y" (localTIME (current-time)))

% use it in the title block:
\header {
    title = "Including the date!"
    subtitle = \date
}

\score {
    \relative c' {
        c4 c c c
    }
}
% and use it in a \markup block:
\markup {
    \date
}
```

Including the date!
20-08-2018

20-08-2018

Aligning and centering instrument names

The horizontal alignment of instrument names is tweaked by changing the `Staff.InstrumentName #'self-alignment-X` property. The `\layout` variables `indent` and `short-indent` define the space in which the instrument names are aligned before the first and the following systems, respectively.

```
\score {
    \new StaffGroup <<

        \new Staff \with {
            \override InstrumentName.self-alignment-X = #LEFT
            instrumentName = \markup \left-column {
                "Left aligned"
                "instrument name"
            }
            shortInstrumentName = "Left"
```

```

}

{ c''1 \break c''1 }

\new Staff \with {
  \override InstrumentName.self-alignment-X = #CENTER
  instrumentName = \markup \center-column {
    Centered
    "instrument name"
  }
  shortInstrumentName = "Centered"
}

{ g'1 g'1}

\new Staff \with {
  \override InstrumentName.self-alignment-X = #RIGHT
  instrumentName = \markup \right-column {
    "Right aligned"
    "instrument name"
  }
  shortInstrumentName = "Right"
}

{ e'1 e'1}

>>

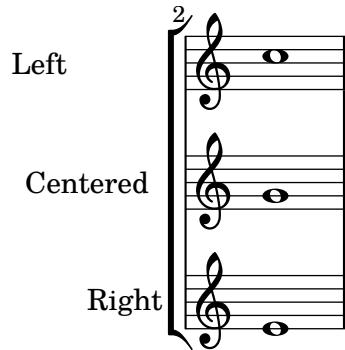

\layout {
  ragged-right = ##t
  indent = 4\cm
  short-indent = 2\cm
}
}

Outputting the version number

By putting the output of `lilypond-version` into a lyric, it is possible to print the version number of LilyPond in a score, or in a document generated with `lilypond-book`. Another possibility is to append the version number to the doc-string, in this manner:

```
\score {
  \new Lyrics {
    \override Score.RehearsalMark.self-alignment-X = #LEFT
    \mark #(string-append "Processed with LilyPond version " (lilypond-version))
    s2
  }
}
```

Processed with LilyPond version 2.19.82

Spacing

Section “Spacing issues” in *Notation Reference*

Adjusting lyrics vertical spacing

This snippet shows how to bring the lyrics line closer to the staff.

```
% Default layout:
<<
\new Staff \new Voice = melody \relative c' {
    c4 d e f
    g4 f e d
    c1
}
\new Lyrics \lyricsto melody { aa aa aa aa aa aa aa aa }

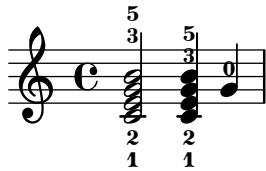

\new Staff {
    \new Voice = melody \relative c' {
        c4 d e f
        g4 f e d
        c1
    }
}
% Reducing the minimum space below the staff and above the lyrics:
\new Lyrics \with {
    \override VerticalAxisGroup.nonstaff-relatedstaff-spacing =
        #'((basic-distance . 1))
}
\lyricsto melody { aa aa aa aa aa aa aa aa }
>>
```

Allowing fingerings to be printed inside the staff

By default, vertically oriented fingerings are positioned outside the staff. However, this behavior can be canceled. Note: you must use a chord construct <>, even if it is only a single note.

```
\relative c' {
    <c-1 e-2 g-3 b-5>2
    \override Fingerling.staff-padding = #'()
    <c-1 e-2 g-3 b-5>4 <g'-0>
}
```

Page label

Page labels may be placed inside music or at top-level, and referred to in markups.

```
#(set-default-paper-size "a6")

#(define-markup-command (toc-line layout props label text)
  (symbol? markup?)
  (interpret-markup layout props
    (markup #:fill-line (text #:page-ref label "8" "?"))))

\book {
  \markup \huge \fill-line { \null Title Page \null }

  \pageBreak

  \label #'toc
  \markup \column {
    \large \fill-line { \null Table of contents \null }
    \toc-line #'toc "Table of contents"
    \toc-line #'firstScore "First Score"
    \toc-line #'markA "Mark A"
    \toc-line #'markB "Mark B"
    \toc-line #'markC "Mark C"
    \toc-line #'unknown "Unknown label"
  }
  \pageBreak

  \label #'firstScore
  \score {
    \new Staff \relative c' {
      c2 c
      \mark \markup {
        A (page \concat { \page-ref #'markA "0" "?" } )
      } \label #'markA
      c2 c
      \pageBreak
      \mark "B" \label #'markB
      d2 d
      d2 d
      \once \override Score.RehearsalMark.break-visibility =
        #begin-of-line-invisible
      \mark "C" \label #'markC
    }
    \header { piece = "First score" }
  }
}
```

Proportional strict notespacing

If `strict-note-spacing` is set spacing of notes is not influenced by bars or clefs within a system. Rather, they are placed just before the note that occurs at the same time. This may cause collisions.

```
\relative c' <<
  \override Score.SpacingSpanner.strict-note-spacing = ##t
  \set Score.proportionalNotationDuration = #(ly:make-moment 1/16)
  \new Staff {
    c8[ c \clef alto c c \grace { d16 } c8 c] c4
    c2 \grace { c16[ c16] } c2
  }
  \new Staff {
    c2 \tuplet 3/2 { c8 \clef bass cis,, c } c4
    c1
  }
>>
```

Vertically aligned dynamics and textscripts

All `DynamicLineSpanner` objects (hairpins and dynamic texts) are placed with their reference line at least 'staff-padding' from the staff, unless other notation forces them to be farther. Setting 'staff-padding' to a sufficiently large value aligns the dynamics.

The same idea, together with `\textLengthOn`, is used to align the text scripts along their baseline.

```
music = \relative c' {
  a'2\p b\f
  e4\p f\f\> g, b\p
  c2^\markup { \huge gorgeous } c^\markup { \huge fantastic }
}

{
  \music
  \break
  \override DynamicLineSpanner.staff-padding = #3
  \textLengthOn
  \override TextScript.staff-padding = #1
  \music
}
```

Vertically aligning ossias and lyrics

This snippet demonstrates the use of the context properties `alignBelowContext` and `alignAboveContext` to control the positioning of lyrics and ossias.

```
\paper {
  ragged-right = ##t
}

\relative c' <<
  \new Staff = "1" { c4 c s2 }
  \new Staff = "2" { c4 c s2 }
  \new Staff = "3" { c4 c s2 }
```

```

{ \skip 2
<<
  \lyrics {
    \set alignBelowContext = #'1"
    lyrics4 below
  }
  \new Staff \with {
    alignAboveContext = #'3"
    fontSize = #-2
    \override StaffSymbol.staff-space = #(magstep -2)
    \remove "Time_signature_engraver"
  } {
    \tuplet 6/4 {
      \override TextScript.padding = #3
      c8[{"ossia above" d e d e f]
    }
  }
>>
}
>>

```

MIDI

Section “Creating MIDI output” in *Notation Reference*

Changing MIDI output to one channel per voice

When outputting MIDI, the default behavior is for each staff to represent one MIDI channel, with all the voices on a staff amalgamated. This minimizes the risk of running out of MIDI channels, since there are only 16 available per track.

However, by moving the `Staff_performer` to the `Voice` context, each voice on a staff can have its own MIDI channel, as is demonstrated by the following example: despite being on the same staff, two MIDI channels are created, each with a different `midiInstrument`.

```
\score {
    \new Staff <<
        \new Voice \relative c''' {
            \set midiInstrument = #"flute"
            \voiceOne
            \key g \major
            \time 2/2
            r2 g-"Flute" ~
            g fis ~
            fis4 g8 fis e2 ~
            e4 d8 cis d2
        }
        \new Voice \relative c' {
            \set midiInstrument = #"clarinet"
            \voiceTwo
            b1-"Clarinet"
            a2. b8 a
            g2. fis8 e
            fis2 r
        }
    >>
    \layout { }
    \midi {
        \context {
            \Staff
            \remove "Staff_performer"
        }
        \context {
            \Voice
            \consists "Staff_performer"
        }
        \tempo 2 = 72
    }
}
```

Changing the tempo without a metronome mark

To change the tempo in MIDI output without printing anything, make the metronome mark invisible.

```
\score {
  \new Staff \relative c' {
    \tempo 4 = 160
    c4 e g b
    c4 b d c
    \set Score.tempoHideNote = ##t
    \tempo 4 = 96
    d,4 fis a cis
    d4 cis e d
  }
  \layout {}
  \midi {}
}
```

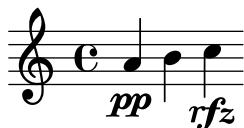

Creating custom dynamics in MIDI output

The following example shows how to create a dynamic marking, not included in the default list, and assign it a specific value so that it can be used to affect MIDI output.

The dynamic mark `\rfz` is assigned a value of 0.9.

```
#(define (myDynamics dynamic)
  (if (equal? dynamic "rfz")
    0.9
    (default-dynamic-absolute-volume dynamic)))

\score {
  \new Staff {
    \set Staff.midiInstrument = #"cello"
    \set Score.dynamicAbsoluteVolumeFunction = #myDynamics
    \new Voice {
      \relative {
        a'4\pp b c-\rfz
      }
    }
  }
  \layout {}
  \midi {}}
```

Customize drumPitchNames drumStyleTable and drumPitchTable in layout and midi

If you want to use customized drum-pitch-names for an own drum-style with proper output for layout and midi, follow the steps as demonstrated in the code below. In short:

```
* define the names * define the appearance * tell LilyPond to use it for layout * assign pitches
to the names * tell LilyPond to use them for midi

%% This snippet tries to amend
%% NR 2.5.1 Common notation for percussion - Custom percussion staves
%% http://lilypond.org/doc/v2.18/Documentation/notation/common-notation-for-percussion#cust

%%%%%%%%%%%%%
%%
%% To use custom drum-pitch-names for your score and midi you need to follow
%% this route:
%%
%%%%
%% LAYOUT:
%%%%
%%
%% (1) Define a name and put it in `drumPitchNames'
%%      This can be done at toplevel with
%%          drumPitchNames #'my-name = #'my-name
%%      or shorter:
%%          drumPitchNames.my-name = #'my-name
%%      It's possible to add an alias as well.
%% (2) Define how it should be printed
%%      Therefore put them into a toplevel-list, where each entry should look:
%%          (my-name
%%              note-head-style-or-default
%%              articulation-string-or-#f
%%              staff-position)
%% Example:
%%     #(define my-style
%%         '(
%%             (my-name default "tenuto" -1)
%%             ; ...
%%         ))
%% (3) Tell LilyPond to use this custom-definitions, with
%%         drumStyleTable = #(alist->hash-table my-style)
%%     in a \layout or \with
%%
%%     Now we're done for layout, here a short, but complete example:
%%         \new DrumStaff
%%             \with { drumStyleTable = #(alist->hash-table my-style) }
%%                 \drummode { my-name }
%%
%% MIDI:
%% %
%% (1) Again at toplevel, assign a pitch to your custom-note-name
%%         midiDrumPitches #'my-name = #(ly:make-pitch -1 4 FLAT)
```

```

%%      or shorter:
%%          midiDrumPitches.my-name = ges
%%      Note that you have to use the name, which is in drumPitchNames, no alias
%% (2) Tell LilyPond to use this pitch(es), with
%%      drumPitchTable = #(alist->hash-table midiDrumPitches)
%%
%%      Example:
%%          \score {
%%              \new DrumStaff
%%                  \with {
%%                      drumStyleTable = #(alist->hash-table my-style)
%%                      drumPitchTable = #(alist->hash-table midiDrumPitches)
%%                  }
%%                  \drummode { my-name4 }
%%                  \layout {}
%%                  \midi {}
%%          }
%%
%%%%%
%% TESTING
%%%%%
%%
%% To test whether all is fine, run the following sequence in terminal:
%%      lilypond my-file.ly
%%      midi2ly my-file.midi
%%      gedit my-file-midi.ly
%%
%% Which will do:
%% 1. create pdf and midi
%% 2. transform the midi back to a .ly-file
%%     (note: midi2ly is not always good in correctly identifying enharmonic pitches)
%% 3. open this file in gedit (or use another editor)
%% Now watch what you've got.
%%

Replacing default MIDI instrument equalization

The default MIDI instrument equalizer can be replaced by setting the `instrumentEqualizer` property in the `Score` context to a user-defined Scheme procedure that uses a MIDI instrument name as its argument along with a pair of fractions indicating the minimum and maximum volumes respectively to be applied to that specific instrument.

The following example sets the minimum and maximum volumes for flute and clarinet respectively.

```
#(define my-instrument-equalizer-alist '())

#(set! my-instrument-equalizer-alist
  (append
   '(
     ("flute" . (0.7 . 0.9))
     ("clarinet" . (0.3 . 0.6)))
   my-instrument-equalizer-alist))

#(define (my-instrument-equalizer s)
  (let ((entry (assoc s my-instrument-equalizer-alist)))
    (if entry
        (cdr entry)))

\score {
  <<
  \new Staff {
    \key g \major
    \time 2/2
    \set Score.instrumentEqualizer = #my-instrument-equalizer
    \set Staff.midiInstrument = #"flute"
    \new Voice \relative {
      r2 g' '\mp g fis~
      4 g8 fis e2~
      4 d8 cis d2
    }
  }
  \new Staff {
    \key g \major
    \set Staff.midiInstrument = #"clarinet"
    \new Voice \relative {
      b'1\p a2. b8 a
      g2. fis8 e
      fis2 r
    }
  }
  >>
  \layout { }
  \midi { }
}
```

Templates

Ancient notation template – modern transcription of gregorian music

This example demonstrates how to do modern transcription of Gregorian music. Gregorian music has no measure, no stems; it uses only half and quarter note heads, and special marks, indicating rests of different length.

```
\include "gregorian.ly"

chant = \relative c' {
    \set Score.timing = ##f
    f4 a2 \divisioMinima
    g4 b a2 f2 \divisioMaior
    g4( f) f( g) a2 \finalis
}

verba = \lyricmode {
    Lo -- rem ip -- sum do -- lor sit a -- met
}

\score {
    \new Staff <<
        \new Voice = "melody" \chant
        \new Lyrics = "one" \lyricsTo melody \verba
    >>
    \layout {
        \context {
            \Staff
            \remove "Time_signature_engraver"
            \remove "Bar_engraver"
            \hide Stem
        }
        \context {
            \Voice
            \override Stem.length = #0
        }

    }
}
}
}
}
```

A musical score for two staves. The top staff uses a treble clef and has four measures. The first measure shows a bassoon entry with a bassoon clef. The second measure shows a bassoon entry with a bassoon clef. The third measure shows a bassoon entry with a bassoon clef. The fourth measure shows a bassoon entry with a bassoon clef. The bottom staff uses a bass clef and has four measures. The first measure shows a bassoon entry with a bassoon clef. The second measure shows a bassoon entry with a bassoon clef. The third measure shows a bassoon entry with a bassoon clef. The fourth measure shows a bassoon entry with a bassoon clef.

O come let us sing | unto the Lord : let us heartily rejoice in the strength of our sal vation.

8. Today if ye will hear his voice *
harden' not your' hearts : as in the pro-
vocation * and as in the **day** of tempt-'
-ation 'in the' wilderness.

Hymn template

This code shows one way of setting out a hymn tune when each line starts and ends with a partial measure. It also shows how to add the verses as stand-alone text under the music.

```
Timeline = {
    \time 4/4
    \tempo 4=96
    \partial 2
    s2 | s1 | s2 \breath s2 | s1 | s2 \bar "||" \break
    s2 | s1 | s2 \breath s2 | s1 | s2 \bar "||"
}
```

```

 This is line two of the same
 And here's line three of the first verse
 And the last line of the same

Jazz combo template

This is quite an advanced template, for a jazz ensemble. Note that all instruments are notated in `\key c \major`. This refers to the key in concert pitch; the key will be automatically transposed if the music is within a `\transpose` section.

}

```
}

Song (tune)

Me

moderato

Swing

The musical score template consists of two staves separated by a vertical brace. The top staff contains four parts: Trumpet, Alto Sax, Bari Sax, and Trombone. The bottom staff contains five parts: Guitar, Piano (with three staves), Bass, and Drums. The Drums part uses a different time signature. The music includes various notes (circles) and rests, with specific markings like 'B△ C#m7 Solo' and 'Cm△ D△9'.

Orchestra choir and piano template

This template demonstrates the use of nested `StaffGroup` and `GrandStaff` contexts to subgroup instruments of the same type together, and a way to use `\transpose` so that variables hold music for transposing instruments at concert pitch.

```
fluteMusic = \relative c' { \key g \major g'1 b }
```

```
% Pitches as written on a manuscript for Clarinet in A
% are transposed to concert pitch.
```

```
clarinetMusic = \transpose c' a
\relative c'' { \key bes \major bes1 d }
```

```
trumpetMusic = \relative c { \key g \major g''1 b }
```

```
% Key signature is often omitted for horns
```

```
hornMusic = \transpose c' f
\relative c { d'1 fis }
```

```
percussionMusic = \relative c { \key g \major g1 b }
```

```
sopranoMusic = \relative c' { \key g \major g'1 b }

}
```

The musical score template consists of 15 staves, each representing a different instrument. The instruments are: Flute, Clarinet in B-flat, Horn in F, Trumpet in C, Percussion, Piano, Soprano, Alto I, Alto II, Tenor, Violin I, Violin II, Viola, Cello, and Double Bass. The score is in common time with a key signature of one sharp (F#). The first two measures show notes on the G and A lines of the treble clef staff. Measures 3 and 4 show notes on the D and E lines of the bass clef staff. Measures 5 through 8 show notes on the G and A lines of the bass clef staff. Measures 9 through 12 show notes on the D and E lines of the bass clef staff. Measures 13 through 16 show notes on the G and A lines of the bass clef staff.

Piano template (simple)

Here is a simple piano staff with some notes.

```
lower = \relative c {
  \clef bass
```

```
\key c \major
\time 4/4

a2 c
}

\score {
  \new PianoStaff \with { instrumentName = #"Piano" }
  <<
    \new Staff = "upper" \upper
    \new Staff = "lower" \lower
  >>
  \layout { }
  \midi { }
}
}
```

Piano template with centered lyrics

Instead of having a full staff for the melody and lyrics, lyrics can be centered between the staves of a piano staff.

```
upper = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

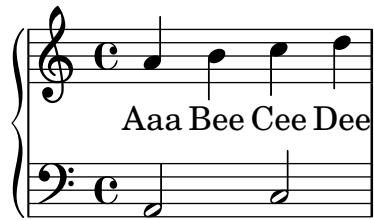

lower = \relative c {
  \clef bass
  \key c \major
  \time 4/4

  a2 c
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score {
  \new PianoStaff <<
    \new Staff = upper { \new Voice = "singer" \upper }
    \new Lyrics \lyricsto "singer" \text
    \new Staff = lower { \lower }
  >>
}
```

```
>>
\layout { }
\midi { }
}
```

Piano template with melody and lyrics

Here is a typical song format: one staff with the melody and lyrics, with piano accompaniment underneath.

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

upper = \relative c' {
  \clef treble

Score for diatonic accordion

A template to write a score for a diatonic accordion.

- There is a horizontal staff indicating if the accordion must be pushed (thick line) or pulled (thin line)
- There is a small rhythmic staff with lyrics that describes the bass buttons to press. The bar lines are made from gridlines

- The tabulator staff for diatonic accordions shows the geographic position of the buttons and not (as for every other instrument) the pitch of the notes; the keys on the melody-side of the accordion are placed in three columns and about 12 rows

In the tabulator staff notation the outermost column is described with notes between lines, the innermost column is described with notes between lines and a cross as accidental, and the middle column is described with notes on a line, whereby the row in the middle is represented on the middle line in the staff.

Some words to transpose piano notes to the diatonic accordion:

1. Every diatonic accordion is built for some keys only (for example, for the keys of C major and F major), so it is important to transpose a piano melody to match one of these keys. Transpose the source code, not only the output because this code is required later on to translate it once more to the tabulator staff. This can be done with the command `displayLilyMusic`.

2. You have to alternate the push- and pull-direction of the accordion regularly. If the player has a too long part to pull the accordion gets broken. On the other hand, some harmonies are only available in one direction. Considering this, decide which parts of the melody are the push-parts and which the pull-parts.

3. For each pull- or push-part translate the piano notes to the according tablature representation.

```

verse = \lyricmode { Wie gross bist du! Wie gross bist du! }

harmonies = \new ChordNames \chordmode {
    \germanChords
    \set chordChanges = ##t
    bes8 bes8 bes8
    es2 f
    bes1
}

NoStem = { \hide Stem }
NoNoteHead = \hide NoteHead
ZeroBeam = \override Beam.positions = #'(0 . 0)

staffTabLine = \new Staff \with {
    \remove "Time_signature_engraver"
    \remove "Clef_engraver"
} {
    \override Staff.StaffSymbol.line-positions = #'(0)
    % Shows one horizontal line. The vertical line
    % (simulating a bar-line) is simulated with a gridline
    \set Staff.midiInstrument = #"choir aahs"
    \key c \major
    \relative c'
    {
        % disable the following line to see the noteheads while writing the song
        \NoNoteHead
        \override NoteHead.no-ledgers = ##t

        % The beam between 8th-notes is used to draw the push-line
        % How to fast write the push-lines:
        % 1. write repeatedly 'c c c c c c c c |' for the whole length of the song
    }
}

```

```

% 2. uncomment the line \NoNoteHead
% 3. compile
% 4. Mark the positions on which push/pull changes.
%     In the score-picture click on the position
%         the push- or pull-part starts
%             (on the noteHead, the cursor will change to a hand-icon).
%             The cursor in the source code will jump just at this position.
%     a) If a push-part starts there, replace the 'c' by an 'e['
%     b) If a pull-part starts there, replace the 'c' by an 's'
% 5. Switch into 'overwrite-mode' by pressing the 'ins' key.
% 6. For the pull-parts overwrite the 'c' with 's'
% 7. For every push-part replace the last 'c' with 'e'
%     8. Switch into 'insert-mode' again
% 9. At last it should look like e.g.
%     (s s e[ c | c c c c c c c | c c c c c e] s s)
% 10. re-enable the line \NoNoteHead
\autoBeamOff
\ZeroBeam
s8 s s e[ c c c c c c e] | s s s s s
}

}

Single staff template with notes lyrics and chords

This template allows the preparation of a song with melody, words, and chords.

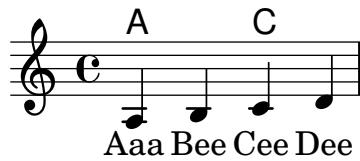

```
melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

text = \lyricmode {
  Aaa Bee Cee Dee
}

harmonies = \chordmode {
  a2 c
}

\score {
  <<
  \new ChordNames {
    \set chordChanges = ##t
    \harmonies
  }
  \new Voice = "one" { \autoBeamOff \melody }
  \new Lyrics \lyricsto "one" \text
  >>
  \layout { }
  \midi { }
}
```

Single staff template with notes lyrics chords and frets

Here is a simple lead sheet template with melody, lyrics, chords and fret diagrams.

```

verseI = \lyricmode {
    \set stanza = #"1."
    This is the first verse
}

verseII = \lyricmode {
    \set stanza = #"2."
    This is the second verse.
}

theChords = \chordmode {
    % insert chords for chordnames and fretboards here
    c2 g4 c
}

staffMelody = \relative c' {
    \key c \major
    \clef treble
    % Type notes for melody here
    c4 d8 e f4 g
    \bar "|."
}

\score {
    <<
    \context ChordNames { \theChords }
    \context FretBoards { \theChords }

    }
    \new Lyrics = "lyricsI" {
        \lyricsto "voiceMelody" \verseI
    }
    \new Lyrics = "lyricsII" {
        \lyricsto "voiceMelody" \verseII
    }
    >>
    \layout { }
    \midi { }
}

```

1. This is the first verse
2. This is the second verse.

Single staff template with notes and chords

Want to prepare a lead sheet with a melody and chords? Look no further!

```
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4

    f4 e8[ c] d4 g
    a2 ~ a
}

harmonies = \chordmode {
    c4:m f:min7 g:maj c:aug
    d2:dim b4:5 e:sus
}

\score {
    <<
    \new ChordNames {
        \set chordChanges = ##t
        \harmonies
    }
    \new Staff \melody
    >>
    \layout{ }
    \midi { }
}
```

Single staff template with notes and lyrics

This small template demonstrates a simple melody with lyrics. Cut and paste, add notes, then words for the lyrics. This example turns off automatic beaming, which is common for vocal parts. To use automatic beaming, change or comment out the relevant line.

```
melody = \relative c' {
    \clef treble
    \key c \major
    \time 4/4

    a4 b c d
```

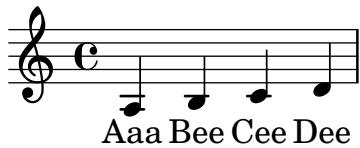

```

}

text = \lyricmode {
  Aaa Bee Cee Dee
}

\score{
  <<
  \new Voice = "one" {
    \autoBeamOff
    \melody
  }
  \new Lyrics \lyricsto "one" \text
>>
\layout { }
\midi { }
}

```

Single staff template with only notes

This very simple template gives you a staff with notes, suitable for a solo instrument or a melodic fragment. Cut and paste this into a file, add notes, and you're finished!

```

melody = \relative c' {
  \clef treble
  \key c \major
  \time 4/4

  a4 b c d
}

\score {
  \new Staff \melody
  \layout { }
  \midi { }
}

```

String quartet template (simple)

This template demonstrates a simple string quartet. It also uses a `\global` section for time and key signatures

```

violinOne = \new Voice \relative c'' {
  c2 d
}

```

```

e1
\bar "|."
}

violinTwo = \new Voice \relative c' {
g2 f
e1
\bar "|."
}

viola = \new Voice \relative c' {
\clef alto
e2 d
c1
\bar "|."
}

cello = \new Voice \relative c' {
\clef bass
c2 b
a1
\bar "|."
}

\score {
\new StaffGroup <<
\new Staff \with { instrumentName = "Violin 1" }
<< \global \violinOne >>
\new Staff \with { instrumentName = "Violin 2" }
<< \global \violinTwo >>
\new Staff \with { instrumentName = "Viola" }
<< \global \viola >>
\new Staff \with { instrumentName = "Cello" }
<< \global \cello >>
>>
\layout { }
\midi { }
}

```

The musical score is a four-staff system. The top staff is labeled "Violin 1" and has a treble clef. It begins with a quarter note 'c'. The second staff is labeled "Violin 2" and also has a treble clef. It begins with a half note 'c'. The third staff is labeled "Viola" and has a bass clef. It begins with a half note 'c'. The bottom staff is labeled "Cello" and has a bass clef. It begins with a half note 'c'. All four staves continue with a half note 'c' on the next beat.

String quartet template with separate parts

The “String quartet template” snippet produces a nice string quartet, but what if you needed to print parts? This new template demonstrates how to use the \tag feature to easily split a piece into individual parts.

You need to split this template into separate files; the filenames are contained in comments at the beginning of each file. `piece.ly` contains all the music definitions. The other files – `score.ly`, `vn1.ly`, `vn2.ly`, `vla.ly`, and `vlc.ly` – produce the appropriate part.

Do not forget to remove specified comments when using separate files!

```
Violinone = \new Voice {
    \relative c'' {
        c2 d e1
        \bar "|."
    }
}

Violintwo = \new Voice {
    \relative c'' {
        g2 f e1
        \bar "|."
    }
}

Viola = \new Voice {
    \relative c' {
        \clef alto
        e2 d c1
        \bar "|."
    }
}

Cello = \new Voice {
    \relative c' {
        \clef bass
        c2 b a1
        \bar "|."
    }
}

music = {
<<
    \tag #'score \tag #'vn1
    \new Staff \with { instrumentName = "Violin 1" }
    << \global \Violinone >>

    \tag #'score \tag #'vn2
    \new Staff \with { instrumentName = "Violin 2" }
    << \global \Violintwo>>
}
```

```
\tag #'score \tag #'vla
\new Staff \with { instrumentName = "Viola" }
<< \global \Viola>>

\tag #'score \tag #'vlc
\new Staff \with { instrumentName = "Cello" }
<< \global \Cello >>
>>
}

```

Vocal ensemble template with automatic piano reduction

This template adds an automatic piano reduction to the standard SATB vocal score demonstrated in “Vocal ensemble template”. This demonstrates one of the strengths of LilyPond – you can use a music definition more than once. If any changes are made to the vocal notes (say, `tenorMusic`), then the changes will also apply to the piano reduction.

```

The musical score shows four staves in common time (indicated by 'C') and key of C (indicated by 'C'). The top two staves (Soprano and Alto) have lyrics 'hi' placed above the notes using the `alignAboveContext` command. The bottom two staves (Tenor and Bass) have lyrics 'ha', 'hu', and 'ho' placed below the notes using the `alignBelowContext` command. The music consists of quarter notes and eighth notes with ties.

Vocal ensemble template with lyrics aligned below and above the staves

This template is basically the same as the simple “Vocal ensemble” template, with the exception that here all the lyrics lines are placed using `alignAboveContext` and `alignBelowContext`.

```
global = {
  \key c \major
  \time 4/4

    }
}

```

Vocal ensemble template

Here is a standard four-part SATB vocal score. With larger ensembles, it is often useful to include a section which is included in all parts. For example, the time signature and key signature are almost always the same for all parts. Like in the “Hymn” template, the four voices are regrouped on only two staves.

```
\paper {
    top-system-spacing.basic-distance = #10
    score-system-spacing.basic-distance = #20
    system-system-spacing.basic-distance = #20
    last-bottom-spacing.basic-distance = #10
}

```

A musical score for a choir of four voices: Soprano, Alto, Tenor, and Bass. The score is in common time (C). The Soprano part (top staff) sings "hi" four times. The Alto part (second staff) sings "ha" four times. The Tenor part (third staff) sings "hu" four times. The Bass part (bottom staff) sings "ho" four times. The music consists of quarter notes.
